SHORE LEAVE: Local Immigration Officers issue shore pass valid for 15 days when Hososhima is first port of call in Japan. Extension possible if ship stays longer.

AUTHORITY: Hososhima Port Administration Office, No. 17371-2 Shinkai, Hichiya, Hyuga City, Miyazaki Pref., Kyushu, Japan. *Tel:* 09825-2-5366. *Cables:* Port Authority Hyuga. *Contact:* Mr. Ogata.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., c/o Hakko Unyu Co. Ltd., 731 Kaigan-dori, Hososhima, Hyuga City, Miyazaki Pref. 889-11. P.O.Box No.883. Tel: (0982) 52-2185. Telex: 776-677 Hakkoi J. Fax: (0982) 53-6755. Cables: Hakko Hyuga.

IHO: 34.45 N. 134.46 E.

NO VESSELS CALLING AT THE PRESENT TIME – FACILITIES NOT IN USE SINCE 1973.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged throu Agent by cable via Nagasaki Radio giving 72 hours notice. Urge correction of ETA outside business hours should be cabled direct to pi station. Inland Sea Pilot Association covers all Inland Sea ports. Pilota compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of pilot stations dependent upon vessel's last port of departure and a Master's discretion. Pilotage available throughout 24 hours and 72 hou advance notice preferred, thereafter advising any alterations. Mo Inland Sea Pilots also act as Harbour Pilots up to berth or anchora at destination.

Note: VHF communication available with Inland Sea Pilot Station Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Strai Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic addre "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transiti Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraph address "Anjin Saganoseki". In event bad weather, recommende vessels proceed for shelter as near as possible, having due regard t safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Positi Lat. 33° 56′ 14″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Closed Port. Agent will arrange anchorage position t discharging, with Authorities, but usual position Iho Signal Statio bearing 215° distant 3,000 m. (Signal Station Lat. 34° 44′ 58″ N., Lon 134° 46′ 12″ E.).

HEALTH: Pratique must be obtained at another port before calling Ih

At first port of call in Japan, vessel must obtain Free Pratiq Quarantine Officers will attend vessel only from daylight to sunset an Master to show all Vaccination Cards, Derat Exemption Certificate. I case vessel arrives from cholera-infected area within 10 days, Mast must advise crew and passengers' health condition to respecti Quarantine Office through ship's Agent prior to arrival and close all so pipes before entering port.

RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which cover all ports in Japan. I specifically Westbound vessel, to contact Choshi, and Northbound t contact Nagasaki Radio respectively.

TUGS: Not required. Discharging at Outer Anchorage.

TANKERS: Port is operated for oil discharging only. Discharge is in barges through 6 in. hoses at either side of vessel.

DENSITY: Average density is between 1025 and 1026 in Winter seaso and between 1018 and 1020 in Summer season.

FRESH WATER: Not available.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Ba Osaka Bay and Kanmon Port. At all other ports bunker will be lightere from the nearest stock ports at maximum 7 days prior notice.

REPAIRS: Not available.

DRY DOCK: Nearest dockyard at Aioi.

AIRPORT: Nearest airport at Osaka.

TIME: GMT plus 9 hours, no alterations.

POLICE/AMBULANCE/FIRE: Police tel. 07944/2-3377; Ambulanc 119 or 2-2101; Fire 119 or 2-2101.

SERVICES: None. Nearest services available at Kobe/Osaka area.

✓ IMABARI (Imahuru): 34.04 N. 133.00 E. (incl. Mategata
(See Plan

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
5 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
3 Voyage "Memo".
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camer wrist-watch, radio, firearms/swords, etc. (only at first port of cal Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Car Manifest and Cargo Manifest in transit using specific forms. Therefo ship's Agent should be provided with necessary information about deta of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged throu Agent giving 72 hours notice. Urgent correction of ETA outside busine hours should be cabled direct to pilot station. Inland Sea Pi Association covers all Inland Sea ports. Pilotage compulsory for vess over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations depend upon vessels last port of departure and at Master's discretion. Pilota available throughout 24 hours and 72 hours advance notice prefer thereafter advising any alterations. Most Inland Sea Pilots also act a Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Station Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Strai Position Lat. 34° 35′ N., Long. 135° 08′ 24″ E. Telegraphic addre "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transit Bungo Channel), Position Lat. 33° 13′ N., Long. 131° 55′ 38″ Telegraphic address "Anjin Saganoseki". In event bad weath recommended vessels proceed for shelter as near as possible hav due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Posi Lat. 33° 57′ N., Long. 131° 03′ E.

MAX. SIZE: See "Berthing".
ANCHORAGE: Anchorage outside breakwater, sufficient water, but on account fast current deemed not safe anchorage. Anchorage inside breakwater generally shallow, and sea area narrow for large vessels.
RESTRICTIONS: No entry after dark.
HEALTH: Vessel should obtain Pratique at Matsuyama or any other Quarantine port. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: 6 tugs available, 1,050 h.p. – 4,000 h.p. Kurashiki Wharf: join vessel at sea anchorage, using tug's line with charge.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. Also see "Max. Size".

Kurashiki Wharf:

Section	*Length* (m.)	*Depth* (m.)	*Max.Draft* (m.)
1	165	9.0	8.10
2	140	7.5	6.75
3	180	5.5	
4	270	5.5	

Toryu Wharf:

Section	*Length* (m.)	*Depth* (m.)	*Max.Draft* (m.)
1	180	5.5	

CRANES: Floating crane available from Kure.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges (0700 hrs. – 0830 hrs., 1630 hrs. – 2130 hrs.) 60% additional of basic stevedorage; 2130 hrs. – 0700 hrs. next morning 120% additional; Sundays/holidays 100% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Temposan Wharf 1015.
FRESH WATER: Fresh water available by barge from Onomichi.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
CONSULS: See "Kobe".
REPAIRS: Only minor repairs.
DRY DOCKS: Imabari Ship Building Co.Ltd.:

No. 1 Shipway	1×16,800 g.r.t.
No. 1 Dry dock	1×53,000 g.r.t.
No. 2 Dry dock	1×80,000 g.r.t.

Hashihama Dockyard Co.Ltd.:

No. 1 Dry dock	2,800 g.r.t.
No. 2 Dry dock	6,200 g.r.t.
No. 3 Dry dock	3,300 g.r.t.
Oshima Works	20,000 g.r.t.

There are also some small dockyards.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register and/or International Tonnage Certificate to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
REPATRIATION: Possible. Immigration Office at Niihama.
AIRPORT: No airport. Nearest airports are Matsuyama and Takamatsu where are All Nippon Airways.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: None.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but 7 days extension possible if ship stays longer.
AUTHORITY: Imabari Port Administration Office, 2 Katahara-cho 1-chome, Imabari City, Ehime, Pref. *Tel:* (0898) 22-4120.

IMARI: 33.18 N. 129.49 E. (See Plan)

(A) IMARI
(B) LPG TANKERS

(A) IMARI

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (ports of call).
4 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Last Port Clearance.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: There are 2 Pilot Stations. One is for Bay Pilot boarding Lat. 33° 26.4′ N., Long. 129° 42.7′ E., and the other is for Harbour Pilot boarding at Quarantine Station at Lat. 33° 20.15′ N., Long. 129° 48.74′ E. (from Uranosaki Light 93° × 1,630 m.). Both pilots available to board any time if the Master requires, through Agent, and pilot not compulsory. Pilot uses tug as pilot boat, so the Master can contact tug by VHF Channel 16 in daytime, except Sundays/holidays.
ANCHORAGE: No restrictions, except dangerous cargo ships and draft. Depth of inner harbour anchorage is about 10 m. – 17 m.
RESTRICTIONS: No restrictions on entry/departure, available day and night.
MAX. SIZE: LOA 248.50 m., beam 43.00 m., d.w.t. 88,309 tons. Minimum under-keel clearance 10% of draft required (See "Berthing").
HEALTH: Formalities will be carried out at anchorage. Quarantine Station is 096° × 1,300 m. (200 m. circle) from Uranosaki Lighthouse in position Lat. 33° 20′ 06″ N., Long. 129° 48′ 32″ E.
RADIO: Recommended Master communicates with Agent through Nagasaki Radio.
VHF: No port radio.
TUGS: 3 tugs available, 2×3,000 h.p. and 1×3,100 h.p. Additional tugs available from Sasebo and Nagasaki.
BERTHING:

Name of Berth	*Length* (m.)	*Max. Draft* (m.)
Buoy No. 1		9.0
Buoy No. 2		9.9
Buoy No. 3		11.7
Kubara North Pier No. 2	130	6.8
No. 3	185	9.0
Kubara South Pier No. 1	270	5.0
No. 2	260	6.8
No. 3	370	9.0

CRANES: Mobile cranes available if required.
BULK CARGO FACILITIES: None.
SPECIAL CARGO HANDLING FACILITIES: See "Section B".
BRIDGES: None.
STEVEDORES: 2 gangs for general cargoes and/or 10 gangs for logs available.
MEDICAL: Notice not necessary, full hospital facilities available.
DENSITY: 1025 salt, generally at all tides.
FRESH WATER: Available 24 hours a day at 50 t.p.h. from shore only. Cost Yen 700/ton.
FUEL: Domestic oil is available. Bonded oil will be brought from Moji, Oita or Tokuyama area with sufficient notice, when required.
FIRE PRECAUTIONS: None, except LPG tankers (See "Section B").
CONSULS: No local representatives.
REPAIRS: The shipyard is capable of carrying out all kinds of fitting-out and repair work.
DRY DOCKS: One dry dock of 460 m. length and 70 m. width (New building only).
SURVEYORS: Available for cargo and class survey (NK, BV, RL, NV, etc.).
GANGWAY/DECK WATCHMEN: Not specifically required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Hatch operation by crew.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid cargo gear certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashore, but no spirits.
REPATRIATION: Facilities exist for repatriation of crew.
AIRPORT: Fukuoka Airport 80 km. from Imari. Served by domestic and overseas airlines.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: January 1st – 3rd; August 15th – 16th.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.
EMERGENCY CO-ORDINATION CENTRE: VHF Channel 16 call "Moji Hoan". Tel: 0955-73-4999. 24 hours service.
TELEPHONES: Not available.
SERVICES: Almost all services available.
BANKS: The Bank of Saga Ltd., Imari Branch Office. Tel: 0955-23-3111. Fax: 0955-22-5908.
STORING: Vessels can store by barge, truck and forklift at any time, except LPG tankers.

SHIP SUPPLIERS: *Provisions:* Sasebo Trading Co.Ltd. Tel: 0956-32-1211. Fax: 0956-33-4868.

Matsuda Shintoh Trading Co.Ltd. Tel: 0956-22-7220. Fax: 0956-22-7225.

SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days when Imari is first port of call in Japan. Extension possible if ship stays longer.

REGULATIONS: Normal port regulations.

DEVELOPMENTS: Dredging inner harbour to 10 m. One grain berth 13 m. depth and 400 m. length is under construction, and will be completed in 1995.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Moji, c/o Nagai Shokai Co.Ltd., 58-2, Shiohama Men, Fukushima Machi, Kita-Matsuura gun, Nagasaki Pref., Japan. Tel: 0955-47-3463. Telex: 7479-33 Nagai J. Fax: 0955-47-2221. Cables: Nagai Fukushima.

(B) LPG TANKERS

LOCATION: Kyushu LPG Fukushima Terminal Co.Ltd. (Lat. 33° 29′ N., Long. 129° 40′ E.).

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (ports of call).
4 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Last Port Clearance.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: There are 2 Pilot Stations. One is for Bay Pilot boarding (Lat. 33° 26.4′ N., Long. 129° 42.7′ E.), and the other is for Harbour Pilot boarding (Lat. 33° 29′ N., Long. 129° 40′ E.). Both pilots available to board any time if the Master requires, through Agent, and pilot is compulsory. Pilot uses tug as pilot boat, so the Master can contact tug by VHF Channel 16 in daytime, except Sundays/holidays. Boat's name is "Mezura Maru".

ANCHORAGE: Same as Pilot Station (Lat. 33° 29′ N., Long. 129° 40′ E.). Depth of inner harbour anchorage is about 10 m. – 17 m.

RESTRICTIONS: Entry is allowed after sunrise to 4 hours before sunset. Also see "Berthing".

MAX. SIZE: Max. draft 14.0 m. Max. d.w.t. 70,000 tons.

HEALTH: No restrictions except Quarantine. If the vessel has a valid Sanitary Certificate, Radio Pratique available. If no valid Sanitary Certificate, normal Quarantine Inspection will be carried out at Terminal Berth after berthing.

RADIO: Recommended Master communicates with Agent through Nagasaki Radio. No radio station so if vessel equipped with telex, send to Agent's Office (Telex: 7479-33 Nagai J).

VHF: When approaching the port, contact pilot boat "Mezura Maru" on Channel 16.

RADAR: No radar at port.

TUGS: 3 tugs available, 3×3,000 h.p. 3 tugs required for berthing, and 2 tugs required for unberthing.

BERTHING: Vessel may berth either side alongside, although Terminal prefer portside alongside. Local regulations prohibit the commencement of discharging after sunset. Normal mooring configuration is 3,3,2, with lines on quick release hooks. Mooring boats in attendance. A shore gangway is provided.

The following restrictions apply to berthing:

1. Max. wind force allowed: Less than 10 m./sec.
2. Max. wave height allowed: Less than 1.0 m.
3. Visibility allowed: Over 1.0 sea miles.
4. Max. docking speed allowed: Less than 10 cm./sec.
5. Max. docking angle allowed: Less than 6°.
6. When coming alongside berth, the ship's manifold to be used shall be clearly marked with "Flag N", so as to be easily distinguished by the Terminal Berthing Master on the jetty.

CARGO HANDLING FACILITIES:

	Propane (L)	*Propane* (V)	*Butane* (L)	*Butane* (V)
Receiving Capacity (cm./hr.)	2,000	2,700	2,000	2,300
Max. Pressure (kg./sq.m.)	10	10	10	10
Allowable Temp. (C)	−45	−45	10	10
Hose Flange Size (in.)	12	10	12	10

Note: Unloading cargo operation of Propane and Butane shall be carried out at the same time.

Shore arms arrangement: If berthing port side to, from bow BV-BL-PL-PV.

BRIDGES: None.

MEDICAL: Notice not necessary, but advisable if treatment required. Full hospital facilities available, also cholera vaccinations.

DENSITY: 1025 salt, generally at all tides.

FRESH WATER: Available from the berth, but minimum of 7 days notice is required for this service. Tank capacity 350 cu.m., supply rate 19 cu.m./hr.

FUEL: Domestic oil is available. Bonded oil will be brought from Moji, Oita or Tokuyama area with sufficient notice, when required. Must be taken at anchorage.

FIRE PRECAUTIONS: In operation.

CONSULS: No local representatives.

REPAIRS: The shipyard is capable of carrying out all kinds of fitting-o and repair work.

DRY DOCKS: One dry dock of 460 m. length and 70 m. width (Ne building only).

SURVEYORS: Available for cargo and class survey (NK, BV, RL, N etc.) from Moji or Nagasaki.

GANGWAY/DECK WATCHMEN: Whilst alongside at the Termi berth, a responsible member of crew shall be stationed at the ship gangway to advise visitors on safety regulations and to check visito and crew members.

CERTIFICATES: Ship's Register to show Customs Inspector ship registered gross and nett tonnages.

CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take asho but no spirits.

REPATRIATION: Facilities exist for repatriation of crew.

AIRPORT: Fukuoka Airport 80 km. from Imari. Served by domestic a overseas airlines.

TIME: GMT plus 9 hours. No alterations made to clocks during year

HOLIDAYS: Unloading cargo operations will be carried out every da

POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.

EMERGENCY CO-ORDINATION CENTRE: VHF Channel 16, call "Mo Hoan". Tel: 0955-73-4321, 24 hours service.

TELEPHONES: Not available.

SERVICES: Most services available.

BANKS: The Bank of Saga Ltd., Imari Branch Office. Tel: 0955-23-311 Fax: 0955-22-5908.

STORING: Stores shall be loaded before unloading from a barge.

SHIP SUPPLIERS: Provisions: Sasebo Trading Co.Ltd. Tel: 0956-3 1211. Fax: 0956-33-4868.

Matsuda Shintoh Trading Co.Ltd. Tel: 0956-22-7220. Fax: 0956-2 7225.

SHORE LEAVE: Local Immigration Offices issue shore passes valid t only 15 days when Imari is first port of call in Japan. Extension possib if ship stays longer.

REGULATIONS: Cargo handling operations shall be stopped and th vessel shall be shifted to safe anchorage under such conditions a follows:

1. When Harbour Master or Maritime Safety Agencies give order.
2. Wind force is forecast to increase to more than 15 m./sec.
3. Wave height is forecast to be more than 1.0 m.
4. Visibility is less than 200 m.
5. Thunderstorm is forecast and approaching.
6. When LPG vapour accumulation is present on the deck.
7. When a fire occurs either on the vessel or in the vicinity.
8. When warning of approaching tidal wave is received.

Smoking shall be prohibited onboard when Chicksan arms are bei connected or disconnected.

Fire wires shall always be lowered to sea level over the off-side bo and quarter to enable tugs to connect up rapidly in an emergency.

Lubricant pressure of stern tube shall be maintained lower than se water pressure.

SHIPMASTER'S REPORT: November 1984.

Location: The terminal is a fairly new facility situated deep within Ima Bay on the N.W. coast of Kyushu – some 12 miles or so North of Saseb It is owned by Kyushu L.P.G. Fukushima Terminal Company Limit and was built in August 1982.

It is used solely for LPG discharge and there is a coastal tanker load berth immediately adjacent.

Approaches: BA. 1527 is the only British chart to cover the area fro the South and is barely adequate. Japanese Charts 166 and 1256 w give a better indication of the geography of the bay and immedia approaches.

On this occasion we arrived from the Arabian Gulf and chose t approach to the East of the Goto Retto, through Aizaki Seto and there North to pass between Azuchi O Shima and Taku Shima, i.e. throu Oshima Seto.

Navigation presents no problem with the high land providing excell radar returns. Because of the strong tidal streams it will be necess to time the passage of Aizaki Seto on the flood; if this cannot be manag then passage through to the East of Eno Shima is recommended.

There are the usual huge concentrations of fishing vessels in the ar and, on arrival, the Pilot advised strongly against attempting anoth passage of Oshima Seto. (We had transited on a Sunday morning a the passage was entirely clear. On departure, however, it was thick w fishing vessels). A passage to the North of Azuchi O Shima is theref recommended.

From Safety Regulations:

(i) Master should proceed carefully in Imari Bay to prevent ground in shallow water (from Aoshima S.E. 1.3 miles, depth 12.4 m 13.8 m., Nohtori Asase depth 15.5 m.).
(ii) Under keel clearance shall be kept to more than 10% of maxim ship's draft.
(iii) Entering bay is prohibited under the following conditions:
  1. Wind force is forecasted to increase to more than 10 m./s
  2. Wave height is forecasted to be more than 1.0 m.
  3. Visibility is forecasted to decrease to less than 1.0 mile
(iv) Boil-off gas blowing is prohibited in Imari Bay.
(v) Master shall be requested to proceed through Imari Bay du period from sunrise to sunset.
(vi) Master will be requested to keep ship's speed less than 8 kn while proceeding in Imari Bay.
(vii) The vessel should keep a good lookout by radar and sight.

Pilotage: Pilot compulsory for LPG tankers over 10,000 gross tons. T pilot boarding position is 33° 29′ N., 129° 40′ E., although this is marked on the BA charts. The Pilot boarded from a tug and requ the pilot ladder 2.0 m. from the water. Boarding daytime only. The ves is then escorted to her berth by 2 or 3 tugs, one of which stations itself over a shoal (12.0 m.) patch within the bay as a marker. There is a 4 knot speed restriction in this area. Pilot guarded Channel 16 and worked Channel 6 VHF.

Length of pilotage about 1.5 hours to quarantine anchorage and thence to berth.

Restrictions: See "Approaches" and "Berthing".

Max. Size: 70,000 d.w.t., max. draft 15.5 m.

Health: If the vessel has a valid Sanitary Certificate the quarantine anchorage may be dispensed with and the vessel will be cleared alongside.

VHF: See "Pilotage".

Tugs: See "Pilotage".

Berthing: Vessels may berth either side alongside although they prefer to berth port side to, presumably to save time on arrival. Local regulations prohibit the connection of cargo lines after sunset.

Normal mooring configuration of 3, 3, 2, with lines on quick release hooks. Mooring boats in attendance.

A shore gangway is provided, length 15 m., extension ability 5 m. – 9 m., can operate to 33° above horizontal and to 17° below horizontal.

The following restrictions apply to berthing:

1. Max. wind force allowed: less than 10 m./sec.
2. Max. wave height allowed: less than 1.0 m.
3. Visibility allowed: over 1.0 sea mile.
4. Max. docking speed allowed: less than 10 cm./sec.
5. Max. docking angle allowed: less than 6°.

From Safety Regulations:

1. Should be port side alongside in principle.
2. Should use tugboat for berthing and unberthing.
3. Should keep berthing speed less than 10 cm./sec., berthing angle less than 6°.
4. Should use line boat for berthing.
5. When coming alongside berth, the ship's manifold to be used shall be clearly marked with "Flag N" so as to be easily distinguished by the Terminal Berth Master on the jetty.
6. Should be careful not to damage the berth facilities.

Discharging: Normal cargo survey procedure. However, the shore carry out their own determination of cargo S.G. and will use this figure for their own calculations.

Normal Japanese Safety Inspections and procedures. There is supposed to be a 4 hourly safety check throughout discharge.

The discharge presented no problems with a rate of 1,200 t.p.h. being achieved with 4 pumps.

A back pressure of 3.0 bar was stipulated but we worked constantly at about 3.2 bar without any complaint, tonnage rate apparently being their main consideration at the time.

Chiksans are purged with Nitrogen on completion.

Cargo Operation Specifications:

	Propane (Liq.)	*Propane (Vap.)*	*Butane (Liq.)*	*Butane (Vap.)*
Receiving capacity (cu.m./hr.)	2,000	2,700	2,000	2,300
Allowable max. pressure kg./sq.m.	10	10	10	10
Allowable temperature (°C)	−45	−45	−10	−10
Hose flange size from shoreside (inches)	12	10	12	10
		All 150 ASA		

Remarks: Unloading cargo operation of Propane and Butane shall be carried out at the same time.

Chicksan Arm Arrangements: From left to right looking shoreward: Propane vapour, Propane liquid, Butane liquid and Butane vapour.

This being the usual Japanese configuration of V.L.L.V. with dedicated lines.

Shore Vapour Blower Capacity:

Propane:	Max. pressure 2,400 mm. Aq. Max. quantity 5 t.p.h.
Butane:	Max. pressure 2,400 mm. Aq. Max. quantity 5.8 t.p.h.

Shore Tank details:

for Propane:	Tank capacity 40,000 tons×2 Tank pressure 0.15 kg./sq.cm. Tank temperature −45°C
for Butane:	Tank capacity 40,000 tons×2 Tank pressure 0.15 kg./sq.cm. Tank temperature −10°C

Nitrogen Supply:

Tank capacity:	27 cu.m. (in liquid)
Supply rate:	3,000 cu.m./hr.
Flange size:	1.0 in.
Flare capacity:	3,500 cu.m./hr.×1

Communications: Communication is by means of a telephone placed on board in the CCR. Level of English rather poor and an Agent is invariably in attendance to assist.

Ship's Tel. No.: 380.

Shore Cargo Control Room Tel. Nos.: 350, 351, 352.

Fresh Water: Available from the berth but a minimum of 7 days' notice was quoted for this service.

Tank capacity 350 cu.m, supply rate 17.5 cu.m./hr., Hose flange size 2.5 in.

Water may also be taken by barge (prohibited during cargo operations).

Fuel: Available by barge and must be taken at anchor.

Repairs: The main engines and other equipment for ship's manoeuvring shall be in an operable condition and in a state of immediate readiness while alongside the berth.

There are a number of contractors available for minor repairs, with the usual restrictions on hot work and the movement of large metal objects. There is a large shipyard within the area which could presumably handle emergency repairs.

Surveyors: Nearest Lloyd's Surveyors are at Nagasaki and Moji.

Gangway/Deck Watchmen: Whilst alongside at the terminal berth, responsible member of crew shall be stationed at the ship's gangway to advise visitors of safety regulations and to check visitors and crew members.

Storing: Stores may be loaded from the quay but not whilst working cargo.

Shore Leave: Ship's crew and visitors shall take the route through the terminal shown on the map in the terminal information booklet.

Ship's crew should carry Landing Permit which is issued by Japanese Immigration Officer.

No smoking shall be allowed in the terminal.

When taking photographs of the terminal, permission should be obtained from the Terminal Representative.

Regulations: Following are extracts from the Terminal Safety Regulations.

Cargo handling operation shall be stopped and the vessel shall be shifted to a safe anchorage under such conditions as follows:

1. When Harbour Master or Maritime Safety Agencies order ship's Master to shift vessel.
2. Wind force is forecasted to increase to more than 15 m./sec.
3. Wave height is forecasted to be more than 1.0 m.
4. Visibility is poor (less than 200 m.).
5. Thunderstorm is forecasted to be approaching.
6. When LPG vapour accumulation is present on the deck.
7. When a fire occurs either on the vessel or in the vicinity.
8. When warning of approaching tidal wave is received.

Smoking shall be prohibited onboard when Chicksan arms are being connected or disconnected.

Fire wires shall always be lowered to sea level over the off-side bow and quarter to enable tugs to connect up rapidly in an emergency.

Lubricant pressure of stern tube shall be maintained lower than sea water pressure.

AUTHORITY: Japan Maritime Safety Agencies, Imari Branch Office, 2976-31, Kubara, Yamashiro cho, Imari City, Saga Pref., Japan. *Tel:* (0955) 28-3388.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Moji, c/o Nagai Shokai Co.Ltd., 58-2, Shiohama Men, Fukushima Machi, Kita-Matsuura gun, Nagasaki Pref., Japan. Tel: 0955-47-3463. Telex: 7479-33 Nagai J. Fax: 0955-47-2221. Cables: Nagai Fukushima.

INNOSHIMA: 34.17 N. 133.11 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 copy Voyage Memo (last 3 months).
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

Kanmon Pilot boards at Mutsure (Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E.) for passing Shimonoseki Strait to Hesaki where Pilot will be changed to Inland Sea Pilot.

Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: No. 1, 14 m. deep, 1.4 miles off Hyakkan Island 180°. No. 2, 9 m. deep, 1.5 miles off Hyakkan Island 290°.

RESTRICTIONS: In general, mooring/unmooring and/or dry-docking in-and-out carried out in daytime only.

MAX. SIZE:

	Length	*Breadth*	*Draft*
(1) For mooring only	320 m.	× 50 m.	× 7 m.

(2) Max. draft for entering port: 9 m.
(3) Max. draft for mooring: 5 m. – 7 m. according to quay.

Current is N.E. at high tide, and S.W. at low tide at max. 2.5 knots.

HEALTH: In event vessel proceeding Innoshima direct from foreign port, vessel to receive Pratique at Quarantine Anchorage Kobe or Hososhima (Lat. 32° 25′ 50″ N., Long. 131° 41′ 53″ E.) or Matsuyama (Lat. 33° 51′ 00″ N., Long. 132° 41′ 00″ E.) or Mutsure (Lat. 33° 59′ N., Long. 130° 53′ E.).

At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 6 tugs available, 320 h.p. – 3,500 h.p. Ship taken into port by Dock Master who joins ship at anchorage with tug-boat. Usually tug's lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

(See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of call).
Last Port Clearance.
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. Pilots available at Quarantine Anchorage, when required. Inland Sea Pilot not compulsory from Sekisaki to Iwakuni.

Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Cable address "Ansin Moji". Inland Sea Pilot Association covers all Inland Sea ports.

Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Cable address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGES: 7 anchorages, one for "Quarantine" and repairing, etc., others for discharging logs.

(a) Quarantine, Lat. 34° 11′ 12″ N., Long. 132° 14′ 21″ E. minimum depth 27 m.

(b) Discharging area as follows:

Vessel under 5,000 g.r.t. depth 23 m.		Vessel over 5,000 g.r.t. depth 24 m.	
No.1	34° 11′ 26″ N., 132° 16′ 00″ E.	No.A	34° 10′ 34″ N., 132° 15′ 54″ E.
No.2	34° 11′ 10″ N., 132° 16′ 10″ E.	No.B	34° 10′ 07″ N., 132° 16′ 06″ E.
No.3	34° 10′ 48″ N., 132° 16′ 18″ E.	No.C	34° 09′ 42″ N., 132° 16′ 45″ E.

Nature of bottom mud. Minimum bottom width no limit.

RESTRICTIONS: Day and night entry possible.

HEALTH: Radio Pratique available. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at Quarantine area. Tug's lines to be used free of charge. 3 tugs available, 1×3,000 h.p., 1×3,200 h.p. and 1×3,400 h.p.

BERTHING: No berthing from sunset to sunrise. At least 2 hours notice of arrival necessary to reach berth, in event of direct arrival from foreign country.

Green Shipping Ltd., Moji, 9-7, Minato Machi, Moji Ward, Kitakyu City, Fukuoka Pref., 801 Japan. Tel: 093-321-4261. Telex: 715 Greenm J. Fax: 093-321-4288. Cables: Greenship Moji.

KAGOSHIMA: 31.35 N. 130.33 E. (See Plan)

DESCRIPTION: Port situated in Kagoshima Bay, the Southern part of Kyushu and consists of 8 sections as follows:

Old Harbour (Honko): Divided into Inner Harbour sheltered by breakwaters which can accommodate up to 3,000 tonners, and Outer Harbour, (open roads) where large size vessels lie at anchor.

New Harbour: Adjacent to Main Harbour on the South. This section also sheltered by breakwaters and a 10,000 tonner can be accommodated.

Kamoike Harbour: Located about 7 km. away from old harbour on South side. There is a ferry terminal to Osumi Peninsula.

South Harbour: Located about 7 km. away from old harbour on South side and used for small coasters.

Lumber Harbour: Located about 11 km. away from old harbour on South side and used for log carriers, a 15,000 tonner can be accommodated.

Taniyama District No. 1: Located about 14 km. away from old harbour on South side. Facilities include warehouses for feed storage and docking area for international passenger ships. A 65,000 tonner can be accommodated.

Taniyama District No. 2: Located about 16 km. away from old harbour on South side, and used for oil storage. A 10,000 tonner can be accommodated.

Hamahirakawa Harbour: Located about 21 km. away from old harbour on South side. Also has a yacht harbour.

DOCUMENTS:

Customs: When vessel arrives direct from foreign port, Customs Officials board for search. Following documents to be submitted:

Crew List.
Passenger List.
Manifest of crew personal effects (must be signed by individual crew member).
Stores List.
Arms and Ammunition List.
Narcotics List.
List of ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.

Following will be checked on board: Ship's Registry; Last Port Clearance.

When vessel comes from Japanese port, Customs Officials will not attend on board, except in special case. Master or Agents to attend Custom House for entry formalities with following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.
Ship's Registry.
Last Port Clearance.

Documents entrusted with the Master by Customs at previous port.

On vessel's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Immigration: Immigration Officials attend from Kagoshima Immigration Office. They board vessel on arrival at berth to examine Passports, Discharge Books and/or other equivalent travel documents, and provide 15 day landing passes for crew members. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting Immigration business on vessel's arrival.

When vessel stays in port more than 7 days and calling at one port only, or 15 days and calling at several ports in Japan, the Landing Passes will be extended every 7 days or 15 days on application. In event that crew members without entry visas are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men, has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days.

PILOTAGE: Not compulsory for Quarantine Anchorage or Taniyama Wharves. Agent gives 24 hours notice to Kagoshima Pilot Association and advises if ETA changes.

ANCHORAGE: Quarantine Anchorage: Lat. 31° 33′ N., Long. 130° 35.5′ E., depth of water 20 m. – 30 m. Anchorage is used for vessel's Quarantine procedure, if the vessel comes from foreign port, and by vessels waiting for orders.

Off Taniyama: Lat. 31° 30.5′ N., Long. 130° 34′ E., depth of water 20 m. – 30 m. Anchorage is used by vessels waiting for a pilot, and also vessels which are not granted Radio Pratique.

RESTRICTIONS: Berthing and unberthing during daylight hours only. If weather is good, unberthing is possible up to 2100 hrs.

HEALTH: Radio Pratique message will be accepted if vessel has a valid Japanese Sanitary Certificate.

If vessel is not in possession of a certificate, Pratique formalities will take place at the Quarantine Anchorage.

Radio Pratique message must be sent to vessel's Agent within 36 hours before arrival. When Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to obtain Radio Pratique:

(i) A vessel that has been in contact with an infected area, or a suspected infected area, within 15 days prior to arrival.
(ii) If a vessel has on board any case, or any suspected case, of infectious disease, within 15 days of arrival.
(iii) If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended that Master contacts Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If Westbound via Chosi and Northbound to Nagasaki respectively.

TUGS:

"Wakashio Maru No. 2"	Twin diesel vessel 3,200 h.p.
"Kiire Maru No.8"	Twin diesel vessel 3,200 h.p.
"Eiko Maru"	Twin diesel vessel 3,200 h.p.
"Sinko Maru"	Twin diesel vessel 3,000 h.p.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Max.Draft* (m.)	*Remarks*

Taniyama 2-ku				
Wharf No. 7	260	7.5	7.00	Public Wharf

STEVEDORES: Working hours are 0830 hrs. – 1630 hrs. Overtime working is normally only for finishing cargo. No work on Sundays or holidays.

Discharge rates:

Bagged cargo (meal products) – 300 tonnes per gang/day.
Bulk cargo (meal products) – 700 tonnes per gang/day.
Bulk cargo (corn/sorghum at Grain Silo Dolphin) – 4,000 tonnes per gang/day.
Logs – 5,000 cu.m. per gang/day.

MEDICAL: Chuo Hospital, Municipal Hospital, Yotsumoto Dental Plant, Igo Oculist. No advance notice required unless urgent.

TANKERS: No tanker berths at Kagoshima, but Central Terminal Station (C.T.S.) in Kagoshima Bay. See "Kiire".

FRESH WATER: One 200 ton water barge available with advance notice. Hydrants at wharves in main harbour. Rate of delivery: 50 t.p.h. from hydrants at Taniyama Districts No. 1 and 2; 20 – 30 t.p.h. from hydrants at Old Harbour and New Harbour.

FUEL: Not available. Lightered from another port. Ample notice so that necessary lighterage can be arranged.

REPAIRS: Hull/engine repairs are available at Kagoshima Dockyard and Iron Works and Kikukawa Iron Works.

GANGWAY/DECK WATCHMEN: Not specifically required unless passengers or valuable cargo on board.

English speaking watchmen are available but advance notice is required.

OPENING/CLOSING HATCHES: Crew open/close hatches.

CERTIFICATES: Ship's Register to show Customs Inspector registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears poor.

CUSTOMS ALLOWANCES: 400 cigarettes and 3 bottles of spirits to take ashore.

REPATRIATION: Possible.

AIRPORT: Kagoshima International Airport. Located to the North, 50 minutes' drive from centre of Kagoshima City. Flights available to Fukuoka, Osaka, Tokyo, Okinawa, Hong Kong and Seoul.

TIME: GMT plus 9 hours. No alterations to clocks during year.

HOLIDAYS: See "Tokyo".

WIND/TIDE: N.W. wind prevails in Winter season and Easterly wind in Summer. Wet seasons in June and July. Average tidal range 2.74 m. In the outer harbour. Flood tide sets to North and ebb to South. Maximum speed of current 2 – 3 knots. Current in inner harbour is less than 1.0 knots.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 day extension possible if vessel stays longer. Also see "Regulations".

GARBAGE DISPOSAL: Garbage collection is not permitted for foreign vessels at this port.

WASTE OIL DISPOSAL: Three companies operate this service for domestic vessels. Because it is necessary for them to be authorised by the Ministry of Transport, this service is not available for foreign vessels. Further enquiries could be made at Nagasaki or Kitakyushu Port.

SEAMAN'S CLUBS: None. However, there is an inn called the Kagoshima Port and Harbour Labor Welfare Center (Kagoshima Kowan Loudo Fukushi Center in Japanese) for seafarers, which provides accommodation and meals only. Meals are provided at extra cost. The overnight charge at Yen 1550 is reasonable. Address: 22-1 Jyonan-cho, Kagoshima City. Tel: (0992) 26-0626.

CURRENCY: Yen. U.S.$ 1.00 = Yen 125.63.
U.K.£ 1.00 = Yen 231.9.
German Mark 1.00 = Yen 80.23.
French Franc 1.00 = Yen 23.63 (23.6.92).

There is no local currency restrictions placed upon seafarers.

REGULATIONS: Immigration Officials board vessel on arrival to examine Passports, Discharge Books and/or other equivalent travel documents and provide 72 hour landing passes for crew members and passengers. 1 copy each of crew list and passenger list required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes may be extended 72 hours on application. In the event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days.

SERVICES: Cargo Survey. Provisions and Stores. Fumigation – Toyo Fumigation attend from Moji on request.

AUTHORITY: Kagoshima Port and Harbour Office, 18-16 Izumi-Cho, Kagoshima City, 892 Japan. *Tel:* (0992) 23-3277. *FAX:* (0992) 24-2832. *Contact:* Tadao Sarukawa, Director.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Moji, 9-7 Minato Machi, Moji Ward, Kitakyushu City, Fukuoka Pref., 801 Japan. Tel: 093-321-4161. Telex: 7153-11 Greenm J. Fax: 093-321-4288. Cables: Greenship Moji.

KAKOGAWA (Including Higashi-Harima):
34.42 N. 134.50 E. (See Plan)

Port is for sole use of the Kobe Steel Co. Ltd. Declared open port as of 1st May 1970, but vessels should first call off Kobe to obtain Free Pratique, Customs clearance and Pilot.

Also see "Shipmaster's Report" dated June 1985.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
1 List of Ports of Call, for Customs.

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Also see "Shipmaster's Report" dated June 1985.

PILOTAGE: Pilot will board at Tomogashima Pilot Station (Lat. 34° 10′ N., Long. 135° 00′ E.) due to compulsory pilotage. Pilot will be arranged by Agent subject advance request and usual ETA advices.

Also see "Shipmaster's Report" dated June 1985.

ANCHORAGES: There are 6 anchorages off Kakogawa. However anchorage is treated as Non-Open port, so nobody can visit the vessel, and nobody can come ashore from vessel during her stay at anchorage, except in an emergency.

RESTRICTIONS: Mooring/unmooring conducted daylight hours only.

MAX. SIZE: Kobe Steel, Berth No. 4: 165,000 d.w.t. (or 320,000 d.w.t., LOA 330 m. with part load).

HEALTH: Vessel must call off Kobe for Free Pratique. At first port call in Japan, vessel must obtain Free Pratique. Radio Free Pratique available if vessel has valid Japanese Sanitary Inspection Certificate and Derat Exemption Certificate. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Chosi, and Northbound to contact Nagasaki Radio respectively.

BERTHING:

	Length	*Depth*	*Max. Size*
Pier W-5	240 m.	11.90 m.	35,000 d.w.t.
Pier W-6	275 m.	11.90 m.	35,000 d.w.t.
LPG Dolphin	77 m.	16.00 m.	70,000 d.w.t.
Scrap Pier	250 m.	11.10 m.	25,000 d.w.t.
South Pier	450 m.	6.80 m.	—

Depth at low water is 17 m. in the fairway which is 400 m. wide.

Kobe Steel:

Berth	*Length* (m.)	*Depth* (m.)	*Max.LOA* (m.)	*Max.Draft* (m.)
E-5 *	450	17.0	330	16.0
E-4	400	17.0	330	16.0
E-3	300	14.5	239	14.5
E-2	200	14.0	190	12.5

* Lay-by berth, not available for discharging cargo.

Products Handled Coal and ore.

Cranes: 4 × 1,500 t.p.h. at E.4; 1×700 t.p.h. at E.3; 2×35 ton at West Wharf (No. 5) and 2×35 ton at West Wharf (No. 6).

MEDICAL: Treatment has to be arranged at Kakogawa.

FRESH WATER: Available from quay. Rate 30 – 40 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Bunkers supplied by barge at berth under the following conditions:
(a) Supply limited to 80% of tank capacity.
(b) Supply only during following times:
  (i) May – August, 0900 hrs. – 1600 hrs.
  (ii) September – April, 0900 hrs. – 1400 hrs.
(c) Two surveyors must be present during bunkering.

REPAIRS: Arranged from Kobe.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening a closing hatches. If any time lost by ship's crew doing this wo stevedores charge ship for waiting. Recommend request stevedores t this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector shi registered gross and nett tonnages. Valid Cargo Gear Certifica sometimes required by stevedores when cargo gear's maintenan appears to be poor. Ship's Register and International Tonna Certificate must be shown to stevedores.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashor but no spirits.

REPATRIATION: Possible, through Kobe. Nearest airport is Osaka.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

SHORE LEAVE: Local Immigration Offices issue shore pass valid f only 7 days, but 7 days extension possible if ship stays longer.

SHIPMASTER'S REPORT: When the vessel anchors off Kobe in th Roads, "Kobe Harbour Control" will call on VHF Channel 16 and a for anchoring time and position from Kobe Headlight.

The maximum draft at Higashi Harima is 16.0 m.

Vessels always berth port side alongside. The gangway should b lowered as soon as possible to let the officials aboard.

The vessel loaded 112,000 metric tons in 60 hours, previously th same amount had been loaded a little quicker.

Bilge water, oil or garbage should never be thrown overboard becau owners have to pay compensation to the Fishermen's Union.

Berthing takes place 2 hours before high water.

SHIPMASTER'S REPORT: June 1985.

Pilotage/Sanitary Inspection: If vessel in possession of valid Japanes Sanitary Inspection Certificate and has been granted Radio Fre Pratique, the Inland Sea Pilot boards 5 miles S.S.W. of Kobe Lt. Th Pilot berths the vessel at Kakogawa.

Customs clearance and other formalities, in this event are carried o after berthing at Kakogawa.

Pollution: Penalties and mandatory compensation are particularly seve for any form of pollution. A floating save-all barrier is placed around th ship. This would appear to be as much for identifying offenders, as th preventing the spread of pollution.

When discharging coal, petroleum-coke or ore at the West Wha (Kobe Steel Co.), scuppers must be efficiently plugged to preve overside pollution in the event of rain or ballasting overflows. On selected scupper outlet is connected to a shore drainage hose.

Shore Leave: At West Wharf and LPG Jetty, ship's personnel are n permitted to traverse the wharf or any other roadway or part of th steelworks on foot.

Kobe Steel Ltd., Kakogawa Works, does not provide any form o transport inside the complex, so a taxi schedule must be arrange through the Agent, between ship and Kakogawa (JNR) railway statio Frequent trains to Kobe – about 35 minutes. Kakogawa, itself ha reasonable shopping facilities in the vicinity of the railway station.

SHIPMASTER'S REPORT: May 1991.

Vessels arriving on maximum draft of 16.00 m. usually berth at No. E and then lighten to 13.5 m. before shifting to No. E3. The sho personnel say that 13.5 m. draft is ideal, but vessels may be 14.0 m. maximum 14.5 m. for shifting. The cost of this shift is borne by Kob Steel. Normally 3 tugs and 1 pilot are used, 1 tug each end at break forecastle and starboard quarter, and 1 tug amidships just pushing.

Usually 2 pilots are used for berthing at this port. From anchorag 4 tugs (1 each bow and 1 each quarter) are made fast before anch is hove up. When inside the breakwater, the port side tugs let go a put up lines on the starboard side. A boom is put around the ship. Th 2 pilots are a regulation, but only one pilot undertakes pilotage duti "N" flag on the jetty indicates where the bridge front should be. F positioning the ship, for the last few metres the tugs are used and m the engines.

Crew signing off must be cleared through Immigration before th vessel departs from Japan. This is especially important during th "Golden Week", when the Immigration Office is closed on several da

Kakogawa is a good place for shopping, especially around Kakoga Central Station. Shop prices vary considerably, and it pays to lo around.

We arrived in Japan just at the start of the "Golden Weekend". I not sure if it is Golden Week or Golden Weekend. I received conflicti reports locally. It does apparently mean about 10 days of holidays f the local non-essential workers. The Emperor's birthday refers to th last Emperor. (I believe the new Emperor's birthday is 27th Decemb It seems every day is a holiday from 27th April to 6th May, except t the 2nd and 3rd of May, which were ordinary working days.

On the official holidays, telephone calls to the U.K. are 20% cheap about U.S.$ 2.00 per minute.

KAMAISHI: 39.16 N. 141.55 E. (See Plan)

DOCUMENTS:

Ship's Register. Last Port Clearance. 6 Crew Lists including Passport Numbers. 4 Passenger Lists. 1 Stores List and 2 Lists of Ports of Call.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot not compulsory, but arrangeable at Master's request. Pilot arranged by Agent and vessel required to radio Agent ETA 24 hours before ship's arrival. Pilot boat has no facility to communicate, nor particular light or sound signals, but flies Pilot flag "H". Pilot boards at Lat. 39° 16′ N., Long. 141° 59′ E. About 1 mile N.N.E. of Osaki Point. No alternative area in event bad weather.

ANCHORAGE: Up to 4×30,000 d.w.t. vessels can safely anchor. Max. size at anchorage 120,000 d.w.t. Depth of water: 31 m. – 43 m. at Quarantine Anchorage.

RESTRICTIONS: Vessel free in and out anytime.

MAX. SIZE: Draft 14 m. and LOA 300 m. (915 ft.) Breadth no restriction.

HEALTH: *Quarantine Anchorage:* Located in Western semi-circle of 500 m. radius with centre at Lat. 39° 15′ N., Long. 141° 55′ E. This area is also used for urgent anchorage.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Chosi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs (2) join vessel at anchorage and tugs' lines used free of charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth		Length (m.)	Depth (m.)	Permissible Draft (m.)	Capacity (d.w.t)	Shore Cranes

North Pier						

NSC Nos. 1 & 2 not suitable for the vessel more than 5,000 g.r.t.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Winter 1026-1027. Summer 1023-1024.

FRESH WATER: Available from wharf by hose. Rate of delivery: about 10 t.p.h. – 15 t.p.h. No water barge.

FUEL: Domestic diesel oil (Bunker A) is available. Bonded oil will be brought from Sendai, Yokohama and Kashima with sufficient advance notice.

CONSULS: None.

REPAIRS: Minor repairs such as welding, piping, lathing works, etc. only.

DRY DOCKS: None.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

REPATRIATION: Possible.

AIRPORT: Hanamaki, distance 100 km. (2 hours by car). Toa Domestic Airlines (TDA); 3 flights between Hanamaki/Tokyo everyday, 2 flights between Hanamaki/Osaka everyday and 1 flight between Hanamaki/Sapparo every day.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 2-4536 (Headquarters) and 2-3828 (Water Police Station); Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: Surveyor, tally, hold cleaning, tank cleaning.

GENERAL: Discharging ex-gearless vessel not possible at anchorage.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY : Port and Harbour Dept, Iwate Prefecture Government, 10-1 Uchimaru, Morioka City, Iwate Pref., 020 Japan. *Tel:* (0196) 51-3111. *Contact:* Masanao Takeda, Director, Port & Harbour Department.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Tobutsu Marine Co. Ltd., 3F Tobutsu Bldg., 4-10, Minato-Machi, 2-chome, Kamaishi City, Iwate Pref. 026, Japan. Tel: (0193) 22-2677. Telex: 8355-50 Marine J. Fax: (0193) 22-2679. Cables: Tobutsumarine Kamaishi.

KANAZAWA: 36.37 N. 136.35 E. (See Plan)

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
5 copies Crew List.
5 copies Passenger List (if passengers onboard).
1 copy Stores List.
1 copy Declaration of Crew's Baggage (only at first port of call in Japan).
Voyage Memo (last 3 months).
Crew Member's Passports/Seaman's Books (only at first port of call).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest and Manifest in Transit, using specific forms, therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Inward/Outward Declaration and Application of Crew Members Landing Permits will be prepared by Ship's Agent.

PILOTAGE: Pilotage should preferably be arranged through Agent by telegram, telex or telephone, 36 hours prior to vessel's arrival.

Pilot requests amendment to ETA at least 4 hours prior to vessel's arrival, but only during the daytime.

Pilot boarding position: 36° 37′ 51″ N., 136° 35′ 10″ E. (near Quarantine Anchorage).

In case of bad weather, and pilot cannot board at boarding position, which is located outside of breakwater, pilot will give advice to Master. Vessel will proceed to inner breakwater or change the boarding position, etc. Vessel will be advised by VHF radio.

ANCHORAGES: See "Pilotage".

RESTRICTIONS: Anchoring at Inner Harbour (breakwater) is prohibited. But in emergency cases, vessel should contact Maritime Safety Agency.

Passage inward or outward to/or from Inner Harbour at night time is not advisable.

MAX. SIZE: Max. LOA: No special requirements, but refer to Port Office when necessary.

Max. draft: 10% U.K.C. required when berthing at pier.

For Oil (Sekiyu) Pier: Draft must be under 6.20 m.

HEALTH: Radio Pratique is available. Master must submit following documents to Quarantine Officer after entering the port (through ship's Agent):

Maritime Declaration of Health, Derat Certificate, Sanitary Inspection Certificate, Crew List, Inward Declaration by Ship's Agent.

At first port of call in Japan, if Radio Pratique is not available, Quarantine Officers attend vessel, only from daylight to sunset, and Master to show all Vaccination Lists/Cards and Derat Exemption Certificate.

In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passenger's health condition to the Quarantine Officer.

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan.

VHF: No Port Radio Station at Kanazawa. In emergency cases, vessel should contact "Fushiki Hoam" (Maritime Safety Agency) on VHF Channel 16, but communication is limited to Port Regulation matters. However, pilot can talk to you from pilot boat or from the pier (by pilot owned VHF-radio). When approaching or when within radio range or whilst at the anchorage, vessel should maintain listening watch on VHF Channel 16.

TUGS: 1 tug of 2,700 h.p. is available ("Inuwashi Maru", owned by Prefectural Government). Usually tug's line is used for berthing and unberthing. Additional tugs are not available.

BERTHING:

Name of Berth	Length (m.)	Depth (m.)	Permissible Draft (m.)	LOA (m.)	Capacity (d.w.t.)
Sekiyu Pier	600	7.0	6.2	600	6× 5,000 (Tanker)
Muryoji Tottei	270	5.5	5.0	80	3× 2,000
Muryoji Pier	390	7.5	7.5	390	3× 5,000
Tomizu Pier	370	9.0	8.3	370	2×15,000
Gokuden Pier	370	9.7	8.7	370	2×15,000
Gorojima Pier	220	9.0	8.3	240	1×10,000

Usually load/discharge is done by ship's own gear.

CRANES:

Type of Crane	Owner	Working Load	Number
Tower Crane	Kanazawa Koun Co.	20 tons	1
Truck Crane	Kanazawa Koun Co.	50 tons	1
Truck Crane	Ishikawa Prefecture	50 tons	1
Truck Crane	Kanazawa Koun Co.	80 tons	1
Truck Crane	Ishikawa Prefecture	200 tons	1

BULK CARGO FACILITIES: No facilities available.

SPECIALISED CARGO HANDLING FACILITIES: Facilities for handling L.P.G. at Sekiyu Oil Pier No. 5 and 6.

BRIDGES: None.

STEVEDORES: Stevedores available in daytime on weekdays, except on national/local and stevedores' holidays.

At least 24 hours prior notice, excluding Sundays and holidays required in order for Agent to arrange stevedores.

MEDICAL: No advance notice required, except on Sundays, holidays and in an emergency.

TANKERS: See "Berthing".

3 oil fences are available at both ends and centre of the Sekiyu Pier.

DENSITY: Average 1022. The density is not affected by tide.

FRESH WATER: Available from pipeline on piers. Cost: Yen 340/ton.

FUEL: No bunker supply facilities.

FIRE PRECAUTIONS: Night time working is prohibited. Cars and trucks require permission from Fire Department to enter.

CONSULS: None.

REPAIRS: Only minor repairs possible.

DRY DOCKS: None.

SURVEYORS: None locally, can be arranged from Tokyo, Yokohama and Kobe area.
GANGWAY/DECK WATCHMEN: Not specially required.
HATCHES: Stevedores will open and close hatches if requested, but normally undertaken by crew.
CUSTOMS ALLOWANCES: Under Customs law, 200 cigarettes and 1 bottle of whisky for each crew member a week to be held out of bond.
REPATRIATION: Possible.
AIRPORT: Distance from Kanazawa Port to Komatsu Airport is about 50 km. Regular domestic flights: Komatsu – Tokyo: 6 flights a day. Komatsu – Fukuoka: 2 flights a day. Komatsu – Sapporo: 1 flight a day. Komatsu – Sendai: 1 flight a day (suspended during Winter). Komatsu – Okinawa: 1 flight a day.

International flights: Komatsu – Seoul (Republic of Korea): 2 flights a week (Tuesday and Friday). Seoul – Komatsu: 2 flights a week (Monday and Thursday).

TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: Sundays, national holidays, local holidays, New Year's Holidays. Other provisional holidays arranged by stevedores.
POLICE/AMBULANCE/FIRE: Police Tel: 110. Ambulance/Fire Tel: 119.
TELEPHONES: No arrangements for placing telephones on board.
SERVICES: Radar repairs possible, but depends on manufacturer.
BANKS: Hokkoku Bank (Toiya/machi Branch), 66, Toiya-machi, 2-chome. Tel: 37-6404.
STORING: See "Prelims".

1. (1) Vessel will be stored by truck.
2. (2) Consultation needed with stevedores, in case of dangerous cargo stored on the pier or fumigation of logs going on at the pier. Trucks will be regulated by law (Harbour Master and Plant Quarantine Laws, etc.).
3. (3) Trucks can proceed alongside the berth, but only when stevedores are not working onboard or at the pier (after working hours, lunch time, stevedore's holiday, etc.).
4. (4) Forklift trucks not used on the jetty for storing.
5. (5) Must receive Customs permission before storing (Declaration of Loading of Ship's Stores).
6. (6) No local riggers available.

SHORE LEAVE: Local Immigration Officers issue shore passes valid for 15 days.
EMERGENCY CO-ORDINATION CENTRE:
Sea accident (Maritime Safety Office): 67-4999.
Port Fire Department: 38-1300.
GENERAL: Kanazawa Port is an artificial river port, designed at the mouth of the Ono River. Since outside of the breakwater is open sea, Master is requested to pay attention to safety while at the outside anchorage, particularly during Winter season. Also, requested to be very careful about fishing nets and fishing boats.

During and after the rain, a large quantity of river water flows into the port, and current near the pier becomes fast, about 1.5 knots, so Master must take it into account.

Official: Kanazawa Branch Customs: Tel. 67-4490.
Detached Office of Niigata Quarantine Station: Tel. 68-0062.
Plant Protection Station: Tel. 68-0001.
Kanazawa Maritime Safety Office: Tel. 68-0329.

Kanazawa West-Police Office, 1-1-1, Kanaiwa-machi, Kanazawa. Tel. 67-1241.
AUTHORITY: Kanazawa Port, Government Office Building, 13, 4-chome, Minato, Kanazawa.
AGENT: Sub-agents of Aall Barwil Agencies K.K.
Kanazawa Koun Co.Ltd., 11, Minato 4-chome, Kanazawa City, Ishikawa Pref. 920-02, Japan. Tel: (0762) 68-1811. Telex: 5122-429 Kkkoun J. Fax: (0762) 68-1816. Cables: Koun Kanazawa.

KANDA: 33.47 N. 131.00 E. (See Plan)

LOCATION: Kanda Port is located in the Southern part of Moji Port. N.E. side of this port is sheltered by the Suo-Nada open sea. Located at the port are Nissan Motor Vehicle's motor pool and export wharf, and some cement maker's wharves. Imported coal in bulk and export cement in bulk also handled.
DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:
Ship's Register.
International Tonnage Certificate.
Voyage Memo (ports of call)
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilotage in/out not compulsory. Cable address of pi station "Anjin Moji". 48 hours and 24 hours advance notice of ET required, and any change in ETA. Pilot boards off Kanda Anchora (Lat. 33° 48′ 03″ N., Long. 131° 03′ 02″ E.). Inland Sea Pilots a available from Sekisaki, Hesaki or Mutsure, if required.
ANCHORAGE: Kanda Anchorage (see "Pilotage").
RESTRICTIONS: Strictly no entry after sunset.
MAX. SIZE: Max. permissible LOA 210 m., max. draft 10.0 m. (9.7 m
HEALTH: Pratique available at Hesaki or Mutsure Anchorages. If vess from East, formalities will be carried out at the Hesaki Anchorage vessel from West, formalities will be carried out at the Mutsu Quarantine Anchorage. After Free Pratique granted, vessels have t pass the Kanmon Channel enroute to Kanda.

Radio Pratique available. Send cable to Agent within 36 hours arrival.

RADIO: Recommended that Master communicates with Agent throu Choshi Radio or Nagasaki Radio, which cover all ports in Japa Westbound vessels to contact Choshi Radio and Northbound vesse to contact Nagasaki Radio respectively.
VHF: Master should call "Kanda Port Radio" on Channel 16. Servic range 50 miles from port area.
TUGS: Tugs normally join vessel at Kanda Anchorage. 4 tugs availab 1×3,100 h.p. and 3×3,000 h.p.

KANMON-KO (Kanmon Harbour). **(See Plan)**

According to Japanese Harbour Area Regulations, Moji, Shimonoseki, Kokura, Tobata, Wakamatsu and Yawata are respective sections included in one port namely Kanmon Harbour. The expression of the port as "Kanmon" has been used in charter parties, where these 6 ports are considered to be one port. Vessel's movements within these ports is treated as shifting berth in the same port. Therefore, if vessel calls at more than 2 ports within this area, such calls are covered by one payment of tonnage dues. However, at Tobata, Wakamatsu and Yawata, port dues are levied in addition to tonnage dues.

Entry/departure procedures to Customs, Immigration and/or Harbour Master should be effected at each port, as those officials are stationed individually at each port.

Pilotage is compulsory for vessels over 10,000 g.r.t. passing through Kanmon Channel.

Also see "General" before first port.

Wakamatsu included in area of Hibikinada.

AUTHORITY: Kitakyushu Port and Harbour Bureau, 2-7 Nishi-Kaigan, 1-chome, Moji-Ku, Kitakyushu City, 801 Japan. *Tel:* (093)-321-5941. FAX: (093) 321-5915.

KANOKAWA: 34.11 N. 132.26 E. **(See Plan)**

(PORT STATUS: CLOSED PORT)
DOCUMENTS:
Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
5 Port of Call Lists (for Iwakuni and Kanokawa).
1 Maritime Declaration of Health.
10 Crew Lists including Passport Numbers. (For Iwakuni and Kanokawa.)
10 Passenger Lists. (For Iwakuni and Kanokawa.)
2 Stores Lists. (For Iwakuni and Kanokawa.)
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Customs: Formalities are to be carried out at the ship's last calling port in Japan or Iwakuni Port for entering Kanokawa Port (Closed Port) prior to proceeding to Kanokawa Port.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio or Choshi Radio, giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF Communication available with Inland Sea Pilot stations. Also see "Shipmaster's Report" before first port.

Inland Sea Pilots board at the following positions:

1. Vessels transitting Bungo Channel:
Inland Sea Pilot boards at Sekisaki Pilot Station (33° 13′ N., 131° 56′ E.). Telegraphic address: "Anjin Saganoseki".

2. Vessels transitting Kanmon Strait:
Kanmon Strait pilot boards at Mutsure Pilot Station (33° 59.5′ N., 130° 52.6′ E.) (compulsory over 10,000 g.r.t.). Telegraphic address: "Kanmon Pilot Moji".
Inland Sea Pilot boards at Hesaki Pilot Station (33° 58.0′ N., 131° 01.1′ E.). Telegraphic address: "Anjin Moji".

3. Vessel transitting Kii Strait:
Osaka Bay Pilot boards at Tomogashima Pilot Station (34° 10′ N., 135° 00′ E.). Telegraphic address: "Osakabay Pilot".
Inland Sea Pilot boards at Wadamisaki Pilot Station (34° 35′ 00″ N., 135° 08′ 24″ E.) (compulsory over 10,000 g.r.t.). Telegraphic address: "Anjin Kobe".

Note: VHF communication with pilot station available as follows:

Name of Station	*Call/Answer Channel*	*Communication Channel*
Oita Port Radio (for Sekisaki)	16	14
Shimonoseki Port Radio (for Mutsure)	16	14
Kobe Port Radio (for Wadamisaki)	16	14

4. Most Inland Sea Pilots act as harbour pilots up to berth or anchorage at destination. If vessel requires only harbour pilot, harbour pilot boards off Kanokawa in approximate position: 34° 08′ 00″ N., 132° 24′ 30″ E.

ANCHORAGES: No anchorage at Kanokawa Port. Vessel is able to anchor off Kanokawa Port in approximate position Lat. 34° 08′ N., Long. 132° 24′ 30″ E., if vessel arrives at night time, or if berth occupied by preceeding vessel. Depth is 25.0 m.

RESTRICTIONS: No berthing or unberthing from one hour after sunset to one hour before sunrise.

MAX. SIZE: Length 270 m., draft 14 m., deadweight 125,000. See "Tankers".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Usually vessels anchor at Iwakuni Quarantine Anchorage, where the authorities board and grant Free Pratique.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively. Telex communication available with Agent if vessel equipped.
VHF: Hiroshima Port Radio. Channels 11, 12, 14 and 16.
RADAR: No radar station at Kanokawa Port.
TUGS: All kinds of tugs available, from 2,600 h.p. to 3,300 h.p. Tugs normally join off Kanokawa Port, and usually tug's lines used, without extra charge.
BERTHING: See "Tankers".
CRANES: None.
BULK HANDLING FACILITIES: None.
BRIDGES: No bridge restrictions.
STEVEDORES: None.
MEDICAL: No advance notice required, except after office hours and on Sundays and holidays. Vaccination against cholera available.
TANKERS: *MC Terminal:* (Private wharf).
Wharf No. 1:
Length/Depth: 99 m./12.2 m.
Permissible Draft/LOA: 11.2 m./240 m.
Capacity: 30,000 d.w.t.
Number and Size of Manifolds: 1 × 6 in.
Number and Size of Shore Lines: 1 × 8 in.
Max. Back Pressure on Shore Gauge: 3.0 kg./sq.cm.
Max. Rate for Discharging: 350 kl./hr.
Cargo handled: Ethanol.
Wharf No. 3:
Length/Depth: 159 m./15.4 m.
Permissible Draft/LOA: 14.0 m./270 m.
Capacity: 125,000 d.w.t.

	Crude Oil	Ethanol
Number and Size of Manifold:	2 × 12 in.	1 × 6 in.
Number and Size of Shore Line:	1 × 24 in.	1 × 8 in.
Max. Back Pressure on Shore Gauge:	5.0 kg./sq.cm.	3.0 kg./sq.cm.
Max. Rate for Discharging:	3,000 kl./hr.	350 kl./hr.

DENSITY: 1023.
FRESH WATER: Available at berth, ex-pipeline. Average delivery rate – 20 t.p.h. Cost per ton: Daytime Yen 600. Overtime, Sundays and holidays Yen 800.
FUEL: Most grades of domestic and bonded oil are available by barge only at anchorage after completion of discharge, with 3 days' advance notice (Anchorage is also Closed Port, therefore the "Closed Port Dues" will be assessed as same as entering Kanokawa Port).
FIRE PRECAUTIONS: Following standard tanker berth regulations apply:
(a) Cannot use ship's crane for loading vessel's stores.
(b) Cannot use radar after berthing.
(c) Barge cannot come alongside vessel for loading oil or storing after berthing.
(d) Cannot use fire.
CONSULS: No consuls at Kanokawa Port.
REPAIRS: Small repairs can be undertaken, subject to berth owner's permission. However, major repairs and the use of fire at the pier is strictly prohibited by the Hiroshima Maritime Security Board and the berth owner.
DRY DOCKS: No dry docks at Kanokawa Port.
SURVEYORS: Cargo inspections are available (attend from Kure Port). Name of surveyors:
Japan Marine Surveyor and Sworn Measurers Association.
New Japan Surveyors and Sworn Measurers Association.
Registration surveys are available (attend from Kure). Name of surveyors:
Lloyd's Register of Shipping.
American Bureau of Shipping.
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: No cargo vessels enter Kanokawa Port (only tankers).
CUSTOMS ALLOWANCES: Allowed 60 cigarettes only.

REPATRIATION: Possible.
AIRPORT: Hiroshima Airport, approximately 60 km. from Kanokawa.
Hiroshima/Tokyo (Haneda Airport), 11 flights per day (domestic airlines).
Hiroshima/Seoul, 7 flights per week (international airlines).
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: Port works on Sundays and national holidays, except 1st January.
POLICE/AMBULANCE/FIRE: Police Station (emergency), Tel: 110; Ambulance/Fire, Tel: 119; or Hiroshima Maritime Safety Agency, Tel: 082-253-3111.
EMERGENCY CO-ORDINATION CENTRE: Hiroshima Maritime Safety Agency. Tel: 082-253-3111.
TELEPHONES: No arrangements for placing telephones on board.
SERVICES: All navigation apparatus can be serviced as required with 2 days advance notice.
BANKS:
Hiroshima Bank, Kure Branch, 5-4, Hondori 3-chome, Kure, Japan. Tel: 0823-21-5141. Fax: 0823-24-5575.
Sumitomo Bank, Kure Branch, 1-14, Hondori 2-chome, Kure, Japan. Tel: 0823-22-4921. Fax: 0823-21-0724.
STORING: See "Prelims".
1. Ship's stores loaded by hand.
2. Loading of ship's stores during discharging of cargo is possible.
3. Truck cannot proceed alongside at the berth (truck is to remain about 200 m. from ship).
4. Cannot use fork truck at berth.
5. Must obtain Customs clearance before loading ship's stores.
6. Riggers available to assist with storing.

SHIP SUPPLY SERVICE: Makino Shipchandler, 5-1, Hondori 1-chome, Kure, Japan. Tel: 0823-21-4443. Fax: 0823-21-4899.
No craft/helicopter at Kanokawa Port.
SHORE LEAVE: Kure Immigration Officer issues shore passes, if crew members have valid Passport or Seaman's Book.
REGULATIONS: Special regulations for tankers apply for tankers berthing at MC Terminal.
DELAYS: If vessel arrives at night time, it must wait at the anchorage.
GENERAL: Kanokawa Port is local port, which makes it difficult to arrange all requirements. At least 3 days notice helpful.
AUTHORITY: Ohgaki Doboku (Public) Office, 25 – 3 Oaza Ohara, Ohgaki-Cho, Saiki-Gun, Hiroshima Pref., Japan. *Tel:* 0823 – 57 – 3434. (*Note:* This is a closed port, therefore there is no Port Authority.)

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Naigai Unyu Co. Ltd., 1-7, Nakadori 1-chome, Kure, Hiroshima, Japan. Tel: 0823-21-4952. Telex: 662340 Naigai J. Fax: 0823-25-3728. Cables: Naigai Kure.

KASAOKA: 34.23 N. 133.26 E. (See Plan)

Located on central Northern coast of Setonaikai (Inland Sea) and on border of Hiroshima Prefecture and Okayama Prefecture.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 copy Voyage Memo (last 3 months).
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
APPROACHES: Main approach channel (leading to raw material discharging berths and pipe loading berth). Depth 16 m. (52 ft. 6 in). Width 350 m. (1,148 ft.). Distance from quarantine anchorage to "A" Berth, 9,500 m.
Pilot undertakes berthing vessels at "A", "B", "M" or "L" Berths, with draft up to 16 m. Vessels drawing over 15.5 m. may berth at high tide.
Branch channel (leading to loading berths except pipe berth). Depth 11 m. (36 ft.). Width 300 m. (984 ft.). Distance from quarantine anchorage to Export Berth No. 1: 11,500 m.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio and/or Choshi Radio, giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of two pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.
Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.
1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 07.54′ E. Telegraphic address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed shelter as near as possible, having due regard to safety, to Sekisaki pilot station.
ANCHORAGES: Quarantine anchorage position: Lat. 34° 22.5′ N. and Long. 133° 26.3′ E., an area of 750 m. radius.
RESTRICTIONS: Inland Sea (Setonaikai):
1. *Akashi Strait and Bisan Seto:* All vessels, over 200 m. LOA sh navigate on Bisan Seto in daytime only and also vessels over 250 LOA have to have an escort boat when navigating on Akashi Strait an Bisan Seto respectively in accordance with the Maritime Regulation Permissible draft on arrival 16 m., but 12 m. on departure.
2. *Kurushima Strait:* The vessels, over LOA 200 m., shall naviga on Kurushima Strait at slack water in daylight and vessels over LO 250 m. and up to 300 m. have to have an escort boat when navigati on Kurushima Strait.
The draft restrictions are as follows: The permissible draft for LO from 200 m. up to 250 m. shall be less than 13 m. and LOA from 250 up to 300 m. shall be less than 11 m.
Escort Boat: 2 escort boats with VHF available. Max. speed 24 kno cruising speed 18 knots.
MAX. SIZE: *Pipe Berth:* LOA 220 m., max. draft 11.0 m.
Also see "Berthing".
HEALTH: Radio Pratique available. At first port of call in Japan, vess must obtain Free Pratique. Quarantine Officers will attend vessel on from daylight to sunset and Master to show all Vaccination Cards an Derat Exemption Certificate. In case vessel arrives from chole infected area within 10 days, Master must advise crew and passenger health condition to respective Quarantine Office through ship's Age prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which cover all ports in Japan. specifically Westbound vessel, to contact Choshi, and Northbound, contact Nagasaki Radio respectively.
VHF: "Fukuyama Port Radio" on Channel 16 (0600 – 2000 hrs.).
TUGS: 5 tugs (3,600 h.p.) available in the Fukuyama Harbour. Addition tugs are available from other Inland Sea terminals.
BERTHING: No specific requirements. Pilot boarding time will be notifie by ship's Agent mainly by radio. Berthing/unberthing not carried o during hours of darkness.
Nippon Kokan K.K. – Fukuyama Works. Private Berths.
Pipe Berth: Length 399 m., depth 11.00 m., capacity 43,000 d.w Cranes: 3 × 38 tons.
Public Berth at Kasaoka: Terama Berth: Length 180 m., depth 5.50 capacity 2,000 d.w.t.
STEVEDORES: *Pipe Berth:* Stevedores available for loading pipe except Sundays and 30th December – 4th January.
For berth term contract on loading, at least 24 hours prior notic excluding Sundays and holidays, is required, in order for Agent t arrange stevedores.
If stevedores cannot commence loading at the time notified by t Agent, the orderers must pay for waiting time.
Terama Berth: Stevedores available from Monday to Saturday, exce holidays and 30th December – 4th January, for loading/discharging.
All cargo loading/discharging by ship's gear and mobile crane.
Working hours are from 0800 hrs. to 1800 hrs. only.
MEDICAL: No advance notice required except on Sundays, holida and in an emergency.
DENSITY: Summer 1016 – 1022. Winter 1025. The density not muc affected by tide, which is maximum 3.84 m.
FRESH WATER: Available at any berth. Supply capacity 10 t.p.h. Wa barge also available, capacity 300 tons. Minimum order 200 tons.
FUEL: Bunkers by lighters from Kobe, Mizushima, Tokuyama or M area. Advance notice required, bunkering allowed at loading/discharg berth, daytime only. Oil fence required during bunkering.
CONSULS: None.
REPAIRS: Only minor repairs. For machinery, radio, radar, etc., are arranged by firms located in Tokyo, Osaka and Kobe.
DRY DOCK: None. Available at Innoshima or Mukayima and Tsuneis
GANGWAY/DECK WATCHMEN: Not specially required unle valuable cargo on board. Steel Mill's guard are on watch at all gates
OPENING/CLOSING HATCHES: Stevedores carry out opening a closing hatches for loading steel products. Charge is assess according to tariff. Recommend request stevedores for this work unle crew can complete it before berthing. For discharging raw materia opening/closing hatches must be carried out by ship's crew befo berthing.
CERTIFICATES: Ship's Register to show Customs Inspector sh registered gross and nett tonnages. Valid Cargo Gear Certifica sometimes required by stevedores when cargo gear's maintenan appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ash but no spirits.
REPATRIATION: Possible.
AIRPORT: Nearest airport is Okayama (70 km.), but Tokyo and Osaka are preferable due to convenience of traffic.
TIME: GMT plus 9 hours. No alterations made to clocks during yea
POLICE/AMBULANCE/FIRE: Report to Guardmen's office locate Middle Gate of Nippon Kokan.
TELEPHONES: No arrangements for placing telephone on boa Private telephones connecting with offices in the compound of t Fukuyama Works are placed at each of the raw material berths.
For vessels alongside export berths, private telephone availab foremen's office located on berth.
SERVICES: Hold cleaning.
SHORE LEAVE: Local Immigration Offices issue shore pass vali 15 days.
GENERAL: Kasaoka is a local and new port, developed along with expansion of Nippon Kokan, Fukuyama Steel Works.
AUTHORITY: Kasaoka Public Works Office, 2-5 Rokuban-cho, Kasa City, Okayama Pref., Japan. *Tel:* (08656) 3-5252.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Nissan Senpaku Ltd., 1, Kokan-cho, Fukuyama City, Hirosh Pref.721, Japan. Tel: (0849) 41-0535. Telex: 6436-11 Niss Fax: (0849) 43-1104. Cables: Nissan Fukuyama.

KASHIMA: 35.54 N. 140.42 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
6 Passenger Lists.
1 Stores List.
1 Crew Declaration List, i.e. cigarettes, wine, spirits and others, at 1st port only.
3 Lists of Port of Calls, covering last 3 months.
Other documents will be prepared by Agents.

APPROACHES: Normally the approaches to Kashima are not as congested as some of the other ports of Japan, but in good weather a large number of fishing and pleasure craft may be met. Also, many fishing nets are placed on the sea bottom throughout the year.

Being free of off-lying dangers the approach to the Pilot Boarding ground (except fishing nets) do not present any difficulty, however, the presence of swell very often hampers the manoeuvre of the tugboat carrying the Pilot. A convenient lee is required to enable the Pilot to board.

Approaches to Kashima Oil Co. Terminal: The berth approach is made only during daylight hours. Pilots board, at the latest, one hour before sunset.

All traffic for entering into or departing from the port, and all movements inside the port are controlled from the signal station at the centre of the port. For the signals shown please refer to H.O. PUB No. 156 or B.A. Japan Pilot Vol. 1 (No.41). The type of control is "one way" for larger vessels. The signal station is not equipped with radar or VHF, but may contact a vessel via telephone and Ibarki Port Radio.

The harbour entrance is marked by two buoys.

Leading lights, 183.5°, are exhibited for steaming up the channel. The depths in the outer channel are 24 m. and in the inner part 22 m. below chart datum. Tidal currents in the channel are weak, less than 0.5 knots.

No entry is made if wind velocity from Northerly directions is 7 m./sec. or over, or from other directions 10 m./sec. or more. Also, berthing operations are suspended if the wave height is 1.5 m. or more.

The tug that brings the Pilot(s) on board joins the vessel immediately. Other tugs join inside the breakwater.

During periods of Northerly swell the entry channel is fully exposed. Vessels at low speed generally have difficulty in steering therefore, laden VLCCs are also required to attain a speed up to 6 knots until as close as 0.75 miles from C.O.P. (Crude Oil Pier) No. 1. The full power of five tugs is normally sufficient to timely reduce the headway but at times vessels engines are also called for prompt and strong astern action.

PILOTAGE: Pilot called through Agent. Pilot boards about 3 miles to N.E. from the end of South Breakwater, in vicinity of Lat. 36° 00.5′ N., Long. 140° 45′ E.

ANCHORAGE: No suitable anchorage at present. Quarantine Anchorage indicated on chart is not used for quarantine purposes, as it is too close to the channel. Vessel can choose her anchoring point herself, but should keep enough distance from the South Breakwater, and Northerly directions from the breakwater is recommended. Quarantine Officials board vessel upon berthing, but if requested by Agents, and sea condition is good, Quarantine Officials can also board vessel at the Anchorage, using a tug. Transportation between the Anchorage and shore is only by tug. Nothing is supplyable at the Anchorage. Generally, anchor holding ground is not good and often causes dragging of anchor.

RESTRICTIONS: Pilots board vessel from 0600 hrs. to one hour before sunset for inward operations, and from 0600 hrs. to 2100 hrs. for outward operations. But for vessels of more than 50,000 gross tons, pilots board only during daytime.

Passages:

Name	*Width* (m.)	*Depth* (m.)
Central Passage	400 – 600	19 – 13
South Passage	300 – 430	12 – 10
North Passage	300	13 – 10
Outport Passage	480 – 540	24 – 22

MAX. SIZE: *Tankers:*

Berth	*Max. d.w.t.* (tons)	*Max. L.O.A.* (m.)	*Max. Safe Draft* (m.)
C.O.P. No. 1 (Crude Oil Pier)	250,000	340	19.0
C.O.P. No. 2	100,000	258	13.8
C.O.P. No. 3	80,000	238.5	12.4

Bulk carriers have entered with draft up to 44 ft.

HEALTH: Radio Pratique is available if application is made in accordance with Japanese Regulations. Quarantine Officers will attend vessel only from daylight. Master to show all Vaccination Cards, Derat Exemption Certificate, Ship's Register and Crew List. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

VHF: 50 Watt powered base station operates at Oh-aza Igiri, Kamisu-machi, using call sign "Ibaraki Port Radio", continuous watch is maintained 24 hours on Channel 16, all calling should be on Channel 16, and working Channels 14 and 12. Tugs (including Pilots) work on 400 mHz.

Station handles all traffic about pilotage, etc. Station not yet mentioned in List of VHF stations (Radio Holland). Agents pay fee per ship per port call for using the station.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent, mainly by radio.

TUGS: Usually joins vessel at anchorage where Pilot boards; Tug's lines used.
MEDICAL: No advance notice required unless urgent.
TANKERS: Requirements prior to arrival: Manifold position, number and external and internal diameters. Reducer: type (ASA or JIS, etc.) and external and internal diameters. Ship's ETA and draft are to be reported in advance. ETA is to be advised if any changes.
Berthing Procedure and Mooring at C.O.P. No. 1: Normally 3 to 5 tugs attend and are employed in a combination of "alongside" and "on the hook".

Vessels always berth port side to. The normal procedure is to bring the vessel to a stop, parallel to the berthing face, at a distance of 100 m. – 150 m., and then warp her alongside with the tug assistance. The sequence for handling ship's lines is: Spring lines, breast lines, and then bow and stern lines. 2 mooring launches are used.

Since the breasting dolphins at C.O.P. No. 1 used for the spring lines are rather a long distance apart, conventional spring lines from the main deck are frequently very short and often break when a swell is running. Therefore, it is advisable to try using longer springs from the forecastle and poop decks.

The normal mooring configuration is: 4 bow lines, 4 stern lines, and 4 breasting lines and 2 spring lines both forward and aft.

The berth is equipped with a sonar docking system.

Discharge Rates:

Berth	*Product*	*Discharge Rate* (Kl./Hr.)
C.O.P. No. 1	Crude Oil	14,000
	Naphtha	5,000
C.O.P. No. 2	Crude Oil	5-7,000
	L.P.G.	2,400
C.O.P. No. 3	Crude Oil	5,000
	Naphtha	2,000
	Kerosene	2,000

LPG:
Berth: Kashima Oil.
Max. LOA: 258.16 m.
Max. size: 100,000 tonnes s.d.w.t. (59,134 g.r.t.)
Max. draft: 13.43 m.
Cargo lines: 1×12 in. ASA 150 for Propane and 1×12 in. ASA 150 for Butane.
Vapour lines: 1×10 in. ASA 150 for Propane and 1×10 in. ASA 150 for Butane.
Line alignment: From right to left: PV-PL-BL-BV
(Butane and Propane lines can be interchanged).
Discharge rates: Butane and Propane 1,200 cu.m./hr.
Max. manifold pressure 9 kg./sq.cm.
Cargo temperatures: Propane −40°C – −45°C. Butane −2°C – −4°C.
Vapour pressure: 0.05 – 0.1 kg./sq.cm.
Shore tank capacity: Propane 2×35,000 cu.m., 1×43,000 cu.m. and 1×10,000 cu.m. Butane 1×37,000 cu.m. and 1×44,000 cu.m.
Fuel: Fuel by shore line (stems through Kyodo Oil or Kashima Oil direct). MDO by barge in daytime only and before or after discharging operations.
Fresh water: Available ex-shoreline at 30 cu.m./hr.
DENSITY: 1025.
FRESH WATER: Fresh water is available at all berths, except Asahi Glass, where the line is very poor and pumping rate is quite low. 20 t.p.h. at Kashima Oil.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, from where bunkers are lightered at maximum 7 days' prior notice. Depending on the case, bunkers are available from Kashima Oil, but bunker barge mostly comes from Tokyo Bay area.
FIRE PRECAUTIONS: No special precautions, but water curtain made alongside dolphin in case of fire, and there is a fire boat (15 gross tons, and airfoam system).
CONSULS: None.
REPAIRS: Hot work on deck is not allowed.

Electronic engineers for radar, radio, Inmarsat, etc., are available from Yokohama area.
GANGWAY/DECK WATCHMEN: Kashima Oil: 24 hour watch on dolphins.

Sumitomo Metal: If ship's gangway is located next to the discharging cargo hold (ore/coal berths), watchman stands by and controls the operation during discharging from the relative hold.
CERTIFICATES: Ship's Register and International Tonnage Certificate for Customs purposes.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per person per week.
Sealing: Customs will seal guns and pornographic tapes and books. Cigarettes and alcohol are not sealed.
AIRPORT: Narita Airport (New Tokyo International Airport), 1 hour by car.
TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance/Fire Tel. 119.

TELEPHONES: Not available for placing on board.

SERVICES: No equipment or facilities, but service engineers arrangeable from Yokohama.

SHORE LEAVE: Local Immigration Office issues shore passes for Kashima Town and Kamisu Town, valid for 7 days, extension is possible, if necessary.

IDENTIFICATION CARDS: Not required, but shore pass is always to be carried.

DEVELOPMENTS: This artificial port started its construction in 1963, and is still under construction. When completed, total length of wharves will be about 17 km. for about 30 large industries, such as steel mill, oil refinery, chemical works, grain terminals and general cargoes.

AUTHORITY: Kashima Port Administration Office, 13 Oh-aza Higas Fukashiba, Kamisu-City, Kashima-Gun, Ibarak-Ken, Japan. *Tel:* 029 92-2111.

AGENT: Sub-agents for Aall Barwil Agencies K.K.

Keiyo Shipping Agency Ltd., 14-23, Kamisu 1-chome, Kamisu-mac Kashima-gun, Ibaraki-ken, Japan 314-01. Tel: 0299-92-219 Telex: 3658926 Keiyok J. Fax: 0299-92-9371. Cables: Keiyosh Kashima.

KAWASAKI: 35.32 N. 139.46 E. (See Pla

LOCATION: Kawasaki Port is located in the Northwest of Tokyo Ba connected with Yokohama Port (11 km. by land, 2 nautical miles by se in the West, and Tokyo Port (18 km. by land, 10 nautical miles by se in the North.
PORT LIMITS: The boundary of the Kawasaki Port consists of: Th position of the central outfall of the border canal (Sakai Canal) Ohkawa-cho, Kawasaki-ku, Kawasaki City and Anzen-cho, Tsurumi-k Yokohama City. From this position to a point of 151° 30′, 3,460 m. a from this latter position to a point of 126°, 2,310 m. The position of 13 5,150 m. from the Tamagawa River Haneda Light Beacon, the line draw from the end point of the Tamagawa River administrative bounda border line and the sea surface which covers the shore. The wa surface of the following canals: Sakai Canal (beyond the East of t administrative boundary border line), Siraishi Canal, Tanabe Cana Minami Watarida Canal, Asano Canal, Ikegami Canal, Sakurabori Cana Iriezaki Canal, Mizue Canal, Shiohama Canal, Yako Canal, Chido Canal, Daishi Canal, Suehiro Canal and Tama Canal. The water surfa of the area of Siraishi-cho No. 2, Asano-cho No. 1, Yako No. 3-1, Ya No. 1-1 and Ukishima-cho No. 100 of Kawasaki-ku, Kawasaki City an the downstream water surface of Kannongawa Iriebashi. The wa surface area of Tamagawa River (beyond the West of the administrat boundary border line), downstream of the line drawn 43° 30′ from th S.E. side of Tono machi Kawasaki-ku, Kawasaki City.
DOCUMENTS:
Maritime Declaration of Health.
Certificate of Registry.
International Tonnage Certificate.
1 List of Crew's Personal Effects (to be signed by each cre member).
1 Ship's Stores List.
3 Lists of Port of Call (last 4-6 months).
7 Crew Lists.
7 Passenger Lists.
PILOTAGE: See "Yokohama".
RESTRICTIONS:
(A) Berthing/unberthing from sunrise (or after 0630 hrs.) till sunse
(B) Max. draft in Kawasaki Fairway (or Kawasaki Passage) a Tsurumi Fairway is 12.0 m.
(C) Max. airdraft to be kept to less than 40 m. for tankers for berthi unberthing at Tonen/NPRC Gas/General Sekiyu/Toyu (To Yuso), MC Terminal (Mitsubishi) and Showa GATX.
MAX. SIZE: Main Dry Cargo Berths:

Name of Berth	*Max. D.W.T.* (tons)	*Max. LOA* (m.)	*Max. Draft* (m.)	*Max. Airdraft* (m.)
NKK Ohgishima E – A	200,000	360	19.0	19.0
NKK Ohgishima E – B	100,000	240	17.0	19.0
Toyo Futo (Coal Berth)	50,000	230	12.0	14.5
Main Tanker Berths:				
Keihin Kawasaki Sea Berth	250,000	300	30.0	
Toa Nenryo Ohgishima Sea Berth	250,000	300	26.0	
Toa Nenryo Ukishima Sea Berth	100,000	250	16.6	
Tokyo Electric Ohgishima LNG Berth	65,000	—	17.0	

HEALTH: Radio Pratique applicable for vessels who possess va Sanitary Inspection Certificate issued by Japanese Quarantine Autho

Radio Pratique message can be sent by Master to ship's Age between 6 hours and 36 hours prior to arrival as per specific forma

Following vessel not applicable for Radio Pratique:
(A) Vessel's navigation days to Japan less 7 days after depa from port designated as 'infected area'.
(B) If ship's crew suffered from infectious disease within 15 da before ETA in Japan.

Kawasaki Quarantine Inspector boards vessel at Kawa Quarantine Anchorage for Pratique.
RADIO: Choshi Radio and Nagasaki Radio.
VHF:
(A) VHF range is about 50 miles away from Bay Pilot Statio entrance of Tokyo Bay.
(B) Berthing information for next day can be obtained from Kawa Port Radio at 1500 hrs. by Channel 16.
RADAR: Traffic Control Centre (Tokyo Wan Traffic Advisory Se Centre) keeps watch round-the-clock for vessels within the radar se area. Vessels can make contact with the Traffic Control Cen Channel 16.
TUGS: See "Yokohama".

BERTHING: In addition to the berths below, there are many with less water.

Public Berths:

Toa Nenryo Ukishima Sea Berth	Crude Oil	12 in.×3	5,000
Toa Oil No. 3 Factory	Crude Oil	12 in.×3	1,400
Toa Oil No. 1 Pier	Crude Oil	10 in.×2	1,670
General Sekiyu Seisei	Crude/Fuel	12 in.×2	3,000
Mitsubishi Oil	Crude Oil	12 in.×2	4,000
	Fuel Oil	8 in.×1	1,500
MC Terminal	Fuel Oil	8 in.×2	800
Toyu	Fuel Oil (C)	12 in.×1	1,000
	Fuel Oil (A)	10 in.×1	800

Toyu: The berth consists of an "L" shaped jetty with a roadway and a pipe trestle 20 m. long. It is provided with 2 breasting dolphins which are connected to the platform by trestles. 2 bollards are installed on the dolphins. Other bollards are installed ashore along the face of the quay.

No capstans are provided and so it is difficult to send heavy wires ashore. Therefore, it is advisable to have a number of synthetic ropes readily available.

The back springs which are made fast to the bollards located on the dolphins, have a very short lead and are at a steep angle.

The 2 dolphins are provided with resilient buffer fender systems having hollow rubber tubes. No sonar doppler is provided.

The normal mooring configuration is:

3 head lines,
2 breast lines forward,
2 back springs forward,
2 back springs aft,
2 breast lines aft,
3 stern lines.

The terminal does not use hard arms. Rubber hoses are used, generally consisting of a string of 3 lengths of 10 in. JLS flanges, connected with bolts and nuts.

The vessel's derrick must be used for handling the hoses.

High pour fuels are generally handled at this terminal but vessel's assistance is no longer required at the end of each discharge for flushing the hoses and shore lines. The terminal now flushes back into the ship the line's contents.

No gangway is provided.

Bunkers and fresh water are not available at this berth.

Berth A-1: Berth A-1 is designed to accommodate tankers up to about 65,000 d.w.t. in light loaded condition. The berth consists of a T-shaped jetty with a roadway and pipe trestle 40 m. long, and is provided with 2 breasting dolphins positioned at a distance of 80 m. and connected to the platform by trestle. The dolphins are provided with small bollards which are seldom used for ship's lines. Usually the lines, including the springs are run ashore to bollards having adequate strength.

There are no capstans for pulling the lines ashore and some difficulties may be experienced, particularly when handling heavy wires. It is advisable to have ready a certain number of synthetic ropes.

2 smaller berths are located in the inner side of the jetty face. These berths are left vacant when a tanker is alongside Berth A-1. The structure on these berths may interfere with the vessel's mooring arrangement and may create difficulties when sending the vessel's lines ashore.

The dolphins are provided with rubber cell fenders (diamond shaped). Sliding along the dolphins should be avoided so as not to damage the rubber fenders.

The berth is provided with a sonar doppler to monitor the berthing speed. The pilot is advised by walkie-talkie if the berthing velocity exceeds the safety limit.

The normal mooring configuration is:

3 head lines,
2 breast lines forward,
2 back springs forward,
2 back springs aft,
2 breast lines aft,
3 stern lines.

3 hard arms are installed on the platform. 2×12 in. diameter are used for discharging crude and fuels and 1×12 in. is used for the discharge of LPG liquid. No LPG vapour return line is installed on the jetty. Arms are connected by means of nuts and bolts. The flanges are ASA 150 p.s.i. for bunker fuel, the others for lubricating oil. Bunker can be supplied simultaneously with vessel discharge operations.

Esso controlled tonnage generally discharges fuel and diesels oils at Berth A-1. High pour fuels are also handled at this berth and the terminal may require vessel's assistance for flushing the arms and the lines after each discharge. No slop or deballasting facilities are provided.

A heavy and bulky gangway is provided which has to be lifted by the vessel's derrick.

The hooks on the end of the gangway are narrow and cannot grip the ship's sheer strake so have to be laid on the ship's handrail. On several occasions, vessel's handrails have been damaged by the gangway hooks. Fresh water is available at this berth through a 2.5 in. outlet.

TIDAL CURRENT: The littoral current running Westward along reclaimed industrial area of city is very slow and has rate of about 0.3 m. around the head of municipal wharf when tide is on the ebb.

FRESH WATER: Supplied at piers and by water barges, overtime on Sundays and legal holidays.

	Barge	*Loading Capacity (ton)*	*Remarks*
Water	Hoei Maru No. 12	350	Operated by Water Bureau of Kawasaki City
Barge	Kosie Maru	300	

FUEL: All grades available.

CONSULS: See "Yokohama".

REPAIRS: All repairs possible.

DRY DOCKS: Hitachi Dockyard.

Dry Dock	*Max. d.w.t.*	*Max. LOA*
No. 1	60,000	228 m.
Wet Basin No.	*Max. d.w.t.*	*Max. LOA*
A	25,000	163 m.
B	60,000	258 m.
C	60,000	246 m.

SURVEYORS: Lloyd's, ABS, BV, DNV, Salvage Association and U.S.Salvage from Yokohama. GL available from Kobe.

GANGWAY/DECK WATCHMEN: Normally not required.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES: See "Yokohama".

CUSTOMS ALLOWANCES: *Daily Consumption allowed aboard by Customs:*

Cigarettes: 2 packets.
Beer: 1.3 litres.
Whisky: 144 ml.

REPATRIATION: Possible.

AIRPORT: Kawasaki to Haneda Airport (20 minutes by taxi). Kawasaki to Narita Airport (2 hours by taxi and limousine bus).

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: See "Yokohama".

POLICE/FIRE/AMBULANCE: Police Kawasaki 110; Ambulance and Fire Kawasaki 119.

EMERGENCY CO-ORDINATION CENTRE:

Maritime Safety Agency Kawasaki (Coast Guard): Tel. 044-266-1591.
Kawasaki Rinko Police Station: Tel. 044-266-9161.

Master of the vessel can also contact Kawasaki Port Radio by VHF Channel 16 for urgent matters.

TELEPHONES: Telephone can be placed onboard at most public berths.

SERVICES: Most services can be provided if advance notice given.

BANKS: Bank of Tokyo Ltd., 3-27-1 Honcho, Naka-ku, Yokohama. Tel: 045-201-2515. Hours: 0900 hrs. – 1500 hrs., Monday to Friday.

STORING: *Dry Cargo Vessels:*

Public Berths: Vessel can be stored by truck.

Private Berths (Dolphin Berths): Vessel can be stored by barge.

Private Berths (non-dolphin): Vessel can be stored by truck.

Tankers: Stores/bunkers/lubes can only be supplied at anchorage. Small quantities of stores can be delivered onboard by hand at the terminal.

SHIP SUPPLY SERVICE: See "Yokohama".

SHORE LEAVE: See "Yokohama".

IDENTITY CARDS: See "Yokohama".

GARBAGE DISPOSAL: See "Yokohama".

WASTE OIL DISPOSAL: See "Yokohama".

SEAMEN'S CLUBS: See "Yokohama".

SAFETY: *Voluntary Separation Scheme:* A voluntary separation scheme is in existence South of the Uraga Channel, and is an extension of the mandatory scheme. Northbound vessels keep to the East side of the channel, and Southbound vessels keep to the West side of the channel. Coasters do not comply with this scheme.

Signals for Large/Dangerous Cargo Carriers: Large vessels (LOA over 200 m.) require following placed onboard:

By day: Two black cylindrical shapes placed vertifically (0.6 m. × 1.2 m. or larger).

By night: One all-round green light, flashing at regular intervals, at a frequency between 180 and 200 times per minute.

Vessels carrying dangerous cargo require following placed onboard:

By day: "First Substitute" flag over "B".

By night: One all-round red light, flashing at regular intervals, at a frequency between 120 and 140 times per minute.

Restrictions on Overtaking: Large vessels and other particular vessels as prescribed by the Maritime Traffic Safety Law, and vessels of 10,000 g.r.t. or more should, if the circumstances of the case permit, avoid overtaking a vessel of 500 g.r.t. or more in the traffic routes.

Restriction on Speed: A vessel should not navigate at a high speed within the Bay.

Restriction on Entry into the Traffic Route in poor Visibility: Unless otherwise instructed by the Tokyo Wan Traffic Advisory Service Centre, vessels of 10,000 g.r.t. or more should not enter the traffic route when the visibility in the traffic route and its vicinity is less than 1,000 m.

Restriction on Use of Auto-Pilot: A vessel navigating in Tokyo Bay should not use auto-pilot.

Preparation of Emergency Wires: A vessel carrying dangerous cargo prescribed by the Maritime Traffic Safety Law should prepare emergency fire wires at the bow and the stern for immediate use in case of emergency.

The Pledge for Safety Measures: The owner or operator should submit "The Written Pledge for Safety Measures" to the Maritime Safety Agency, and fulfil its requirements when a tanker of 220,000 d.w.t. or more carrying dangerous cargo enters Tokyo Bay for the first time, and a liquified (natural petroleum) gas tanker of 25,000 g.r.t. or more enters Japanese waters for the first time.

Notification of Traffic Routes and Notification of Change:

(a) Vessels of 10,000 g.r.t. or more should report the "Notification of Traffic Routes" and the "Notification of Change" to the Tokyo Wan Traffic Advisory Service Centre at Kannon Saki in the same way as in the case of a large vessel.

(b) With the "Notification of Traffic Routes", following items should be reported:

(i) Port of destination and section of the port, when they are known.

(ii) Port of departure and section of the port, in case of a departing vessel.

(iii) Whether a pilot is arranged or not.

(iv) Whether a special vessel with foam-type or powder-type fire fighting facilities is arranged or not.

Communication with the Centre: Vessels equipped with VHF radiotelephone (Channel 16) should keep watch on VHF while navigating within the radar service area, since information might be provided by the Centre.

Preparation of Charts: Vessels navigating in Tokyo Bay should prepare at least some of the following charts issued by Hydrographic Department of the Maritime Safety Agency and published by Japan Hydrographic Association, and obtain recent information of ports in advance:

Chart No.	Title
90	Tokyo Wan
1062	Middle Part of Tokyo Wan
1081	Uraga Suide
H-301B, H-302B	Maritime Traffic Information Chart for Tokyo Wan

SHIPMASTER'S REPORT: *The Tonen Ohgishima Sea Berth:*

1. Suggest Mikimoto Lighthouse used for end of passage as from there inwards to Uraga Channel (58 miles) heavy concentrations of traffic frequently experienced.

2. Entry to Uraga Channel for VLCC's permitted only during daylight (i.e. sunrise to sunset).

3. Pilot boards in vicinity Uraga No. 1 Buoy from 1 of the 2 tugs which escort the vessel to Yokohama/ Kawasaki and requires fire fighting tug standing by at Uraga Buoys Nos. 1–6.

4. Deep draft signal to be displayed including the red flashing light and Code "First Substitute over Flag 'B'" and 2 black cylindrical shapes (0.6 m. × 1.2 m.) placed vertically (refer Maritime Traffic Safety Law).

5. ETAs (No. 1 Buoy Uraga) should be updated as promptly as possible. Considerable importance attached to the vessel's arrival/ sailing time by Tokyo Wan Traffic Advisory Service Centre (TWTASC).

6. Vessel must anchor at Kawasaki Anchorage where Port Health boards (pilot hoist used).

7. Berthing/Unberthing Ohgishima Sea – berth during daylight only (sunrise to sunset).

8. Berthing pilots (2) embark at Quarantine Anchorage, 6 tugs using nylon tow ropes with eye on bitts. Always port side alongsid Refer mooring diagram for details. No additional mooring ropes availab on loan or hire from berth. Shore gangway, Chicksan arms 4×16 connections.

9. A spill boom completely surrounds the vessel on the berth. comprehensive book (in English) of the Terminal Regulations placed board on arrival. Tonen Company require a tape recording concern oil pollution to be broadcast throughout the vessel's p/a system befo cargo discharge commences.

10. Ullaging is witnessed by Oil Co. representative. Samples tak from all tanks necessitating the opening of tank hatches. All tanks dipp after discharging completed.

11. The loading of stores, provisions, etc. (either by crane or derr is not permitted on this berth. No restrictions on items being carried board via the gangway, e.g. laundry. Necessary to anchor af discharging/ballasting to take on stores.

12. During severe weather conditions tug assistance was requeste to stand by the vessel on the berth. Tugs cannot approach unless th spill boom is removed and this will only be removed if cargo dischar ceases and Chicksan arms disconnected.

13. A shore liberty boat was arranged through Agent. This service to Yokohama, approx. 1 hour journey. A boat service to nearby Kawasa is permitted and take 40 minutes. All boat services suspended whe weather deteriorates. Shore passes issued by Immigration Authorit on board and must be collected in before vessel leaves berth.

SHIPMASTER'S REPORT: December 1991.

Charts: B.A. Charts No. 3548, 3108 and 3109.

Documents:

First Port:

*4 copies Crew List.
*2 copies Stores List.
*1 copy Maritime Declaration of Health.
*1 copy Crew Effects List.
1 copy Ports of Call List.

* These must be completed on Japanese forms (Japanese version IMO forms).

At subsequent ports the following are required:

1 copy Crew List.
1 copy Stores List.
1 copy Ports of Call List.

In addition the "Riders" from the first port should also be available.

Formalities: Sanitary Certificate/Pratique: Vessels without a Sanita Certificate can obtain temporary pratique but must undergo a sanita inspection. The galley, toilets, showers and void spaces under bunk and settees are checked for dirt and vermin.

The vessel must be in possession of rat traps, rat guards, rat ba water purification liquid, disinfectant and a spray. The certificate las from 1 – 3 years, depending on cleanliness. Prior to arrival at the fir port a standard message prefixed by "RPM" must be sent.

Approaches: The high headlands and islands to the South of Urag Channel are easily identified visually and by radar. There is the usua volume of traffic and fishing vessels around the coast. Vessels shou keep a good lookout for ferries when about one mile South of the 'OF Racon Buoy which marks the Southern end of the Uraga Channel. Th buoy is large and conspicuous.

A voluntary separation scheme is in existence South of the Urag Channel and is an extension of the mandatory scheme. Northbou vessels keep to the East side of the channel and Southbound vesse keep to the West side of the channel. Coasters do not comply with th scheme.

Pilotage: The Uraga Channel pilot boards in position Lat. 35° 10' N Long. 139° 47' E. from a tug boat with a boarding platform forward. Th pilot is based at Kurihama Wan which is about 2.2 miles South of Kanno Saki.

Pilotage is compulsory for vessels over 10,000 g.r.t. It is als recommended that foreign vessels under 10,000 g.r.t. take a pilot in Tokyo Bay.

Within Keihin (Yokohama, Kawasaki area) harbour pilotage i compulsory. Uraga Pilot is on VHF Channel 13.

Traffic Control: Vessels over 10,000 g.r.t. must report to "Tokyo Mar Control" as per Admiralty List of Radio Signals.

Visibility: Uraga Channel is closed to vessels over 200 m. LOA whe visibility falls below one nautical mile and is closed to vessels ov 10,000 g.r.t. when visibility is below 0.5 nautical miles. Ships wi dangerous cargo may be restricted depending on their circumstanc and size of vessel.

Anchorages: There are numerous anchorages in the area. Forei vessels inside Tokyo Bay anchor in accordance with instructions fro pilot and/or "Tokyo Martis Traffic Control". A favoured waiting anchora is Naka-No-Se which is centred on Lat. 35° 23' N., Long. 139° 45' E a depth of 14 m. – 18 m.

We used Yokohama No. 5 area (Lat. 35° 22.5' N., Long. 139° 41' E for discharging lub oil additives into coasters. Anchorage position giv by "Tokyo Martis". In this area vessels should beware of the depths, to the S.E. of the anchorage depth increases sharply from 15 m. to 40 m so plenty of cable is required.

Berth: Vessel berthed portside to at Nippon GATX in Kawasa (Lat. 35° 29.2' N., Long. 139° 42.8' E.) The max. draft allowed is 7.7

This is a typical tanker type pier and projects out into the chann The berth face has a length of 30 m. and is equipped with Chicksa and hoses. There are breasting dolphins 20 m. each side of the je face which are used for backsprings. Headlines and sternlines are se to shore bollards, the berth is well fendered.

As a brow gangway only is possible we used a pilot ladder and th offshore gangway for the launch service.

Cargo: When at the anchorage we discharged into 2 coasters using 6 flexi-hoses. The coasters can receive as fast as the ship can pump

When alongside we discharged additives with 6 in. shore hoses. The plant also handles other chemicals. There was negative back pressure. Discharge of Amoco Grade A8083 went very slowly into the shore tanks, about 30 tonnes/hr.

There are plenty of surveyors available and total safety was given by safety boat.

Fresh Water: Not available at the GATX berth. Water can be obtained by barge either alongside or at the anchorage. The minimum supply is 50 tonnes and the cost is Yen 3,285 per tonne.

Shore Leave: Shore leave is not allowed through the plant so a launch is used when alongside and at the anchorage.

Launch cost:	0800 hrs. – 1700 hrs. –	Yen 18,000.
	1700 hrs. – 2200 hrs.	Yen 27,000.
	2200 hrs. – 0600 hrs.	Yen 36,000
	0600 hrs. – 0800 hrs.	Yen 27,000.

Yellow shore passes are required and they have to be surrendered on return from ashore.

Shifting: Vessels with dangerous cargoes cannot move at night (between sunset and sunrise) and this includes shifting from berth to berth, moving from anchorage to berth or sailing outwards.

Transit: Vessels normally transit Keihin Unga Fairway Kawasaki in an Easterly direction. Most vessels enter through Tsurumi and leave through Kawasaki entrances.

The bridge across Tsurumi Fairway is not yet completed.

Stores: Prices for fresh food are high but quality is good. Stores can be supplied by barge while at the anchorage or whilst alongside. By prior arrangement small amounts of spares or stores can be delivered to the quayside but only up to 70 m. from the ship.

KIIRE: 31.23 N. 130.32 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: No particular regulations for navigating in Kagoshima Bay. Suggest enter Bay on course close to Osumi Peninsula. 3 Light Beacons South of oil piers for ships approaching and manoeuvring. Bay Pilots not provided but Mooring Master provided for assistance to Master for berthing without charge. No VHF available for ship-shore communication.

ANCHORAGES: Anchorage area ranges in depth from 30 m. to 60 m. Holding ground in these areas only fair; recommended vessels lie to long scope of chain. Locally tide rise approximately 3 m. in springs and 1.5 m. neaps. Maximum tide currents Northerly 0.32 knots, Southerly 0.47 knots. Ample anchorage and manoeuvring area N.E. of terminal.

Since the holding ground in Kagoshima Bay is not very good, most vessels prefer to proceed to the open sea, outside the bay, if a typhoon is predicted to pass nearby.

RESTRICTIONS: Night entry and departure permitted subject to weather conditions. However, Harbour Master will not permit vessels loaded with oil cargoes to berth between sunset and sunrise.

MAX. SIZE:

Berth	*Max. LOA* (m.)	*Max. Draft* (m.)	*D.W.T.* (tons)
1	300	16.2	33,000–150,000
2	300	16.2	33,000–150,000
3	400	25.2	33,000–450,000
4	450	30.6	up to 500,000

HEALTH: Radio Pratique available. Quarantine Officers board the vessel either at the Quarantine Anchorage or at the pier, depending on availability of berth.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: Mooring and unmooring assistance provided by 4×3,200 h.p. tugs.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by telex.

MEDICAL: Advance notice required if arriving at weekend.

TANKERS: (Crude oil only).

Berth No.	*Connections*	*Discharge Rate*
1	4×12 in.	10,000 k/l (loading/unloading)
2	4×12 in.	10,000 k/l (loading/unloading)
3	6×16 in.	27,600 k/l (unloading) 12,000 k/l (loading)
4	2×16 in. 3×24 in.	9,200 k/l (loading/unloading) 30,000 k/l (unloading) 12,000 k/l (loading)

Berthing Procedures and Mooring: The counter current in the bay is anti-clockwise and in the berthing area runs in a S.E. to South-Southeasterly direction, parallel to the berthing face of the berths, at a rate of about 0.5 knots. As a result, vessels always berth port side to.

The normal berthing procedure is to bring the vessel to a stop at a position about 150 m. off the berth, parallel to berthing face, and then to warp her alongside with tug assistance.

Since all berths are surrounded by submersible oil booms, anchors cannot be used when close to the berths.

Berth No. 4 has been designed to permit safe berthing of a 500,000 d.w.t. tanker with a berthing velocity of 20 cm./sec., but normally the berthing velocity is less than 10 cm./sec.

The sequence of bringing out mooring lines depends on tide and wind direction, but normally spring lines first (heaving lines first) and then the other lines (direct in the launch). 2 mooring launches attend (115 h.p. and 165 h.p.)

The usual mooring configuration at Berth No. 4 is forward: 4 headlines, 3 breast lines, 3 spring lines; aft: 4 stern lines, 3 breast lines, 3 spring lines. (A total of 20 lines). During the Winter Northwesterly storm periods, it is usual to add forward and aft each one breast line and one spring line, making a total of 24 lines. At Berth No. 3 under normal conditions, 18 lines are used and in Winter, 18 lines. During the Winter Northwesterly storm periods moorings at Berth No. 3 moorings are same as Berth No. 4.

Tension winches must be set to manual operation and the brakes must be securely applied.

All mooring lines will be inspected by the terminal prior to commencing cargo operations and they have to be in good condition. Also, regular inspections of moorings are carried out during the cargo operations.

DENSITY: 1025.

FRESH WATER: Water obtainable at berth on oil piers at rate of 30 t.p.h.

FUEL: Domestic oil is available from Kagoshima and bonded oil will be lightered from Moji area, when required.

FIRE PRECAUTIONS: Very strict Safety Regulations.

Disregard of regulations will result in stopping all loading or unloading operations and the vessel being ordered off berth for appropriate action to be taken.

CONSULS: None.

REPAIRS: Minor repairs, including equipment/instrument service, can be carried out by Tokyo Tanker Kikoh Co.Ltd. Advance notice required.

DRY DOCKS: None.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Distance from airport about 2 hours by car. ANA, JAL and JAS (TDA) airlines serve daily.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police station Tel: 110; Fire brigade station is located at terminal and Ambulance available at that station.

TELEPHONE: Telephone placed on board at Terminal free of charge for inter-office communication.

SERVICES: All services available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer.

GARBAGE DISPOSAL: Service not available.

WASTE OIL DISPOSAL: Service not available.

SEAMAN'S CLUBS: Kiire Seamen's Club, 1033 Nakamyo, Kiire-Cho, Kagoshima, 891-02 Japan. Tel: 0993-45-0156. Facilities: International telephone and public bar.

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
3 Voyage Memos (Ports of call).
Last Port Clearance.
5 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent, giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours' and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position: Lat. 34° 35′ N., Long. 135° 08.24′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel). Position: Lat. 33° 13′ N., Long. 131° 55′ 38″ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Mesaki, at East side of Kanmon (Shimonoseki) Straits. Position: Lat. 33° 57′ N., Long. 131° 03′ E.

ANCHORAGE: Lat. 34° 03′ N., Long. 132° 51′ E. Water depth: 15 – 30 m. Anchorage located about 350 m. off beach. Holding ground good and Port faces Iyo-Nada and located Bungo Channel. Current at berth and off shore very strong. During Winter months strong N.W. wind prevails.
RESTRICTIONS: Mooring and unmooring daytime only and to be carried out on flood tide.
MAX. SIZE: 88,450 d.w.t., LOA 237 m. and Max.draft 16.0 m.
HEALTH: Closed port. Vessels should obtain Pratique at Matsuyama and Sekisaki, also Radio Pratique available in this port.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to contact Choshi and North bound to contact Nagasaki Radio respectively.
TUGS: Join vessel at sea anchorage, always using tugs line without charge. 2 to 4 tugs are required for berthing, depending on size of vessel. 3 tugs are normally used for unberthing.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
MEDICAL: No advance notice required unless urgent.
TANKERS: *Taiyo Oil Co. Terminal.* 2 tanker berths available.

Berth	*Type Cargo & diameter/Number of shore pipes*	*Discharge rate Kl.p.h.*
Dolphin Berth	Crude oil 24 in.×1(12 in.×2)	4,500
	Motor Gasoline 18 in.×1(12 in.×1)	1,600
	Kerosene 12 in.×1 (10 in.×1)	800
	Gas Oil 8 in.×2 (10 in.×1)	800

DENSITY: Anchorage 1015. Berth 1015.
FRESH WATER: Fresh water not available but usually brought by barge from Onomichi (about 6 hours run to Kikuma). Rate of delivery 80 tons to 200 t.p.h. dependent on barge.
FUEL: Can only be supplied by barge from Hanshin and Kanmon area, provided 5 days notice is given. All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from nearest bunker stock ports at maximum 7 days prior notice.
CONSULS: No consuls. The nearest Consulates in Kobe.
REPAIRS: Only minor repairs.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
REPATRIATION: Possible. Nearest Immigration Office situated at Matsuyama.
AIRPORT: Nearest Matsuyama, distance 50 km.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: See "Kobe".
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but 7 days extension possible if ship stays longer.
GARBAGE DISPOSAL: Not compulsory.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Japanese Yen.
GENERAL: As this port is a closed port, the undermentioned procedures required: In conformity with regulations vessel required to obtain special permission to enter from Shikoku Maritime Bureau.

Customs request vessel call at Kikuma to obtain special permission for entering at preceding port, by paying the charge at the same rate of tonnage dues.

Prior to arrival of a vessel, the above procedures will be undertaken by Agent.

No quarantine available, the nearest quarantine station is located at Matsuyama.

No Immigration Office at this port (coming from Matsuyama).

Customs:

Required upon vessel's arrival by:
Customs Officer: Okinawa Customs Branch, Henza Sub-Branch Office.
Location: 2972 Aza Henza Yonashiro-Son, Okinawa (Tel: 09897-7-8558).

1. When ship arrives direct from foreign port, Customs Officer will board vessel for search. Following documents to be submitted.
5 copies Crew List.
3 copies Passenger List.
1 copy Stores List.
1 copy Crew's Baggage List.
4 copies Ports of Call List.
1 copy International Health Declaration.
Ship's Register.
International Load Line Certificate.
Last Port Clearance.
Bill of Lading.

Ship's Agent will prepare Inward Declaration, one Cargo Manifest, Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

2. When ship comes from Japanese port, Customs Officer will not attend on board except special case. Agent to attend Customs House for entry formalities with following documents.
Crew List and Passenger List.
Stores List.
List of ports of call on current voyage.
(Last Port Clearance and Documents entrusted with the Master by Customs at previous port).

Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Immigration:

Required upon vessel's arrival by:
Immigration: Naha Immigration Kinwan Sub-Branch Office.
Location: 2628-2 Ishikawa City, Okinawa (Tel: 09896-4-2858).

1. When ship arrives direct from foreign port, Immigration Officer will board vessel for check. Following documents to be submitted.
Crew List. . . . . 2 copies
Passenger List. . . . . 2 copies

Please collect the Crew Seaman's Book in order such as No. 1, No. 2 . . . till the end as per Crew List stated.

Please collect the passports in order such as No. 1, No. 2 . . . till the end as per Passenger List stated.

Ship's Agent will prepare Inward Vessel Declaration, one application for shore pass, one application for extension of the area of movement using specific forms.

2. When ship comes from Japanese port, Immigration Officer will not attend on board, except special cases. Agent to attend Immigration Office for entry formalities with following documents.
Crew List. . . . . 2 copies
Passenger List. . . . . 2 copies
Seamens' Books
Passports

Documents (Shore Passes) entrusted with the Master by Immigration at previous port. Ship's Agent will prepare Inward Declaration, one application for Shore Pass, one application for Extension of the Area of Movement using specific forms.

APPROACHES: See "Berthing" – Report dated 1983.

PILOTAGE: Also see "Approaches".
Berthing Masters will normally board from a tug having a blue hull and cream upperworks, with a tall mast bearing a number (1, 2, 3 or 4). Since the tugs have a fairly high freeboard, pilot ladders should be rigged with the bottom step about 6 ft. (2 m.) above the water level, otherwise the lower steps may be crushed or damaged. Vessels with a freeboard exceeding 30 ft. are requested to rig the pilot ladder in conjunction with an accommodation ladder in the approved manner.

Masters of calling vessels are reminded of their obligation to comply with statutory rules and are requested to comply with International recommendations concerning pilot ladders. If the ladder is not safe, the Berthing Master may refuse to board and thus cause unnecessary delay to the ship.

ANCHORAGES: Recommended anchorages: Also see "Berthing" – Report dated 1983.

For mammoths in order of arrival:

K1:	Lat. 26° 24′ 00″ N., Long. 127° 57′ 48″ E.
K2:	Lat. 26° 23′ 30″ N., Long. 127° 57′ 12″ E.
KE:	Lat. 26° 25′ 00″ N., Long. 127° 58′ 10″ E.
KW:	Lat. 26° 25′ 12″ N., Long. 127° 55′ 24″ E. (for vessels over 100,000 g.r.t. and requiring long stay).

(Subject Japanese Coastguard M.S.A. approval is obtained by Agent.)

For vessels 50,000 d.w.t. – 150,000 d.w.t.

KS:	Lat. 26° 23′ 06″ N., Long. 127° 56′ 43″ E.
S1:	Lat. 26° 22′ 30″ N., Long. 127° 56′ 48″ E.
S2:	Lat. 26° 22′ 00″ N., Long. 127° 56′ 48″ E.

Products anchorage: The area bounded by a line joining the following positions:

1.	Lat. 26° 22′ 00″ N., Long. 127° 56′ 29″ E.
2.	Lat. 26° 22′ 13″ N., Long. 127° 56′ 33″ E.
3.	Lat. 26° 22′ 00″ N., Long. 127° 57′ 19″ E.
4.	Lat. 26° 21′ 51″ N., Long. 127° 57′ 05″ E.

The holding ground is good in anchorages, but depths in the first groups between 22 and 25 fathoms; it is therefore recommended that at least 1 shackle of chain be walked back on the windlass before letting go the anchor.

Depths in the product anchorage vary between 10 and 14 fathoms.

Prior to anchoring, vessel must obtain permission from Nakagusuku Maritime Safety Agency Office, who designates the anchoring position. *Prohibited Anchorage:* Owing to the existence of underwater pipe-lines, telephone cables and obstructions, anchoring is prohibited anywhere S.E. of a line joining the following 2 positions:

1. Lat. 26° 22′ 31″ N., Long. 127° 58′ 08″ E. (i.e. the N.E. dolphin of the Sea Island)
2. Lat. 26° 21′ 37″ N., Long. 127° 56′ 44″ E. (i.e. the N.E. dolphin of No. 3 Berth on the Products Pier)

For berthing, Masters of vessels are requested to have the propeller submerged and vessel in a reasonable trim for ship-handling purposes (not exceeding 3.5 m.).

RESTRICTIONS: Berthing operation is permitted during daylight only. Unberthing operations take place throughout 24 hours.

There are no specific restrictions on draft, but in order to ensure safe handling characteristics it is recommended that vessels arriving in ballast arrange that the propeller is fully submerged, with a stern trim not exceeding about 10 ft. Vessels which do not meet this requirement may be delayed in berthing until additional ballast has been run in.

MAX. SIZE: 5 berths are available for calling tankers. Berth No. 1 can accommodate vessels up to 500,000 d.w.t., and Berth No. 2 vessels up to 150,000 d.w.t. These 2 berths are situated at the offshore platform. Berths No. 3, No. 4, No. 5 are situated at the Product Dock. (Also see "Berthing").

Berth No.	*Max. d.w.t.*	*Least depth of water below datum*	*Remarks*
Sea Berth 1	500,000	102 ft.	
Sea Berth 2	150,000	90 ft.	
Prod. Pier 3	60,000	50 ft.	Max. dist. stern to manifold 320 ft.
Prod. Pier 4	20,000	36 ft.	
Prod. Pier 5	10,000	30 ft.	

In addition to the above tanker berths a dry-cargo berth is also available. This berth is 110 m. in length and has a least depth of 22 ft. below Okinawa Datum.

HEALTH: Quarantine Office: Naha Quarantine Office. Location: Naha Godo Chosha Bldg., 11-1, 2-chome, Minato-Machi, Naha, Okinawa (Tel: 0988-68-1674).

At first port of call in Japan, vessel may obtain Free Pratique.

Quarantine Officer will attend vessel only from daylight to sunset, and Master to show all vaccination cards and Derat Exemption Certificate. If vessel arrives from infected area crew and passengers' health condition to be cabled to Quarantine Officer through ship's Agent prior to arrival, and close all soil pipes before entering port.

(1) *Radio Pratique:* Free Radio Pratique Telegrams to Quarantine Station not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival.

Maritime Declaration of Health	1 copy
Crew List and Passenger List	1 copy
Vaccination List	1 copy

(2) The following vessels will not be able to obtain Radio Pratique.

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has onboard any case, or any suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: When on route to the Kin Wan Port at Okinawa a vessel's ETA must be communicated to his Agent, 72, 48 and 24 hours prior to arrival. If VHF is not available arrival information can also be passed to your Agent by "Ship Telephone Service". Naha: 09885-4-5155.

It is important that ETAs are confirmed 12 hours before expected arrivals and amendments communicated when known.

VHF station "Kin Wan Tug" located on Henza Island keeps a 24 hour listening watch on Channel 16 (156.800 MHz) and Channel 13 (156.650 MHz). Tel: 09897-7-8341 is also manned 24 hours per day.

RADAR: The port is not equipped with radar. Poor visibility may occur in heavy rain, but fog is rare. Coastlines and buoys within the bay give good echo returns on ship's radar. All tugs are fitted with radar, and on occasions vessels have been guided into the port by them in heavy rainstorms, the tug keeping close alongside within sight of the bridge, and communicating by VHF.

TUGS: 4 tugboats are stationed at the Terminal. The Berthing Master in consultation with the Master will decide the number of tugs required for each berthing operation and as stand-by tugs during the vessel's stay in port.

Vessels are berthed with the assistance of up to 4 tugs according to the vessel's size and weather conditions. Such tugs will either secure alongside, "American style", or will secure forward or aft by their towing hooks. Tugs' lines are always used. The tugs are 2×3,400 h.p. Z-peller, 2×2,600 h.p. Z-peller and 2 small twin-screw tugs 400 h.p., and are manned by highly skilled crews. It should be noted that the port charges for vessels are a fixed amount based on deadweight tonnage, and this charge is not affected by the number of tugs used or not used. Masters may thus follow the Berthing Master's recommendations regarding tug requirements without having to consider what may well be dangerous economies.

READINESS: A vessel is "arrived" for Notice of Readiness purposes, when the Berthing Master boards or, if vessel proceeds to anchorage without a Berthing Master, when she drops her anchor.

BERTHING: In normal circumstances no lines are run out until the vessel is alongside the berth and in position. Tugs will hold her there whilst the mooring takes place, springs usually being run first, followed by breastlines, then head- and stern-lines. On the larger berths all lines except springs are lowered to the water and taken to the dolphins by line-handling boats, where they are secured to quick-release hooks. Nothing is required in the way of pennants, tails or shackles. Spring are passed direct to the dolphins by heaving-lines.

Owing to the depth of water, anchors are not normally used whe berthing at the sea-berth. However, the outboard anchor should in a cases be ready for emergency use.

Weather permitting, vessels secure starboard side alongside a Berth No. 3. At Berths No. 4 and 5 vessels can only berth starboar side to the pier, owing to the construction of the berths. Therefore if win conditions do not permit of berthing in this way, the berthing will b delayed until the wind is suitable. At the sea-berth, mammoth vesse normally berth port side to the pier, but this is only to reduce the tim taken for the operation, and they can be berthed starboard side to conditions require it. Smaller vessels are berthed either way accordin to requirements and conditions.

The Marine Office is equipped with a Weather Facsimile Recorde and Masters can obtain the latest information regarding possible stor conditions by contacting the Berthing Master on VHF Channel 13 or b calling 580 on the internal telephone system from the berths. Whe typhoons are imminent all cargo operations cease and vessels ar required to vacate the berths and are recommended to proceed to se

Berth No. 1: Also see "Report" dated 1983 (below).

Owners: Okinawa Terminal Company Ltd.

Position: Lat. 26° 22′ 25″ N., Long. 127° 58′ 01″ E.

Depth: 30 m. (MLWS).

Max. Size: 385 m. LOA, 70 m. beam, 26 m. draft. 500,000 d.w.t.

Services: Fresh water not available.

Loading Rates: Bunkers/HFO 3,000 kl/h, product 2,000 kl/h. Cru 12,000 kl/h., Ballast 4,000 kl/h. Max. pressure 250 p.s.i.

Berth No. 2: Also see "Report" dated 1983 (below).

Owners: Okinawa Terminal Company Ltd.

Position: Lat. 26° 22′ 25″ N., Long. 127° 58′ 01″ E.

Depth: 28 m. (MLWS).

Max. Size: 305 m. LOA, 45 m. beam, 20 m. draft. 150,000 d.w.t.

Services: See Berth No. 1.

Loading Rates: See Berth No. 1.

Berth No. 3

Owners: Okinawa Sekiyu Seisei K.K.

Position: Lat. 26° 21′ 34″ N., Long. 127° 56′ 40″ E.

Depth: 15.5 m. (MLWS).

Max. Size: 240 m. LOA, 35 m. beam, 13.5 m. draft.

Services: Fuel oil (bunkers) available, 70 kl/h. 6 in. hoses used. Fres water available, but not fit for drinking.

Loading Rates: Aviation, JP4 and Naphtha, 500 kl/h × 2 low sulphu FO 1,000 kl/h × 3. Fuel oil and diesel 1,000 kl/h. Max. pressure 15 kg sq.cm.

Vessels normally berth starboard side to.

Berth No. 4

Owners: Okinawa Sekiyu Seisei K.K.

Position: Lat. 26° 21′ 29″ N., Long. 127° 56′ 48″ E.

Depth: 11.5 m. (MLWS).

Max. Size: 175 m. LOA, 22 m. beam, 10 m. draft limiting conditio 90 m. stern to manifold.

Services: Fuel oil available, rate 70 kl/h. Chicksan used. Fresh wate available, but not fit for drinking.

Loading Rates: Aviation, JP4, JP1, kerosene 500 kl/h × 2. Lo sulphur F.O. 600 kl/h. diesel 1,000 kl/h, fuel oil "A" 1,000 kl/h. Maximu pressure 15 kg./sq.cm.

Vessels berth starboard side to.

Berth No. 5

Owners: Okinawa Sekiyu Seisei K.K.

Position: Lat. 26° 21′ 28″ N., Long. 127° 56′ 58″ E.

Depth: 10 m. (MLWS).

Max. Size: 110 m. LOA, 17 m. beam, 8.5 m. draft limiting conditio 10,000 d.w.t.

Services: Fuel oil, 6 in. hose, 70 kl/h diesel, 6 in. hose, 700 kl/h. Fres water available, but not fit for drinking.

Loading Rates: JP4, JP1, kerosene, diesel and fuel oil "A" 700 kl Max. pressure 20 kg./sq.cm. sulphur, 120 kl/h, max. pressure 15 kg sq.cm. low sulphur fuel, 600 kl/h max. pressure 20 kg./sq.cm LPG 200 kl/h max. pressure 27 kg./sq.cm.

Vessels berth port side to.

Operator's Report: 1983.

Okinawa Terminal Co. Ltd. (OTC) Sea Berth (Discharging and loadi terminal): Operated by OTC.

Terminal operates 24 hours per day, 7 days a week. Ships moor and unmoored at anytime, weather or other circumstances permittin Terminal will not be closed on any holidays.

Location: Lat. 26° 22′ 25″ N., Long. 127° 58′ 01″ E.

Pilotage: Compulsory.

Anchorage: (See "Plan") Anchorages are in the following position Approval of The Captain of the Port of Kim-Nakagusuku must b obtained through Agent prior to arrival

K1: Within a radius 700 m. Lat. 26° 24′ 00″ N., Long. 127° 57′ 48″ For vessels of 100,000 g.r.t. or over.

K2: Within a radius 700 m. Lat. 26° 23′ 30″ N., Long. 127° 57′ 12″ For vessels of 100,000 g.r.t. or over.

KE: Within a radius 700 m. Lat. 26° 25′ 00″ N., Long. 127° 58′ 10″ For vessels of 100,000 g.r.t. or over.

KW: Within a radius 700 m. Lat. 26° 25′ 12″ N., Long. 127° 55′ 24″ For vessels of 100,000 g.r.t. or over.

KS: Within a radius 600 m. Lat. 26° 23′ 06″ N., Long. 127° 56′ 43″ For vessels of maximum 100,000 g.r.t.

S1: Within a radius 400 m. Lat. 26° 22′ 30″ N., Long. 127° 56′ 48″ For vessels of maximum 10,000 g.r.t.

S2: Within a radius 400 m. Lat. 26° 22′ 00″ N., Long. 127° 56′ 48″ For vessels of maximum 10,000 g.r.t.

Approaches: For the purpose of Traffic Separation and Control, th approach to Kin Bay is divided by a channel centre line joining th following positions. Lat. 26° 26′ 00″ N., Long. 128° 02′ 00″ E. and Lat. 26° 24′ 47″ N., Long. 127° 59′ 26″ E.

Vessel should make for position Lat. 26° 26′ 00″ N., Long. 128° 04′ 00″ E. off the East coast of Okinawa and from there steer to the West, passing Menguisho light beacon abeam to port at a distant of about 1.25 miles. The Berthing Master will board VLCC's (150,000 d.w.t. or over) or any ship which is on a first visit to the port.

When vessels are abeam of the beacon (but if circumstances should prevent this, the ship should continue on the Western course for one mile past the beacon) alter course to 242°, after about 1.4 miles on this new course the ship will be at the inner pilot boarding area.

Berthing:
Maximum rate 4,000 kl/h
West side of sea berth (No. 1 berth)
Max. size 500,000 d.w.t., Max. draft 26.0 m.
East side of sea berth (No. 2 berth)
Max. size 150,000 d.w.t., Max. draft 20.0 m.

Ballast: Disposal of dirty ballast water over the side is strictly prohibited by the Authorities and any pollution of the sea will result in heavy claims and fines.

No ballast is to be taken from the bay unless required for the ship's segregated clean ballast system. Ballast for cargo tanks will be supplied by the terminal.

LOADING: Loading lines at the berths are as follows: *(Note:* Hoses are listed from N.E. to S.W.)

Berth No.	*Dia. (in.)*	*To handle*	*Type*
1	16	Products	Chicksan arm with Q/C
	16	Crude/HFO	Chicksan arm with Q/C
	16	Crude/ballast	Chicksan arm with Q/C
	16	Crude/ballast	Chicksan arm with Q/C
	16	Crude	Chicksan arm with Q/C
	16	Ballast	Chicksan arm with Q/C
2	16	Product	Chicksan arm with Q/C
	16	Crude/HFO	Chicksan arm with Q/C
	16	Crude/ballast	Chicksan arm with Q/C
	16	Crude/ballast	Chicksan arm with Q/C
	16	Crude	Chicksan arm with Q/C
3	4	Bunkers (DO, FO)	Flexible hose
	10	Ballast	Mechanical arm
	10	Naphtha/JP4/kero.	Mechanical arm
	10	Naphtha/JP4/kero.	Mechanical arm
	12	Ballast/LSFO	Mechanical arm
	12	Low sulphur fuel	Mechanical arm
	12	Low sulphur fuel	Mechanical arm
	6	Bunkers (DO, FO)	Flexible hose
4	10	Ballast	Mechanical arm
	10	JP4, Jet A1, kero., naph.	Mechanical arm
	10	JP4, Jet A1, kero., naph.	Mechanical arm
	10	Automotive or marine diesel	Mechanical arm
	10	Low Sulphur (FO)	
	6	Bunkers (DO, FO)	Flexible hose
5	6	Auto/marine diesel, kero.	Flexible hose
	4	LPG vapour return	Flexible hose
	6	LPG/propane/butane	Flexible hose
	6	Liquid sulphur	Mechanical arm
	6	Bunkers (FO, DO)	Flexible hose

During cargo transfer or ballast operation all vessels shall show signal flag "B" during the day, and a red light during the night.

Transfer operation shall not be started, or if started shall be discontinued by either the duty officer of the vessel or the Terminal supervisor, when any of the following conditions come to his attention:

(*a*) During severe electrical storms.
(*b*) If a fire occurs on the pier or on the vessel.
(*c*) If there is not sufficient competent personnel aboard the vessel or on the pier to safely handle cargo operation in progress.
(*d*) Should any condition develop which represents a hazard to the vessel or Terminal installation.

MEDICAL: Agents should be given advance notice of medical or dental attention required. Clinic and hospital facilities are available, and in emergencies helicopter evacuation is possible. There is also a Company ambulance on Henza Island, for emergencies only. Tel: 119. If no answer, or at night, telephone 318. Or contact C.C.D. (Central Control Desk) on VHF Channel 16 or 13 or Tel: 580.

DENSITY: The bay is open to the sea, and normal density is 1025.

FRESH WATER: Available at Berth Nos. 3, 4 & 5, but not fit for drinking.

FUEL: All grades of bunkers are available at Nos. 3, 4 and 5.

FIRE PRECAUTIONS: Smoking and use of naked lights is strictly prohibited on board vessels alongside the berths, except in those enclosed spaces aboard ship specifically designated by the Master as "Smoking Areas".

Fire wires of steel must be hanging over the side of the offside bow and quarter whilst alongside to enable tugs to connect readily in an emergency situation. The towing eyes should be maintained at water level.

Boiler tubes must not be blown whilst vessel is alongside and every precaution must be taken to prevent sparks and soot particles escaping from the funnel.

Mooring of boats or craft with mechanical propulsion alongside a vessel loading/discharging crude oil or in the process of ballasting, is not allowed, unless special permission has been given by the Terminal.

In case of a fire aboard a vessel alongside the pier the following sequence of procedure should be adhered to:

(*a*) "Kin Wan Tug" to be informed immediately.
(*b*) All cargo operations to cease forthwith.
(*c*) MOV's and gate valves on loading arms, nitrogen and battery limit valves to be closed as soon as possible.
(*d*) Dock personnel to stand-by for disconnecting loading arms, unberthing or fire-fighting in accordance with instructions issued by the Berthing Master or "Kin Wan Tug".

During an emergency situation on board a vessel alongside, the Berthing Master will be in charge of organising the preliminary fire-fighting assisted by "Kin Wan Tug". He is to make use of all available means at his disposal, such as tugboats, launches, personnel, terminal equipment and other facilities to assist the vessel and protect lives and Terminal installations. Should the Berthing Master be unavailable or unable to communicate, "Kin Wan Tug" will direct the preliminary fire-fighting.

Kin Bay area comes under the jurisdiction of the 11th District of the Japanese Coast Guard and lies in Kin Nakagusuku Port. The telephone number of the Captain of the Port-Coast Guard Offices, 11th District is 098895-4874 or 5439.

CONSULS: At present the only Consulates on Okinawa are those of U.S.A., Korea and Philippines.

REPAIRS: Only minor repair facilities are available in Kin Wan, for such small components as can be sent ashore, e.g. repairing of valves or piping, re-winding of electric motors.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Shore gangways are fitted at Nos. 1, 2 and 3, and are supplied free of charge. Ship's gangways must be provided at Nos. 4 and 5. Watchmen are not required since access to the berths is controlled by the Company's security guards at the installation gates.

REPATRIATION: Crew changes and/or repatriation can be arranged by the Agent.

AIRPORT: Kin Wan Port is about 2 hours by car from Naha Airport (depending on traffic conditions) from where there are frequent services by several major airlines to all parts of the world via Tokyo, Honolulu, Taipei or Hong Kong.

TIME: Local time is 9 hours ahead of GMT, unchanged throughout the year.

HOLIDAYS: Local holidays do not normally affect operations in the port. Bank Holidays are now basically the same as those in other Japanese ports.

POLICE/AMBULANCE/FIRE: Ambulance 119 after hours or 580 (C.C.D.) or VHF 16; Fire 119 after hours or 580 (C.C.D.) or VHF 16; Police inform C.C.D. by VHF Ch. 16 or Tel: 580, or Berthing Master Tel: 578.

TELEPHONES: Telephones are not placed on board, but for urgent ship's business arrangements can be made for calls to be placed through the Company switchboard.

SERVICES: Tank-cleaning alongside is prohibited, but facilities for discharge of tank washings are available. See "Pollution Control".

SHORE LEAVE: For reason of safety the Terminal and the Off-Shore Platform are restricted areas. However, ship's personnel and visitors to ships are permitted to disembark and embark via the dolphins, which are also the personnel landing areas. Loitering at the loading platform will not be permitted.

Unauthorised or apparently intoxicated or disorderly persons shall be prohibited from entering the pier and the Terminal.

Shore passes will be issued by the Agent. These passes must be surrendered to the Agent prior to the ship's departure, unless the vessel is bound for another port in Japan when they can, after stamping, be used in the second port. The pass is sufficient, and no other means of identification need be carried when ashore.

POLLUTION CONTROL: Gas-freeing is not allowed on tankships alongside the pier.

To minimise the chances of pollution *all* ballast, whether clean or dirty, *must* be discharged ashore, except that which is contained in independent "permanent" ballast tanks. Also all ballast loaded into cargo tanks must be taken from ashore, and not from the Bay. The shore ballast tank has a capacity of 550,000 barrels and is connected to all tanker berths.

Caution: The sea berth is surrounded by a new type of sink/float oil fence to contain any oil that may be spilled on the sea. This fence is moored in place by 36 anchors and ropes. Vessels are therefore warned against approaching this fence or using any anchors in the vicinity of the sea berth. Nor should they throw overboard any old wires, ropes or other rubbish which may foul or damage the fence or its moorings.

The Terminal will, in case of an oil spill, take such steps as may be deemed necessary to fight the pollution before it spreads. If the spill is due to faulty equipment or materials on the vessel or to negligency on the part of ship's personnel, the Terminal shall be indemnified for any expenses incurred in connection with the preventive action taken.

No ballast is to be taken from the Bay unless required for the ship's clean permanent ballast system. Ballast for cargo tanks will be supplied by the Terminal.

AUTHORITY: Okinawa Prefectural Government, 1-2-32, Izumisaki, Naha, Japan 900. *Contact:* Nobuo Oshiro, Chief of Port Division.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

For Vessels at OTC: Okinawa Terminal Co. Ltd., 6483, Aza Heianza, Yonashiro-son, Okinawa Pref. 904-24, Japan. Tel: (09897) 7-8226. Telex: 795-605 Kps J. Fax: (09897) 7-7411. Cables: Kinwanportsvc Naha.

KISARAZU (Kimitsu): 35.22 N. 139.52 E. (See Plan)

PORT LIMITS: Refer to Marine Chart No. 1067. Published by Surveys of the Hydrographic Department M.S.A., Japan.

DOCUMENTS: Arrival

Quarantine Service:

Maritime Declaration of Health – WHO Form, 1 copy.

Crew List – free form, 1 copy.

Passenger List (if any) – free form, 1 copy.

Derat (Exemption) Certificate, presentation.

Immigration Service:

Crew List – free form, 1 copy.

Passenger List (if any), – free form, 1 copy.

Passport or Seamen's Book (all of them), presentation.

Customs Inspection:

Ship's Register, presentation.

Last Port Clearance, presentation.

Crew List – free form, 1 or 2 copies.

Passenger List (if any) – free form, 1 copy.

Stores List (Japanese Customs form required).

Declaration of Crew's Baggage, (Japanese Customs Form required) i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan.)

List of ports of call including last foreign port.

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: *Berthing Pilot:* Compulsory for foreign trade vessels over 10,000 g.w.t. Application to be made to Yokohama Pilot Office, via local Agent. Pilot boards on Kisarazu Quarantine Station or entrance of approaching passage. Pilot available 0600 hrs. – 1900 hrs. for inward vessels, and 0600 hrs. – 2000 hrs. for outward vessels. Large vessels (over 60,000 d.w.t.) can enter until 1 hour before sunset and may leave up until 30 minutes before sunset.

Bay Pilot: Uraga & Nakanose on entering: Bay Pilot became compulsory in January 1977 for foreign trade vessels over 10,000 g.w.t. Application required 24 hours prior to entering by Cable to Anjin Yokosuku through Agent or direct. Pilot boarding position located on point 5.0 miles and 161° from Kannon Zaki L.H. Available any time, if any delay, change must be cabled to Anjin Yokosuka.

On leaving: Application same as on Entering. Pilot boarding on pier or off harbour.

ANCHORAGE: Refer to Japanese Chart No. 1062 (middle part of Tokyo Bay). Kisarazu Quarantine Anchorage boundary.

RESTRICTIONS: See "General".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port. A vessel may be berthed without a stay at the anchorage if Radio Pratique system used and permission of Chief of Quarantine Office. If Pratique formalities carried out locally vessel anchors 1.5 miles off No. 1 Entrance Buoy in position: Lat. 35° 21′ 54″ N., Long. 139° 50′ 35″ E.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF: Port Radio Station at Yokohama works 24 hours. Channel 16. Call sign "Yokohama Port Radio".

RADAR: Radar station at Kannonzaki which controls all vessels in Uraga Channel.

TUGS:

2 tug boats belonging to Kimitsu tug boat station.

3,200 h.p.	2 tugs

Another 16 tug boats listed belonging to Yokohama tug boat station.

2,000 h.p. – 2,500 h.p.	4 tugs
2,500 h.p. – 3,000 h.p.	8 tugs
3,000 h.p. – 3,500 h.p.	4 tugs

Tug boat's lines used free of charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by VHF.

Public: Kisarazu Quay E. Max. draft 7.5 m. at high tide. Length 260 m. Capacity 5,000 d.w.t.

Private: Kisarazu Lumber Association dolphin pier. Max. draft 10.0 m. Length 250 m. Capacity 25,000 d.w.t.

Kimitsu Works of Nippon Steel Corporation.

Centre Pier:

No. 1–4	Coastal chemical tanker, tug boat basin.
No. 5	Coastal Raw material discharging berth.
No. 6	Discharging berth of iron ore and coal. Max. draft 16.0 m. at high tide. Length of berth 304 m. Capacity 150,000 d.w.t. or 270,000 d.w.t. (Part load). Dischage rate for coal 25,000 tonnes per day.
No. 7	Discharging berth of iron ore and coal. Max. draft 18 m. at high tide. Length of berth 350 m. Capacity 200,000 d.w.t. Discharge rate for ore 30,000 tonnes per day.
No. 8	Discharging berth of iron ore and coal. Max. draft 18 m. at high tide. Length of berth 422 m. Capacity 310,000 d.w.t. Discharge rate for ore 30,000 tonnes per day.
No. 10	Coastal Limestone carrier berth.
No. 11, 12	Coastal tanker berth.

Centre Pier unloader at No. 6 & 7 – 4 units each capacity 1,500 t.p.h.

Centre Pier unloader at No. 8 – 1 unit capacity 2,500 t.p.h.

Also see "Shipmaster's Report" dated December 1991.

West Pier:

No. 1–6	Coastal small ships only.
No. 7	Loading berth of steel products. Max. draft 11 m. Leng of berth 250 m. Capacity 30,000 d.w.t. Shore crane 1 u 20 tons, 1 unit 30 tons.
No. 8	Loading berth of steel products. Max. draft 11 m. Leng of berth 250 m. Capacity 30,000 d.w.t. Shore crane 1 u 30 tons, 1 unit 20 tons.
No. 9	Loading berth of steel products. Max. draft 11 m. Leng of berth 285 m. Capacity 30,000 d.w.t. Shore crane 1 u 30 tons, 1 unit 35 tons.
No. 10	Loading berth of steel products. Max. draft 11 m. Leng of berth 230 m. Capacity 40,000 d.w.t. Shore crane 2 un each 30 tons.

East Pier:

No. 2	Loading berth of steel pipes. Max. draft 11 m. Length berth 240 m. Capacity 30,000 d.w.t. Shore crane 3 un on Berths No. 2 & No. 3 berth 30 ton.
No. 3	Loading berth of steel pipes. Max. draft 11 m. Length berth 240 m. Capacity 30,000 d.w.t. (See No. 2 Berth).
No. 4–13	Coastal ships only used for loading wire rod, angle b etc. and discharging materials.

CRANES: See "Berthing".

BULK CARGO FACILITIES: See "Berthing".

SPECIALISED CARGO-HANDLING FACILITIES: See "Berthing".

BRIDGES: None.

STEVEDORES: At least 24 hours' prior notice excluding Sundays a holidays required in order for Agent to arrange stevedores. Vessel mu constantly keep her Agent advised of ETA. If stevedores cann commence loading/unloading at time notified by the Agent, the ordere must pay for waiting time. If cargo gear not rigged on berthin stevedores will do same for ship's crew at additional cost.

Average loading rates:	Coils 75 t.p.h.
	Plates 50–60 t.p.h.
	Pipes 40 t.p.h.
	Angle 40 t.p.h.
	Wire rods 15–25 t.p.h.
Average discharging rates:	Coal 700 t.p.h.
	Iron ore 750–800 t.p.h.
	1,500–1,600 t.p.h.
	(2,500 ton unloader)
	Manganese ore 600 t.p.h.
	Iron sand 900 t.p.h.
	Coke 700 t.p.h.

MEDICAL: No advance notice required unless urgent.

TANKERS: Only coastal tankers.

DENSITY: Summer 1020, Winter 1025·5.

FRESH WATER: Available from shore line. Rate of delivery 40-50 t.p

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay. Bunke will be lightered from the nearest bunker stock ports (Yokohama a Chiba) at maximum 7 days' prior notice.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: 500,000 d.w.t. dry dock at Chiba.

SURVEYORS: Nippon K.K.K., Kimitsu Branch.

GANGWAY/DECK WATCHMEN: Not specially required unle passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening a closing hatches except steel hatches. If any time lost by ship's cre doing this work, stevedores charge ship for waiting. Recommend reque stevedores for this work unless crew can complete it before berthing

CERTIFICATES: Ship's Register to show Customs Inspector shi registered gross and nett tonnages. Valid Cargo Gear Certifica sometimes required by stevedores when cargo gear's maintenan appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take asho but no spirits.

CARGO GEAR: Usually load/unload by shore cranes.

REPATRIATION: Possible.

AIRPORT: Narita (Tokyo) International Airport is about 2 hours by c or railway.

TIME: GMT plus 9 hours. No alterations made to clocks during yea

HOLIDAYS: No cargo loaded on January 1st. Cargo discharged on holidays.

POLICE/AMBULANCE/FIRE: Kisarazu Police Station tel. 0438-2 4011; Kisarazu Fire Brigade and Fire Station tel. 0438-23-7121.

TELEPHONES: No telephones installation direct to vessels alongs wharf.

SERVICES: Provisions, laundry, ship's stores, garbage, hold cleani navigation aids. Special service are called from Chiba, Yokohama a Tokyo.

SHORE LEAVE: Local Immigration Offices issue shore pass valid only 7 days, but 7 days' extension possible if ship stays longer in Jap (up to 15 days if vessel calling at 2 or 3 ports).

IDENTIFICATION CARDS: Shore Pass and Seaman's Book requir

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Japanese Yen.

REGULATIONS: See "General".

GENERAL: Notification to Maritime Safety Agency:

According to Maritime Traffic Safety Law, The Master of large ve (over 200 m. in LOA and 10,000 g.w.t.) is required to give to Regi Maritime Safety Agency an advance report of estimated time pas the traffic route and other matters and also required to obey t instruction given by the Agencies.

Notification cable definitely to be given by 1200 hrs. (JST) on the prior to entering, directly from Master or through local Agent. Any cha in reported matters, to be reported 3 hours before the time of ente by radio communication or telephone.

Seaweed cultivation to be carried out in the vicinity of Nippon Steel Corporation Kimitsu Works so Master's co-operation with regards to the following items would be appreciated.

1. The discharge of oil or oily waste into the water is strictly prohibited by Marine Pollution Law and other related ordinance.
2. Proceeding to the cultivation area is prohibited.
3. Numerous buoys each exhibiting flashing yellow lights have been established to mark the outer side-line of the seaweed cultivation area.
4. Bunkering possible daytime only whilst in berth (sunrise to 1 hour before sunset) in the Port of Kimitsu. Bunkering also possible at anchorage.

SHIPMASTER'S REPORT: December 1991.
Vessel: 188,000 d.w.t.
Berth: Kimitsu Works – Central Pier – Berth No. 8.
Tugs: Vessel used 4 tugs for berthing and 3 tugs for unberthing. Tugs make fast between Buoys No. 5 and 6.
When berthing, the two starboard side tugs let go and push on the port side.
Signals: Inbound vessels fly intention signals and berth signal. Outward bound vessels do not fly any signals.
Pilot: The undocking pilot will normally use the accommodation ladder.
Moorings: Order of moorings: Headlines, forward breasts, forward springs, after breasts, after back springs and finally stern lines, which are passed by mooring boat which comes from forward.

AUTHORITY: Kisarazu Port and Harbour Office, 3-13-34, Kaifuchi , Kisarazu City, Chiba Pref. 292, Japan. *Tel:* (0438) 25-5141. *Contact:* Atsuko Nojima, Director.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Daito Transportation Co. Ltd., Sodegaura Branch, 1-1-21, Nagaurataku, Sodegaura-cho, Kimitsu-gun, Chiba Pref. 299-02. Cables: Daito Kisarazu. Tel: (0438) 62-5886. Telex: 3785-880 Dukca J. Fax: (0438) 62-1000.
Seitetsu Unyu Co. Ltd., 1, Kimitsu, Kimitsu City, Chiba Pref. Cables: Tetsuun Kisarazu. Tel: (0439) 52-2311. Telex: 378-5861 Tetsuun J. Fax: (0439) 52-5744.
Kimitsu: (Tepco Futtsu): Utoku Express Co. Ltd., Hiranohaitsu, 103, 3-3-6, Higashisakata, Kimitsu City, Chiba Pref. Tel: (0439) 551354. Fax: (0439) 551354.

KOBE: 34.40 N. 135.12 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
1 Stores List.
1 Declaration of Crew's Baggage.
4 Crew Lists.
4 Passenger Lists (if any).
Ship's Agents will prepare other documents such as Inward/Outward Declaration, Cargo Manifest, etc., using Japanese Custom's Forms.

PILOTAGE: Osaka Bay Pilot is compulsory for vessels over 10,000 g.r.t. Pilot boarding point is 7 miles South of Tomogashima Lighthouse (approximately Lat. 34° 10′ N., Long. 135° 00′ E.). Cable address: "Baypilot Kobe". If Bay Pilot is required, inform them 24 hours prior to vessel's arrival at Tomogashima Pilot Station.
Harbour Pilot: Pilot boards at Quarantine Anchorage at Wada-Misaki Point. Cable address: "Pilot Kobe". 24 hours' prior notice is required. When vessel moors to buoy, chain cable should be prepared.

ANCHORAGES: Quarantine Anchorage: Lat. 34° 38′ N.; 34° 38.6′ N. Long. 135° 10′ E.; 135° 11′ E.
All vessels requiring anchorage for awaiting berth, repairs, bunkering, etc., must obtain anchoring position from Harbour Master for period within 3 days.

RESTRICTIONS: Quarantine officials are available during daylight hours. Berthing is not permitted after 2000 hrs., except full container vessels.
Draft limitation in channel:
1st Fairway: 8.70 m.
2nd Fairway: 11.80 m.
3rd Fairway: 11.40 m.

MAX. SIZE:

Name of Berth	*Max. LOA (m.)*	*Max. Safe Draft (m.)*	*Depth at Berth (m.)*
Showa Sangyo	230	10.45	12.60
Tomen Silo	230	10.45	12.40
Zenno Silo	223	10.45	12.20
Kohnan Silo	250	10.82	12.20
Hanshin Silo	240	10.36	11.60

HEALTH: Quarantine Officials board vessel from daylight to sunset at Quarantine Anchorage.
Radio Pratique is available. Vessels must be in possession of a valid Japanese Sanitary Inspection Certificate.
Documents Required: Derat Exemption Certificate, Crew List, Passenger List, Maritime Declaration of Health and Vaccination Cards.

RADIO: Recommend Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radios respectively.

Kobe-Radio details:

	Security and Port message	*Port message*	*Public message*
Call sign	JGD	Kobe Port Radio	JCK
Name of Station	Coast Station or Special Service Station	Kobe Port Radio	Kobe Radio
Station Owner	5th Regional Maritime Safety Headquarters	Kobe Municipality (its Port & Telegraph Harbour Bureau)	Kobe Central Office
Frequency	444 kHz. 500 kHz. 500 kHz. 512 kHz. International VHF Channels 12, 16	International VHF Channels 16, 12, 11, 18, 20. 24-hour service.	134.9 kHz. 143 kHz. 416.5 kHz. 487.5 kHz. 500 kHz. 512 kHz. 425 kHz.

TUGS: Join vessel at entrance of fairway. Tug's lines used without extra charge. 35 tugs available (900 h.p. – 3,600 h.p.).

BERTHING: Chains must be used in mooring to a buoy. Ship must not drop anchor near a buoy when it is moored to one. Ship brought head in alongside pier except in special cases. Some berths impossible to reach after sunset,i.e. dolphin berths. This is why ships need to arrive outside breakwater before sunset.

BULK HANDLING FACILITIES: Hanshin Silo Company Berth, 11.60 m depth alongside available for vessels up to 50,000 tons d.w.t. Discharg effected by 2 pneumatic unloaders with capacity 400 t.p.h. per unit.

Kohan Silo Berth, length 214 m., depth alongside 12.2 m. equippe with 2 discharging units which can be used for grain, sugar, or genera cargo, also 1 pnuematic unloader, with capacity 300 t.p.h. and 2 gra buckets with capacity 500 t.p.h. per unit.

Kobe Steel, Berth No. 3: Length 334 m., depth 13.0 m., max. LO 260 m., beam 40.0 m., draft 11.82 m. 2 cranes available for coal an ore. Discharge rate 1,400 tonnes/p.h.

In the current development programme a total of 7 container berth are to be provided at Kobe.

STEVEDORES: At least 24 hours' prior notice excluding Sundays an holidays required in order for Agent to arrange stevedores.

MEDICAL: No advance notice required unless urgent. Hospital facilitie available.

TANKERS:

Name of Berth	Max. d.w.t. (approx.)	Max. LOA (m.)	Max. safe Draft (m.)	Mooring–Pipeline-discharging rate
Shell. Bunkers ex-barge only. No slop discharge facilities.	70,000	250	12.6	To 4 buoys. 1×24″, 1×12″ for F.O., D.O Minas/Seria Waxy Residue. Average discharge rate (1 Pipe) 1,000 t.p.h. Max. (2 Pipe) 3,000 t.p.h. (mooring possible when tide runs towards West)
MKS. Bunkers ex-barge only.	40,000	234 (breadth 33)	11.20	To 3 buoys. 2×16″ F.O. and D.O. Average discharge rate 1,000 t.p.h. Max 1,300 t.p.h. mooring possible when tide runs towards West)
MC Terminal (ex-Mitsubishi Shoji) (for L.P.G.tankers).	62,000	231 m.	10.48 m.	Alongside Pier.

Liquid: 12 in. (2 for Butane and 1 for Propane).

Vapour: 1×8 in. and 1×6 in. rubber hose.

Line alignment based on port side to, from ship's bow: PV-PL-PL-B BV.

Discharge rate: Propane 600 t.p.h. with max. manifold press 5 kg./sq.cm. Butane 800 t.p.h. with max. manifold pressure 5 kg./sq.c

MKS Buoy Berth (Noda Terminal): When approaching the berth, th vessel heads straight for the middle of the berth, taking into account th direction and velocity of the tidal stream. Vessels can berth eith heading East or West, depending on the direction of the tidal strea and always use only 3 of the 4 buoys and 2 bow anchors. When headi East the manoeuvre is as follows: When the bow approaches the li connecting the 2 Southerly buoys, drop starboard anchor, swing t starboard paying out about 8 or 9 shackles. When the vessel is abo half its length past the 2 Easterly buoys, drop port anchor. Then work vessel astern, paying out port chain and heave in starboard chain to about 4 shackles. Send ropes to 3 buoys, 2 or 3 ship ropes to each buoy, depending on weather and then secure the 40 mm. preventer wires. In this case the Southeasterly buoy is not used. 2 or 3 tugs attend. When heading West, the manoeuvre is similar, but first drop anchor, swing over to port, drop starboard anchor. In this case the Southeasterly buoy is not used. Normally 2 mooring launches are used.

TIDE: Mean height of tide 1.030 m. Some of tanker berths in West part of port affected by tide. Currents less than 1 knot inside harbour.

DENSITY: Winter: 1023 – 1026. Summer: 1018 – 1022.

FRESH WATER: Supplied from the quays at rates of 40 to 50 cu.m./hr. Three water barges available, largest with capacity 325 cu.m., can supply vessels at rates up to 300 cu.m./hr.

Possible to supply fresh water at anchorage weather permitting. 24 hours' prior notice is required.

FUEL: All grades are obtainable from major oil companies and supplied by barge.

FIRE PRECAUTIONS: LPG tankers instructed by Maritime Safety Headquarters to strictly observe safety rules. Example: checking on what is carried by those who go aboard; banning ship's stores to be loaded on to ship which is working.

CONSULS: The following countries are represented by Consuls in Kobe and Osaka area:

Argentina
Australia
Austria
Belgium
Bolivia
Brazil
Canada

Kawasaki Heavy Industries Ltd.	2 floating docks 2 dry docks

SURVEYORS: Lloyd's Register, Germanischer Lloyd, American Bureau of Shipping, Bureau Veritas, Norske Veritas, Nippon Kaiji Kyokai.

WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: By Stevedores or crew, ship's option.

CERTIFICATES: Ship's Register to show Customs Inspector for registered gross and nett tonnage. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Tobacco (per passenger or crew member). Temporary shore-leave up to 50 cigarettes (duty free); Disembarkation up to 200 cigarettes (duty free). Maximum allowable (only in case of disembarkation) up to 800 cigarettes duty free (however, 600 cigarettes – taxable).

Wines and/or Spirits: Crew member: When the ship at sea for more than 1 month, up to 6 bottles (1 bottle – duty free); less than 1 month up to 6 bottles (no duty free). Passengers: When a passenger travels for less than a fortnight up to 12 bottles (1 bottle – duty free); more than a fortnight up to 12 bottles (up to 3 bottles – duty free).

REPATRIATION: Possible.

AIRPORT: Osaka International Airport. Distance from Airport about 1 hour by car.

Domestic: Following regular airlines, Japan Air Lines, All Nippon Air Lines, Nippon Air System and Air Nippon.

International: For Far East: Japan Air Lines 27 flights per a week, Thai International Air Lines 7 flights per a week, Cathay Pacific Air Lines 21 flights per a week, China Air Lines 5 flights per a week, Korean Air Lines 28 flights per a week, Japan Asia Airways 18 flights per week.

For Europe: Lufthansa 4 flights per week, British Airways 2 flights per week.

For U.S.A.: Japan Air Lines 13 flights per week, North West Airlines 15 flights per week, United Airlines 18 flights per week.

TIME: GMT plus 9 hours. No alteration to clocks throughout year.

HOLIDAYS: 1st January (New Year's Day); 15th January (Coming-of-Age Day); 11th February (National Founding Day); 21st March (Spring Equinox Day); 29th April (Green Day); 3rd May (The Constitution Day); 5th May (Children's Day); 15th September (Respect for the Aged Day); 23rd September (Autumn Equinox Day); 10th October (Health Sports Day); 3rd November (Culture Day); 23rd November (Labour Thanksgiving Day), 23rd December (Emperor's Birthday).

SERVICES: Compass adjusting, radio/radar services, etc.

SHORE LEAVE: Crew members free to go ashore with landing passes issued by Immigration Authorities.

POLICE/AMBULANCE/FIRE: *Police:* 110; Water Police Station tel. 331–2351, 331–2354, Ikuta Police Station 331–0044, Fukiai Police Station 231–4441, Hyogo Police Station 551–0051.

Ambulance: 119.

Fire: 119; Water Fire Department 331–9951, Fukiai Fire Department 291–0401.

TELEPHONES: Possible to place telephone on board.

DELAYS: 1. Weather condition (where strong wind prevents ships entering port). 2. Tide (berths in West part of port). 3. Berths where no ships permitted berth alongside at night. 4. Where a quarantine officer or Pilot being awaited. 5. Shortage of gangs, weather.

GENERAL: When typhoon approaching, Port Captain requires ships to proceed outside breakwater.

DEVELOPMENTS: 5 additional berths, each 350 m. length and depth 15 m. are planned for the Port Island in 1996.

2 additional berths (RC – 6 and RC – 7) under construction at Rokko Island.

3 additional berths, each 300 m. LOA and depth 12 m. planned for Maya Piers.

SHIPMASTER'S REPORT: February 1980 (Updated 1992).

Sakai to Kobe:

Transit: For LPG ships this can only be accomplished in daylight.

Pilots: In normal conditions Sakai Pilot will depart at about No.5 buoys Hamadera Passage and vessel proceed to Kobe No.6 Breakwater embarking Pilot at No.3 Buoy. In weather with poor visibility take 'Bay' Pilot, no movements with visibility less than 1 mile.

Kobe:

Pilot: For vessels proceeding to Mitsubishi Storage Terminal, Pilot is embarked at No.3 Buoy and leaves at same.

Anchorage: Outside Kobe Breakwaters in areas marked on Japanese Chart. We anchored in Lima 3 area, very congested.

Best to obtain up to date Japanese Hydrographic Office Charts of Kobe and Osaka Bay as frequent changes, also BA. charts do not have incidentals like anchorage areas, Tomogashima traffic routes, lava beds, etc.

VHF: Kobe Port Radio.

N.O.R.: 1st Line ashore.

Tugs: Two powerful tugs join vessel just inside No.7 Breakwater. Cost of one tug Yen 101,700 per hour.

Terminal:

Moorings: 3,2,2, each end, Line boat available.

Tanker type jetty with mooring dolphins each end connected by catwalks.

Berth situated West end of No.2 Industrial area.

Port side to.

Gangway can be difficult to land on narrow catwalk.

No transport near ship, about 5 minutes walk to gate.

Depth: 12.50 m.

Connections: Chicksans: 12 in. liquid, 8 in. vapour return. The forward vapour return line has a right angle elbow in it. Connection and disconnection by shore personnel, can take 1.5 to 2 hours.

Quite often a vapour mixture is returned to the vessel if discharging two grades, generally acceptable if propane and butane.

Max. Rate: About 700 tonnes/p.h. both grades.

Surveyor: NKKK in attendance.

Microbus: We hired microbus for 20 persons on contract hire for 9 hours at Yen 70,000 – about £125. Easy to arrange through Agent.

Doctor: Obtainable, about £40 per visit.

Fresh Water: From the pier through Mitsubishi – will only give what Master has ordered. At 20 t.p.h. Difficult to connect American couplings. Yen 500 per tonne.

Stores: Nil on berth.

Facilities: All repairs off berth.

Walport Film and Video exchange through Agent.

Safety: Normal requirements plus fire axes each end at moorings.

General: As usual the shore line is continually changing and care is required in taking positions.

BA. 2265: Kobe Ko. New breakwater marked by temporary light buoys from Breakwater No. 6 in position 34° 39.99′ N., 135° 14.86′ E. to 34° 39.63′ N., 135° 15.19′ E. in direction 324° – 144° for 830 m.

BA. 3614: Osaka Bay. New Osaka International Airport Buoy 34° 26.9′ N., 135° 16.15′ E. in a Southerly direction for 3.5 miles and Westerly direction for 2.5 miles with causeway to shore in approx. position 34° 24.5′ N., 135° 18.2′ E. Many barges crossing from Awaji Shima.

Also see "SAKAI" – "Shipmaster's Report" – Kobe was 2nd Port of Call.

SHIPMASTER'S REPORT: December 1991.

Charts: B.A. Charts No. 2265, 3615 and 3614.

Documents: We arrived from Yokohama so the agent required:

1 copy Crew List.
1 copy Stores List.
1 copy Previous Ports List.
and the "Rider" from Yokohama.

Pilotage: Osaka Bay Pilot is compulsory for all vessels over 10,000 g.r.t. and is recommended for all foreign vessels due to the traffic density in Tomogashima Straits and from Lat. 34° 30′ N., which is very busy with traffic from the Inland Sea.

Pilots are based at Sumoto on Awaji Shima which is 12 miles from the boarding position. On departure the pilot disembarks off Olshino Hana which is at the tip of Awaji Shima in Tomogashima Straits, The pilot boat is a large craft painted orange. Vessels should call "Bay Pilot Kobe" on VHF Channel 68, they speak good English.

Approaches: Currents through Tomogashima Straits can be strong. Osaka Bay is closed to LNG/LPG vessels if the visibility falls below 0.5 miles.

Anchorage: We anchored in Area "M5" to discharge cargo into barges, the depth of water was 14.0 m. and we used 4 shackles.

Cargo Operations: Vessels discharge into coasters as fast as the pumps can handle. We used 4 in. flexi-hoses. The coasters have good fenders. Cargo Safety Personnel and Surveyors are in attendance.

Fresh Water: Fresh water is available by barge between 0900 hrs. and 1800 hrs.

The minimum supply is 50 tonnes and the cost is Yen 3,000 per tonne.

Shore Leave: A shore leave boat is available but was not used on our visit.

AUTHORITY: Port and Harbour Bureau, Kobe City Government, 5-1 Kano-Cho, 6 Chome, Chuo-Ku, Kobe, 650 Japan. *Tel:* 078-331-8181. *Telex:* 78548 Kobeport. *Cables:* Japangate. *Contact:* Promotion Division.

AGENT: Aall Barwil Agencies K.K., 3-1 Hatoba-cho, Kobe City 650, Japan. Tel: (078) 391-8031. Telex: (Overseas) J78822, (Domestic) 5622-401. Fax: (078) 331-1181. Cables: Aallbarwil Kobe.

✓

KOCHI: 33.31 N. 133.34 E. (See Plan)

LOCATION: Located on central Southern coast of Kochi Prefecture of Shikoku Island, and on border of Ehime Prefecture and Tokushima Prefecture.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 copies Crew List, including Passport numbers.
3 copies Passenger List.
1 copy Stores List.
1 copy Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore, ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality, because the fairway, channel in vicinity of the Harbour Entrance is regularly dredged, but the channel is long and narrow and the tidal streams are strong. Kochi Harbour Pilot should preferably be arranged through Agent by cable via Nagasaki Radio and Choshi Radio because VHF communication is unavailable.

The pilot is available at the Quarantine Anchorage (Lat. 33° 29′ 00″ N., Long. 133° 35′ 30″ E.) for vessels requiring pilot services. Draft limitation in the channel, depth 7.50 m. (24 ft. 7 in.) and width 170 m. (557 ft.). The pilot undertakes berthing vessels at Niida and Ushioe Berths, with draft up to 7.00 m. Vessel drawing over 6.50 m. may berth at high tide.

ANCHORAGES: *Quarantine Anchorage and Pilot Station:* Lat. 33° 29 ′00″ N., Long. 133° 35′ 30″ E. Quarantine procedures will be carried out at this point.

RESTRICTIONS: The length overall of the vessel must be less than 180 m., because the channel is long, narrow and bending, and the tidal streams are strong.

The draft restrictions are as follows: The permissible draft for LOA over 150 m. at Niida Berth (5-1/5-2), forward shall be less than 5.30 m. and aft shall be less than 7.00 m., and at Ushioe Berth (1-7), fore and aft draft of less than 6.80 m., may berth, except at low tide.

MAX. SIZE:

Ordinary Berths	Length (m.)	Max.LOA (m.)	Max.Draft (m.)	Remarks
Niida (5-1)	140	140	7.00	
Niida (5-2)	130	130	5.30	
Ushioe (1-4)	364	100	6.80	Ferry
Ushioe (1-6)	315	80	6.80	Ferry
Ushioe (1-7)	260	130	6.80	

Special Berths	Max.LOA (m.)	Max.Draft (m.)
Niida (5-1) + (5-2)	180	(F.) 5.30
Shifting not necessary		(A.) 7.00
Ushioe (1-7) + (1-6)	160	6.80

Client must pay shifting charge of vessel/ferry.

HEALTH: Radio Pratique available. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset, and Master to show all Vaccination Cards and Derat Exemption Certificate.

In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health conditions to Quarantine Office through vessel's Agent prior to arrival, and close all soil pipes before entering port.

RADIO: Recommended that Master communicates with Agent through Nagasaki Radio or Choshi Radio, which cover all ports in Japan.

VHF: No port radio, except Maritime Safety Office. Maritime Safety Office available only in emergency. The Maritime Safety Office does not accept pilot boarding times, etc.

RADAR: None.

TUGS: 2 tugs (2,200 h.p.) available in Kochi Port. Tug's lines to be used.

BERTHING: No specific requirements. Pilot boarding time will be notified by vessel's Agent mainly by radio.

Berth No.	*Cargoes*	*Remarks* (per day)
Niida (5-1) + (5-2)	American logs	700,000 Scr.
Ushioe (1-4)	Domestic cargo	
Ushioe (1-6)	Domestic cargo	
Ushioe (1-7)	Bulk cargo, coal	1,500-2,500 tonnes

Also see "Max. Size".

BRIDGE: Urado Bridge: The height from the top of the mast of the vess to sea level must be less than 39 m., regardless of tidal conditions.

Arch-type Bridge: Vessel's height will be checked and calculati prepared for Port Authorities. Centre of the bridge is more than 39 m from sea level.

STEVEDORES: Log gangs (3-4 gangs) available. Working tim 0800 hrs. to 1700 hrs., excluding Sunday and holidays.

MEDICAL: No advance notice required, except on Sundays, holiday and in an emergency.

DENSITY: 1019, average in the port.

FRESH WATER: Available from shore hydrants, except at Niida Ber Rate of delivery about 30 t.p.h. Water not available at Niida Berth or log carriers, as water barge has been scrapped.

FUEL: Bonded oil will be brought from Kobe or Shimotsu. Domestic o is available by barge. Advance notice required.

CONSULS: None.

REPAIRS: No facilities.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not specially required, unles valuable cargo on board.

HATCHES: Opening/closing normally carried out by crew.

CERTIFICATES: Ship's Register to show Customs Inspector vessel registered gross and nett tonnages. Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenanc appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashor but no spirits.

REPATRIATION: Possible. Kochi/Osaka by airplane about 1 hour, an ferry about 10 hours.

AIRPORT: Kochi Airport about 30 km. (40 minutes by car), and connec with nearest international airport (Osaka Airport). For Osaka 19 flight and others 10 flights (Tokyo, Nagoya, Fukuoka and Miyazaki) per da

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Report to Minami-Sho, nearest Police and inform your vessel's and Agent's name and reason for ca Emergency Tel: 0888-31-1233 (Minami-Sho Police). They know how t contact Agent in case of emergency.

TELEPHONES: No arrangements for placing telephone on board.

SERVICES: Supply of charts available.

SHORE LEAVE: Local Immigration Office issues Landing Permit an Shore Pass, valid for 15 days.

REGULATIONS: Normal port regulations.

GENERAL: *Traffic Signals:* Vessels of over 1,000 g.r.t. and tankers o over 500 g.r.t. should inform the Harbour Authorities of their ETA/ET at the Harbour Entrance by noon of the day previous to entry/departur in Japanese. Vessels entering/departing Kochi Port are controlled b Katsurahama and Urado signals. VHF Channel 16. Tel: 0888-42-649 Call: "Kochi-Hoan".

DEVELOPMENTS: Kochi new port and new breakwater unde construction since 1988.

AUTHORITY: Kochi Maritime Safety Office, 5-4-55, Sanbashi-dor Kochi City 780, Japan. *Tel:* 0888-32-7111. *Contact:* Harbour Master.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Irimajiri Kaiun Co.Ltd., 5-10, Sanbashi-dori, 5-chome, Kochi City 78 Japan. Tel: 0888-31-5151. Telex: 5882-140 Irikai J. Fax: 0888-31-515 Cables: Irimajirikaiun Kochi.

✓

KOKURA: 33.54 N. 130.53 E. (See "Kanmon-Ko") (See Plan

LOCATION: Kokura is situated between Moji and Tobata. On the Eas is contiguous to Moji Port, on the West to Tobata Port and on the Nor it opens to the Kanmon Straits.

DOCUMENTS: When vessel arrives direct from a foreign port, Custom officials will board to search, and the following documents are to b submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (ports of call).
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camer wrist-watch, radio, firearms/swords, etc. (only at first port of call i Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Carg Manifest and Cargo Manifest in transit using specific forms. Therefor ship's Agent should be provided with necessary information about detai of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged throug Agent via Nagasaki Radio, giving 72 hours' notice. Urgent correction ETA outside business hours should be cabled direct to pilot statio Inland Sea Pilot Association covers all Inland Sea ports. Pilotag compulsory for vessels over 10,000 g.r.t. Pilots obtained from one three pilot stations dependent upon vessel's last port of departure an at Master's discretion. Pilotage available throughout 24 hours and 7 hours' advance notice preferred, thereafter advising any alteration Most Inland Sea Pilots also act as Harbour Pilots up to berth o anchorage at destination.

Note: VHF communication available with Inland Sea pilot station Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address: "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Anchorage not in use as the area is being dredged for the purpose of navigation fairway.

RESTRICTIONS: Vessel enters port only within 1 hour before and after slack tide in daytime. Night departure available up to 2200 hrs. at Hiagari Wharves No. 1-7, but departure for East side only from Nos. 5-7 for vessels up to 10,000 g.r.t., vessel moored port side alongside.

MAX. SIZE: See "Berthing".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from 0830 hrs. to 1630 hrs. at anchorage. Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi and Northbound to contact Nagasaki Radio respectively.

VHF: Shimonoseki Port Radio Station on Channels 16, 12, 14, 20 and 22. Pilots on Channel 13.

TUGS: See "Moji".

*2 cranes – capacity 1,000 t.p.h. each.

BRIDGES: Kanmon Suspension Bridge was build in 1973 across Hayatomo Channel (narrowest place in Kanmon Strait, width of fairway 530 m.), between Shimonoseki and Moji. The height of the bridge from sea level is 61 m. High vessels over 59 m. must give advance notice to Pilot Office.

STEVEDORES: At least 24 hours' prior notice, excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 hrs. – 1900 hrs. 50% additional of basic stevedorage; 2100 hrs. – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

(a) A maximum of 6 gangs are available. Stevedores, regular employees 116, temporary labourers 109. Longshoremen 459.

(b) Lighters: SKK Logistics Service Co.Ltd., lighters 25, tonnage 8,900 tons.

(c) Shore cranes:

No.	*Capacity*		*Location*	*Owners*
2	10 tons		Sunatsu Wharf	Sumitomo Metal
1	6 tons		Sunatsu Wharf	SKK Logistics
3	12 tons	outreach 18 m.	Sumitomo Metal Wharf	Sumitomo Metal
3	35 tons		Hiagari Wharves Nos. 6 and 7	Shin Nihon Steel Corp.

(d) Floating crane: Arrangeable from Moji.

(e) Average performance of loading/discharging:

Discharging: Iron ore 40/50 t.p.h./gang/hatch (by ship's gear). 200 t.p.h./gang/hatch (by shore crane). Coal 40/50 t.p.h./gang/hatch (by ship's gear). 100/150 t.p.h./gang/hatch (by shore cranes). Ordinary 10 t.p.h./gang/hatch (by ship's gear). Bulky 5 t.p.h./gang/hatch (by ship's gear).

Loading: Steel under 20 ft. long 25–30 t.p.h./gang/hatch, over 20 ft. long 15–20 t.p.h./gang/hatch.

(f) 2 shifts: 0800 to 1700 hrs. and 1700 to 0700 hrs. Normal working hours: 0800 to 1700 hrs. Refer to Moji for further information.

MEDICAL: No advance notice required, unless urgent.

TANKERS: Also see "Berthing". At Kanematsu-Goshi Oil Refinery 1×6 in. line, rate 900 t.p.h. (Fuel/diesel oil). No slop facilities available.

DENSITY: Average 1025.

FRESH WATER: Good quality fresh water supplied either from water barge or from hydrants. From hydrants at Sunatsu and Sumitomo Metal Wharves, the rate of delivery per hour is 30 tons per hydrant.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days' prior notice.

CONSULS: Korea, Tel: 0832-66-5341. Also see "Moji".

REPAIRS: All types of repairs possible.

DRY DOCKS: Mitsubishi Heavy Industries Ltd. 4 dockyards (Nos. 3 and 4 for small vessels).

	Dimensions of Docks			*Max.Size of Vessel for Docking*		
	Length (m.)	Breadth (m.)	Depth (m.)	Length (m.)	Breadth (m.)	Draft (m.)
Dock No. 1	164.13	25.0	7.04	160.00	22.50	5.50
Dock No. 2	150.10	20.0	6.88	143.00	19.30	5.00

Towa Shipbuilding K.K. 1 dockyard (max. 1,000 g.r.t.).

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Fukuoka, about 2 hours by train and taxi from Kokura station to airport. Kitakyushu Airport about 40 minutes by taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119. Public telephone booth available near by the berth.

TELEPHONES: Possible to place telephone on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 15 days when Kokura is first port of call in Japan. Extension possible if ship stays longer.

SERVICES: All services available.

SHIPMASTER'S REPORT: 1975 (Updated 1992).

Vessel discharged iron ore at Sumitomo Metal Industries.

Pilotage: Arriving from East. He Saki: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

Arriving from West. Mutsure: Lat. 33° 58′ 30″ N., Long. 130° 53′ 00″ E.

Anchorage:

He Saki: Lat. 33° 56.2′ N., Long. 131° 02.9′ E. Depth 6.7 m. – 16.7 m.

Mutsure: Lat. 34° 00.0′ N., Long. 130° 52.5′ E. Depth 19.0 m.

Departing from He Saki anchorage to arrive to port of destination in Kanmon Straits in Slack Water and only in daylight.

Normally Pilot boarding 1 hour before tide change. Allowable drafts to transit Kanmon Straits, max. 30 ft. anytime. Max. 32 ft. 10 in. at HW.

Radio Pratique: Obtained if in possession of valid Sanitary Certificate and all Certificates valid. Send cable to Agent with prefix RPM following the standard text.

Docking: Always starboard side.

Anchor: Port anchor ready for emergency.

Fenders: Prismatic rubber.

Gangway: Ship's accommodation ladder.

Discharging Facilities: 3 cranes – capacity 180 t.p.h. each.

Departure from Dock: Undocking only in daylight and about 1 hour before slack water. 3 tugs are necessary for turning the vessel in the narrow basin to head out.

Under construction 2 unloaders, cantilever bridge type, with capacity of 1200 t.p.h. each.

AUTHORITY: Kitakyushu Port and Harbour Bureau, 2-7 Nishi-Kaigan, 1-chome, Moji-ku, Kitakyushu City, Fukuoka Pref., 801 Japan. *Tel:* (093)-321-5941. *FAX:* (093) 321-5915.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Moji, 9-7, Minato-machi, Moji Ward, Kitakyjushu City, Fukuoka Pref. 801 Japan. Tel: (093) 321-4261. Telex: 7153-11 Greenm J. Fax: (093) 321-4288. Cables: Greenship Moji.

TOKUSHIMA-

KOMATSUSHIMA: 34.00 N. 134.36 E. (See Plan)

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 5 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. 3 authorised licensed Pilots available.

ANCHORAGES: Situated at Western corner of Komatsushima Bay and port protected by three breakwaters, North, East and South covering 396,700 sq. m. Depths of water at anchorages as follows:

(a) Inside Breakwater 8 m. – 10 m.,
(b) Outside Breakwater 8 m. – 13 m.,
(c) Wharf 8.50 m.

RESTRICTIONS: Vessels must get permission and instructions where to anchor from Port Captain before arrival. Wharf and Inner Harbour: Entering and sailing usually only during day-time regardless tide and current. Outer Harbour: Entry and sailing anytime.

MAX. SIZE: Anchorage inside breakwater: Length 175 m., breadth no limit, draft 8.50 m.

Anchorage outside breakwater: Length 200., breadth no limit, draft 10.0 m.

Shinko Wharf: (Suitable 10,000 d.w.t.) Length 175 m. Draft 8.5 m.
Kanaiso Wharf. (Suitable 10,000 d.w.t.) Length 170 m. Draft 8.5 m.
Kanaiso Wharf. (Suitable 15,000 d.w.t.) Length 200 m. Draft 10 m.

HEALTH: Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Wharf and Inner Harbour: Join vessel at Sea Anchorage, always using tug's line without charge. Outer Harbour: No tug required in normal conditions. 1 × 3,000 h.p. and 1 × 2,400 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent generally by telegram.

KUDAMATSU: 34.00 N. 131.52 E. **(See Pla**

DOCUMENTS: When vessel arrives direct from a foreign port, Custo Officials will board to search, and the following documents are to submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of call).
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, came wrist-watch, radio, firearms/swords, etc. (only at first port of cal Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Ca Manifest and Cargo Manifest in transit using specific forms. Theref ship's Agent should be provided with necessary information about deta of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged throu Agent via Nagasaki Radio, giving 72 hours' notice. Urgent correction ETA outside business hours should be cabled direct to pilot statio Inland Sea Pilot Association covers all Inland Sea ports. Pilota compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 o Pilot stations dependent upon vessel's last port of departure and Master's discretion. Pilotage available throughout 24 hours and 72 hou advance notice preferred, thereafter advising any alterations. Mo Inland Sea Pilots also act as Harbour Pilots up to berth or anchora at destination.

Note: VHF communication available with Inland Sea Pilot Statio Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Strai Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic addre "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transiti Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegrap address "Anjin Moji". In event bad weather, recommended vesse proceed for shelter as near as possible having due regard to safety, Saganoseki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Positio Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Kudamatsu loading anchorage Lat. 33° 59′ 40″ Long. 131° 51′ 20″ E.

RESTRICTIONS: No restriction for entry into and/or departure fro anchorage during night and daytime. But berthing/unberthing effect during daytime only.

MAX. SIZE: No restriction on length, breadth, and draft for any vess entering port, but maximum safe draft for Nippon Oil Jetty 19 m., 178,0 d.w.t, Hitachi Seisakusho 9.5 m. and Toyo Kohan Wharf 9.0 m.

HEALTH: Radio Agent for Free Pratique not more than 36 hours befo arrival, advising full details of vessel and health condition on boar When Free Pratique is granted by radio, vessel will be required to sub the following documents to Quarantine Officer on arrival at Quarant Anchorage (Lat. 33° 56′ N., Long. 131° 51′ 30″ W.):

Maritime Declaration of Health.
Crew List.
Passenger List.
Voyage Memo.
Derat Certificate.
Declaration Inwards.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspec infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectio disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exempt Certificate.

RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which cover all ports in Japan specifically Westbound vessel to contact Choshi Radio, and Northbou to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel proceeding to Nippon Oil Refin Wharf at Lat. 33° 58′ 20″ N., Long 131° 53′ 30″ E. and proceeding Toyo Kohan Wharf at Lat. 33° 59′ 40″ N., Long. 131° 51′ 20″ E. Tu line used and charges for line's use is included in tug-boat opera charge. 8 tugs available, 2,000 h.p. – 4,000 h.p.

BERTHING: No specific requirements. Pilot boarding time will be noti by ship's Agent mainly by radio.

	LOA (m.)	*Depth* (m.)	*Capacity* (g.r.t.)	*Cargo*
Hitachi Wharf	175	9.5	12,000	Plant/Carri
Toyo Kohan Wharf	200	9.0	20,000	Steel Plate
Kudamatsu Public Wharf	130	7.5	5,000	General Car
Kudamatsu Public Wharf	185	10.0	15,000	General Car

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2130 – 0800 hrs. next morning 120% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Nippon Oil Refinery:

Berth	*Max. d.w.t.*	*Max. LOA* (m.)	*Max. draft* (m.)
Nippon Petroleum East	178,000	420	19.0
Nippon Petroleum West	50,000	400 (6 buoy)	12.0

KURE (including Hiro Bay): 34.14 N. 132.32 E.

(See Plan)

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
5 copies Ports of Call.
Last Port Clearance.
6 copies Crew List, including Passport numbers.
6 copies Passenger List.
1 Stores List.
Maritime Declaration of Health.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent via Nagasaki/Choshi Radio, giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea Ports. Pilotage compulsory for vessels over 10,000 g.r.t. Inland Sea Pilots board at the following positions:

1. Vessels transitting Bungo Channel:

Inland Sea Pilot boards at Sekisaki Pilot Station (33° 13′ N., 131° 56′ E.). Telegraphic address "Anjin Saganoseki".

2. Vessels transitting Kanmon Strait:

Kanmon Strait Pilot boards at Mutsure Pilot Station (33° 59.5 ′ N., 130 ° 52.6′ E.) (compulsory over 10,000 g.r.t.). Telegraphic address "Kanmon Pilot Moji", and Inland Sea Pilot boards at Hesaki Pilot Station (33° 58′ N., 131° 01.1′ E.). Telegraphic address "Anjin Moji".

3. Vessel transitting Kii Strait:

Osaka Bay Pilot boards at Tomogashima Pilot Station (34° 10′ N., 135° 00′ E.). Telegraphic address "Osakabay Pilot", and Inland Sea Pilot boards at Wadamisaki Pilot Station (34° 35′ N., 135° 08′ 24″ E.) (compulsory over 10,000 g.r.t.). Telegraphic address "Anjin Kobe".

Note: VHF communication with Pilot Station available as follows:

Name of Station	Call/Answer Channel	Communication Channel
Oita Port Radio (for Sekisaki)	16	14
Shimonoseki Port Radio (for Mutsure)	16	14
Kobe Port Radio (for Wadamisaki)	16	14

4. Most Inland Sea Pilots act as harbour pilots up to berth or anchorage at destination. If vessel requires only harbour pilot, harbour pilot boards at Kure Quarantine Anchorage (approx. 34° 13′ 30″ N., 132° 31′ 00″ E.).

Also see "Shipmaster's Report" before first port.

ANCHORAGES:

Anchorage	*Position* *Latitude*	*Longitude*	*Depth* (m.)
C	34° 13′ 51″ N.	132° 31′ 30″ E.	21.0
D	34° 13′ 29″ N.	132° 31′ 45″ E.	20.0
Y-1	34° 14′ 50″ N.	132° 31′ 08″ E.	20.0
Y-2	34° 14′ 54″ N.	132° 31′ 35″ E.	17.0
C, D & Y-1	For vessels of less than 200 m. LOA.		
Y-2	For vessels of less than 150 m. LOA.		

RESTRICTIONS: Berthing and unberthing from one hour after sunrise to one hour before sunset.

Portion of Nasami Strait (Hiroshima Bay) has depth of 17.0 m., therefore Maritime Safety Agency request bottom clearance 10% of ship's draft plus 0.5 m.

In the following cases, Inland Sea Pilot and Maritime Safety Agency request escort tug at Nasami Strait:

1. Tankers (over 50,000 d.w.t.), if vessel loaded with dangerous cargo.
2. Large vessels (LOA over 250 m.).
3. If vessel's draft over 15.0 m.

MAX. SIZE: Nisshin Steel Wharf: LOA 360 m., 276,000 d.w.t., draft 17.40 m. (as per tidal condition).

HEALTH: Vessel must obtain Free Pratique at first port of call in Japan. Radio Pratique available if vessel has Japanese Sanitary Inspection Certificate. Ordinary Pratique takes place at Kure Quarantine Anchorage.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound/Eastbound to contact Nagasaki Radio respectively. If vessel fitted with telex, they may communicate direct with Agent.

VHF: Hiroshima Port Radio on Channels 11, 12, 14 and 16.

RADAR: No port radar.

TUGS: Tugs normally join vessel at quarantine anchorage area, and tug's lines used at no extra charge (2,600 h.p. – 3,300 h.p.).

BERTHING: Berthing and unberthing from one hour after sunrise to one hour before sunset.

Nisshin Steel Wharf (Private Wharf):
Cargo : Iron ore and coal.
Length : 330 m.
Depth : 18.00 m.
Permissible LOA : 360 m.
Permissible Draft : Under 200,000 d.w.t. – 17.00 m. (draft available – 17.40 m. as per tidal condition). Over 200,000 d.w.t. – 16.30 m.
Cranes : 2×1,500 t.p.h.
Capacity : 276,000 d.w.t.

Kawaraishi South Wharf (Public Wharf):
Length : 370 m.
Depth : 10.00 m.
Permissible Draft : 9.00 m.
Capacity : 2×15,000 d.w.t.
Cranes : None.

Kawaraishi West Wharf (Public Wharf):
Length : 260 m.
Depth : 7.50 m.
Permissible Draft : 6.70 m.
Capacity : 4,000 d.w.t.
Cranes : None.

Hiro Bay:

Hiro is a part of Kure Port and Port Authorities such as Customs and Immigration will attend from Kure.

Quarantine Anchorage: Lat. 34° 11′ 57″ N., Long. 132° 36′ 33″ E.

Anchorage: Anchorage A: Lat. 34° 12′ 00″ N., Long. 132° 37′ 00″ E. Depth 18.0 m.

Anchorage B: Lat. 34° 12′ 03″ N., Long. 132° 37′ 26″ E. Depth 40.0 m. For vessels of less than 200 m. LOA.

Berthing: Berthing and unberthing from one hour after sunrise to one hour before sunset.

Name of wharf : Oji Paper Dolphin
Length : 89 m.
Permissible LOA : 195 m.
Permissible Draft : 9.0 m.
Capacity : 36,600 g.r.t.

Restrictions: Passage from anchorage to dolphin has depth of 8.0 m., therefore berthing about 2 hours before high tide.

Other conditions same as Kure.

CRANES: Floating cranes (lifting capacity from 100 tonnes to 300 tonnes) and mobile cranes (lifting capacity from 20 tonnes to 120 tonnes) are available.

BULK CARGO FACILITIES: See "Berthing".

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: No bridge restrictions at Kure Port (Hiroshima Bay area).

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep Agent advised of ETA. If stevedores cannot commence loading/unloading at time notifed by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 hrs. – 2130 hrs. approx. 60% additional of basic stevedorage; 2130 hrs. – 0430 hrs. next morning 130% additional; Sundays/holidays approx. 100% additional.

Discharging of raw materials is on "Free in/out" basis. Therefore stevedorage is to receiver's account.

MEDICAL: No advance notice required, except after office hours, Sundays and holidays. Vaccination against cholera available.

TANKERS: No facilities.

DENSITY: 1023.

FRESH WATER: Nisshin Steel Wharf: No water supply facilities at Wharf. Water available by barge (capacity 330 tonnes) from Hiroshima Port. 3 days advance notice required.

Cost per tonne:
(1) Daytime on weekday Yen 1,000. Overtime Yen 1,500.
(2) Daytime on Sundays/holidays Yen 1,500. Overtime Yen 2,000.

Public Wharf: Available from shore pipeline.

Cost per tonne: Daytime Yen 300. Overtime/Sundays/holidays Yen 450.

FUEL: Most grades of domestic and bonded oil are available, by barge with 3 days advance notice.

CONSULS: No consul available at Kure.

REPAIRS: All types of deck and engine repairs are possible.

At Nisshin Steel Wharf, small repairs can be undertaken subject to berth owner's permission.

DRY DOCKS: Ishikawajima-Harima Heavy Industries Co.Ltd.

Dry Dock	*Length* (m.)	*Width* (m.)	*Depth* (m.)	*Capacity* (g.r.t.)
No. 2	268	48.0	6.81	91,000
No. 3	370	68.0	8.96	251,000
No. 4	273	41.7	12.80	69,000

Docks No. 2 and No. 3 are building docks, and Dock No. 4 is a repair dock.

SURVEYORS: Japan Marine Surveyor & Sworn Measurers Association and New Japan Surveyors and Sworn Measurers Association available for cargo inspections.

Lloyd's Register of Shipping and American Bureau of Shipping available for registration surveys.

GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Usually opened by crew.

CERTIFICATES: Ship's Register to show Customs Inspector for confirmation of ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible.

AIRPORT: Hiroshima Airport, distance from Kure approximately 35 km. Hiroshima/Tokyo (Haneda Airport) 11 flights per day (domestic airline). Hiroshima/Seoul 7 flights per week (international airline).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: Nisshin Steel Wharf: No stoppages, unless charter party says "excluding from the laydays January 1st".

Public Wharf: No working at year end (New Year from 31st December to 3rd January), daytime only on 30th December and 4th January. Sunday and holiday working, if required, at additional charge.

POLICE/AMBULANCE/FIRE: Police Station (emergency) Tel: 110. Ambulance/Fire Tel: 119. Kure Maritime Safety Agency Tel: 0823-21-0110.

TELEPHONES: No arrangements available for placing telephones aboard.

SERVICES: All navigational apparatus can be serviced as required with minimum 48 hours' advance notice.

BANKS: Hiroshima Bank, Kure Branch, 5-4, Hondori 3-chome, Kure, Japan. Tel: 0823-21-5141. Fax: 0823-24-5575.

Sumitomo Bank, Kure Branch, 1-14, Hondori 2-chome, Kure, Japan. Tel: 0823-22-4921. Fax: 0823-21-0724.

STORING: See "Prelims".

1. At Nisshin Steel Wharf, ship's stores loading by barge.
2. Available to load ship's stores during discharge of cargo.
3. At Nisshin Steel Wharf, trucks cannot proceed alongside the berths.
4. At Nisshin Steel Wharf, cannot use forklift trucks at berth (usually load ship's stores direct to vessel by ship's crane).
5. Must obtain Customs Clearance before loading ship's stores.
6. Riggers available to assist with storing.

SHIP SUPPLY SERVICE: Makino Shipchandler, 5-1, Hondori 1-chon Kure, Japan. Tel: 0823-21-4443. Fax: 0823-21-4899.

No craft/helicopters at Kure Port.

SHORE LEAVE: Kure Immigration Officers issue shore passes, if cr members have valid Passports or Seaman's Books.

REGULATIONS: Normal port regulations.

DELAYS: If vessel arrives at night-time, it must wait for berth anchorage.

GENERAL: Kure Port is a local port which makes it difficult to arran all requirements. At least 3 days' notice helpful.

AUTHORITY: Port and Harbour Dept. – Kure City, 1-6 Chuo 4-chon Kure City, Hiroshima Pref. *Tel:* (0823) 25-3336.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Naigai Unyu Co. Ltd., 1-7, Nakadori 1-chome, Kure, Japan. Tel: 082 21-4952. Telex: 662340 Naigai J. Fax: 0823-25-3728. Cables: Naig Kure.

KUSHIRO: 42.58 N. 144.21 E. (See Pla

DOCUMENTS: Ship's Register. International Tonnage Certificate. La Port Clearance. 6 Crew Lists including Passport Numbers. 4 Ports Call Lists. 4 Passenger Lists. 1 Stores List. 1 Declaration of Crew Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearm swords, etc. (only at first port of call in Japan). Maritime Declaration Health.

Ship's Agent will prepare Inward/Outward Declaration, 1 Carg Manifest and Cargo Manifest in transit using specific forms. Therefo ship's Agent should be provided with necessary information about deta of cargoes in advance.

PILOTAGE: No telegraphic address. Previous advance notice, minimu 8 hours' advance notice ETA and any alterations. Contact pilot bo through Harbour Office/tug boats with wireless telephones. Pilot bo has no radio telephone. Pilot boat waits at Quarantine Anchorag (1,000 m. off and 280° from North Breakwater white light), and entranc of breakwater during winter period (December–March).

ANCHORAGE: Bottom sand and mud. Minimum depth 9 m. in passag and 7.5 m. in anchorage. Depth over 29.5 ft. 162,075 sq.m., Section Depth over 24.5 ft. 690,000 sq.m., Section 2 and 3; Depth under 24.5 393,600 sq.m., Section 3. Tidal range, average high-tide plus 1.533 m average low-tide plus 0.154 m., average tidal difference plus 0.953 m

RESTRICTIONS: Vessel allowed to enter and sail day and night. Pi assistance officially not compulsory but in practice necessary, and Pi service available sunrise to sunset for entry and up to 2100 hrs. sailing.

MAX. SIZE: See "Berthing".

HEALTH: Radio Pratique available. Formalities will be carried out at th anchorage. Quarantine Station 1,200 m. – 293° off Kushiro Breakwat Red Lighthouse.

RADIO: Recommended Master communicates with Agent throug Choshi Radio or Nagasaki Radio which cover all ports in Japa If specifically Westbound vessel, to contact Choshi, and Northbound contact Nagasaki Radio respectively.

VHF: Kushiro Port Radio on Channel 16.

TUGS: Usually join vessel at entrance of breakwater and ship's lines be used. 1×3,300 h.p., 1×3,200 h.p., 1×1,700 h.p. and 1×1,100 h.p

BERTHING: No specific requirements. Pilot boarding time will be notifie by ship's Agent mainly by radio. All berths limited by depth in entranc channel.

RESTRICTIONS: Pilot available daylight hours only for berthing a unberthing .
MAX. SIZE: Basic design Panamax type (60,000 d.w.t.) is acceptab Ship's draft 14.00 m., LOA 248.50 m., beam 43.00 m., d.w 88,309 tons.
HEALTH: If the vessel is in possession of the Japanese Sanita Certificate, Radio Free Pratique can be obtained by sending a messa to the Quarantine Office in Nagasaki via Agent, after which the ves can proceed directly to Matsushima. If vessel is not in possession Japanese Sanitary Certificate, it has to call at Nagasaki for ordina quarantine service, Customs and Immigration formalities, etc.

If vessel is to proceed to Nagasaki for quarantine, the pilot will anch the vessel at the outer roads (Anchorage A, Harbour Section No. 6), position Lat. 32° 42′ N., Long. 129° 48′ E.

Quarantine formalities are possible between 0830 hrs. and 1600 hr therefore the vessel has to arrive at Nagasaki Roads before 1600 hr otherwise vessel will have to stay overnight in the roads. As soon a formalities are completed, the vessel may sail for Matsushima witho a pilot.
RADIO: Recommended that Master communicates with Agent throu Choshi Radio or Nagasaki Radio, which cover all ports in Japa Westbound vessels to contact Choshi Radio, and Northbound vesse to contact Nagasaki Radio respectively.
TUGS: Over 60,000 d.w.t. vessels to use 3 tugs when berthing, and tugs when unberthing. Over 10,000 d.w.t. vessels to use 2 tugs wh berthing and unberthing. Tug "Tomi Maru" (2,600 h.p.) based Matsushima, and other tugs assist from Sasebo or Nagasaki.
VHF: Channels 16, 3 and 6.
BERTHING:

Name of Berth	*Length* (m.)	*Max.Draft* (m.)	*Capacity* (d.w.t.)
P-1	255	14.00	60,000
P-2	114	8.00	5,000
P-3	114	8.00	2,000
P-4	114	8.00	2,000 (oil berth)

Matsushima is a small island with an electric plant of the Electric Pow Development Co.Ltd. It is a well organised plant with its own port. T concrete berth is well fendered, and there are ample mooring bolla and additional storm bollards. Off the Northern end of the wharf, the is a dolphin joined to the shore by a 65 m. long catwalk. The North end of the berth will accept vessels over 60,000 d.w.t. The South end is for vessels of 5,000 d.w.t., 2,000 d.w.t. and 2,000 d.w respectively.

It is the Custom of the Port to berth port side alongside, but if reques by the Master, vessel may berth starboard side alongside.

The berthing pilot, who is a Power Company employee, hands o a berthing plan when he arrives, which contains information abo mooring lines, depth alongside and strength and numbers of bolla All the bollards are painted and are numbered. The plant and the be are always kept clean.

There is an approach velocity meter on the quay, and tugs are fi with receivers.

On average 5 vessels a month call at Matsushima.
CARGO HANDLING FACILITIES: There are 4 grab unloaders w capacity of 23 tons each. Discharging rate with grabs is 700 t. maximum each crane, or 2,800 t.p.h. in total. The average discharg rate is 1,600 t.p.h. The unloader's travelling distance is 345.0 Maximum outreach from fender face 22.00 m. Vessel must keep air d within 17.00 m.

Normal working hours are from 0630 hrs. to 2130 hrs., 7 days a we including holidays. The only day not worked is January 1st (New Yea Day).
MEDICAL: There is a hospital at Oseto Cho. 2 days advance no necessary to Agent before arrival. Only cholera vaccination availab
DENSITY: 1025 (salt).
FRESH WATER: Available. Rate 12 t.p.h. Cost is Yen 450 per kilo
FUEL: Possible by barge. Bonded oil (fuel and diesel) will be brou from Seto Island port.
CONSULS: No local representatives. Marine Note of Protest can attended by local notary public at Nagasaki City.
REPAIRS: Minor repairs possible.

DRY DOCKS: Nearest dry dock is Sasebo Heavy Industry (S.S.K.), about 50 km. from Matsushima.

SURVEYORS: All surveyors, such as Lloyd's Register, American Bureau, Bureau Veritas, Nippon Kaiji Kyokai, etc., available. They will attend from Sasebo or Nagasaki.

GANGWAY/DECK WATCHMEN: Compulsory. Cost of watchmen Yen 25,440 per day. One watchman on board to attend to the telephone, which is placed on board on arrival. The watchman remains on board until vessel's departure.

OPENING/CLOSING HATCHES: Hatch operations by crew.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid cargo gear certificates sometimes required by stevedores, when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

REPATRIATION: Immigration Office is located at Nagasaki City. 2 or 3 days advance notice of crew replacement requested by Agent.

AIRPORT: Nagasaki Airport, 70 km. from Matsushima, about 1.5 hours by taxi. This airport serves only domestic airlines. Destination: Tokyo 7 flights; Osaka 5 flights; Okinawa, Sapporo, Kagoshima, Miyazaki and Nagoya one flight daily.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.

TELEPHONE: Compulsory to have telephones placed on board during stay. Cost Yen 10,500 for setting up lines onboard, and rental rate Yen 1,060 per day.

SHORE LEAVE: Local Immigration Office issues shore passes, valid for only 15 days when Matsushima is first port of call in Japan. Extension possible if ship stays longer. Shore passes are issued for Matsushima and Oseto town only. Oseto town is opposite Matsushima Island. There is a ferry boat service between 0700 hrs. and 2210 hrs.

In case Master needs to go to Nagasaki City, for example, Sea Protest or other kind of shipping business, special permission must be obtained.

SERVICES: All special services available, except tank cleaning equipment and facilities for discharge of tank washings.

Ship Supplier: Mazda Shinto Senpaku Co.Ltd., 5-5 Hizukushi-machi, Sasebo City, Nagasaki Pref., Japan. Tel: 0956-33-9106. Fax: 0956-33-6231.

REGULATIONS: Normal port regulation (strictly prohibited to discharge bilge oil and other kinds of oil during stay in this port). No smoking on the deck or in port area.

SHIPMASTER'S REPORT: May 1988.

Health: If vessel is to proceed to Nagasaki for quarantine the Pilot will anchor the vessel at the outer roads (Anchorage A, Harbour Section No. 6) in position 32° 42′ N., 129° 48′ E. The mooring buoy with a red light on BA. Chart No. 2815 in position 32° 41.8′ N., 129° 47.45′ E. is no longer in existence.

Tugs: In general, vessels over 60,000 d.w.t. use 3 tugs and vessels under 60,000 d.w.t. use 2 tugs. On departure 2 tugs are used for unberthing. Tugs tow lines are used. The port tugs have a blue hull with white superstructure and orange mast.

Berthing: Moorings consisted of 5 head/stern lines and 1 spring line at each end. On approaching the berth, 2 headlines can be sent away at one time by the line boat.

On average 5 vessels a month call at Matsushima.

General: Provisions: It is possible to obtain stores at the port.

Tidal Range: Maximum +3.50 m. Minimum −0.50 m.

Hotels: There is no hotel accommodation at Matsushima or Oseto.

Tax Free Shop: Should crew wish to buy electrical goods, the Master should contact Kaijima Company in Sasebo City via the Agent. It is suggested that a cable/telex is sent well in advance in order that a salesman may be sent aboard on arrival.

MATSUURA: 33.21 N. 129.41 E. (See Plan)

LOCATION: Lat. 33° 21.5′ N., Long. 129° 41.5′ E.

The port is located on the Northern coast of Nagasaki Pref. and at South Western part of Imari Bay.

DOCUMENTS: The following documents are to be submitted on arrival for formalities:

Ship's Register and/or International Tonnage Certificate.
Last Port Clearance.
5 Crew Lists and Passenger Lists, if any.
3 Voyage Memo (Ports of Call covering last 2/3 months).
1 Declaration of Health.
1 Ship's Stores List.
1 Declaration of Crew's Baggage.

Inward/Outward Declaration, Cargo Manifest and other necessary papers will be prepared by ship's Agents, using Customs forms. A vessel is therefore requested to provide Agents in advance with necessary information regarding cargoes, etc.

PILOTAGE: A vessel berthing or unberthing at Matsuura Coal Berth (CB-1) has to take a pilot (Berthing Master).

Pilot boarding position is around Lat. 33° 28′ N., Long. 129° 41′ N., which is about 340° × 2.85 miles from Ogonoshima Lighthouse.

Inward pilot boards vessel on lee side at the above position from tug "Kyoei-Maru" (3,000 h.p., based in Matsuura), and outward pilot boards at the berth.

ANCHORAGES: No quarantine anchorage in Matsuura.

Proper anchoring area outside of Imari Bay when awaiting berth is located about 1.5 miles N.W. of Izu-Shima.

Special attention to the many fishing boats and nets should be paid when the vessel approaches the port.

RESTRICTIONS: Entry into Imari Bay (passing Aoshima Strait) is prohibited during night time.

Berthing/unberthing will be carried out during daylight hours only.

Pilot boarding time will be advised by ship's Agents through VHF, telex and/or radio.

MAX. SIZE: Acceptable cape size vessel (approx. 130,000 d.w.t.) with max. draft 16.30 m., LOA 270 .00 m. and beam 47.00 m.

HEALTH: Radio Pratique only acceptable if the vessel holds valid Japanese Sanitary Certificate. Otherwise vessels have to call at a convenient port for ordinary quarantine service, before arrival at Matsuura.

RADIO: Recommended that Master communicates with Agents through Nagasaki Radio or Choshi Radio, which cover all ports in Japan.

VHF: "Matsuura Port Radio" on Channel 16 from 0600 hrs. – 2000 hrs.

TUGS: 4 tugs (about 3,000 h.p.) required for vessels over 100,000 d.w.t. for mooring, and 3 tugs for unmooring. Vessels over 60,000 d.w.t. require 3 tugs for mooring and 2 tugs for unmooring. Vessels over 10,000 d.w.t. require 2 tugs for mooring/unmooring, under normal weather conditions.

One tug ("Kyoei-Maru" 3,000 h.p.) available in the Matsuura Port. Other tugs are available from Imari, Sasebo and Nagasaki.

BERTHING:

Name of Berth	*Length* (m.)	*Max.Draft* (m.)	*Capacity* (d.w.t.)
CB-1	370	16.30	130,000
CB-2	370	16.30	130,000 (under construction)
D-3	105	7.30	2,000
D-4	126	7.30	5,000
K-5	126	7.30	5,000
K-6	105	5.30	2,000

CB-1 and CB-2 are the berths for discharging coal only. Others are utility berths for discharging/loading oil, chemicals, etc.

All berths are privately owned and belong to Kyushu Electric Power Co.Inc., Matsuura Power Station Electric Power Development Co.Ltd. and Matsuura Thermal Power Station.

Vessels are usually required to dock starboard side alongside, unless there is a special reason.

STEVEDORES: Normal working hours are between 0800 hrs. and 2130 hrs. with 2 gangs by 2 unloaders with capacities up to 1,800 tons per hour each.

MEDICAL: No advance notice required, except Sundays, holidays and in emergency cases.

FRESH WATER: Available from shore connection, rate about 20 t.p.h. Charge is Yen 500/cu.m.

FUEL: Possible to supply bonded oil (IFO/MDO) by barge from Kanmon area.

CONSULS: None.

REPAIRS: Only minor repairs possible.

GANGWAY/DECK WATCHMEN: Not specially required, but possible to arrange.

HATCHES: Opening/closing must be done by ship's crew.

CERTIFICATES: Ship's Register or International Tonnage Certificate to show Customs Inspector ship's gross and nett tonnages.

REPATRIATION: Possible, but a few days advance notice of crew replacement to Agents required, since Immigration Office is located in Imari City and Customs House in Sasebo City.

AIRPORTS: International airport is in Fukuoka, distance about 120 km., and local airport is in Nagasaki, distance about 100 km. from Matsuura.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Report to Security's Office located at West end of Berth "CB-1".

TELEPHONES: No arrangements for placing telephones on board vessels. Calls may be made from telephone booth located on the berth.

SHORE LEAVE: Local Immigration Offices issue Crew Landing Permit valid for 15 days and for Matsuura City only. Special permission is required in case of crew going outside of the city limits for ship's official business.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Moji, 9-7, Minato Machi, Moji Ward, Kitakyushu City, 801 Japan. Tel: 093-321-4261. Telex: 7153-11 Greenm J. Fax: 093-321-4288. Cables: Greenship Moji.

MATSUYAMA: 33.52 N. 132.42 E. (See Plan)

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
6 Passenger Lists.
1 Stores List.
3 Ports of Call Lists.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. when passing Osaka Bay, Akashi Route, Bisan Seto Route and/or Kurushima Channel. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot stations. Also see "Shipmaster's Reports" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat: 34° 35′ N., Long: 135° 08′ 24″ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position Lat: 33° 13′ N., Long: 131° 55′ 38″ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat: 33° 57′ N., Long: 131° 03′ E.

4. Tomogashima Pilot Station: Lat. 34° 10′ N., Long. 135° 00′ E.

ANCHORAGE: The port faces Iyo-Nada and located near Bungo Straits. Entrance open to Iyo-Nada towards West, but port protected by West breakwater and small island off Northern part of approaches where holding ground good. During Winter months strong N.W. wind prevails causing heavy swell at anchorage. Depth of water 17 m. – 25 m.

RESTRICTIONS: *Oil tanker berth:* Vessel drawing less than 11.5 m. can moor and unmoor at half-flood during daytime but vessels drawing 11.5 m. or more advised to await high water.

Dry cargo is logs only and cargo working carried out at anchorage of Umaiso and Yura Bay.

Yura Bay: Vessels no longer than 110 m. can berth. Daytime entry only regardless of tide and current.

MAX. SIZE: *Cosmo Matsuyama Oil Co. Ltd., Matsuyama Factory, Genyu Sambashi:* Max. 60,000 d.w.t. Max. LOA, 240 m. Max. safe draft 11.5 m.

Umaiso Bay: Length of vessel 160 m.; breadth no limit; draft 15 m.

Yura Bay: Length 110 m.; breadth no limit; draft 10 m.

Also see "Berthing".

HEALTH: Radio Pratiqu available. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: For tankers: Join vessel at Quarantine anchorage, using tug's lines without charge. For dry cargo vessel, no tug required for berthing and unberthing in normal conditions.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

General cargo to be loaded/discharged at the following wharves in Matsuyama.

Berth	*Length* (m.)	*Depth* (m.)
Gaiko-Futo Wharf		
No. 1	366	9.5
No. 2	390	7.5
Imazu Wharf	370	10.0

There are no deadweight restrictions at the wharves.

Restrictions: Due to tidal condition (strong current) Pilot requires 2 tugs for mooring and unmooring, even if vessel is less than 5,000 g.r.t.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 0630 hrs. – 0830 hrs., 1630 hrs. – 2130 hrs. 60% additional of basic stevedorage; 2130 hrs. – 0600 hrs. next morning 120% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No advance notice of diameter of load/discharge lines required. See "Max. Size".

Manifold: 1×12 in. for loading/discharging Naphtha and Kerosine (rate 1,800 cu.m./hr.). 1×12 in. for loading/discharging diesel oil and fuel oil (rate 1,100 cu.m./hr.). 3×6 in. (rubber hoses) for loading/discharging Mono-Ethylene Glycol (rate 300 cu.m./hr.).

DENSITY: Anchorage 1015. Berth 1015.

FRESH WATER: *Cosmo Matsuyama Oil Co.Ltd., Genyu Sambashi:* Can be supplied by shore line with capacity 25 t.p.h.

Anchorage: Can be supplied by 60 ton barge with capacity 60 t.p.h. Strong winds prevail during Winter months, when no water can be supplied.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days' prior notice. Also see "Moji, Fuel".

CONSULS: Consulates in Kobe.

REPAIRS: Only minor repairs.

DRY DOCKS: None. Nearest at Kawasaki Heavy Industries L Sakaide; Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima a Mukaishima, dimensions of those docks as follows:

Kawasaki Heavy Industries Ltd., Sakaide. Dock No. 2 for 500,000 d vessel 450 m.×72 m.×12.3 m. Only used presently for shipbuilding a after services.

Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima Dockyard. D No. 1 for 20,000 d.w.t. vessel 175 m.×25 m.×25.62 m.×9.10 m. D No. 3 for 130,000 d.w.t. vessel 282.50 m.×47 m.×11.33 m.

Hitachi Shipbuilding & Engineering Co. Ltd., Mukaishima Dockya Dock No. 1 for 3,000 d.w.t. vessel 86.18 m.×13.60 m.×6.80 m. D No. 2 for 8,500 d.w.t. vessel 125 m.×18 m.×7.40 m. Dock No. 3 25,000 d.w.t. vessel 175 m.×29 m.×9 m.

GANGWAY/DECK WATCHMEN: Not specially required un passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening a closing hatches. If any time lost by ship's crew doing this w stevedores charge ship for waiting. Recommend request stevedores this work unless ship's crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector sh registered gross and nett tonnages. Valid Cargo Gear Certifica sometimes required by stevedores when cargo gear maintena appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ash but no spirits.

REPATRIATION: Possible.

AIRPORT: Matsuyama Airport. Services to Tokyo, Osaka and Nag by ANA and JAL. Services to Fukuoka, Miyazaki and Kagoshima Japan Air Systems.

TIME: GMT plus 9 hours. No alterations made to clocks during yea

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 11

TELEPHONES: No facilities for placing telephones on board.

SERVICES: Only at Kobe.

SHORE LEAVE: Immigration issue shore passes valid for 7 day vessel only calling at one port in Japan or 15 days if vessel calling more than 2 ports in Japan, further extension possible.

AUTHORITY: Matsuyama Marine Safety Agency, Kaikan-C Matsuyama, Japan. *Tel:* (0899) 51-1197. *Contact:* Port Captain.

MATSUZAKA: 34.37 N. 136.34 E. (See Pl

Status: Closed Port.

LOCATION: Located at centre of Mie Prefecture, about 55 km. So from Yokkaichi in position Lat. 34° 36′ 47″ N., Long. 136° 33′ 51″ E

Closed port (not open port) for Japanese Customs and Maritime La Foreign flag ships are not allowed to enter the port directly, and ves is requested to obtain the permission of Maritime Transport Bureau a Customs' House at one of the open port in Japan before proceeding Matsuzaka.

DOCUMENTS: Also see "Entry Formalities".

To Yokkaichi Transport Bureau: The vessel must obtain permiss to enter "Closed-Port" beforehand.

- Application for Permission to enter Closed-Port. – 1 original an copies.
- Ship's Register – 1 copy.
- Crew List – 1 copy.
- Cargo Manifest – 1 copy.
- Bills of Lading – 1 set of copies.

At Yokkaichi Anchorage: If vessel comes directly from foreign (Agents board for formalities after Free Pratique).

To Yokkaichi Transport Bureau:

- Ship's Register – 1 original.
- Crew List – 1 copy.

* Yokkaichi Transport Bureau issues Permission for Entry into Clos Port.

To Yokkaichi Customs:

- Ship's Register – 1 original.
- International Tonnage Certificate – 1 original.
- Inward/Outward Declaration – 1 copy/2 copies (Prepared by Age
- Ports of Call List – 1 copy.
- Crew List – 1 copy.
- Crew's Baggage List – 1 copy.
- Ship's Stores List – 1 copy.
- Free Pratique Certificate – 1 original.
- Permission for Entry into Closed-Port – 1 original.
- Application for Permission for Entry into Closed-Port – 3 sh (prepared by Agent).
- Application for Exemption Tonnage Dues Payment. – 3 sh (prepared by Agent).

To Yokkaichi Quarantine: At anchorage, Quarantine Inspector bo to issue Free Pratique.

- Declaration of Health – 1 copy.
- Vaccination List – 1 copy.
- Crew List – 1 copy.
- Ports of Call List – 1 copy.
- Ship's Register – 1 original.

Matsuzaka Berth:

To Yokkaichi Immigration (issuing Shore Pass):

Inward/Outward Declaration (Prepared by Agent) – 2 copies for arrival/departure.

Crew List – 1 copy.

Ports of Call List – 1 copy.

To Tsu Customs:

Nearly same as Yokkaichi Customs above.

To Matsuzaka Port Authority and Yokkaichi Maritime Safety Agency: (For each Authority):

Inward/Outward Declaration – 1 copy.

Crew List – 1 copy (M.S.A. only).

* Agents carry out above formalities.

Entry Formalities:

Customs: (a) If vessel is coming from a foreign port to Matsuzaka directly, Customs formalities must be done at Yokkaichi Anchorage. After entry and paying "Closed-Port Dues" at Yokkaichi Customs, the vessel is allowed to proceed to Matsuzaka. After berthing in Matsuzaka, entry to Matsuzaka is done at Tsu Customs. Agents carry out the above entry formalities.

(b) If the vessel is coming from a Japanese port, Customs entry is done at Tsu Customs, after berthing, by Agents.

Immigration: Yokkaichi Immigration Office only.

M.S.A.: Maritime Safety Agency at Yokkaichi has jurisdiction at Matsuzaka.

PILOTAGE: Daytime service for berthing/unberthing. Pilot is compulsory for vessels of 10,000 g.r.t. or more. Vessels of less than 10,000 g.r.t. take a pilot at Master's option.

Pilot boarding point for Irago Bay Pilot:

Entering Ise Bay: Lat. 34° 30.8′ N., Long. 137° 06.9′ E. (Coming from East). Lat. 34° 28.3′ N., Long. 137° 03.8′ E. (Coming from South).

Unberthing: Pilot boards at berth. Pilot comes from Morozaki Pilot Station.

Harbour Pilot for berthing/unberthing: Harbour Pilot comes on board from Yokkaichi or Nagoya, by tug or car.

ANCHORAGES: In vicinity of Lat. 34° 38′ N., Long. 136° 36′ E., sand or mud bottom.

APPROACHES: Matsuzaka Port Fairway is 130 m. wide and has a depth of 7.5 m.

Tidal Range: H.W.L. + 2.102 m. L.W.L. + 0.144 m.

HEALTH: No quarantine station at Matsuzaka. Ships calling at Matsuzaka directly from a foreign port have to call Yokkaichi first, where Quarantine Anchorage is located in vicinity of Lat. 34° 56′ 15.5″ N., Long. 136° 40′ 40.0″ E., where Free Pratique is granted, after which vessel proceeds to Matsuzaka.

Also see "Documents".

VHF: No VHF service in Matsuzaka. Nagoya Port Radio on VHF Channel 16.

RADAR: No radar service in Matsuzaka.

TUGS: No tugs stationed in Matsuzaka. Tugs come from Yokkaichi, Nagoya or Mikawa Bay Station.

Two tug companies in service:

Tug charge by Sanyo Kaiji Co.Ltd.

Yen 448,400/day/tug.

Yen 685,700/two days or more/tug.

Tug charge by Nishinihon Eisen Co.Ltd.

Yen 240,000 + (tug charge/hr. × hrs.) for one day's work.

Yen 240,000 × 1.5 + (tug charge/hr. × hrs.) two days' or more.

Line Handling: Available in Matsuzaka.

BERTHING: 16 public berths available.

Name of Berth	*Depth* (m.)	*Length* (m.)	*Capacity* (d.w.t.)	*No.of Berths*
Ohguchi	7.5	390.0	5,000	3
North	5.5	86.5	2,000	1
North	4.5	476.9	700	7
Central	4.5	306.0	700	5

CRANES: No shore cranes at the wharves. Mobile crane available locally.

BRIDGES: None.

STEVEDORES: This service is rendered from Yokkaichi or Nagoya.

MEDICAL: Hospital and clinics are located in Matsuzaka.

FRESH WATER: Available at all berths by pipeline.

REPAIRS: Only minor repairs possible.

CONSULS: No consuls in Matsuzaka.

SURVEYORS: No surveyors in Matsuzaka. Surveyors are available from other cities.

MIIKE: 33.00 N. 130.23 E. (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.

International Tonnage Certificate.

Last Port Clearance.

3 Crew Lists, including Passport Numbers.

3 Passenger Lists.

3 Ports of Call Lists (Voyage Memo).

1 Stores List.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Compulsory; Pilots board at the point Lat. 32° 59′ N., Long. 130° 23′ E.

Shimabara Bay Pilot (Kuchinotsu Pilot) not compulsory. Pilots board 1 mile South of Kuchinotsu Lighthouse, Lat. 32° 35′ N., Long. 130° 12′ E. (Advise ETA Kuchinotsu 48 hours prior to arrival.)

Vessel should proceed to Miike Anchorage by itself in case of Pilot not being arranged.

Bay pilot boat time restricted to 0600 hrs. – 2200 hrs.

ANCHORAGES: Lat. 32° 59′ N., Long. 130° 23′ E. Harbour limit within circle of 2,700 m. radius centering on lighthouse at West end of Northern Breakwater. Roadstead affords safe anchorage, mud and sand.

RESTRICTIONS: Vessel shall dock or depart on HW. Ebb stream begins about 30 minutes before HW and runs to South for 6 hours. Max. current 3 knots at entrance of channel. Flood stream begins at about LW time and runs to North for 6 hours. Maximum of 3 knots at lighthouse. Channel 1,800 m. long, 137 m. broad from jetty to jetty, 45.7 m. width at bottom. 7.3 m. depth at LWOST.

MAX. SIZE: No limitation for breadth and length, but max. drafts are as follows: 29 ft. 6 in. up to 20,000 d.w.t.; 26 ft. 4 in. up to 25,000 d.w.t.; 24 ft. 6 in. up to 30,000 d.w.t.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset, and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival, and close all soil pipes before entering port.

Formalities will be carried out 2 miles off lighthouse (Lat. 33° 0′ 8″ N., Long. 130° 23′ 50″ E.). Radio Pratique available.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 3 tugs available. 2×1,100 h.p.; 1×800 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Length* (m.)	*Depth* (m.)	*Draft* (m.)	*Capacity*	*Shore cranes & pipelines*
North Quay (No. 6, 7, 8)	558	10.3	10.0	2 ×10,000	1×10 tons 1 unloader*
Dock Pier	90	8.5	8.2	1 × 8,000	1×10 tons
Dock Quay	421	8.5	8.2	2 × 8,000	2 coal loaders
Quay No. 5	91	10.7	10.0	1 × 8,000	1 coal loader
New Quay No. 5	68	10.7	10.0	1 × 6,000	1 coal loader

*One shore unloader at North Quay No. 8. Mainly used for vessels over 5,000 d.w.t.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Average 1025 in Winter, 1020 in Summer, subject to weather and tide current.

FRESH WATER: Available at wharf only. Delivery 20 t.p.h. – 25 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports, bunkers will be lightered from the nearest bunker stock port, at maximum 7 days' prior notice.

CONSULS: No local representatives. Marine Note of Protest can be attended to by local notary public.

REPAIRS: Minor repairs only.

DRY DOCKS: See "Moji".

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches (according to charter party). If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

SURVEYORS: (1) NKKK cargo inspectors available. (2) Lloyd's Register, American Bureau and Bureau Veritas in Miike.

REPATRIATION: Possible.

AIRPORT: Nearest airport is Fukuoka Airport, about 2 hours drive from Miike. Served by JAL, ANA, JAS and Cathay Airlines.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 15th August and 1st January are stevedores holidays.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance/Fire 119.
Public telephone booth available near the berth.

TELEPHONES: No facilities for placing telephones on board. KDD Overseas public telephone booth in the port.

STORING: See "Prelims".
1. By truck.
2. Barge storing only when loading steel products.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks available.
5. If any regulations in force agent will arrange documents.
6. Only a few riggers available. Extra riggers come from Moji or Kobe.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Japanese Yen (Y). U.S.$ 1.00 = Y 133.75 (11.4.91).

SHORE LEAVE: Local Immigration Offices issue crew permit valid for only 15 days, but 15 days' extension possible if ship stays longer.

MISHIMA-KAWANOE: 34.00 N. 133.30 E. (See Pl

LOCATION: Located on central Southern coast of Setonaikai (In Sea), and on border of Ehime Prefecture and Kagawa Prefectur

DOCUMENTS:
Ship's Register.
International Tonnage Certificate.
Last Port Clearance.

3 Voyage Memo (Last 3 months).
5 Crew Lists, including Seaman's Book number and expiry date.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore, ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland sea pilotage should preferably be arranged through Agent by cable or telex, giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station.

Inland Sea Pilot Association covers all inland sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of two pilot stations, depending upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours, and 72 hours advance notice preferred, thereafter advising any alterations. Most inland sea pilots also act as harbour pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations.

Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transiting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 07.54′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event of bad weather, recommended that vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

ANCHORAGES: Quarantine Anchorage Position: Lat. 33° 59.40′ N., Long. 133° 31.36′ E.

RESTRICTIONS: Inland Sea (Setonaikai):

1. Akashi Strait and Bisan Seto: All vessels over 200 m. LOA shall navigate in Bisan Seto in daytime only, and also vessels over 250 m. LOA to have an escort boat when navigating in Akashi Strait and Bisan Seto respectively, in accordance with the Maritime Regulations. Permissible draft on arrival 16 m., but 12 m. on departure.

2. Kurushima Strait: Vessels over LOA 200 m. shall navigate in Kurushima Strait at slack water in daylight, and vessels over LOA 250 m. and up to 300 m. to have an escort boat when navigating in Kurushima Strait.

The draft restrictions are as follows: The permissible draft for LOA from 200 m. – 250 m. shall be less than 13.0 m., and LOA from 250 m. - 300 m. shall be less than 11.0 m.

Escort boat: 2 escort boats with VHF available. Max. speed 24 knots, cruising speed 18 knots.

MEDICAL: No advance notice required, unless urgent.

FRESH WATER: Available from the water supply facilities operated by the Kumamoto Prefecture.

FUEL: Not available.

CONSULS: None.

REPAIRS: Only light repairs possible.

DRY DOCKS: Small docks for less than 1,000 tons.

SURVEYORS: Available.

GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work, unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificate sometimes required by stevedores, when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible. Kumamoto Branch Office of the Fukuoka Immigration Office arranges necessary repatriation.

AIRPORT: Nearest is Kumamoto Airport, about 60 km. It is only served by domestic airlines to Tokyo, Osaka, and other Japanese airports.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance/Fire 119. The Oyano Police Station Misumi Police Box located at Higashiko, Misumi-machi, Uto-gun, Kumamoto Pref. Tel: 0964-52-3110. Nishi Branch Station of UKI Fire Department located at Nakamura, Misumi-machi, Uto-gun, Kumamoto Pref. Tel: 0964-52-2222.

EMERGENCY CO-ORDINATION CENTRE: Misumi Kaijo Haonbu (Misumi Maritime Safety Office) Tel: 09645 (2) 3103.

TELEPHONES: There are no arrangements for placing telephone on board.

STORING: Trucks may proceed alongside. Fork lift trucks not available. Contact Agent if riggers required.

SHORE LEAVE: Local Immigration Offices issue shore passes, valid for only 15 days, when Misumi is first port of call in Japan. Extension possible if ship stays longer.

DELAYS: Delays will be expected when quays are occupied by vessels or a Pilot cannot go on board because of the tidal conditions.

AUTHORITY: Misumi Port Office of the Kumamoto Prefecture, 1160 – 39, Oaza Misumiura, Misumi-machi, Uto-gun, Kumamoto Pref. *Tel:* 0964-52-2079. *Contact:* Port Director.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Moji, c/o Nippon Express Co.Ltd., Misumi Branch, 1159 Misumi Ura Oaza, Misumi-machi, Uto-Gun, Kumamoto Pref., Japan. Tel: (0964) 52-3121. Telex: 766993 Nexmis J. Fax: (0964) 52-3125. Cables: Nexco Misumi.

MITSUKOJIMA: 34.11 N. 132.31 E. (See Plan)

Port Status: Closed Port.

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
Last Ports Clearance.
Declaration Inward/Outward of Vessel (Agent will prepare).
5 copies Port of Call List.
6 copies Crew Manifest.
6 copies Passenger List.
1 copy List of Ship's Stores.
1 copy Declaration of Crew's Baggage.
Cargo Manifest (Agent will prepare).
1 copy Maritime Declaration of Health.

Customs Formalities: Formalities are to be carried out at ship's last port of call in Japan or Kure Port for entering Mitsukojima (Closed Port), prior to proceeding Mitsukojima Port.

PILOTAGE: Inland sea pilotage should preferably be arranged through Agent, by cable via Nagasaki/Choshi Radio, giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station.

Inland Sea Pilot Association covers all inland sea ports.

Inland Sea Pilot boards at the following positions:

1. Vessels transiting Bungo Channel: Inland Sea Pilot board Sekisaki Pilot Station (33° 13′ N., 131° 56′ E.). Telegraphic add "Anjin Saganoseki".

2. Vessels transiting Kanmon Strait: Kanmon Strait Pilot board Mutsure Pilot Station (33° 59.5′ N., 130° 52.6′ E.) (compulsory vessels over 10,000 g.r.t.). Telegraphic address "Kanmon Pilot M Inland Sea Pilot boards at Hesaki Pilot Station (33° 58.0′ 131° 01.1′ E.). Telegraphic address "Anjin Moji".

Note: VHF communication with pilot station available as follows:

Name of Station	Call/Answer Channel	Communication Channel
Oita Port Radio (for Sekisaki)	16	14
Shimonoseki Port Radio (for Mutsure).	16	14

3. Most Inland Sea Pilots also act as harbour pilots up to bert anchorage at destination. If vessel only requires harbour pilot, harb pilot boards at Kure Quarantine Anchorage.

ANCHORAGES: No anchorage at Mitsukojima.

Vessel is able to anchor off Kure Port, if it arrives at night-time, o berth is occupied by preceeding vessel. Depth is 20 m.

RESTRICTIONS: Berthing/unberthing from one hour after sunrise to o hour before sunset.

A portion of Nasami Strait (Hiroshima Bay) has a depth of 17.0 The Maritime Safety Agency request bottom clearance 10% of sh draft plus 50 cm.

In the following cases, Inland Sea Pilot and Maritime Safety Agen request escort tug boat at Nasami Strait:

1. Tankers (over 50,000 d.w.t.), if vessel loaded with danger cargo.
2. Large vessels (LOA over 250 m.).
3. If vessel's draft over 15.0 m.

MAX. SIZE: LOA 303.59 m., 156,649 d.w.t., draft 17.40 m. (as per t condition).

HEALTH: At first port of call in Japan, vessel must obtain Free Prati Radio Pratique is available.

If vessel has no Japanese Sanitary Inspection Certificate, ordin quarantine procedure takes place at Kure Quarantine Anchorage.

RADIO: Recommend that Master communicates with Agent throu Choshi Radio or Nagasaki Radio, which cover all ports in Jap Communication available with Agent, if vessel equipped with telex.

VHF: Hiroshima Port Radio on Channels 11, 12, 14 and 16.

RADAR: No radar station at Mitsukojima.

TUGS: Available from 2,600 h.p. to 3,300 h.p.

Normally tugs join off Kure Port, and usually tug's line used with extra charge.

BERTHING: Berthing/unberthing from one hour after sunrise to one h before sunset.

Name of Wharf: Mitsukojima Wharf (private wharf).
Cargo: Salt.
Length/Depth: 192 m./17.0 m.
Permissible Draft/LOA: 16.5 m./303.59 m., draft of 17.4 m. availab depending on tidal conditions.
Capacity: 76,000 g.r.t.

CRANES: No cranes at Mitsukojima. Floating cranes (lifting capa from 100 tonnes to 300 tonnes) are available from Kure or Hiroshim

BULK CARGO FACILITIES: See "Berthing".

Discharge is by vessel's belt conveyor.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: No bridge restriction at Mitsukojima (Hiroshima Bay are

STEVEDORES: Discharging of salt is on "Free in/out" basis. There stevedorage is to receiver's account.

TANKERS: No facilities.

MEDICAL: No advance notice required, except after office hou Sundays and holidays. Vaccination against cholera available.

DENSITY: 1023.

FRESH WATER: Available by water barge (capacity 330 tonnes) fr Hiroshima port, 3 days' advance notice required.

Cost per tonne:
(1) Daytime of weekday Yen 1,000/tonne, overtime Yen 1,500 ton
(2) Daytime on Sundays/holidays Yen 1,500/tonne, over Yen 2,000/tonne.

FUEL: Most grades of domestic and bonded oil are available by ba with 3 days advance notice.

CONSULS: None.

REPAIRS: Minor repairs possible (attend from Kure or Hiroshima)

DRY DOCKS: No dry docks available (available at Kure port).

SURVEYORS: Cargo inspection is available (attend from Kure). Na of surveyors: Japan Marine Surveyor & Sworn Measurers Associat and New Japan Surveyors and Sworn Measurers Association.

Registration surveys are available (attend from Kure). Name surveyors: Lloyd's Register of Shipping, American Bureau of Shipp

GANGWAY/DECK WATCHMEN: Not required.

HATCHES: Opening/closing by crew.

CUSTOMS ALLOWANCES: Allowed 60 cigarettes only.

CARGO GEAR: No shore cranes at Mitsukojima port. Discharge b vessel's belt conveyor.

REPATRIATION: Possible.

AIRPORT: Hiroshima Airport, distance from Kure approximately 36 Hiroshima/Tokyo (Haneda Airport), 11 flights per day (domestic air Hiroshima/Seoul, 7 flights per week (international airlines).

TIME: GMT plus 9 hours. No alterations made to clocks during yea

HOLIDAYS: Working possible on Sundays and national holidays, exc New Year's Holidays (1st, 2nd and 3rd January).

POLICE/AMBULANCE/FIRE: Police Station (emergency) 1 Ambulance/Fire 119; or Kure Maritime Safety Agency (see below

EMERGENCY CO-ORDINATION CENTRE: Kure Maritime Sa Agency. Tel: 0823-21-0110.

TELEPHONES: No arrangements for placing telephones on board.
SERVICES: All navigation apparatus can be serviced as required with 2 days advance notice.
BANKS: Hiroshima Bank, Kure Branch, 5-4, Hondori 3-chome, Kure, Japan. Tel: 0823-21-5141. Fax: 0823-24-5575.

Sumitomo Bank, Kure Branch, 1-14, Hondori 2-chome, Kure, Japan. Tel: 0823-22-4921. Fax: 0823-21-0724.

STORING: See "Prelims".

1. Ship's stores loaded by barge.
2. Available for loading ship's stores during discharging cargo.
3. Trucks cannot proceed alongside at the berth due to Mitsukojima being an island.
4. Cannot use forklift trucks at berth (usually loading ship's stores direct to vessel by ship's crane).
5. Must obtain Customs Clearance before loading ship's stores.
6. Available to employ riggers to assist with storing.

SHIP SUPPLY SERVICE: Makino Shipchandler, 5-1, Hondori 1-chome, Kure, Japan. Tel: 0823-21-4443. Fax: 0823-21-4899.

No craft or helicopters at Mitsukojima port.
SHORE LEAVE: Kure Immigration Officers issue shore passes, if crew members have valid passports or Seaman's Books.
REGULATIONS: Normal port regulations.
DELAYS: If vessel arrives at night-time, vessel must wait at anchorage.
GENERAL: Mitsukojima is a local port, which makes it difficult to arrange all requirements. At least 3 days notice required for most services.
AUTHORITY: Mitsukojima Transshipment Co.Ltd., 24-1, Tonoko 2-chome, Ondo-Cho, Akigun, Hiroshima Pref., Japan. *Tel:* 0823-52-2711.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Naigai Unyu Co.Ltd., 1-7, Nakadori 1-chome, Kure, Japan. Tel: 0823-21-4952. Telex: 662340 Naigai J. Fax: 0823-25-3728. Cables: Naigai Kure.

MIYAKO: 39.39 N. 141.58 E. (See Plan)

DOCUMENTS:

For Quarantine
1 Statement by Ship's Master.
1 Crew List.
1 Passenger List (if any).
Yellow cards for all.
1 Derat Certificate.

For Immigration
1 Declaration of Inward Vessel.
Passport or Seamen's Book for all.
1 Crew List.
1 Application for shore pass.

For Customs
1 Last Port Clearance.
1 Declaration of Inward Vessel.
1 Crew List.
1 List of Crew's Baggage.
1 List of Ship's Store.
2 Cargo Manifest (Discharging).
1 Cargo Manifest (Through).
1 Certificate of Ship's Registry.

For Port Management Office
1 Declaration of Inward Vessel.

For Maritime Safety Base
1 Declaration of Inward Vessel.
1 Crew List.
1 Cargo Manifest (Discharging).
1 Cargo Manifest (Through).

Above documents to be prepared by Master before arrival.

Master to telegraph ETA and crew's health condition directly to Quarantine Miyako before arrival.
PILOTAGE: Not compulsory, but arrangeable at the Master's request. Pilot ordinarily boards at/around Quarantine anchorage, also available boarding at the Master's request at outer harbour which position is HeisaKi light Northward 1.5 miles (Lat. 39° 40.5′ N., Long. 142° 1.2′ E.).
ANCHORAGES: Quarantine anchorage located at Lat. 39° 37.82′ N., Long. 141° 59.3′ E. Depth 16 m. – 22 m. Bottom mud and sand. Outside breakwater, care should be taken not to foul fishing nets.

Depth in inner anchorage 12 m. – 15 m.
RESTRICTIONS: Night entry and departure permitted subject to weather conditions.
MAX. SIZE: Draft 12 m. and LOA 240 m., breadth no restrictions.

Also see "Berthing".
HEALTH: Radio Pratique available. Formalities carried out at anchorage.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. Westbound vessel, via Choshi Radio, and Northbound via Nagasaki Radio.
TUGS: Normally join vessel on passage from anchorage. Tug's line used. One tug available 2,400 h.p. Additional tugs available from Kamaishi.
STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Max.LOA* (m.)	*Max.Draft* (m.)	*Capacity* (d.w.t.)

F10	390	7.5	5,000 (under construction)
F11	270	13.0	40,000 (under construction)

MEDICAL: No advance notice required unless urgent.
TANKERS: No facilities.
DENSITY: Average 1019.
FRESH WATER: Available from wharf about 50 t.p.h. but no water barge. In case vessel urgently requires water at anchorage, tug-boat arrangeable for this purpose.
FUEL: Domestic oil is available; Bonded oil will be brought from Tokyo or Sendai, when required.
CONSULS: None.
REPAIRS: Minor deck and engine repairs available.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not especially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register, Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: 60 cigarettes to take ashore but no spirits.
REPATRIATION: Possible.
AIRPORT: Hanamaki Airport distant 150 km. from Miyako (2.5 hours by car). 1 flight between Hanamaki/Tokyo Monday/Thursday/ Friday and Saturday and 2 flights Tuesday/Wednesday and Sunday by Toa Domestic Air Lines (TDA).
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 62-5011 (Headquarters) and 62-6037 (Water Police Station); Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Surveyor, Tally, Hold cleaning, Tank cleaning.
SHORE LEAVE: Local Immigration Office issues shore pass valid for only 3 days; 3 days' extension possible if ship stays longer. If vessel advises longer stay in port on arrival, Immigration can issue shore pass for 9 days.
GENERAL: Discharging ex-gearless vessel at wharf not possible as no shore crane for discharge.
AUTHORITY: Miyako Port Administration Office, 114, Fujiwara 3-chome, Miyako City, Iwate Pref. *Tel:* (0193) 62-1471.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Ohshyuya Kaisoten, 64-67, Fujiwara 3-chome, Miyako City, Iwate Pref. 027, Japan. Tel: (0193) 62-3688. Telex: 8344-08 Koun J. Fax: (0193) 62-4755. Cables: Marushime Miyako.

✓

MIYAZU: 35.32 N. 135.12 E. (See Plan)

DOCUMENTS:

Ship's Register (and International Tonnage Certificate, if Register does not show gross and nett tonnages).
Last Port Clearance.
6 Crew Lists, including Passport numbers.
4 Passenger Lists.
2 Stores Lists.
2 Declarations of Crew Baggage.

PILOTAGE: Not compulsory. Pilots board at Kurosaki Anchorage.
ANCHORAGES: See "Plan".
RESTRICTIONS: Draft limitation in the channel is about 10.0 m. Berthing is only allowed during daytime. Unberthing and sailing is permissible at night-time, subject to advance notice (and pilot's consent if employing a pilot).
HEALTH: Neither Radio Pratique or ordinary quarantine inspection are undertaken at Miyazu, so quarantine must be granted at a way port, such as Maizuru or Moji.
TUGS: 3×330 h.p., 1×80 h.p. and 1×50 h.p.
BERTHING:

Name of Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft/LOA* (m.)	*Capacity* (g.r.t.)	*Shore Cranes & Pipelines*

Anchorage					
Section 1		13.0/14.0		15,000	
Section 2		14.0 (Not used at present)			
Buoy No.1			12.0		

STEVEDORES: Working hours: 0830 hrs. – 1630 hrs.
FRESH WATER: Available by barge at 160 tonnes/hr.
FUEL: Bonded oils available from Moji.
GENERAL: *Immigration:* The authorities come from Maizuru.
Lightering: Not possible.
Shipchandlers: Provisions obtainable.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Miyazu Koun Co.Ltd., 2160-9, Aza Tsuruga, Miyazu City, Kyoto 626, Japan. Tel: (07722) 2-3236/8. Fax: (07722) 2-3238. Cables: Koun Miyazu.

MIZUSHIMA: 34.31 N. 133.45 E. (See Plan)

DOCUMENTS:

Ship's Register (Certificate of Nationality).
International Tonnage Certificate.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
2 Ports of Call Lists (Last 3 months).
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: *(a)* Osaka Bay pilotage should preferably be arranged through Agent by cable via Nagasaki Radio or Inmarsat telex, giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Pilotage compulsory for vessels over 10,000 g.r.t. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations.

Note: VHF communication available with Osaka Bay Pilot Station by calling "Bay Pilot Kobe" through Channel 16 (Telex 5622617 Baykobe J).

Position of pilot station: Lat. 34° 10′ 00″ N., Long. 135° 00′ 00″ E. 7 miles off South of Topmogashima Lighthouse.

(b) Inland sea pilotage should preferably by arranged through Agent by cable via Nagasaki Radio or Inmarsat telex, giving 72 hours notice. Urgent correction same as Osaka Bay Pilot. Inland Sea Pilot Association covers all inland sea ports. Pilotage is compulsory for vessels over 10,000 g.r.t. Pilots available at one of 3 pilot stations, depending on vessel's last port of departure, and at Master's discretion. Pilotage available throughout 24 hours, and 72 hours' advance notice prefered, thereafter advising any alterations. Most inland sea pilots also act as harbour pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Station via Kobe Port Radio by Channel 16.

1. Wadamisaki, at entrance to Kobe (vessel transiting Kii Straits). Position Lat. 34° 37′ 50″ N., Long. 135° 10′ 00″ E. Telegraphic address "Anjin Kobe". Telex: 5623011 Anjin J.

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessel transiting Bungo Channel). Position Lat. 33° 13′ 00″ N., Long. 131° 56′ 00″ E. Telex: 751345 Anjin J.

In event of bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E. Telex: 715303 Anjin J.

(c) There is a draft/LOA restriction for passing Kurushima Channel, which is located between Sekisaki/Hesaki and Mizushima, as follows:
Max. LOA is 285 m. for tankers and 300 m. for cargo vessels.
Max. allowable draft is:
For tankers of LOA less than 230 m.: 12 m.
285 m.: 11 m.
For cargo vessels of LOA less than 250 m.: 13 m.
300 m.: 11 m.

Tidal restriction is also applied at Kurushima for vessels of LOA more than 200 m., i.e. such vessel is forced to transit Kurushima with following current of less than 3 knots.

(d) Harbour Pilot: Pilots of the Inland Sea Pilots Association are also employed for this pilotage, if required, and pilot boards at Mizushima Quarantine Anchorage (Lat. 34° 26′ 30″ N., Long. 133° 34′ 30″ E., approximate centre position of quarantine area). However, if an Inland Sea Pilot is employed at the above mentioned pilot station, the same pilot acts for Harbour Pilotage.

ANCHORAGES: Anchorages inside Mizushima port available only for vessels of 3,000 g.r.t. or less. Mizushima Quarantine Anchorage is located outside of Mizushima port and, being treated as "Closed Port", i.e. non-open port, is allowed use by vessels of less than 50,000 d.w.t. and LOA less than 200 m. Other large vessels waiting for berthing can anchor off Kobe with depth 43 m. – 47 m., under approval of MSA Kobe, for limited period, i.e. maximum period of 6 hours for tankers and a maximum of 3 days for cargo vessels.

RESTRICTIONS: *(a)* Entering and departing from port shall be in accordance with instructions to be given by Signal Station.

(b) No restriction imposed upon entering or leaving port during night-time, nevertheless such movements are next to impossible in consideration of the nature of the structures of the port. In addition Pilots refuse to board during night-time.

(c) Tidal restriction is applied for passing Mizushima Traffic Rou pilots as follows:
D.w.t. less than 30,000 : Any time
D.w.t. 30,000 – 50,000 : 2.0 hours either side of slack water.
D.w.t. 50,000 – 100,000 : 1.0 hour either side of slack water.
D.w.t. more than 100,000 : 0.5 hour either side of slack water.

Draft restriction is also applied for passing Mizushima Traffic Ro especially super-size vessels with deep draft (14.5 m. or more) can en only with high water. 10% of draft plus 0.5 m. of UKC is required be depth 16.00 m. Height of tide can be added.

MAX. SIZE: See "Berthing".
HEALTH: Radio Pratique available. Formalities will be carried ou Quarantine Anchorage – Lat. 34° 26′ N., Long. 133° 44′ E.
RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which covers all ports in Jap If specifically Westbound vessel to contact Choshi and Northboun contact Nagasaki Radio respectively.
TUGS: Tugs normally join the vessel at the Quarantine Anchorage an Usually tug's lines used free of charge.

C-8 Pier (Dolphin)				
18,270	155 m.	7.9 m.	Chemical (vapour line 4 in.×1) (cargo line 6 in.×1)	100/200 tons

STEVEDORES: At least 24 hours' prior notice excluding Sundays a holidays required in order for Agent to arrange stevedores. Vessel mu constantly keep her Agent advised of ETA. If stevedores car commence loading/unloading at time notified by the Agent, the order must pay for waiting time. If cargo gear not rigged on berth stevedores will do same for ship's crew at additional cost. Over surcharges 1630 hrs. – 2130 hrs. 60% additional of basic stevedora 2130 hrs. – 0830 hrs. next morning, unacceptable in principle. Sund holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: See "Berthing".

DENSITY: Entrance channel Summer average 1020, Winter average 1023. Harbour channel Summer average 1019, Winter average 1025.

FRESH WATER: Available at berth, ex-pipe-line. Average delivery rate 20 k/t/hour. Water barges available, sent from Sakaide. Delivery rate approximately 50 k/tons per hour.

FUEL: Most grades available.

FIRE PRECAUTIONS: *(a)* Whenever necessary to repair vessel, the rule of "Strictly and Completely No Fire" is to be observed. *(b)* To keep sufficiently powered tugboat alongside vessel at all times when engine is under repair. *(c)* A written pledge to be submitted to Oil Company, promising to take full responsibility and to pay full indemnity by ship's Owners (in case of repairing vessel) if any accident has occurred by fault of the vessel.

CONSULS: No consul available, but Marine Note of Protest can be attested by the local notary public.

REPAIRS: All types of deck and engine repairs possible by Mitsui Shipbuilding and Engineering Co. Ltd., Tamano Works. Minor repairs possible by Nojima Senpaku Co. Ltd., Mizushima Works.

DRY DOCKS: *Sanoyasu Dockyard Co. Ltd., Mizushima Shipyard:* Dimensions of longest drydock. Length 630 m., width 63 m., depth 13 m. *Mitsui Shipbuilding and Engineering Co. Ltd., Tamano Dock:*

Dock No. 1: 175 m. × 81 m. × 11.5 m.
Dock No. 2: 282 m. × 57 m. × 23 m.
Dock No. 3: 210 m. × 31 m. × 10.9 m.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register and International Tonnage Certificate, if onboard, to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Okayama Airport is the nearest from Mizushima, distance approximately 50 km. and takes about 1 hour by car. Domestic regular airlines to Tokyo available, 4 flights a day, and international regular airlines available to Seoul, 4 flights a week, on Monday, Wednesday, Friday and Saturday.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: No telephone installation service on board.

SERVICES: All navigational apparatus can be served, as requested, but technicians are to be sent from Kobe.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 7 days for one port call or 15 days for more than 2 port calls, extension possible if ship stays longer.

REGULATIONS: Quarantine Anchorage is outside harbour limits therefore (a) no persons allowed ashore from this anchorage, (b) No supplies permitted to vessels and, (c) No Agency services available.

REPORT: (Ship's Agent) 1984 (Updated 1992).

As you are aware, a vessel over 200 m. in length or 50,000 d.w.t. is not allowed to anchor off Mizushima whilst waiting for a berth or other purposes as the space in the Roads is narrow. Therefore, if a berth is not available at the expected time of ship's arrival, the ship has to anchor off Kobe, which is the nearest available place to wait for berthing turn. However, anchoring period is limited to 3 days for cargo vessels, and 6 hours for tankers. During vessel's stay in Kobe Roads, quarantine service from Kobe Quarantine Station is not available except in an emergency as this service is available at Mizushima. The Customs entry which requires payment of tonnage dues is not made at Kobe. Furthermore, if time for waiting berth is longer than period allowed to stay off Kobe, a vessel is obliged to drift in open sea, keeping 12 nautical miles off coast (normally off Kii Suido, but at Master's option), for adjusting time embarking Osaka Bay Pilot.

In the above circumstances, we, in order to protect the Owners interests, have been instructing the Masters of the vessels to tender Notice of Readiness when they arrived off Kobe or drifting position as customary waiting area for Mizushima for waiting berth, although most Receivers or Charterers only accept the NOR when Free Pratique is granted at Mizushima if the vessel is not qualified to obtain Radio Pratique.

It is apparent that when calculation of laytime is made controversy arises between Shipowners and Charterers as to who is to bear the risk of waiting off Kobe or drifting position, for a discharging berth. The Charterers may contend that the Master is not allowed to tender NOR without Free Pratique and Customs clearance whilst the Owners rebut that the ship was lying at a place for waiting berth solely for Receivers/Charterers convenience, being her voyage ended.

In order to avoid a dispute of this kind, we would respectfully suggest modifying the charterparty clause for a vessel of the above category calling at Mizushima as follows:

Quote:

If berth is not available on arrival at discharging port, vessel shall be allowed to tender Notice of Readiness from place of anchorage ordered by Port Authorities or drifting position whether in berth or not, whether in port or not, whether Customs cleared or not, whether in Free Pratique or not. Time for shifting from a waiting area to discharging berth not to count.

Unquote.

AUTHORITY: Mizushima Port & Urban Development Bureau, Okayama Pref. 1-12, Mizushima Fukuzaki-cho, Kurashiki City, Okayama Pref. Tel: (0864) 44-7141.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Dry Cargo: Naigai Unyu Co. Ltd., Kaigan Bldg., 1, Mizushima Kaigan-dori 2-chome, Kurashiki City, Okayama Pref. 712, Japan. Tel: (0864) 44-5211. Telex: 5933-330 Naigi J. Fax: (0864) 44-5229. Cables: Naigai Kurashiki.

Tankers: Nippon Marine Co. Ltd., Nikko Mizushima Pef, 2-1, Ushio-dori, Kurashiki City, Okayama Pref. 712, Japan. Tel: (0864) 55-5361. Telex: 5933-306 Marine J. Fax: (0864) 56-3329. Cables: Nipponmarine Kurashiki.

MOJI (Kitakyushu): 33.57 N. 130.58 E. (See Plan) (See "Kanmon-Ko").

LOCATION: Moji port is located in the Kanmon Straits between Shimonoseki on Honshu Island and Moji at the Northeast tip of Kyushu and is well sheltered from the open sea by steep hills on all sides. According to the Harbour Regulations, the port is one of the sections in Kanmon Harbour which consists of Moji, Shimonoseki, Kokura and Dokai (Tobata, Wakamatsu and Yawata). In 1963, five cities, Moji, Kokura, Tobata, Wakamatsu and Yawata situated in North-Eastern part of Kyushu were combined in one city, as Kitakyushu.

Moji is now known as Moji-ku of Kitakyushu City.

DOCUMENTS: When ship arrives direct from foreign port, Customs Officials will board to search vessel. Following documents to be submitted:

Crew List, including Passport numbers.
Passenger List.
Ship's Stores List.
Manifest of crew personal effects (must be signed by individual crew member).
Arms and ammunition List.
Narcotics List.
List of ports of call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. C2000).

The following will be checked on board:

Ship's Registry.
Last Port Clearance.
International Tonnage Certificate.

When ship comes from Japanese port, Customs Officials will not attend on board, except special case. Master or Agent to attend Custom House for entry formalities with following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Registry.
Last Port Clearance.

Documents entrusted with the Master by Customs at previous port. On ship's departure, clearance issued by Customs, after confirming payment of tonnage dues.

PILOTAGE: (1) *Harbour Pilotage:* Compulsory for entry, departure and when vessel passing through Straits if g.r.t. exceeds 10,000 tons. Pilots embark Eastbound vessels at Mutsure Quarantine Anchorage position half mile East Mutsure L.H. Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E. and Westbound vessels at Hesaki Quarantine Anchorage position 125°, 1,500 m. from Hesaki L.H. Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E. Two Pilots embark vessels exceeding 30,000 gross tons for entry and departure charging double pilotage (×85%).

(2) *Sea Pilotage:* Vessels approaching from East can obtain Pilots by radio request made at least 24 hours in advance. Pilot embarks at position 3 miles South from Sekisaki L.H. Lat. 33° 13′ 00″ N., Long. 131° 56′ E.

(3) Pilots should be kept closely advised of vessel's accurate ETA at pilot station. If any change in vessel's movements, Master requested to immediately communicate by radio or VHF to pilot offices directly or through Agent reporting revised ETA. Cable addresses of pilot offices are: Harbour Pilot "Kanmonpilot Moji", Inland Sea Pilot "Anjin Moji".

(4) *VHF:* Vessels keep in direct contact with port authorities with regard to arrival, berthing instructions and Pilot's requirements through VHF as follows:

(a) Call sign: Kitakyushu Port Radio (or Shimonoseki Port Radio).
(b) Location of Radio facilities: Transmitting and receiving station located at the top of Mt. Hinoyama, Shimonoseki.
(c) Type of wave: Channel: Simplex 16 (calling, responding); Simplex 12 (communicating); Simplex 14 (communicating); Duplex 20 and 22 (communicating). Output 50 W.
(d) Operating hours: 0000 – 2400 hrs.
(e) Communicating range: Within a radius of 50 miles from the Hinoyama Station.
(f) Communicating language: Japanese/English.

ANCHORAGE:

Tanoura No. 1 anchorage (83° from Moji Saki Light Buoy, 1,340 m.). Draft 9.1 m.

Tanoura No. 2 anchorage (83° from Moji Saki Light Buoy, 1,770 m.). Draft 9.1 m.

Tanoura No. 3 anchorage (80° from Moji Saki Light Buoy, 2,300 m.). Draft 9.1 m.

WIND, TIDE: Easterly winds prevail in warm seasons. N.W. winds prevail in Winter season. Dense fog frequently prevails in Spring and Autumn.

Tidal range 3.07 m. Current near entrance of port runs Westward at flood and Eastward at ebb. Speed of current in vicinity of narrowest section of Straits sometimes reaches 7 – 8 knots. In stream of port, it is about 3 – 5 knots.

RESTRICTIONS: *(a)* Berthing: During daytime only. Occasionally large vessels drawing deep draft made to await high water and/or suitable current to berth alongside wharves.

(b) Departure: With adequate notice, no restrictions from anchorage and/or buoys. Night departure from wharves generally practicable, except No. 7 Wharf and Nos. 8, 9, 10 Wharves, the latter 3 berths however only permitting vessel to sail against tide.

(c) Tug assistance may be required at Pilot's discretion for large vessel mooring to and/or unmooring from buoy, depending upon efficiency of engine and conditions of weather, tidal current, etc.

(d) Vessels with draft over 10.0 m. (33 ft.) but not exceeding 11 m. can pass through Kanmon Straits with favourable tide.

MAX. SIZE: *Tankers:* 1 tanker berth, Mitsui & Co. Berth "B". Max. d.w.t. 33,000 tons. Max. LOA, 200 m. Max. safe draft 9.10 m.

Also see "Berthing" and "Tankers".

HEALTH: Radio Agent for Free Pratique not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Declaration Inward.
Voyage Memo (Port of Call).
Maritime Declaration of Health.
Crew List.
Passenger List.
Derat Certificate (copy).

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

(a) Quarantine Station at Western entrance: half mile East from Mutsure Lighthouse Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E.

(b) Quarantine Station at Eastern entrance: 125°, 1,500 m. from Hesaki Lighthouse Lat. 33° 56′ 24″ N., Long. 131° 30′ 12″ E.

(c) Quarantine inspection not allowed inside port except when weather or other special reasons prevent quarantine boat from approaching ship at anchorage.

(d) "Q" flag should be hoisted until ship is in Free Pratique.

(e) Vessels exceeding 20,000 gross tonnage may undergo quarantine on application when they berth inside port.

(f) Quarantine service is rendered from 0830 hrs. – 1630 hrs.

(g) When ship arrives from plague infected or suspected area within 10 days after she left such place, a 24 hour special quarantine is required. All sanitary scuppers must be closed and garbage must not be thrown overboard after ship reaches 60 miles off Japanese coast.

(h) Radio Pratique is obtainable according to the Radio Pratique Regulations.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

VHF: See "Pilotage".

TUGS: Normally join vessel at suitable position for mooring in judgment of Pilot and tug. In operation, tug's line to be used for mooring and unmooring without any charge. 10 tugs, 1,500 h.p. – 3,520 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Shinmoji: Shinmoji Wharf is equipped to handle raw materials goods used in the Shinmoji marine industrial area. The second reclaiming construction has been carried out, so that it will be abl function as an intensive centre for middle-distance and long-dista ferrying in the future. Depths alongside 4.5 m.–10.0 m.

Developments: See "Developments".

CONTAINER HANDLING FACILITIES:

Tanoura Container Terminal

Total area: 61,100 sq.m.
Area per berth: One berth only
Sea depth: 10 m. under low water level (LWL
Length of wharf: 300 m.
Marshalling yard: 46,894 sq.m.
CFS: 3,390 sq.m.
Office, control tower: 596 sq.m.
Gantry crane: Single/twin: Single
Height of span above quay: 9.2 m.
Max. outreach: 36 m.
Max. backreach: 7.5 m.
Lifting capacity: 37.5 tons
Spreader sizes: Capable of handling conta of ISO-IS & IC also Matson type
Width of rail: 30 m.
Reefer plugs: 220 V×12
Illumination: 3 (25 Lux) 1 kW×28
Track scale: Scaling maximum 50 tons
Straddle carriers: 3

Tachinoura No. 1 Container Terminal:

Total area: 128,720 sq. m.
Area per berth: Two berth
Sea depth: 12 m. under low water level (LWL
Length of wharf: 620 m.
Marshalling yard: 96,665 sq. m.
CFS: 818 sq. m.
Gantry crane: Single/Twin: Twin (three cranes)
Height of span above quay: 10.8 m.
Max outreach: 38 m.
Max. backreach: 11 m.
Lifting capacity: 48.6 tons
Spreader sizes: Capable of handling conta of 180-ISO and IC, also Matson type
Width of rail: 16 m.
Reefer plugs: 220 V×68
Illumination: 4 (25 Lux)
Track scale: Scaling maximum 50 tons
Straddle carriers: 14

Tachinoura No. 2 Container Terminal

Total area: 118,720 sq.m.
Area per berth: Three berth
Sea depth: 10 m. under low water level (LWL
Length of wharf: 555 m.
Marshalling yard: 108,110 sq.m.
Gantry crane: Single/Twin: Single (3 cranes)
Height of spain above quay: 10.8 m.
Max. outreach: 37.2 m.
Lifting capacity: 48.1 tons
Spreader sizes: Capable of handling conta of 180–ISO and IC, also Matson type
Width of rail: 16 m.
Reefer plugs: 220 V × 40
Illumination: 4 (25 Lux)
Straddle carriers: 13 (common use with Tachimoura No. 1 Conta Terminal).

STEVEDORES: At least 24 hours prior notice excluding Sundays holidays required in order for Agent to arrange stevedores. Vessel constantly keep her Agent advised of ETA. If stevedores ca commence loading/unloading at time notified by the Agent, the orde must pay for waiting time. If cargo gear not rigged on berth stevedores will do same for ship's crew.

Average loading/discharging:

Bulk cargo:	Coal	50	t.p.h./gang/hatch	(dis
	Iron ore	45–50	t.p.h./gang/hatch	(dis
	Grain	50	t.p.h./gang/hatch	(dis
Baled cargo:	Cement	50	t.p.h./gang/hatch	(loa
	Fertilisers	40	t.p.h./gang/hatch	(loa
	Grain	30–50	t.p.h./gang/hatch	(dis
	General	40	t.p.h./gang/hatch	(loa
Steel cargo:	Under 20 ft. long	25–30	t.p.h./gang/hatch	(loa
	Over 20 ft.	15–20	t.p.h./gang/hatch	(loa

Scrap steel:	Pressed	20	t.p.h./gang/hatch (dis)
	Ordinary	10	t.p.h./gang/hatch (dis)
	Bulky and awkward	5	t.p.h./gang/hatch (dis)
Lumber/logs:	Lumber	15–20	t.p.h./gang/hatch (dis)
	Logs	30	t.p.h. gang/hatch (dis)

2 shifts; 0800 to 1700 hrs. and 1800 to 0500 hrs. Normal working hours 0800 to 1700 hrs. Overtime work is possible by applying to Customs. No work can be arranged on 31st December and during New Year holidays (1st to 3rd Jan.). No work on 1st and 3rd Sunday of each month.

BRIDGE: Kanmon Bridge – Clearance 61 m. Over 59 m. must advise Pilot Office in advance.

MEDICAL: No advance notice required unless urgent.

TANKERS: No slop discharge facilities. Mobil Oil Berth situated at Okubo, near Tanoura. In the vicinity of the berth, the current runs towards West nearly all the time. Maximum rate of current 3 knots. Vessels berthed during period that tide sets to West, in daytime only. Mooring berth consists of 1 oil pier (length 80 m. width 5 m.) and 2 dolphins. Two 10 in. pipes connected to vessel; discharge rate 1,000 t.p.h. (Fuel and diesel oil).

Also see "Max. Size".

FRESH WATER: Good fresh water supplied from water barges to vessels lying at anchorage; from hydrants to those alongside wharves. The rate of delivery per hour is 20 – 40 tons from hydrant and 50 tons from barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Bonded bunker oil is supplied by oil barges. The rate of delivery: 80 t.p.h. – 100 t.p.h.

CONSULS: Honorary British Consulate concurrent with Honorary Swedish Consulate.

REPAIRS: Mitsubishi Heavy Industries, Ltd. Shimonoseki; Daiki Industries Co., Ltd. Moji; Kitakyushu Iron Works, Wakamatsu.

DRY DOCKS: Refer "Shimonoseki".

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register and International Tonnage Certificate to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible.

AIRPORT: Fukuoka Airport 2 hours by train and taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police station (tel. 110) and Fire/Ambulance (tel. 119).

TELEPHONE: Telephone placed on board.

SERVICES: All services available, including hold cleaning and grain fitting.

SHORE LEAVE: Immigration Officials board vessel on her arrival in port to examine passports, discharge books and/or other equivalent travel documents and provide 15 day landing passes for crew members and passengers. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting Immigration business on ship's arrival. When ship stays in port more than 15 days, the landing passes may be extended every 15 days on application. In the event that crew members without entry visas are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men, has been booked, or unless the ships to which they are to be transferred arrive in Japan within 5 days.

DEVELOPMENTS: Dredging work is being carried out for deepening the draft to 13 m. and extending the Pier Aprons. This construction, dredging and reclaiming is expected to be completed by 1995.

Masters are to keep in close contact with Agent on this work, as sometimes vessels cannot pass through Kanmon Channel, due to dredging materials.

East Wharf	390	7.5	1×5,000
South Wharf	130	7.5	1×5,000

STEVEDORES: Normal working time 0830 hrs. – 1700 hrs. Log gangs available.

FRESH WATER: Available.

FUEL: Domestic oil is available. Bonded oil to be brought from Hakodate or Muroran with sufficient advance notice.

GENERAL: *Immigration:* The authorities come from Wakkanai.

Lightering: Not possible.

Shipchandlers: Provisions obtainable.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Nippon Express Co.Ltd., Sales Dept., 1-8, 5-chome, Saiwai-cho, Monbetsu City, Hokkaido 094, Japan. Tel: (01582) 3-5246. Fax: (01582) 3-5965. Cables: Nexco Monbetsu.

MURORAN: 42.20 N. 140.58 E. (See Plan)

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
Derat Exemption Certificate.
3 Port of Call Lists (Voyage Memo).
Last Port Clearance.
6 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare 2 Inward/Outward Declarations, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but advisable for VLCC's. Arranged by Agent subject receipt of ETA advice at least 24 hours prior arrival. Pilot boarding area in vicinity of 250° × 1.5 miles from South Breakwater Lighthouse (never drop anchor North or area above 270°, due to fouling when anchoring).

Also see "Restrictions".

ANCHORAGES: Outside harbour limits: Subject to notice having been given to Authorities prior arrival.

Inside harbour limits: Permitted in any part.

RESTRICTIONS: Berthing must be finished 1 hour before sunset on VLCC's and oil tankers. Unberthing possible daytime only.

Pilots usually work from 0600 hrs. to 1 hour before sunset in Summer season, and from 0730 hrs. to 1 hour before sunset in Winter season.

Vessels over 30,000 g.r.t. usually have 2 pilots onboard for operations.

MAX. SIZE: *Nisseki Pier (Nippon Petroleum):*

	Max. d.w.t.	*Max. LOA*	*Max. Safe Draft*	*Max. Berth*
	*59,200 (*35,600 g.r.t.)	240 m.	9.90 m.	33.0 m.
Sea Berth	(258,374)	321.45 m.	15.00 m.	58.0 m.

*For vessels of deadweight tons, gross tons and LOA in excess of above limits, it is necessary to obtain entry permission from the Harbour Master, Pilot and the Refinery in advance.

Ore Carriers: Max. LOA 313 m., max. draft 16.0 m.

HEALTH: Radio Pratique available. Vessels usually anchor at Muroran, where the authorities board and grant Free Pratique.
RADIO: Suitable radio stations to communicate with Agents are Sapporo Radio and/or Choshi Radio.
VHF: Harbour Master "Muroran Hoan" is usable via "Otaru Hoan", only in case of emergency or official use. Agents can contact Master by using VHF Channel 16 of tug.
TUGS: 8 tugs, up to 3,200 h.p. Usually meet vessel near Inner Harbour breakwater. 10% additional charge if tug's lines used.

BERTHING: Pilot boarding time will be notified by ship's Agent mainly by radio.

SURVEYORS: Cargo surveyors able to attend from Moji or other areas if prior notice given. LR, ABS and BV are available in Nagasaki. Salvage Association or U.S. Salvage are able to attend from Moji to Nagasaki.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible.

AIRPORT: Distance 54 km. (centre of town to air terminal). Time 1.5 hours by car. All Nippon Airways have regular daily service with 6 flights for Tokyo and Osaka, Japan Air System have regular daily service with 2 flights for Tokyo and Japan Airlines have regular daily service with 1 flight to Tokyo.

Overseas services: Japan Air Lines (JAL) and General Administration of Civil Aviation of China (CAAC) have regular service with 2 flights a week to Shanghai, China. Japan Airlines and Korean Airlines (KAL) have regular service with 3 flights for Seoul and Busan, Korea.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 22-2141; Ambulance/Fire 22-3211 (Fire station).

EMERGENCY CO-ORDINATION CENTRE: Contact Harbour Master.

TELEPHONE: Shore telephone can be installed on board vessel at wharves of Yanagi, Matsugae and Dejima. Vessels at Mitsubishi Yards can communicate via shipyards' switchboard with town.

STORING: See "Prelims".

1. Yes.
2. No restrictions, vessel can store at anytime if adequate notice given.
3. Trucks can proceed alongside at the berth.
4. Yes.
5. No special regulations, but a simple style application must be made to Customs before storing.
6. Yes.

SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 15 days. Extension possible if ship stays longer.

AUTHORITY: Nagasaki Port Authority, 2-11 Dejima, Nagasaki City. Tel: (0958) 22-1257. *FAX:* 0958-22-2265 (Head office).

Harbour Master (Maritime Safety Agency): 7-29 Matsugae, Nagasaki. Tel: (0958) 27-5133.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Sawayama & Company Ltd., 3-10, Dejima-machi, Nagasaki City 850, Japan. Tel: (0958) 23-1221. Telex: 7523-16 Swymac J. Fax: (0958) 23-1227. Cables: Sawayama Nagasaki.

NAGOYA: 35.05 N. 136.53 E. (See Plan)

LOCATION: Situated at Northern head of Ise Bay. Harbour protected by breakwater 7.6 km. in length stretching from Chita Peninsula to bank of Kiso River at opposite side of harbour.

DOCUMENTS:

(a) Quarantine (only when arriving at first port of Japan from a foreign port): One copy of each.
Maritime Declaration of Health.
Crew List.
List of Passengers.
Cargo Manifest.
Declaration Inward (required when vessel granted Radio Free Pratique and prepared by Agent).
Also Log Book and Ship's Register should be readily available.

(b) Customs: One copy of each.
Declaration Inward/Outward with Ports of Call (prepared by Agent).
Ship's National Registry.
Ship's International Tonnage Certificate.
Last Port Clearance.
Stores List (including arms and narcotics).
Cargo Manifest (Discharge/through).
Crew List.
Passenger List.
Crew's Baggage List (the first port of call in Japan).
List of Ports of Call.

(c) Immigration: One copy of each.
Declaration Inward with Ports of Call (prepared by Agent).
Crew List.
Notification of Arrival (prepared by Agent).
Application for Crew's Shore Passes.
Passenger List.
Report on Departure.
Declaration Outward (prepared by Agent).

(d) Harbour Master:
1 Crew List.
1 Declaration Inward/Outward.

(e) Port Authority:
1 Declaration Inward/Outward.

PILOTAGE: Pilotage is compulsory in Ise and Mikawa Wan Bays (where Nagoya, Yokkaichi and other ports located) for vessels of 10,000 g.r.t. or more.

Irago Bay Pilot: Pilotage from entrance of Irago Suido up to Nagoya Anchorage, vise-versa.

Irago Pilot is arranged by Agents, and Master of vessel is requested to maintain contact with Irago Pilot Station, and advise ETA to Irago Pilot by the following means of communication:

(a) Telex: 4563668 Iragop.
(b) Cables: Iragopilot Handa.
(c) VHF: Channel 16, then turn to Channel 13, call sign "Irago Pilot".

Vessel should make contact 3 hours and 1.5 hours prior to arrival at pilot station.

Boarding Points:

(a) 34° 30.8′ N., 137° 06.9′ E., when coming from Eastward.
(b) 34° 28.3′ N., 137° 03.8′ E., when coming from Westward.
(c) 34° 24.8′ N., 137° 03.8′ E., L.N.G. tankers.
(d) 34° 24.6′ N., 137° 00.1′ E., deep draft vessels (14.0 m. or more).

Requirements for vessel when taking a pilot:

1. Pilot ladder: To be fitted with spreaders in accordance with Solas Convention, Chapter V, Reg. 17, on ship's lee side, and kept clean and in good order. The lowest rung to be 1.0 m. above the water.
2. Manropes: 3.5 in. manilas to be rigged when pilot disembarking.
3. A ring buoy with a self-igniting buoy should be provided.
4. Speed: Keep vessel's head way at about 6 knots.

Harbour Pilot: Agents arrange harbour pilot, and Master of vessel is requested to contact Harbour Pilot Station through Nagoya Port Radio by VHF Channel 16.

Boarding point: Vicinity of Buoy No. 6 in Nagoya Outer Harbour.

ANCHORAGES: Quarantine Anchorage, located outside High Tide Breakwaters, between No. 1 and No. 2 Harbour Fairways, offers safe anchorage for vessels awaiting Pilot or quarantine service. Depth of this anchorage area ranges from 10.0 m. to 20.0 m. Sea bed is silty clay. Vessels loaded with dangerous cargo are to be anchored by Harbour Master's instructions.

Anchoring places are:
Crude oil carriers – 2 miles South from Isewan Sea Berth.
LPG carriers – 3 miles 200° from Isewan Sea Berth.
LNG carriers – 4 miles South from Isewan Sea Berth.

The above three kinds of vessels must obtain anchoring permission from Harbour Master in advance.

Also see "Fuel" – "Important Notice".

RESTRICTIONS: Vessels (LOA 200 m. or more, carrying dangerous cargo, draft 13.20 m. or more, or g.r.t. 20,000 and over) are restricted to enter the fairways of Nagoya Port, and advance permission for entry/departure must be obtained from Harbour Master. Agents do the necessary procedures, and all Master has to do is adhere to the signal control.

Also at Irago Suido Traffic Route, the following vessel size is restricted to enter the route and the permission for entry must be obtained in advance from Maritime Safety Agency (Irago Traffic Signal Control).

1. LOA 200 m. and over.
2. G.r.t. 1,000 or more with dangerous cargo.
3. G.r.t. 300 or more with 80 tons or more of ammunition, or 200 tons or more of organic peroxides.

MAX. SIZE:

	Berth	*Capacity* (d.w.t.)	*Depth* (m.)	*Length* (m.)
Tanker	Isewan Sea Berth	280,000×2 (Max.LOA 350 m., max.draft 20 m.	25.5	500
Ore Carrier	Nippon Steel Corp.	310,000×1	14.0	350
Container Ship	Public Berth No.94	50,000×1	14.0	350
Car Carrier	Toyota	65,000×1	11.0	250
General Cargo	Nisshin Seifun	65,000×1	12.0	240
	Toyo Grain	66,000×1	12.0	227
	Oji Seishi	50,000×2	12.0	227+249

HEALTH: Vessels must obtain Free Pratique from Quarantine Authorities at the first port of call in Japan from a foreign country.

Ordinary quarantine inspection will be undertaken by officials in Quarantine Anchorage at Nagoya. Quarantine Office hours: 0900 hrs. – 1700 hrs., Saturday, Sundays and holidays included for this service.

However, Radio Free Pratique is applicable and obtainable, so that vessel can save time and get cargo work underway in port. The mentioned Radio Pratique is given only if vessel holds a valid Certificate of Sanitary Inspection issued by Japanese Government. If so, Master is requested to send Pratique message to quarantine station through Agent within 36 hours before arrival, except for 1200 hrs. – 2400 hrs. on the 2nd and 4th Saturdays of each month, and Sundays and holidays.

Vessel will not be able to obtain Radio Free Pratique if any of the following cases is applied:

1. If in contact with an infectious area or a suspected area within 15 days of arrival.
2. If infectious disease occurred on board or even with any suspected case.
3. If Derat or Derat Exemption Certificate expired.
4. If no Japanese Sanitary Inspection Certificate on board.

RADIO: Call sign: JHY, range 200 km. (24 hour service).

Frequency: 500 kHz., working frequency 429.5 kHz.

This station is not in service of sending international cable messages to Agent's office. To despatch ship's message to Agents, Choshi or Nagasaki Radio is available.

VHF: Nagoya Port Radio (also as call sign), covering 110 km. from Kamishima Island with 24 hour service. Call on Channel 16, working on Channels 12 or 20.

TUGS: Usually join at point where vessel directs course toward allocated berth. Tug's lines normally used without charge.

Tugs are available at any time but advance notice should be given to the service companies and Port Authority.

BERTHING:

Public Wharves: (With a depth of 4.5 m. or more).

CONTAINER HANDLING FACILITIES: Nagoya Container Berth Berths R1, R2 and R3. R1 equipped with 22 m. Ro/Ro ramp. Total len 850 m. Depth 12.0 m. Capacity 3×35,000 d.w.t. 6 cranes available

Also see "Berthing".

CRANES: One floating crane of 120 tonnes capacity available, ow by Fukada Salvage Co.Ltd. Mobile cargo cranes also available.

BULK HANDLING FACILITIES: Coal Pier (Area No. 10 Wharf) accommodate ships up to 15,000 tons. Depth of water 10.0 m.

Nippon Steel Corp., has 1 berth for handling of iron ore with 35 long wharf and a depth of water 14 m., 2 berths for ore and/or coal a 500 m. long wharf and a depth of 13 m., 1 berth for scrap iron 140 m. wharf and a depth of water 13 m.

Grain handling facilities include Wharf No. 8, 991 m. long and 5.5 deep. Nisshin Wharf 150 m. long and 12 m. deep. Toyo Grain W 255 m. long and 12 m. deep. Chita Futo Wharf 185 m. long and 1 deep.

Also see "Berthing".

Ferry Terminals: Nagoya Ferry Berth Co. has 3 berths. Total leng 663 m. with 7.5 m. depth. Capacity is 1×7,000 g.r.t. and 2×10,000

STEVEDORES: Stevedores arranged by Agents by 1500 hrs. on day prior to the working day.

Normal working hours: 0830 hrs. – 1630 hrs.

Overtime work is possible from 1630 hrs. – 2130 hrs. with over fee 60% of basic charge. 2130 hrs. – 0830 hrs. with overtime fee 1 of basic charge. Saturday: Overtime fee 60% of basic cha Sunday: Overtime fee 100% of basic charge (0830 hrs. – 1630 hrs

At private berths, working hours of stevedores vary from berth to b

MEDICAL: Hospitals conveniently located near port.

Medical clinics for vessel's crew also available in port, and they crew to the medical offices from vessel, and vice-versa. Advance no to Agent is preferable.

REPAIRS: All types of repairs possible. Repairs by Ishikawajima-Ha Heavy Industries Co. Ltd., Aichi Works.

DRY DOCKS: Ishikawajima-Harima Heavy Industries Co. Ltd., A Works. (IHI), length 810 m., width 92 m. Capacity: Repair 161,000 build 95,000 g.r.t.

TANKERS:

Also see "Berthing".

Isewan Sea Berth: Location: Lat. 34° 55.2′ N., Long. 136° 44.36′ E.

Isewan Sea Berth is operated by Isewan Seaberth Co.Ltd.

Terminal operates 24 hours a day, 7 days a week. Ships are moored and unmoored during daytime. Discharging commences during daytime.

Berthing/unberthing is prohibited when wind velocity over 15 m./sec. or height of waves is over 0.8 m. and/or visibility under one nautical mile. Discharging is suspended when height of waves is over 1.5 m. or wind velocity over 15 m./sec.

Loading arms (4 arms) 4,500 kl./arm, max. rate 18,000 kl./hr. and max. pressure 10.0 kg./cm. at manifold.

Berth Depth: 25.0 m.

Max. Size: Draft 20.0 m.; max. d.w.t. 280,000; max. LOA 345 m. (approx.).

Berth Length: 500 m. each, West and East.

No. of Berths: Two.

Side Alongside: Usually portside alongside at East berth, and starboard side at West berth.

Pilotage: Vessels over 10,000 g.r.t. must use a pilot.

Tugs: Terminal requests that vessels use tugs for berthing and unberthing. Tugs horse power is calculated as follows:

For berthing: Ship's d.w.t. × (6% – 8%) = Required h.p.

For unberthing: Ship's d.w.t. × (4% – 5%) = Required h.p.

Guard Boat: Cargo consignee arranges guard boat.

DENSITY: 1019 – 1020.

FRESH WATER: Water supplied direct from pier or by barge.

FUEL: Most grades of domestic and bonded oil are available.

Important Notice: Bunkering at anchorage can be carried out within harbour limit line. If a vessel finds safe anchorage only outside the harbour limit line, bunkering is not allowed without special permission from Nagoya Customs and Ministry of Transport.

Firstly, the permission from Transport Ministry should be obtained, and secondly, the Closed-Port-Dues for the Customs should be paid. With those legal procedures done, a vessel outside the limit line can take bunkers.

CONSULS: Korea.

SURVEYORS:

1. Cargo inspectors, bunker soundings, hulls for delivery, etc., by Japanese Government Sworn Surveyors, S.N.K.K. (Shin-Nihon Kentei Kyokai) and N.K.K. (Nippon Kaiji Kentei Kyokai).
2. Class Surveyors: Lloyd's Register, American Bureau, Nippon Kaiji.

Other class surveyors should be arranged in advance as their offices are not located in Nagoya.

GANGWAY/DECK WATCHMEN: Not compulsory but available.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, wine and spirits are not sealed in ship's bonded stores by the Customs, and each crew member can consume freely on board the vessel. This arrangement of the Customs service came into effect in February 1991.

REPATRIATION: Facilities available, but the legal procedures are required to be carried out during the Immigration office hours only (0900 hrs. – 1700 hrs. from Monday to Friday).

The Immigration Office of Nagoya Port is not open outside office hours or Saturdays, Sundays and holidays.

AIRPORT: Nagoya Airport, 1 hour and 10 minutes by car from the airport to the Immigration Office (Nagoya Port), depending on traffic.

Flights available to Auckland, Bangkok, Brisbane, Cairns, Cheju, Denpasar (Bali), Frankfurt, Guam, Hong Kong, Honolulu, Jakarta, Kuala Lumpur, London, Los Angeles, Moscow, Paris (Charles de Gaulle), Portland, Pusan, Rio de Janeiro, Saipan, Sao Paulo, Seoul, Singapore, Sydney, Taipei and Vancouver.

TIME: JST (Japan Standard Time), 9 hours ahead of GMT.

HOLIDAYS: Cargo work not arranged on the following day: July 20th (Maritime Day).

Stevedores' no-working days: 2 Sundays in each month, Year End/New Year holidays.

National holidays: January 15th; February 11th; March 21st; April 29th; May 3rd, 4th, 5th; September 15th, 23rd; October 10th; November 3rd, 23rd; December 23rd.

It is getting difficult to arrange stevedores even on these national holidays, due to the recent labour shortage. Negotiations with stevedores required in advance, in order to arrange for cargo work.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance 119, Fire 119.

EMERGENCY CO-ORDINATION CENTRE: If emergency (fire, pirates, robbery, etc.) breaks out, contact the 4th Regional Maritime Safety Headquarters by the following ways:

1. VHF: Channel 16, call sign "Nagoya Hoan".
2. Cable: Code J.N.T.
3. Telex: No. 4934961 Jmsana.
4. Distress: Call 2182 kHz.
5. Telephone: No. 052-661-1611 (0900 hrs. – 1700 hrs., Monday to Friday, or 052-661-1616 (outside office hours).

TELEPHONES: Shore telephone available on board at most public piers. Two telephones can be installed on board from a pier.

The approximate cost per pier telephone: Yen 7,000/day.

Overseas calls, domestic calls to outside Nagoya City, V.A.T. not included.

SERVICES: Hold cleaning and tank cleaning available.

Local repair shop for radio and radar available but advance notice preferable, in order to get spare parts for repairs.

Supply of Japanese Charts available at Asahi Service Co.Ltd. For British Admiralty and other charts, advance notice required.

Shipchandlers, laundry, garbage disposal and Notary Public for Marine Note of Protest available.

SHIP SUPPLY SERVICE: Launch service for crews:

Ferry, speed boat/bus service:

Nagoya Ship Service Co.Ltd. Tel: 052-661-1322. Fax: 052-652-1156.

Speed boat service to anchorage:

Chita Boat Co.Ltd. Tel: 052-653-0127.

Heisei Marine Co.Ltd. Tel: 052-653-1505. Fax: 052-653-2424.

Delivery of ship's parts/machinery:

Heisei Marine Co.Ltd. See above.

Fujita Senyo. Tel: 052-661-1117.

Shipchandlers/parts and machinery:

Fuji Trading Co.Ltd. Tel: 052-652-0241. Fax: 052-652-0242.

Chita Senshoku. Tel: 0562-55-3888. Fax: 0562-55-4110.

BANKS: Tokai Bank, Nagoyako Branch, 1-17-11, Meiko Minato-ku, Nagoya, 455 Japan. Tel: 052-653-2111, 052-652-9663 (foreign exchange section).

SHORE LEAVE: Allowed with shore passes issued by Immigration.

IDENTIFICATION CARDS: Shore passes to be issued by Immigration at the first port of call in Japan, so either Seaman's Book or Passport (valid) required for issuing of shore passes.

GARBAGE DISPOSAL: Authorised Marine Disposal Companies:

Genyo-Kosan Co. Ltd. Tel: (052) 661-6050. Fax: (052) 661-6011.

Heisei-Shoji Co. Ltd. Tel: (052) 653-1505. Fax: (052) 653-2424.

WASTE OIL DISPOSAL: Contact: Daiko Marine Co. Ltd. Tel: (052) 681-3887. Fax: (052) 681-3223.

SEAMAN'S CLUBS: None.

CURRENCY: Japanese Yen. U.S.$ 1.00 = Y 134.00 (12.3.92).

DEVELOPMENTS: A new deepwater container berth is being constructed to the North of Berth No. 94 in West 4 Section. Like Berth No. 94, the new berth will be equipped with 2 post-Panamax gantry cranes, one of which will be in operation in June of 1992 at Berth No. 94. Construction of the berth will begin in October 1992. Berth No. 92 of West 4 Section is being equipped with a gantry crane (Outreach: Panamax, lift height above quay: 31.86 m.) and is scheduled to be in operation by June 1993. In addition, the port is planning to construct 2 berths at West 3 Section and 5 berths at West 5 Section in the near future.

No. 1 Harbour Fairway (Main Channel) 14.0 m. deep and 350 m. wide. The depth will be deepened to 15.0 m., and the width will be widened to 500 m.

No. 2 Harbour Fairway (Secondary Channel) 10.0 m. deep and 220 m. wide. The depth will be deepened to 12.0 m. and width will be widened to 350 m.

Two bridges are under construction. One bridge is across Kinjo Wharf and Area No. 9, the other bridge is across Area No. 9 and South 1 Section. Completion of the 2 bridges is planned for April 1997.

In 1997, Nagoya port will have three bridges across Nagoya Port to the new access road.

Height of each bridge:

Nagoya Port West Bridge: 37.0 m. (Between West 2 Section and Kinjo Wharf (Area No.13) already constructed).

Nagoya Port Central Bridge: 47.0 m. (most likely over 50.0 m.). (Between Kinjo Wharf (Area No.13) and Petroleum Products depot (Area No.9).

Nagoya Port East Bridge: 40.0 m. (Between Area No.9 and South 1 Section).

AUTHORITY: Nagoya Port Authority, 8-21, Irifune, 1-Chome, Minato-Ku, Nagoya, 455-91 Japan. *Tel:* (052) 661-4111/4. *Telex:* 04463816 NPAJ. *FAX:* (052) 661-0155. *Contact:* Yoshio Haraguchi, Executive Vice-President.

NAHA, Okinawa: 26.12 N. 127.40 E. (See Plan)

DOCUMENTS:

Ship's Register.

Last Port Clearance.

5 Crew Lists, including Passport or Seaman's Book numbers.

5 Passenger Lists, including nationality, if any on board.

1 Stores List.

1 Declaration of Crew's Baggage, i.e. tobacco, wines/spirits, camera, wrist-watch, radio, firearms/swords, etc. (Only at first port of call in Japan.)

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest, Cargo Manifest in transit using specific forms. Therefore Ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot service is compulsory when entering Naha Port (Naha Wharf), but not compulsory for Shinko Wharf (New Wharf). Pilot boards in position Lat. 26° 13′ 49″ N., Long. 127° 38′ 20″ E.

When entering Naha Wharf, signal controls will apply, and the vessel must hoist and fly following flags:

1. Entering Naha Wharf: Hoist No. 2 and "N" flag.
2. Entering Shinko Wharf (New Wharf): Hoist No. 2 and "S" flag.
3. Sailing out from Naha Wharf or Shinko Wharf: To Touguchi Entrance – hoist No. and "T" flag.
4. Sailing out from Naha Wharf or Shinko Wharf: To Yamatogichi Entrance – hoist No. and "Y" flag.

RESTRICTIONS: Vessels entering Naha Port are controlled by the limiting depth in the entrance channel of 11 m. Entry and departure possible 24 hours.

MAX. SIZE: Length and beam not limited. Max. draft 11 m. If vessel over 30,000 g.r.t., it should be discussed with Maritime Safety Agency and Port Office.

HEALTH: Radio Pratique only available if vessel has Japanese Sanitary Inspection Certificate. Quarantine formalities carried out at the Quarantine Anchorage (Lat. 26° 14′ 18″ N., Long. 127° 38′ 57″ E.) from 0830 hrs. to 1700 hrs.

RADIO: Recommended communicate with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radio, respectively. Also see "VHF".

VHF: Vessels may call Naha Hoan (Japanese Maritime Safety Agency) on Channel 16, especially when there is an emergency.

TUGS: 3 tugs available, 2,000 h.p. – 3,000 h.p.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Capacity* (d.w.t.)

NAKANOSEKI: 34.00 N. 131.34 W. (See Plan)

Port Status: Open Port (Mitajiri-Nakanoseki Port).

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore, ship's Agents should be provided with necessary information about details of cargoes in advance.

Officials:

Customs: Stationed in Nakanoseki.

Maritime Safety Office: Stationed in Nakanoseki.

Quarantine: Not stationed in Nakanoseki. Free Pratique is to b obtained through Tokuyama, Ube or Mutsure Quarantine Station pri to proceeding to Nakanoseki.

Immigration: Official stationed at Tokuyama Office.

Port Authority: Stationed in Nakanoseki.

PILOTAGE: Not compulsory for berthing or unberthing.

Also see "Shipmaster's Report".

ANCHORAGE: See "Shipmaster's Report".

RESTRICTIONS: Berthing is carried out between sunrise and sunse Unberthing is carried out between sunrise and one hour before sunse

MAX. SIZE: No. 3 Wharf: LOA 220 m., draft 9.5 m.

HEALTH: See "Documents" – "Officials".

RADIO: Recommended that Master communicates with Agent throu Choshi Radio or Nagasaki Radio, which cover all ports in Japa Westbound vessels to contact Choshi Radio, and Northbound vesse to contact Nagasaki Radio respectively.

TUGS: Available as required. Stationed at Tokuyama, Ube and Mo Usually using 2 tugs on berthing and 1 tug for unberthing.

BERTHING:

Wharf Name	*Length* (m.)	*Max.Draft* (m.)	*Capacity* (d.w.t.)	*Cargoes*
Pier No. 1	360	5.50	2,000	Domestic cargo.
No. 2	260	7.40	5,000	CKD, Steel products, etc
No. 3	480	9.50	30,000	Mazda vehicles, CKD, plant.

STEVEDORES: At least 24 hours prior notice, excluding Sundays an holidays required, in order for Agent to arrange stevedores. Vessel mus constantly keep her Agent advised of ETA. If stevedores canno commence loading/unloading at time notified by the Agent, the orderer must pay for waiting time. If cargo gear not rigged on berthing stevedores will do same for ship's crew at additional cost.

For loading Mazda CKD/vehicles:

Nippon Express Co.Ltd., Hofu Branch.
Mazda Logistics Service Co.Ltd., Hofu Branch.
Naigai Unyu Co.Ltd., Hofu Branch.

Loading rate: Approximately 80 units per hour per gang, subject t stowage.

Labour: Basically 3 or 4 gangs, but a maximum of 6 gangs a available.

MEDICAL: No advance notice required, unless urgent.

FRESH WATER: Available from shore hydrant, rate approximatel 10 tons per hour. The basic charge is 297 Yen per ton. Barge supply i also available, but this must be brought up from Tokuyama.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Ba Osaka Bay and Kanmon Port. At all other ports, bunkers will be lightere from the nearest bunker stock ports at maximum 7 days prior notice.

CONSULS: No local representatives. Marine Note of Protest can b attended by local notary public.

REPAIRS: No facilities.

GANGWAY/DECK WATCHMEN: Not specially required, unles passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening an closing hatches. If any time lost by ship's crew doing this wor stevedores charge ship for waiting. Recommend request stevedores t this work, unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship registered gross and nett tonnages. Valid Cargo Gear Certificate sometimes required by stevedores, when cargo gear maintenanc appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

REPATRIATON: Possible.

AIRPORT: Nearest Ube Airport, about 2 hours drive from Nakanosek JAS and ANA Lines.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

Public telephone booth available near by the berth.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore passes, val for only 15 days, when Nakanoseki is first port of call in Japan. Extensio possible if ship stays longer.

SHIPMASTER'S REPORT: December 1988.

Documents:

Ship's Register.
Last Port Clearance.
5 copies of Crew List, including Passport Numbers.
3 copies of Lists of Ports of Call.
1 copy Stores List.
1 copy Through Cargo Manifest.

Please note that Nakanoseki was not the first Port of Call in Japa If such is the case then at least one Declaration of Crew's Baggage an one Maritime Declaration of Health will probably be required.

Pilotage: Available, but not compulsory.

According to information received by the vessel prior to arrival off th port, Harbour Pilot boards in the vicinity of a 250 m. radius circle (tr bearing 159°, 1,590 m. from Nakanoseki Lighthouse), depth of wat approximately 11.10 m. This boarding area is used for vessels with deadweight in excess of 10,000 tons or if the LOA exceeds 150 m.

Information was also received from the vessel's Agent prior to arri regarding the pilot boarding area. They advised me that the Pilot wou board in position Lat. 33° 58′ N., Long. 131° 33′ E. (090°, 2.0 miles fro Saba Shima Lighthouse). In my opinion this is the more practical of th 2 boarding areas as it keeps the vessel well clear of the numerous fi havens in the vicinity of the channel entrance and allows plenty of roo to manoeuvre to seaward should the vessel have to drift and await th Pilot during periods of high winds.

If required, Inland Sea Pilotage service is available either fro Sekisaki, Kobe, Hesaki, Tokuyama and/or Kadamatsu Pilot Station.

The Pilot boarded the vessel using one of the local tugs.

The Pilot advised me that during flood tide a current of up to 1.2 knots can be experienced across the channel entrance, flowing from East to West. During ebb tide the flow is in the opposite direction.

Anchorages: There is no suitable waiting anchorage for vessels of this size (PCC/Lumber Carrier, 33,000 g.r.t.). Vessels are requested to adjust their ETA so that they arrive at the Pilot Station without having to anchor. I questioned the Pilot as to why it was not permissible to anchor in the vicinity of the Pilot boarding ground and he advised me that it was because of the numerous fishing havens in the area and objections received from local fishermen.

Should the vessel be compelled to anchor for any reason, the Pilot advised a position 138°, 3,000 m. from Ryugu Saki Light. Care must be taken when anchoring in this position due to the close proximity of underwater cables.

Max. Size: Dependent on height of tide. Vessel must have 10% under keel clearance in the approaches, where the depth of water is 10.50 m.

VHF: During the early morning approach to the port the vessel was unable to contact the Pilot by VHF.

Tugs: Available as required. Stationed at Tokuyama Port. This vessel used 2 tugs for berthing and 1 tug for unberthing. Vessel is equipped with bow thruster and was berthed starboard side to, head out.

Berthing: Nakanoseki Wharf No. 3 (Owned/Controlled by Yamaguchi Prefecture).

The berth is used exclusively for Mazda vehicles/CKD but occasionally for Log/Plant carriers.

Depth of water in approaches:	10.50 m.
Depth of water alongside:	12.00 m.
Length of Wharf:	240 m.
Side alongside:	Basically port side to, but starboard side to is also acceptable.

The berth is very exposed to the W/N.W. and strong winds blowing from this direction could prove to be a problem for high-sided PCC type vessels.

Stevedores: For loading Mazda cars/CKD.
Nippon Express Company Limited, Hofu Branch.
Mazda Logistics Service Company Limited, Hofu Branch.
Naigai Unyu Company Limited, Hofu Branch.

Loading Rate: Approximately 80 units per gang hour, subject to stowage.

Labour: Basically 3 or 4 gangs, but a maximum of 6 gangs are available.

General: Charts: There is no large scale BA. Chart of the area available at present. For the purpose of our visit, Japanese Chart No. 1134 was purchased.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Green Shipping Ltd., Moji, c/o Sankyu Inc., Yamaguchi-Nishi Branch, 415-15 Ichinomasu, Aza Ohama, Ooaza Hamakata, Houfu City, Yamaguchi Pref., Japan. Tel: 0835-25-0039. Telex: 6765-93 Sankyu J. Fax: 0835-24-3039. Cables: Hamasankyu Tokuyama.

NAMIKATA: 34.07 N. 132.55 E. (See Plan)

Port Status – Closed Port.

DOCUMENTS:
Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
3 Ports of Call Lists.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station.

Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory for vessels under 10,000 g.r.t., but recommended in view of great number of islands causing navigational hazards. Pilot obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth.

1. Wadamisaki. (In this case Pilots compulsory if over 10,000 g.r.t.) Position: Lat. 34° 35′ N., Long. 135° 08′ 24″ E. Cable address: "Anjin Kobe".
2. Sekisaki. Position: Lat. 33° 13′ N., Long. 131° 54′ E. Cable address: "Anjin Saganoseki".
3. Hesaki. Position: Lat. 33° 57′ N., Long. 131° 03′ E. Cable address: "Anjin Moji".

ANCHORAGE: No anchorage at Namikata.
RESTRICTIONS: Mooring and unmooring daytime only with slack tide.
MAX. SIZE: Oil tankers: 125,000 d.w.t. Gas tankers: 67,000 d.w.t.
HEALTH: Closed port. Vessels should obtain Pratique at Matsuyama.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio.
TUGS: Join vessel off Namikata, always using tug's line without charge. 2 to 4 tugs are required for berthing, depending on size of vessel.
BERTHING: Berthing time will be notified by ship's Agent by radio.
MEDICAL: No advance notice required unless urgent.
TANKERS: *Namikata Terminal Co. Ltd.* only. Located approximate position Lat. 34° 07′ 07″ N., Long. 132° 54′ 32″ E. See "Max. Size".
FRESH WATER: Available by shore line. Rate of delivery: 20 t.p.h.
FUEL: Not available.
REPAIRS: Not possible.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
REPATRIATION: Possible. Nearest Immigration Office situated at Niihama.
AIRPORT: Nearest at Matsuyama.
TIME: GMT plus 9 hours.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.
TELEPHONE: No facilities for placing telephones on board.
SHORE LEAVE: Crew members free to go ashore by designated micro-bus with landing passes issued by Immigration Authorities.
GENERAL: As this port is a Closed Port, special permission to enter into closed port is required from Shikoku Maritime Bureau.

No quarantine available, the nearest Quarantine Station at Matsuyama.

No Immigration Office at this port (Officials come from Niihama).

The above procedures of Quarantine/Customs and Shikoku Maritime Bureau will be undertaken by Namikata Agent.

SHIPMASTER'S REPORT: May 1987.

Pilotage: Inland Sea Pilot from Seki Saki inwards who also undertakes berthing/unberthing, etc. Inland Sea can be traversed by day or night although daylight is preferable.

Pilot should be ordered in advance, telexes sent to "Oita Kyushu" via Moji MSA Radio and confirmed by VHF when within range of Oita Radio.

Restrictions: Berthing/unberthing daylight only when current is less than 0.5 knots for LPG tankers and 1.0 knots for other tankers.

Vessels must proceed to Matsuyama Anchorage for Quarantine and Immigration clearance and to await suitable berthing conditions.

Anchorage: No anchorage off Namikata, waiting vessels must anchor off Matsuyama.

Obstructions: There is a 10 m. patch just North West of Kazitori-No-Ha.

Tugs: 3 tugs used for berthing and 2 tugs used for unberthing with the usual guard tug in attendance inwards and outwards from Matsuyama and whilst vessel alongside.

Berth: Berth is of modern construction and design. Vessels usually berth starboard side to with 4 head/stern lines, 2 breast lines and 2 springs fore and aft. Arms: Liquid 2 × 12 in. ASA. Vapour return line 1 × 8 in. ASA. Discharge rate 1,800 tonnes/hour. Shore gangway provided.

Fuel: No bunkering allowed at Namikata, however can be supplied off Matsuyama where additional tonnage dues must be paid.

SHIPMASTER'S REPORT: September 1991.

Vessel: 83,800 d.w.t., 244.5 m. LOA and 12.00 m. arrival draft.

Cargo: 27,000 tonnes of Naphtha.

API	78.5
Gravity	0.65 – 0.70
Flash Point	– 43°C
Boiling Point	2.3
Fire Point	390°C

Safety Measures:

(1) The route to be tanken to/from oil terminal at Seto Naikai (Inland Sea):

Bungo Suido (Suido means narrow channel) – Iyo Nada – Tsurishima Suido – Aki Nada and reach to Namikata Terminal, and return to Bungo Suido.

(2) General measures for safety navigation in Inland Sea:

The vessel shall take the following safety measures in accordance with the maritime traffic law for safety navigation and with the assistance of a pilot.

1. When in poor visibility, the vessel shall maintain the safety speed and also keep the maritime traffic laws. If necessary, the vessel shall anchor and wait for favourable conditions.
2. The vessel shall arrange fire wires and auxiliary ropes at the bow and the stern of the vessel for immediate use.
3. The vessel shall pay careful attention to the crossing ferryboats.
4. The vessel shall not manoeuvre by auto-pilot except in Suo-Nada.
5. The vessel shall proceed by the maritime traffic law and also keep to the right of the recommended course shown on the chart.
6. The vessel shall take appropriate steps to ensure safe navigation, including maintaining safe speed in addition to the observation of laws and keep a radar watch and also, the vessel has to arrange sufficient watchmen if required.
7. The vessel shall listen for all notices given by coast guard and international VHF radio.
8. The vessel shall check the weather forecast closely and always be ready for unexpected weather changes. Furthermore, the vessel shall navigate safely.
9. When visibility is poor and may interfere with safe navigation, the vessel shall anchor in a safe place, avoiding the fishing area and recommended course and wait until weather/visibility improves.

(3) Passing Hayasui-Seto:

1. This channel is frequently congested with vessels, ferryboats and fishing boats. The vessel will not pass through this channel in fog if visibility is less than one mile.
2. When passing through this channel, the vessel shall keep to the righthand side of the centre line on a course of North Northwest (South Southeast).
3. The vessel shall not overtake another vessel whose g.r.t. is greater than 500 tons, except in an emergency case, and she shall not pass another vessel during the night.
4. The vessel shall not pass through this channel during the night, if possible.

(4) Passing Iyo-Nada:

The vessel shall pay attention to the prevailing Westerly winds, especially to the seasonal wind in Winter.

(5) Passing Eastern area of Aoshima:
The vessel shall pay special attention to safety and navigation during the night at this area.

(6) Passing Tsurishima Suido:
The vessel shall take the following safety measures for passing Tsurishima Suido and/or narrow channel which is often congested with vessels.

1. When visibility is poor, the vessel shall take appropriate steps to ensure safe navigation and/or anchor temporary until favourable weather returns.
2. Concurrently with enforcement of visual watch on the vessel, radar shall be used effectively to see the surrounding traffic conditions.
3. The vessel will not overtake another vessel whose g.r.t. is greater than 500 tons, except in an emergency.
4. The vessel shall pass the Tsurishima Suido according to the recommendations of the 6th Regional Maritime Safety Headquarters which was issued on November 1st 1977 (see "Approaches" below).

(7) Passing Aki-Nada:
The vessel shall proceed along the recommended course with Aki-Nada Light Beacons No. 2, 3 and 4 on the port side, and confirm passing Ogon-Shou (Reef).

(8) Navigation from Aki-Nada to Namikata Terminal Main Berth:

1. The vessel shall reduce her speed to approximately 4 knots and rendezvous with tugs at Aki-Nada No.4 Light Beacon.
2. The vessel shall proceed to Namikata Terminal Main Berth with forward escort tug which possesses foam fire fighting equipment.
3. The vessel shall approach Namikata Terminal Main Berth after passing Ogon-Sho (Reef).

(9) General safety measures in port:
The vessel shall take the following safety measures in port in keeping with the Japanese Port Regulation Laws.

1. The vessel shall take a harbour pilot for mooring and/or unmooring.
2. Berthing and unberthing shall not take place in adverse weather, such as strong winds (wind speed 15 m./sec.), poor visibility (less than 1 mile), etc.
3. The vessel shall maintain a necessary and ample under keel clearance during stay in port.
4. Concurrently with taking sufficient fire control measures, a strict watch over the area shall be maintained for approach of any vessel suspected of having an insufficient fire control system, and if necessary a warning shall be given to such approaching vessel.
5. Fire fighting equipment furnished onboard shall be inspected and prepared for immediate use.
6. During the cargo operation, the vessel will not carry out any bunkering, otherwise special safety measures will be taken.
7. Prior to start of the cargo operations, the operational procedures and the accident prevention measures shall be fully agreed between the cargo handling parties concerned and the safety check shall be carried out in accordance with a check list.
8. The vessel shall fully carry out safety measures generally taken by vessels carrying general inflammable dangerous cargoes, including arranging fire wires and auxiliary ropes on her bow and stern for immediate use.
9. The ballasting operation shall be carried out during daytime, as far as possible.
10. The vessel shall arrange sufficient duty staff in order to discover oil leakages as soon as possible.
11. A communication system for emergency cases will be organised (communication table will be given to Master).
12. The vessel shall follow all safety measures issued by berth owner and Maritime Safety Headquarters.

(10) Safety measures at Namikata Terminal:
The vessel shall take the following safety measures at Namikata Terminal in addition to the aforesaid safety measures.

1. The vessel shall take a harbour pilot for mooring and/or unmooring.
2. The berthing and unberthing shall not take place under the following weather conditions:
   (a) When average wind speed is 10 m./sec. and /or max. 15 m./sec.
   (b) When wave height is likely to reach 1.5 m.
   (c) When visibility is likely to become less than 1 mile.
   (d) When thunderbolt strike is likely.
   (e) When tidal current is over 0.5 knots.
   (f) When the vessel is recommended to take shelter by Chief of Imabari Maritime Safety Agency due to typhoon approaching.
   (g) When berth owner and/or Master judges that conditions of weather and sea are too poor.
3. Berthing/unberthing available from sunrise to sunset.
4. The approach speed to berth shall be less than 10 cm./sec.
5. The vessel shall use sufficient tug assistance for berthing and/or unberthing.
6. The berthing and/or unberthing shall not be at the same time as coaster operations.
7. When approaching Namikata Terminal Main Berth, the vessel shall refer to current table near the berth.
8. Linehandlers shall be positioned at the forward and after end of terminal dock apron. Linehandling boat is also used.

The adjustment of vessel's position between shore connection and ship's manifold shall be done with utmost careful attention.

(11) Notice of arrival/navigation:
The vessel shall keep in close communications with Namika Terminal prior to entering the Terminal for her safety, and th Terminal shall notify Imabari Maritime Safety Agency of vessel schedule in advance.

(12) Waiting and/or anchoring:
The vessel shall adjust arrival at Namikata Terminal at sea i order to berth on arrival, however in cases of an emergency, th vessel shall proceed to anchorage, where Master shall repo position to Imabari Maritime Safety Agency.

(13) Gas purge operation:
The vessel will not carry out gas-purge operation as a rul however if it is necessary, she shall carry it out only at sea an in following conditions:

1. In favourable weather and good visibility.
2. When wind speed is over 5 m./sec.

(14) Pilotages and towage:

1. Inland Sea Pilot shall embark/disembark at Sekisaki Pil Station.
2. The vessel shall arrange sufficient tugs in accordance with th towage requirement scale prepared by licensed inland/sea pil (See "Tugs/Tides" below).

Approaches: Recommendation for Traffic in Turushima Suido (Se Naikai Western Part): (See plan).

Issued by 6th Regional Maritime Safety Headquarters. Date 1st November 1977.

Keep on the starboard side in Turushima Suido.

A vessel proceeding along the course of Turushima Suido shall kee near to the outer limit on the channel which lies on her starboard sid not less than 150 m. distant from a line drawn from Akinada Minam Koro Light Buoy No.1 (33° 57.3′ N., 132° 43.1′ E.) to Turushima Lig Buoy (33° 54.4′ N., 132° 38′ E.).

Tugs/Tides: Towage scale and restrictions for mooring/unmoorin operations:

Towage scale at Namikata Terminal Main Berth:

Vessel (d.w.t.)	*No. of Tugs and H.P. for Mooring*	*No. of Tugs and H.P. for Unmooring*
Under 6,000	1 Tug (over 1,000)	1 Tug (over 1,000)
6,000 – 20,000	2 Tugs (over 2,000)	2 Tugs (over 2,000)
20,000 – 35,000	2 Tugs (over 2,500)	2 Tugs (over 2,000)
35,000 – 70,000	3 Tugs (over 2,500)	2 Tugs (over 2,500)
70,000 – 100,000	2 Tugs (over 2,500) 1 Tug (over 3,000)	3 Tugs (over 2,000)
100,000 – 125,000	4 Tugs (over 2,500)	3 Tugs (over 2,500)
	(Based Z-type propeller tugboat)	

Restriction of tidal current for mooring and/or unmooring operations:

1. Mooring Operation:
   Vessel's D/W
   Under 10,000 – Tidal current is less than 1.0 knots (against).
   Over 10,000 – Tidal current is less than 0.5 knots (against).
2. Unmooring Operation:
   Vessel's D/W
   Under 35,000 – Tidal current is less than 1.0 knots.
   35,000 – 50,000 – Tidal current is less than 0.7 knots.
   Over 50,000 – Tidal current is less than 0.5 knots.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Morizane Transportation Co. Ltd., Namikata Branch Office, 43 Miyazaki, Kou Namikata-cho, Ochi-gun, Ehime Pref. 799-21, Japa Tel: 0898-52-2855. Telex: 584-4711 Mrzn J. Fax: 0899-52-285 Cables: Morizane Niihama.

NANAO: 37.02 N. 136.58 E. (See Pla

LOCATION: Located on the East side of Noto Peninsula in Ishikaw Pref., in the Southern part of Nanao Bay. Arrival of vessel is to b considered the anchoring time in port, or the starting time of waiting f pilot outside the port.

DOCUMENTS:
Ship's Register and International Tonnage Certificate, if available.
Last Port Clearance.
4 Crew Lists and Passenger Lists, if any on board.
1 Stores List on arrival.
1 Declaration of Crew's Baggage (only at first port of call in Japan
1 Maritime Declaration of Health (only at first port of call in Japan)
Inward/Outward Declaration and Cargo Manifests for Discharging a Transit shall be prepared by ship's Agents.
Necessary blank forms will be provided by ship's Agents, if require

PILOTAGE: Ordered by cable via Choshi Radio, or by telex, possib to request local ship's Agents to arrange pilot, informing ETA accurate For entering and berthing, pilot boards in position Lat. 37° 06′ 50″ Long. 137° 04′ 30″ E., or 2 – 3 miles off from this position on bear 259°, for vessel over 10,000 g.r.t. Anchoring outside port is very diffic due to stationary fishing nets. If vessels arrive at night-time, it is bet for large vessels to drift at about 10 miles off the coast and wait for pil Pilot also available at inward Quarantine Station for berthing. It is on possible to contact pilot one hour before berthing (VHF Channel 16

ANCHORAGES: Quarantine Anchorage position: Lat. 37° 05′ 40″ Long. 136° 59′ 16″ E., with depth 16.0 m. and radius 400 m.

RESTRICTIONS: Large LPG vessels are prohibited to enter or sa night-time, and are also prohibited from anchoring inside the bay.

MAX. SIZE: Draft 12.5 m., length 232 m., and d.w.t. 60,000 tonnes

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Radio Pratique available, if vessel has valid Sanitary Certificate, through local ship's Agents, otherwise Quarantine Officer will attend vessel at Quarantine Anchorage or soon after berthing, during official working hours, from Kanazawa Quarantine Office. Sanitary inspection for Radio Pratique shall be carried out by Quarantine Officers, attending from Kanazawa Office. In case any patient aboard, inform local ship's Agents the condition of patient.

RADIO: Master is able to send cable to local ship's Agents via Choshi Radio or Nagasaki Radio. Telex communication also available by Inmarsat, even at great distances.

VHF: Contact "Fushiki Hoan" (name of local Maritime Safety Agency) on Channel 16 at any time there is an emergency.

TUGS: 1×2,000 h.p., 1×320 h.p. and 1×200 h.p. In case of necessity, other large tugs come from Toyama or Niigata.

BERTHING: Berthing not carried out in night-time, but unberthing is possible in night-time with pilot, if weather permits.

Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)	*LOA* (m.)	*Capacity* (g.r.t.)
Wharf No. 1 West	230	7.5	7.0	135	5,000
Wharf No. 2 East	210	9.0	8.5	165	8,000
Ohta Bussen Futo	185	10.0	9.5	180	15,000
Ohta No. 2 Pier	185	10.0	9.5	180	15,000
Ohta Dolphin	200	8.0	7.5	150	8,000
LGT Nanao Jetty (LPG)		14.0	12.5	230	60,000

CRANES: Crawler Cranes of 50 tons and 45 tons, and Truck Crane of 50 tons available. Heavy lift shore cranes or floating crane with greater capacity can be arranged if requested in advance.

STEVEDORES: 5 log gangs available if working by ship's gear. Log gangs available in daytime 0730 hrs. – 1730 hrs. in Summer, but for bulk cargo available up to 2130 hrs.

MEDICAL: No advance notice required, except on Saturdays, Sundays and holidays, also available in emergency. Dental treatment and vaccinations available on usual working hours.

TANKERS: One jetty for LPG vessels only. Discharging lines: 4 flexible rubber hoses (2 liquid and 2 vapour). Flange size: 12 in. for liquid and 8 in. for vapour, both Ansi 150 PSI. Max. flow rate: 2,000 cu.m./hr. for liquid and 3,000/cu.m./hr. for vapour. Temperature: −42° for Propane and −2° for Butane. Pressure: Propane and Butane 0.100 kg./sq.cm. Storage on shore for Propane and Butane, each 30,000 k/t.

DENSITY: 1021 – 1023. Density is not affected by tide.

FRESH WATER: Available at pier, except Ohta Dolphin and LGT Jetty, at about 20 tonnes/hr. Cost Yen 470/per tonne. (1992) At Ohta Dolphin or at inner anchorage available by barge. One barge with max. capacity 80 tonnes. Cost Yen 700/tonne, plus Yen 180/km. of distance. Not available for LPG vessels.

FUEL: Delivered by small vessel or tank lorry from the neighbouring port of Fushiki. Bonded oil not available. Advance notice required.

CONSULS: None locally.

REPAIRS: Small repairs can be undertaken.

DRY DOCKS: None.

SURVEYORS: Staff of Japan Marine Surveyors and Sworn Measurers' Association available from Toyama.

GANGWAY/DECK WATCHMEN: Usually not required. But if requested, watchmen can be arranged.

HATCHES: Hatch operations by stevedores, if requested.

CUSTOMS ALLOWANCES: Same as other ports in Japan.

REPATRIATION: Possible.

AIRPORT: Nearest local domestic airport is Komatsu (100 km.). Flights to Tokyo take 50 minutes, and there are 7 flights per day.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: National holidays: January 1st; February 11th; March 21st; April 29th; May 1st, 3rd, 5th; September 15th, 23rd; October 10th; November 3rd, 23rd; December 23rd. End Year holidays December 30th and 31st. New Year holidays January 2nd – 4th; City Festival May 14th; Port Festival July 20th.

In some cases holidays are workable with additional charges.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119. All stations are in Nanao City. In an emergency, contact local Maritime Safety Agency. Tel: 52-4999. If at sea, contact "Fushiki Hoan" by VHF Channel 16.

TELEPHONES: No arrangements for placing telephones on board. Calls can be made from office on shore near the pier within 5 minutes walk.

SERVICES: Hold cleaning possible.

BANKS: Two banks for exchange of currency in Nanao, Hokkoku Bank and Hokuriku Bank.

STORING: See "Prelims".

1. Available by barge or truck.
2. At LGT Jetty available only by barge after discharging and in daytime.
3. Possible, except Ohta Dolphin and LGT Jetty.
4. Not available.
5. Formalities of Customs required for loading.
6. Local riggers available to assist with storing.

SHIP SUPPLY SERVICE: Provisions and some ship's stores available to be supplied by local shipchandlers, but impossible to arrange craft or helicopter for transfer.

SHORE LEAVE: Crew members only allowed ashore with valid shore passes, issued by Immigration at the first port in Japan. Shore passes available at Nanao, but for renewal have to attend Kanazawa Immigration Office.

GENERAL: Many fishing nets located near the shore at the outer port, within about 3 miles off coast line. If entering or sheltering near shore, proceed with caution, especially at night-time.

DEVELOPMENTS: New dolphin for coal carriers will be available in October 1993. Permissible max. draft 12.5 m. and capacity 60,000 d.w.t.

DOCUMENTS:

1 Inward Declaration of Vessel.
1 Cargo Manifest.
1 Through Cargo Manifest.
1 List of Provisions and Stores.
1 List of Tobacco and Personal Effects.
7 Crew Lists (preferably airmailed in advance).
2 Passenger Lists.

PILOTAGE: Pilot embarks at Quarantine Anchorage to take vessel directly to berth during daytime. All transmitting and receiving through Niigata Radio Station (call sign JCF, Type of Wave: 438454) or Choshi Radio Station and/or Nagasaki Radio Station. Cable Agent 1 week's notice of ETA and accurate ETA 24 hours before arrival, thereafter advising any change in arrival time. No pilot boat. Pilot uses tug-boat.

ANCHORAGES: Half-circle drawn at a point of Lat. 37° 11′ 31″ N., Long. 138° 13′ 59″ E. (lighthouse) with radius 1,600 m.

RESTRICTIONS: Berthing and unberthing daytime only.

MAX. SIZE: LOA 160 m. draft 9.50 m. in Summer, and 9.00 m. in Winter.

HEALTH: Radio Pratique available. Formalities will be carried out at the anchorage. Quarantine Station 321° – 2,200 m. (Lat. 37° 11′ 45″ N., Long. 130° 14′ E. 700 m. radius) from Naoetsu Lighthouse.

RADIO: Niigata Radio Station: JCF. Nagasaki Radio Station: JOS. Choshi Radio Station: JCS.

VHF: Channel 16.

TUG: Normally joins vessel at entrance of port. Ship's lines used. One tug 750 h.p. One tug 1,800 h.p. will be brought from Niigata when required.

STEVEDORES: ETA, draft and hatch cargo quantities to be advised before arrival. Main bulk commodities: unloader crane (1) 150 t.p.h.; tower cranes (3) 120 – 130 t.p.h. and equipment.

MEDICAL: No notice required except in emergency, and attendance on Sundays/holidays.

DENSITY: 1023 – 1025.

FRESH WATER: Available from shore. 30 t.p.h.

FUEL: Domestic oil is available. Bonded oil will be brought from Moji or Hakodate, with sufficient advance notice.

CONSULS: None.

REPAIRS: Minor repairs only.

GANGWAY/DECK WATCHMEN: No professional watchmen available.

OPENING/CLOSING HATCHES: Stevedores if Owner guarantees payment of operation charges.

CUSTOMS ALLOWANCES: Tobacco: Each crew member allowed to retain for his private use 200 cigarettes, 50 cigars, 250 grams of tobacco, etc. Wine/and/or Spirits: 1 bottle of liquor, to last 1 week.

REPATRIATION: Necessary documents to be submitted to Immigration and Customs Authorities in Naoetsu.

AIRPORT: Niigata. 2.5 hours by train. One flight per day to Tokyo.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: No work 31st December and 1st, 2nd and 3rd January. Subject to gangs on other holidays.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONE: No facilities for placing telephones on board.

SERVICES: Technicians for repair and/or adjustment of radar or wireless despatched from Niigata or Tokyo. Hold and/or tank cleaning operations by shorehands available, however gangs are from Niigata.

SHORE LEAVE: Crews allowed ashore within limit of Johetsu City.

IDENTIFICATION CARDS: Passport and/or Seaman's Book required.

DELAYS: Due to port congestion.

GENERAL: During Winter and bad weather, hire of nylon rope (100 mm.) desirable in order to avoid hull damage. Rope owned by Naoetsu Agency Association. Charge made for use.

AUTHORITY: Naoetsu Port Administration Office, 6-8, Minato-machi 1-chome, Johetsu City, Niigata Pref. *Tel:* (0255) 43-4167.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Nippon Express Co. Ltd., 2-9-4, Minato-cho, Jyoetsu City, Niigata Pref. 950, Japan. Tel: (0255) 43-1131. Telex: 3252-411 Nexco J. Fax: (0255) 43-3494. Cables: Nexco Naoetsu.

NAOSHIMA: 34.28 N. 133.58 E.

Port Status: Closed Port.

DOCUMENTS: In addition to the documents required (See "Uno"), vessel must be provided with Customs's Closed Port Entrance Permission by Agents before entering Naoshima, as it is a non-open port.

PILOTAGE: Not compulsory in the port. However, for vessels over 10,000 g.r.t., Inland Sea Pilot is compulsory, especially through navigation routes like Akashi, Bisan-Seto, etc., as defined by Japanese Maritime Traffic Safety Law.

RESTRICTIONS: No restrictions on entering or sailing, even night-time, but pilot is only available during daytime.

MAX. SIZE: 20,000 g.r.t., LOA 180 m., max. draft 9.7 m.

HEALTH: Radio Pratique not available. Vessels usually anchor at Wada-Misaki (off Kobe) or nearest quarantine port, where the authorities board and grant Free Pratique.

TUGS: None. Tugs from Mizushima are available.

BERTHING: Mitsubishi Metal Wharf: Length 160 m. Depth 10.2 m. Max. draft 10.0 m. Max. size 20,000 g.r.t.

Outreach of crane 14.4 m. Distance to stockyard 500 m. Cargo handled is copper/lead concentrate.

Lightenning can be undertaken at anchorage of port of Uno, located in vicinity to Naoshima, in which case one set of port charges will be incurred additionally.

When the berth is congested and cargo is urgently needed, the receivers, Mitsubishi Materials, sometimes arrange for lightering at Uno Anchorage of which depth of water is about 29.0 m.

STEVEDORES:

Hours	Cargo discharged per shift
0800 – 1700	2,500 tonnes
0800 – 1900	3,000 tonnes
0800 – 2200	3,650 tonnes

FRESH WATER: Water barge will be brought from Okayama, when required.

Cost: Up to 100 tonnes – Yen 1,100/tonne; over 100 tonnes – Yen 800/tonne.

FUEL: Domestic oil is available. Bonded oil will be brought from Kobe, when required.

REPAIRS: Small repairs can be undertaken.

HOLIDAYS: See "Uno". No work on local holidays, but usually work on national holidays.

AUTHORITY: Port & Harbour Dept., Kagawa Pref., 1-10, Bancho 4-chome, Takamatsu City, Kagawa Pref. *Tel:* (0878) 31-1111, 62-3653, 34-9302.

AGENT: See "Uno".

NIIGATA-NISHI: 37.54 N. 139.04 E. (See Plan)
NIIGATA-HIGASHI: 38.01 N. 139.13 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Ports of Call Lists.
3 Crew Lists including Passport Numbers.
3 Passenger Lists, if any onboard.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. Pilot embarks at Quarantine Anchorage (Lat. 37° 58′ N., Long. 139° 03′ E.) to take vessel directly to berth during daytime. All transmitting and receiving normally effected through Niigata Radio Station (call sign: JCF, Wave: 438454), or Choshi Radio Station and/or Nagasaki Radio Station. Radio ETA 1 week's notice and accurate ETA at least 24 hours before arrival. Notify any changes to ETA.

ANCHORAGES: Anchorage is a rectangle located N.W. of lighthouse at West Breakwater at a distance of 1,600 m. covering an area of about 160,000 sq.m. Lat. 37° 57′ 37″ N., Long. 139° 04′ 00″ E. Depth: 18-24 m. Bottom: fine sand.

Safe Anchoring: Warning and instructions have been given by Niigata Harbour Master to secure safety of vessels anchoring off Niigata Port especially in Winter season, when the port is greatly affected by N.W. gale.

1. Vessels anchoring outside the breakwater within the Harbour limit must maintain their position West side of N.W. line drawn from Niigata Lighthouse (Fl. R. 3 sec. 15 m. 11 miles) and must avoid the vicinity of the mouth of the Shinano River or Showa Sekiyu K.K. Sea-berth (which is connected with shore facilities by submerged pipe-lines).

2. Vessels anchoring outside the breakwater must maintain their positions in the sea area where the depth of water is 25 m. or more. This rule does not apply to vessels waiting for quarantine inspection and/or Pilot. Vessels under 10,000 gross tons should also keep a sufficient distance from shore.

3. Vessels over 10,000 gross tons with dangerous cargoes or oil anchoring outside the breakwater must advise their positions to the Harbour Master by radio.

4. Vessels anchoring outside the breakwater must keep a bridge watch unless they are equipped with radio. (According to the governing law, any vessel staying outside the breakwater is treated as a navigati vessel even if she is within the harbour limit).

5. Vessels waiting at anchorage must keep watching weathe forecast. In case bad weather is reported, the following necessar actions should be taken; namely, officers on duty, confirmation of ship position, engines on standby, the use of extra anchors, sheltering, et

6. In case a vessel requires shelter from N.W. wind in Winter, it i suggested that such vessel proceed to Sado Island and anchor a Ryotsu Port, Akadomari Port, Sado Island South Coast or Sado Channe

7. When approaching the entrance of the port, a vessel can be draw too close to the East Breakwater or the shallows existing East of th port entrance by force of N.W. gale, N.E. current and river flo Therefore, vessel must enter from N.W. of Niigata Lighthous approaching from Quarantine Anchorage and alter course as We Breakwater Lighthouse and Niigata Port Light Beacon are seen in a lin It is dangerous for vessel to anchor at any areas East of Shinano Rive

8. Prior to arrival, Japanese Charts No. 1155A, 1155B, 122 and 11 or substitutes should be provided on board. Charts 1181, 1198 may als be needed.

RESTRICTIONS: Berthing and unberthing anytime. Entry and/o departure at time authorised by Port Authority. Shinano Fairway fro port entrance to Rinko Wharves, maintained depth 10.5 m.

MAX. SIZE: *Tankers:*

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.35′ N., Long. 135° 08′ 24″ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 55′ 38″ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 57′ 00″ N., Long. 131° 03′ 00″ E.

4. Bay Pilotage-Tomogashima/Wada is also compulsory for vessels over 10,000 g.r.t. Pilot boarding position: Lat. 34° 10′ N., Long. 135° 00′ E.

Inland/Sea Pilotage: Pilotage at Kurushima Channel/Bisan-Seto/Akashi Channel is compulsory for ships over 10,000 g.r.t. Pilot boarding position unchanged, namely, Sekisaki/Hesaki/Wada, even if ship requires only foregoing area's service.
ANCHORAGES: Approved anchorage area just inside harbour limit. A circle drawn at a point Lat. 33° 59′ 18″ N., Long. 133° 16′ 31″ E. with radius of 430 m. where holding ground good and depth of water 12 m. – 15 m. No buoy moorings. Harbour protected by breakwater.
TIDE: (Springs) Max. 263 cm.; min. −9 cm. (Neaps) max. 182 cm.; min. 136 cm.
RESTRICTIONS: Pilot does not take vessel in during darkness. Vessel has to wait if depth during LW 8.50 m. is insufficient to pass channel.
MAX. SIZE: See "Berthing".
HEALTH: Quarantine Inspectors go aboard during day. Master to keep waste until Quarantine inspected in event of any suspected disease or fever on board after entered Japan.
RADIO: Choshi Radio, Nagasaki Radio.
TUG: Joins vessel at Quarantine Anchorage or Section II, always using tug's lines without charge. "Niihama Maru" 2,600 h.p. If more powerful tugs required, can be obtained from Matsuyama or Mizushima.
BERTHING: Harbour Pilot operates during day.

Berth	Length	Depth	Berthing Restrictions

Habu No.2 Wharf	130 m.	7.5 m.	
Besshi Isoura Berth	188 m.	12.00 m.	Draft 11.0 m. LOA 186 m.

Berth A: Public berth for general purposes, no buoy, just anchorage. However, vessel anchoring at this berth sometimes ordered by port authority to shift in order vessel approaching or leaving Berth No. 4 may pass.

CRANES:

Berth "B3"	2× 5 tons
Berth "K4"	1× 5 tons
Berth "K6"	2×25 tons
Besshi Isoura Berth	1×19 tons

MEDICAL: Hospitals and medical facilities available weekdays only.
TANKERS: No facilities for oil carriers.
DENSITY: Entrance 1023 (rate of tide, 1 knot); channel 1022; anchorage 1021.

FRESH WATER: Water is available from the berths "K-4", "K-6" and Besshi Isoura Berth only after normal working hours – 10 t.p.h. Water is not available from any other berths. A 70 ton barge is available, it can supply 300 tons per day.
FUEL: Bunkers in bond available from main ports or oil stations in tranship. 2 days' notice.
CONSULS: None. Nearest in Kobe.
REPAIRS: Minor repairs only. Main engine piston overhauling possible.
DRY DOCKS: None. For nearest see "Imabari".
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Stevedores.
LOADING/DISCHARGE RATES:

Average rate of Discharging Cargo:	
Coal	450 – 500 t.p.h. by ship's gear
Bauxite	700 – 800 t.p.h. by ship's gear
Chemical Oil	200 – 250 t.p.h. by ship's pump
Copper Concentrates	450 – 500 t.p.h. by shore crane
Logs	600,000 – 800,000 BFM/day by ship's gear
Salt in bulk	500 t.p.h. by 2 shore cranes
Average Rate of Loading Cargo:	
Alumina in bags	80 – 90 t.p.h. by ship's gear
Fertiliser in bags	50 – 60 t.p.h. by ship's gear
Fertiliser in bulk	80 – 100 t.p.h. by ship's gear

CUSTOMS ALLOWANCES: Only 60 cigarettes to take ashore. No spirits.
CARGO GEAR: Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.
REPATRIATION: Arranged by Agent.
AIRPORT: None. Nearest at Matsuyama and Takamatsu. All Nippon Airways – 11 flights per day to Osaka and one to Tokyo.
TIME: GMT plus 9 hours. Permanent.
HOLIDAYS: National Holidays: New Year's Day, January 1st; Adult's Day, January 15th; Foundation Day, February 11th; Vernal Equinox Day, March 21st; Green Day, April 29th; Constitution Memorial Day, May 3rd; Children's Day, May 5th; Respect-for-age Day, September 15th; Autumnal Equinox Day, September 24th; Physical Culture Day, October 10th; Culture Day, November 3rd; Labour Thanksgiving Day, November 23rd; Emperor's Birthday, December 23rd.

Local holidays: New Year's Day (Lunar Calendar), January 30th; May Day, May 1st; Memorial Day of the Sea, July 20th; Bon Festival (Lunar Calendar), August 8th; Autumnal Festival, October 16th-18th.

Vessels may enter/leave *except* January 1st, and cargo work can be done as usual at overtime rates on above national/local holidays *except* for *Niihama* (December 31, January 1, 2, 3, and October 17, 18).

Vessels may enter/leave port at overtime rates and cargo work will be done up to 1700 hrs. (daytime) against surcharges.

No cargo will be handled *Niihama* (December 31, January 1, 2, 3, and October 17, 18). No ship's movement (as well as cargo handling) can be done on January 1st.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Crew allowed ashore with pass, by ferry boat.
GENERAL: *Quarantine:* Hiroshima Quarantine Office, Niihama Detached Office, Nishibara-cho, Niihama, Tel: Niihama 32-3966.
Customs: Kobe Customs, Niihama Branch Customs, Nishibara-cho, Niihama, Tel: Niihama 32-3405.
Immigration: Niihama Port Station, Takamatsu Immigration Office, Nishibara-cho, Niihama, Tel: Niihama 32-2672.
Maritime Bureau: Sanbashi-dori, Niihama, Tel: Niihama 32-2855.
Maritime Safety Agency: Nishibara-cho, Niihama, Tel: Niihama 33-0055.
Emergency Procedure: No Harbour Master radio available, therefore cable Agent. Telephone sub-agent since one person will be in attendance even during night, who in turn will contact person in charge.
Salvage: No salvage tug stationed, nearest from Kure.
AUTHORITY: Niihama Marine Safety Agency, Nishibara-Cho, Niihama. *Tel:* (0897) 33-0055. *Contact:* Port Captain.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Morizane Transportation Co. Ltd., 2-13, Sobiraki-cho, Niihama City, Ehime Pref. 792, Japan. Tel: (0897) 32-6119. Telex: 5844-711 Mrzn J. Fax: (0897) 32-3322. Cables: Morizane Niihama.

NISHIHARA (Nakagusuku Wan), Okinawa: 26.14 N. 127.50 E. (See Plan)

LOCATION: The Nansei Sekiyu Ltd. Refinery (NSS) is located in Nishihara Town on the East coast of Okinawa, towards the Southern end of Nakagusuku Bay. Also see "Max. Size".
DOCUMENTS:
- 3 Manifests
- 8 Crew Lists
- 2 Passenger Lists
- 2 Stores Lists
- 2 Personal Effects Lists
- 3 Ports of Call Lists
  (voyage memo...past 3 months)
- 2 Transit Cargo Manifests
- 2 International Health Declarations
- Ship's Register
- International Loadline Certificate
- Safety Equipment Certificate
- Derat Certificate
- Last Port Clearance.

Each Crew member will be issued with an Official Pass, which must be returned prior to vessel sailing.

PILOTAGE: Normally vessels will be expected to enter Nakagusu Bay through entrance marked Tatsu Kuchi, and pick up Berthing Mas inside bay – South of Tsuken Jima. Inside bay Berthing Master reques that vessel keeps South of buoy marking Chikunigaa Shoal. Berthi shall be carried out at day time only.

A safe convenient pilot ladder is to be provided for the Berthing Mas Berthing Master stays aboard vessel throughout discharge, exce vessel berthed at the pier.
ANCHORAGES: Navigation and anchorage in the waters near the NS Product Pier and Crude Berth will in so far as possible be restricted t those ships directed into these waters by Berthing Master. In th interests of safety, ships will not enter the restricted area unless a directed by Berthing Master.
RESTRICTIONS: *Shipmaster's Report:* March 1992: Berthing i daylight only, up to 1500 hrs.
MAX. SIZE: For crude vessels a single point mooring (SALM – Sing Anchor Leg Type Mooring), capable of handling vessels from 90,00 d.w.t. to 270,000 d.w.t. is established in approximate positio Lat. 26° 14′ N. Long. 127° 50′ E., about 2.5 miles offshore.

Products are shipped from a pier connected to the shore – the pi has 2 berths, one for vessels up to 97,000 d.w.t. and one for sma vessels up to 4,000 d.w.t.
PRATIQUE: Port Officials will board the vessel after berthing.
RADIO: Crude vessels discharging at Nishihara should report ETA a pilot station (Lat. 26° 13′ N., Long. 127° 52′ E.) 72, 48, 24 and 12 hou prior arrival. Berthing instructions and time of Pilot boarding will b relayed by a telegraph appointed Agent. Refinery has no VHF radio.

Weather reports essential – particularly during typhoon season. Nah Radio – JCX medium wave 500 kHz. Traffic lists broadcast at odd hou GMT. Short wave 6470 kHz, traffic lists broadcast at even hours GM
TUGS: 2 tugs and a launch are available for assisting with mooring an unmooring. The Berthing Master in consultation with the Master wi decide the number of tugs required for the berthing operation and t standby during the time at berth.
CRUDE BERTH: Single buoy mooring with vessel secured by 2 hea polypropylene lines from buoy. Lines connected to chains through bo mooring lead and secured inboard. Chains secured direct to Brega P (bow stopper). There is 72 ft. of water at buoy position. Vessels ma remain in berth in winds of up to 30 m.p.h.
Floating Hoses: 2×24 in. into 2×20 in. connected to 2×16 in. a connected on vessel's port side. There is a 42 in. line from buoy t shore. The maximum pumping rate is 75,000 b.p.h.
PRODUCT PIER: A 110° – 290° orientated pier allows tankers t approach the berth in a ballasted condition in either of 2 opposi directions. Vessels of 4,000 d.w.t. size and above will be handled a Berth No. 1 and smaller vessels at Berth No. 2

The water depth at the pier is approximately 47 ft. The extreme tid variation is +7.9 ft. to −1.0 ft. and maximum storm tide will ad approximately 3 ft. The maximum current is less than 1 knot.

Berth No. 1 is equipped with 1×16 in. loading arm for clean produc and 2×16 in. loading arms for dark products. Each of these all-met hydraulically controlled loading arms is fitted with a remotely operat coupling device to connect to a nominal 10 in. ASA, DIN or BS flange connection without bolting.

Berth No. 2 is equipped with 2×6 in. loading arm for dark and clea products. These arms are part metal, part hose and are fitted with flange to be bolted to a nominal 6 in. ASA, DIN or BS flanged connection.

Each berth is provided with a gangway.

Vessels will deballast through the loading arms into a 24 in. balla water line leading to refinery tankage. Under no circumstances shou vessel discharge any ballast water directly into the bay.

Fire protection at the pier consists of a foam concentrate tank an proportioning pump, a fire water pump and distribution system, fixe combination water-foam monitors and air-foam play-pipes.
OIL POLLUTION WARNING: We wish to alert all vessels entering th port of the extreme sensitivity on the part of the community an governmental authorities regarding any incident involving oil pollution i the seas. Any oil spill, regardless of size, is considered a criminal ac and offenders are dealt with accordingly. We urge all vessels to ma complete pre-arrival checks for cargo and ballast system tightness, an to strictly adhere to all pollution prevention practices, procedures an policies while discharging or deballasting at this port. Officers and cre should be extremely alert during all phases of vessel operation f potential oil spill risks and seek assistance from shore representati should any unusual risk arise.
FUEL: No facilities available.
TIME: GMT plus 9 hours. Summertime is not used. All ETAs and oth messages should be made in local time.
SHORE LEAVE: Shore leave is permitted – launch service may b arranged but is at vessel's expense.

No person will be given permission to enter the refinery unless th are in the microbus which will be provided by ship's Agent.
AUTHORITY: Nansei Sekiyu K.K., 858 Aza Onaha, Nishihara-Ch Okinawa, 903-01 Japan. Postal Address: P.O.Box 525, Naha, Okina 900-91 Japan. *Tel:* 098-945-3220.

Captain of the Port: Kin-Nakagusuku, 46 Yagihamabara, Nakagusu Son, Okinawa, Japan. *Tel:* 098-895-4999.

AGENT: See "Tokyo".

NOSHIRO: 40.13 N. 140.00 E. (See Plan)

DOCUMENTS:
Ship's Register/New Tonnage Certificate.
Last Port Clearance.
5 Crew Lists, including Passport numbers.
5 Passenger Lists, or "Nil" Lists.
1 Declaration of Crew's Baggage.
2 Ports of Call Lists (date of arrival/departure for previous ports).
Copies of Bills of Lading to show Customs Inspectors.
Ship's Agent will prepare Inward/Outward Declaration.
Ship's Agent should be provided with necessary information about details of cargoes in advance.
All Port Authorities (Customs/Immigration/Quarantine) will attend from Akita Office. Akita/Noshiro 55 km., 1.5 hours by car.

PILOTAGE: Pilot boards off Noshiro. Pilot attending comes from Akita. Present pilot boarding position: 40° 11′ N., 139° 57.5′ E.
Note: VHF communication not available. Communication only available through Choshi Radio, which covers this area. Vessel should wait or shelter at Funakawa Anchorage (39° 51′ N., 139° 53′ E.), if heavy/rough weather from N.W., or manoeuvre without anchor in order to avoid anchor dragging.

ANCHORAGE: Off Noshiro about 1 mile from breakwater. No buoys and no lighthouse. Depth exceeds 30.0 m. Bottom is soft clay with mud.

RESTRICTIONS: Berthing/unberthing in daylight only.

MAX. SIZE:

	LOA (m.)	*Max.Draft* (m.)	*Remarks*
15,000 ton Pier	130	9.4	
Nakajima No.1	110	6.8	Portside alongside
Nakajima No.2	110	6.8	Portside alongside

HEALTH: Radio Pratique acceptable by this year (1992). Until then, Pratique procedure carried out at Funakawa Quarantine Anchorage (39° 51′ N., 139° 53′ E.) where inspector boards.

RADIO: Choshi Radio. Inmarsat/telex available through Agent.

VHF: No port radio station. No VHF communication available.

RADAR: No radar service available.

TUGS: 2×500 h.p. Tugs also available from nearby ports.

BERTHING:

Wharf	*Length* (m.)	*Depth* (m.)	*Capacity* (d.w.t.)	*Cargo*
15,000 ton Pier	185	10.0	15,000	Lumber, General cargo
Nakajima No.1	130	7.5	5,000	Logs, General cargo
Nakajima No.2	130	7.5	5,000	Logs, General cargo

Ship's gear used for cargo operations.

CRANES: Truck crane arrangeable. No heavy lift cranes available.

BULK CARGO FACILITIES: No facilities at present. Discharge of coal will be undertaken at Noshiro Power Station, when new private wharf is completed (late 1992).

STEVEDORES: Overtime work available in daylight. Rate for timber is 1,000 cu.m./day.

MEDICAL: Hospital and treatment available.

DENSITY: 1015 – 1018, depending on river stream.

FRESH WATER: Available at wharves. Cost Yen 256/ton in daytime.

FUEL: Not available.

CONSULS: None. Notary Public available.

REPAIRS: Minor repairs possible.

GANGWAY/DECK WATCHMEN: Not compulsory or available.

OPENING/CLOSING HATCHES: Possible by stevedores, but ship is charged as per tariff.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages and New Tonnage Certificate. The check is possible on vessel if Customs Officers onboard, but it has to be brought to Akita Office, if Officer not attending onboard.

CUSTOM ALLOWANCES: Only 50 cigarettes to take ashore, no spirits.

REPATRIATION: Only possible in special cases.

AIRPORT: No airport locally.

TIME: GMT plus 9 hours. No alterations during year.

HOLIDAYS: Local holidays: January 2nd and 3rd; July 20th; August 13th and 14th; December 30th and 31st. Also 1st, 3rd and 5th Sundays of each month are non-working.

POLICE/AMBULANCE/FIRE: Contact through Agent.

SERVICES: Hold cleaning not available. Surveyor arrangeable. Ship's telephone not available. Radio/Radar repairs arrangeable from Tokyo area.

SHORE LEAVE: Local Immigration Office issues shore passes. Officials attend from Akita on ship's arrival.

AUTHORITY: Noshiro Port Administration Office, 1-2, Aza-Oomoriyama, Noshiro City, Japan 016. *Tel:* 0185-54-8246.

Noshiro Port Office: Akita Kairiku Unso Co.Ltd., 53, Hamadori-cho, Noshiro City, Japan 016. Tel: 0185-54-1278. Fax: 0185-54-1261.

NUMAZU: 35.05 N. 138.51 E. (See Plan)

Port Status: Closed Port.

PILOTAGE: Not compulsory. Pilot available at Tagonoura.

RESTRICTIONS: No restrictions, but pilot not available after sunset. Draft limitation in channel 7.5 m. Tidal range: +1.99 m. to −0.26 m.

HEALTH: Radio Pratique and sanitary inspection not available. All formalities carried out at Shimizu.

TUGS: Available from Tagonoura and Shimizu.

BERTHING:

Name of Berth	*Length* (m.)	*Depth* (m.)	*Capacity* (d.w.t.)
North Wharf No. 1	130	7.5	5,000
North Wharf No. 2	90	5.5	2,000
East Wharf	180	5.5	2×2,000
No. 1 Dolphin	23.7	5.5	2,000
No. 2 Dolphin	27.8	5.5	2,000

STEVEDORES: Working hours: Weekdays 0830 hrs. – 1630 hrs. (extension possible if required).
Stevedores available at weekends (except 1st and 3rd Sundays) and holidays (except December 31st – January 3rd).
Log gangs available.

FRESH WATER: Available.

FUEL: Domestic oil is available. Bonded oil will be brought from Yokohama or Tokyo, with sufficient advance notice.

REPAIRS: No facilities.

GENERAL: *Lightering:* Not possible.
Shipchandlers: Provisions and stores can be obtained.
Grain Fitting: Not available.
Hold Cleaning Facilities: Not available.
Floating Cranes: Not available.

AGENT: See "Shimizu".

OFUNATO: 39.03 N. 141.44 E. (See Plan)

PORT LIMITS: On the line between Goishi Si. Lighthouse (38° 58′ 59.5″ N., 141° 44′ 42″ E.) and Kori Si. Lighthouse (39° 00′ 53″ N., 141° 45′ 42″ E.).

DOCUMENTS:
Ship's Register.
International Tonnage Certificate.
3 Ports of Call Lists.
1 Maritime Declaration of Health.
Last Port Clearance.
5 Crew Lists, including Passport Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory but strongly recommended by Port Management as many fishing obstructions in the harbour, and accidents have occurred when no pilot onboard. Pilot boards vessels under 5,000 g.r.t. in position Lat. 39° 00.7′ N., Long. 141° 44.8′ E., and vessels over 5,000 g.r.t. in position Lat. 39° 00.3′ N., Long. 141° 45.3′ E., during daylight only.

APPROACHES: Proceed to point Lat. 38° 59.2′ N., Long. 141° 47.3′ E. in order to avoid stationary fishing nets.

ANCHORAGES: In vicinity of pilot boarding ground, in depth of 40 m. – 50 m. Anchorage not suitable in strong Easterly or Southerly winds.

RESTRICTIONS: Depth of water at entrance of passage 14 m. Entry/sailing not recommended at night.

MAX. SIZE: Channel: LOA 190 m., beam 30 m. and draft 14.0 m.
Also see "Berthing" and "Tankers".

HEALTH: Radio Pratique available if vessel has Japanese Sanitary Certificate. Formalities carried out at the anchorage.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively. Vessels equipped with telex may contact Agent direct.

VHF: No VHF at the port. Vessels approaching port should keep watch on Channel 16, as Agent may use VHF of a ship in port to contact an approaching vessel.

TUGS: Small tugs 800 h.p. and 600 h.p. available. Large tugs (1,800 h.p., 2,400 h.p. and 2,900 h.p.) can be arranged from Kamaishi with advance notice, they usually join vessel about 400 m. in front of jetty and discharging wharf. Ship's lines used if necessary.

BERTHING:
Public Berths:

Berth	*Length* (m.)	*Depth* (m.)	*Max.Draft at L.W.* (m.)
Chayamae 10,000 ton Wharf	330	9.0	9.0
Chayamae 3,000 ton Wharf	210	6.0	5.0
Nonoda 50,000 ton Wharf	270	13.0	13.0
Nonoda 5,000 ton Wharf	260	7.5	7.5

Foreign trading cargo vessels only berth at above public berths.
Nonoda Wharf available for handling only clean cargo for food factory nearby.

CRANES: No shore cranes or floating cranes available. Mobile crane up to about 50 tons available with advance notice.

BULK HANDLING FACILITIES: Coal, petroleum coke, gypsum, iron ore and quartz handled at public berths. Discharging by ship's gear to portable shore hopper and carried by truck to stockyard. Maximum discharging rate about 1,000 tons/gang per day (0800 hrs. – 1900 hrs.).

SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. Normal working hours 0830 hrs. – 1630 hrs. Overtime surcharges 1630 hrs. – 2130 hrs. 60% additional of basic stevedorage; Sundays/holidays 100% additional.
MEDICAL: No advance notice required unless urgent. Cholera vaccination available at hospital.
TANKERS: *Kamei Pier:* Max. size 35,000 d.w.t. Max. draft 9.0 m. Loading Arm: 1×8 in. Diesel oil only handled at 600 t.p.h. No slop (residue) discharge facilities available.
DENSITY: Average density 1022 – 1024.
FRESH WATER: Available only by shore hydrant. 24 hours advance notice required, excluding Saturdays, Sundays and holidays. Delivery capacity about 10 t.p.h. – 25 t.p.h. Cost is about Yen 253/ton in daytime. Overtime surcharge of about 30%.
FUEL: Domestic diesel oil is available. Bonded oil will be brought from Yokohama or Hakodate, with sufficient advance notice.
CONSULS: None.
REPAIRS: Minor deck and engine repairs available.
DRY DOCKS: None.
SURVEYORS: Available from Tokyo with advance notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board. Usually ship's crew.
OPENING/CLOSING HATCHES: Usually ship's crew.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 20 cigarettes to take ashore, but no spirits.
REPATRIATION: Possible via Tokyo by train.
AIRPORT: Nearest is Hanamaki Airport, about 97 km. from Ofunato by taxi. Hanamaki/Osaka 2 flights/day; Hanamaki/Sapporo 2 flights/day; Hanamaki/Nagoya 1 flight/day; Hanamaki/Tokyo no flights.

Use of Hanamaki Airport is not recommended.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: National holidays: January 1st and 15th; February 11th; March 20th (changing); April 29th; May 3rd, 4th and 5th, September 15th and 23rd (varies); October 10th; November 3rd and 23rd; December 23rd.

Local holidays: January 2nd and 3rd; August 14th, 15th and 16th; December 31st.

National holidays and local holidays available for working after discussions with stevedores.
POLICE/AMBULANCE/FIRE: Police 110 (emergency); Ambulance/Fire 119 (emergency).
EMERGENCY CO-ORDINATION CENTRE: Maritime Safety Agencies:
Shiogama Hoan. VHF Channel 16. Tel: 022-362-4999 (24 hours).
Kamaishi Hoan. VHF Channel 16. Tel: 0193-22-4999.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: No tank cleaning equipment; no facilities for discharge of tank washings; compass adjusting difficult; radio and radar repairs available by travel from other port, with advance notice; supply of charts available by sending from Tokyo area, with advance notice; nautical publications, sounding paper, course recorder paper, Notice to Mariners, Safety equipment available, only by sending from Tokyo area, with advance notice; extension of certificates available by surveyor travelling from Tokyo area, with advance notice.

Provision/stores supply available, but deck/engine stores not available at Ofunato. Laundry available if long stay in port.
STORING: Public Berth: Trucks proceed alongside and can use forklifts.

Kamei Pier: Truck can proceed to within 70 m. and then only by hand. No forklift available.

Anchorage: Difficult and dangerous due to ocean/bay.

Customs permit required for all storing.

Local riggers can be employed to assist with storing.
SHIP SUPPLY SERVICE: No craft or helicopters for transfer of stores. Ferry service available to anchorage, weather permitting.
SHORE LEAVE: Possible.
IDENTIFICATION CARDS: Immigration issue shore passes on Master's application. Valid for 7 days to 15 days, and possible extension.
REGULATIONS: Normal port regulations.
GENERAL: Be aware of dense fog during April through to August. Be aware of fishing vessels operating in the neighbourhood and fishing nets and tackle. Be aware of continuous blowing of seasonal strong N.-N.W. wind during Winter season, so prepare many good lines for mooring to berths.
AUTHORITY: Iwate-Ken Ofunato Doboku-Jimusho, 6-1, Maeda,Ikawa-cho, Ofunato-shi, Iwate-ken, 022 Japan. *Tel:* 0192-27-9919.

OITA: 33.17 N. 131.40 E. (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs officials will board to search the vessel.

The following documents are to be submitted:

Quarantine: (Tel: 0975-21-2394)
See "Health"

For Customs: (Tel: 0975-2-2691)
Crew Manifest (1) (state full name/rank/passport nos./date of bi
List of Ship's Stores (1) (to be attached Arms/Ammunition a Narcotics List).
Declaration of Crew's Baggage (1).
Inward/Outward Declaration (1) (Ship's agents will prepare).
Cargo Manifest for Discharging (1) (Ship's agents will prepare).
Cargo Manifest for Through (1) (Ship's agents will prepare).
Declaration for Payment of Tonnage Dues (1) (Ship's agents w prepare).
The following ship's documents will be checked by Customs:
Ship's Register.
International Tonnage Certificate.
Last Port of Clearance.

Immigration: (Tel: 0975-27-3754)
Crew Manifest (2).
Ports of Call List (1).
Inward/Outward Declaration (1).
1st Japanese port: Ship's agent is to take Passports and/or Seama Books to Immigration Office and obtain the Crew Landing Passe

Harbour Master: (Tel: 0975-21-0115)
Crew Manifest (1)
Inward/Outward Declaration (1).
Vessel's with dangerous cargo: Application for Permission for shi stay in port and Application for Permission for dangerous cargo wo to be obtained from the M.S.A. in daytime.

Port Authority: (Tel: 0975-58-5111)
Inward/Outward Declaration (1).

PILOTAGE: Inland Sea Pilots' Association, Moji office. (Tel: 093-33 7191).

(a) Harbour and Sea pilotage are not compulsory, but foreign vesse are recommended to employ pilots in view of the many fishi boats/nets in the area between Sekisaki/Oita (via Bungo Suid and/or Hesaki/Oita (via Kanmon Strait).

(b) Request for pilot must be made at least 24 hours in advance an Pilot should be kept closely advised of vessel's ETA at the pi station.

(c) Sekisaki Pilot Station, 3 miles South of Sekisaki Lighthouse (vess transitting Bungo Channel). Position: Lat. 33° 13.5′ N., Lon 131° 58′ E., for VLCC's Lat. 33° 13′ N., Long. 131° 58′ E.

(d) Hesaki Pilot Station at East side of Kanmon (Shimonoseki) Strai Position: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

(e) Communication with Pilot: VHF Channel 16 through Oita Po Radio. Tel: 093-332-7191. Telex: 715313 Anjin J. Cable Addres "Anjin Moji".

Shipmaster's Report: April 1988.

Inland Sea Pilot not compulsory in the Inland Sea from Se Saki Oita or from Oita to He Saki (entrance to Kanmon Kaikyo)

Nor is pilotage compulsory from Se Saki (Bungo Suido) to He Sak In the Inland Sea, pilotage is compulsory for vessels over 10,000 g.r in Kurishima Kaikyo, Bisan Seto and Akashi Kaikyo.

At Oita, Harbour Pilot is not compulsory, however it is advisable make use of the services of a Harbour Pilot as the tug Captains do n speak English, which might cause language problems if no Harbour Pi is employed.

ANCHORAGES:

No.	*Depth* (m.)	*Capacity* (g.r.t.)	*Position*

Quarantine Anchorage	25 m. – 43 m.		Lat. 33° 16′ N., Long. 131° 46′ E.

*It is necessary to obtain permission from Harbour before vess arrival.

RESTRICTIONS:

Berthing: During daytime only (Summer: 0600 hrs. – 1800 hr Winter: 0700 hrs. – 1700 hrs.

Tankers and LPG Carriers must be berthed in time to start car operations before sunset.

Departure: Night departure from wharves is generally impractica except for dry cargo vessels at N.S.C. Sea-Berth and Seihin Berth wh can depart up to 2000 hrs. However, this will depend upon condition weather, etc.

Fishing Nets: Fishing nets are laid during the night between August a December, even in fairway and approaches.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Tel: 0975-21-2394.

(a) Quarantine Station: Lat: 33° 16′ 00″ N., Long: 131° 46′ 00″ E.

(b) Quarantine inspection is not allowed inside port except when weather or other special reasons prevent the quarantine boat from approaching ship at anchorage.

Quarantine is effected in berth for vessels of more than 10,000 g.r.t., provided the vessel possesses valid (i) Derat Exemption/Fumigation Certificate. (ii) all crew/passengers are healthy. (Radio message from ship's Master for these items are required 2 days in advance).

(c) Quarantine service is rendered between 0830 hrs. – 1700 hrs. in Summer and between 0830 hrs. – 1600 hrs. in Winter.

(d) "Q" flag should be hoisted until ship has Free Pratique.

(e) When ship arrives from plague infected or suspected area within 10 days after she left such place, a 24 hour special quarantine is required.

(f) Radio Free Pratique is possible, provided the ship has valid Derat Exemption/Sanitary Inspection Certificates.

The Master has to radio or telex the Quarantine Office via ship's agent 36 hours prior to arrival, except Saturday, Sunday and holidays, in compliance with rules.

The following documents are to be submitted:

Declaration Inward/Outward.
Crew List.
Maritime Declaration of Health.
Ports of Call list.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF: Vessel can keep in direct contact with port authorities in regard to their arrival, berthing instructions and Pilot's requirements, etc., through VHF, the details of which are as follows:–

(a) Call sign: Oita Port Radio. Tel: 0975-75-1819.

(b) Location of radio facilities: The transmitting and receiving station is located at the top of Mount Tohmiyama, Saganoseki (Sekisaki)

(c) Channel: Simplex 16 (Calling)
12 (Communicating)
14 (Communicating)

Antenna power: 50 W.

(d) Operating Hours: 24 hours.

(e) Communicating range: Within a radius of 100 km. from the station at sea.

Shipchandlers: Provisions are obtainable.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Shimizu Unyu K.K., 12-1, Irifune-cho, Shimizu City, Shizuoka Pref. 424, Japan. Tel: (0543) 53-3914. Telex: 3965-677 Suzuyo J. Fax: (0543) 52-8323. Cables: Seaunyu Shimizu.

OMISHIMA (Ohmishima), Inokuchi Port: 34.16 N. 133.00 E.

Refinery closed in 1988.

ONAHAMA (Iwaki City): 36.56 N. 140.55 E. (See Plan)

The port is protected by breakwater, 7,910 m. long and is open to the South.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Voyage Memo (Ports of Call).
4 Crew Lists including Passport Numbers.
4 Passenger Lists including Passport Numbers.
1 Stores List.
1 Declaration of Crew's baggage, i.e. tobacco wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnage. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: No means of communication with Pilots and vessels should arrange pilotage by advising Agent of ETA. Not compulsory; Pilots are available at the anchorage (Lat. 36° 53′ 05″ N., Long. 140° 54′ E.) for vessels requiring Pilot services.
For Tankers at Lat. 36° 52′ 05″ N., Long. 140° 54′ 00″ E.

ANCHORAGES: Just outside No. 1 West Breakwater. Depth of water 14 m. – 22 m.

RESTRICTIONS: Restriction only by ship's draft. Depths of water alongside wharves 9 m. and 10 m. at low tide, and rise of tide is about 1.40 m. highest. Berthing daylight only. Unberthing at Pilot's option.

MAX. SIZE: *Tankers:* Sea Berth: Max. 99,999 d.w.t. Depth 15.0 m. Max. safe draft, 13.50 m. (Also see "Berthing").

HEALTH: Radio Pratique available. Formalities will be carried out mainly after berthing.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio, which covers all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Normally join vessel on passage from anchorage. Vessel's lines used. 3 tugs available, 1×3,600 h.p., 1×3,000 h.p and 1×2,600 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding 2nd and 5th Sundays and holidays required in order for Agent to arrange stevedores. 1st, 3rd and 4th Sundays shall be non-working days. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. 60% additional of basic stevedorage; 2130–0800 hrs. next morning 120% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Sea Berth: Product handled, Naphtha and Crude Oil. Shoreline 16 in.×2. Discharge rate 9,000 k/l per hour. Bunkers not available ex-pipe-line.

DENSITY: 1025.

FRESH WATER: Available from shore lines, at about 30 t.p.h.

FUEL: Domestic oil is available. Bonded oil will be brought from Yokohama with sufficient advance notice, when required.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Iwaki (0246); Police 54-1111; Ambulance and Fire, 119.

TELEPHONES: No facilities for connecting on board.

SHIPMASTER'S REPORT: 1975.
The port is protected by breakwaters, 1 running North and N.E. 11,170 ft. long and 1 running Westerly and W.S.W'ly 5,520 ft. long, the latter which affords some protection from Southerly swell.
Pilotage: The Pilot boards at the main breakwater entrance. If possible, obtain Japanese Port Chart No. 63 and approach Chart No. 68.
Anchorage: If awaiting Pilot anchor approximately 1 mile E.S.E. of the Southern extremity of the East breakwater.
Max. Size: Several new berths have recently opened, including No. 5 and No. 6.
Health: The centre of the Quarantine Anchorage is located 6 cables S.E. from the Southern extremity of the East breakwater. Radio Pratique is accepted if a Japanese Sanitary Inspection Certificate is held.

AUTHORITY: Onahama Port Construction Office, 38-1, Onahama Tatsumi-cho, Iwaki City, Fukushima Pref. *Tel:* (0246) 54-2411.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Onahama Kairiku Unso Kaisha Ltd., 312-1 Takayama, Iwaki-shi, Fukushima-ken, Onahama, Japan 971. Tel: (0246) 53-3225. Telex: 08922-80 Onakai J. Cables: Onakai Iwakionahama.

ONODA: 33.58 N. 131.10 E. (See Plan)

Port Status: Closed Port.

Permission to enter and depart from Onoda Port should be obtained at the nearest open port prior to proceeding to Onoda (i.e. Ube Port and/or Shimonoseki).

DOCUMENTS: See "Ube".

Officials:

Customs : Not stationed at Onoda, formalities should be undertaken at Ube Customs House.

Immigration : Not stationed at Onoda, Officials attend the vessel from Ube Port Office, as necessary.

Quarantine : Free Pratique should be obtained at Ube or Mutsure Quarantine Stations.

Port Authority : Stationed in Onoda (Yamaguchi Prefecture).

Maritime Safety Office : Stationed in Ube Port.

PILOTAGE: Not compulsory, but it is recommended that pilot is taken at one of the following points:

1. Sekisaki Sea Pilot Station: Lat. 33° 13′ N., Long. 131° 56′ E., 3 miles S.S.E. of Sekisaki Lighthouse.
2. Ube Pilot Station (Quarantine Station): Lat. 33° 53′ 20″ N., Long. 131° 13′ 15″ E.
3. Hesaki Pilot Station: Lat. 33° 56′ N., Long. 131° 03′ E.
4. Onoda Harbour Pilot Station: In the vicinity of Lat. 33° 55′ 40″ N., Long. 131° 07′ 54″ E., about 500 m. South West of Onoda Light Buoys No. 1 and 2.

RESTRICTIONS: Berthing and unberthing possible in daytime only (30 minutes after sunrise until 1 hour before sunset).

BERTHING:

Wharf	*Length* (m.)	*Depth in Approaches* (m.)	*Depth alongside* (m.)
Onoda Public Wharf			
No. 2	130	6.00	7.60
No. 3	180	5.60	5.70

No. 3 Wharf is exclusively used for domestic carriers only.

Maximum permissible draft at No. 2 Wharf is 5.50 m. for vessels having LOA of between 125 m. and 129 m., and in the event of LOA of vessel below 125 m., deeper draft is acceptable, which depends upon tidal allowance, since the pilot always requires 1.0 m. or 10% draft whichever greater for under-keel clearance.

Starboard side alongside is prefered, but port side alongside is acceptable.

CARGO HANDLING: *Number of Gangs:* Two.

Discharge Rate: Approximately 70 tonnes per gang hour (working period is basically 0800 hrs. – 1830 hrs. = 9 net working hours).

Shore mobile cranes are used for discharging, subject to type of vessel.

Cargo Receiver: Yamaguchi Kyoei Industry Co.Ltd., Onoda. Tel: 08368-3-5485. Person in charge: Mr.Kotake.

Stevedores: Nippon Express Co.Ltd., Ube Branch. Tel: 0836-21-5135. Person in charge: Mr.Kanefuji.

FRESH WATER: Available from hydrant at 15 tonnes/hr. Cost is Yen 400/tonne, minimum supply 20 tonnes.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Moji, 9-7, Minato Machi, Moji Ward, Kitakyushu City, Fukuoka Pref., 801 Japan. Tel: 093-321-4261. Telex: 7153-11 Greenm J. Fax: 093-321-4288. Cables: Greenship Moji.

ONOMICHI-ITOZAKI (incl. Mihara, Matsunaga, Mukaishima): 34.20 N. 133.16 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
1 copy Voyage Memo (last 3 months).

Ship's Agent will prepare Inward/Outward Declarations, 1 Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea Ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. A see 'Shipmaster's Report' before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Stra Position Lat: 34° 34.09′ N., Long: 135° 11′ E. Telegraphic addre "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transit Bungo Channel). Position Lat: 33° 13′ N., Long: 131° 54′ E. Telegrap address "Anjin Moji". In event bad weather, recommended vesse proceed for shelter as near as possible, having due regard to safety, Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position La 33° 56′ 24″ N., Long: 131° 03′ 12″ E.

Inland Sea Pilot also berths vessels at anchorage berth (if Matsuna Bay – logs), or pier in Itozaki district (Mihara section).

Pilot boards for berthing from 30 minutes after sunrise until 30 minu before sunset.

ANCHORAGES: Draft limitations: Itozaki-Mihara 7.5 m. Matsunaga Ba 8.5 m. Tidal range: Maximum (+) 3.91 m. Minimum (–) 0.09 m. Capac for 3×20,000 ton vessels.

HEALTH: Radio Pratique not available. Quarantine formalities norma carried out at Mutsure (off Moji) when vessel comes from West throu Kanmon Strait, Matsuyama when vessel comes from West throu Bungo Channel (Sekisaki Pilot Station) and Fukuyama when vess comes from East (Wadamisaki Pilot Station).

RADIO: Recommended Master communicates with Agent throu Choshi Radio or Nagasaki Radio which cover all ports in Japa If specifically Westbound vessel, to contact Choshi, and Northbound contact Nagasaki Radio respectively.

TUGS: Tugs available at Onomichi at any time with 24 hours notic 7 tugs of 2,000 h.p. – 3,000 h.p. available.

BERTHING: No specific requirements. Pilot boarding time will be notifie by ship's Agent mainly by radio.

Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft and Length overall* (m.)	*Capaci* (g.r.t.)
Municipal				
Nishigosho Pier	404	6.5	5.0×130	2,00
Municipal				
Shinhama Pier	250	5.5	4.5×100	2,00

Municipal				
Itozaki Pier	320	10.0	9.0×200	3,00

Itozaki Pier: Cargo handled from Mitsubishi and Hitachi Wor cement in bags, steel and logs.

STEVEDORES: At least 24 hours prior notice excluding Sundays an holidays required in order for Agent to arrange stevedores. Vessel mu constantly keep her Agent advised of ETA. If stevedores cann commence loading/unloading at time notified by the Agent, the orderer must pay for waiting time. If cargo gear not rigged on berthin stevedores will do same for ship's crew. Overtime surcharges 1700-1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. ne morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No facilities.

FRESH WATER: Available. Method of delivery (1) Barge. (2) Pi Additional charge for overtime work and in event of bad weather.

FUEL: Domestic oil is available, Bonded oil will be brought from Kob Kanokawa, Hirohata or Moji.

CONSULS: None.

OPENING/CLOSING HATCHES: Stevedores carry out opening a closing hatches. If any time lost by ship's crew doing this wor stevedores charge ship for waiting. Recommend request stevedores t this work unless crew can complete it before berthing.

CUSTOMS ALLOWANCES: Only allowed 40 cigarettes to take asho but no spirits.

REPAIRS: Repairs possible for vessels up to 100,000 g.r.t.

REPATRIATION: Possible.

AIRPORT: Nearest domestic airport at Hiroshima. Nearest internation airport for crew joining/repatriation is Osaka International Airport.

TIME: GMT plus nine hours. Permanent.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No arrangements for placing telephones on board.

SHORE LEAVE: Local Immigration Authority issue shore passes va for 15 days if vessel calling at more than one port in Japan and 7 da if vessel only calling at a single port. (If only calling Onomichi-Itoza Immigration issue 7 day pass).

AUTHORITY: Port and Harbour Dept., Onomichi City, 27-13 Koham cho, Onomichi, Hiroshima Prefecture, Japan.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Hakata Marine Co. Ltd., 11-6, Shinhama 1-chome, Onomic Hiroshima, Japan 722. Tel: 0848-23-5600. Telex: 642322 Hakat Fax: 0848-22-5141. Cables: Hakatamarine Onomichi.

OSAKA: 34.39 N. 135.26 E. (See Pl

DOCUMENTS:

Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
4 Crew Lists including Passport Numbers.
4 Passenger Lists, if any on board.

1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Pilotage is compulsory for vessels of 10,000 gross tons or more. 24 hours' notice required. Telegraphic address: "Hanshinpilot Osaka". VHF contact with Osaka Port Radio on Channels 12, 16, 19, 20. Agents operate Channel 26. Three 15 ton Pilot boats with radio equipment to pilot office. Pilot boards anywhere within harbour limits. In event bad weather Pilot boards just inside breakwater when acknowledgement obtainable from Master. If awaiting Pilot, anchor inside harbour limits as near as possible to breakwater.

ANCHORAGES: Section Nos. 7 and 8. Section 7 is Quarantine Anchorage. Section 8 for other vessels. Captain of the Port allocates anchorage position prior vessel's arrival which radioed to Master by Agent. Max. draft about 14.0 m.

RESTRICTIONS: Vessels only permitted to enter from sunrise to 2100 hrs. Full container vessels permitted to enter from sunrise to 2400 hrs. and to depart at any time of the day. However, in order to avoid danger, some wharves (oil wharf, Nakayama Wharf and various shipyards where there is not enough space to conduct berthing operation), accept vessel only until sunset.

MAX. SIZE: Max. permissible length 250 m., draft 11.6 m. Also see "Tankers".

HEALTH: Vessel requiring Free Pratique requested cable directly to "Quarantine Station", Osaka informing ETA, date of departure from last port, name of last port, number of crew and health condition. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

Radio Pratique is available only for a vessel which possesses Valid Sanitary Inspection Certificate issued by the Japanese Government.

RADIO: Osaka Port Radio, 24-hour port operation service on VHF Channels 16, 12, 19 and 20.

RADAR: Osaka Harbour Radar has 24-hour navigation aid and weather information service and supplies information on ship movements, etc. Contact by VHF Channels 16, 14 and 22.

TUGS: 10 Port Authority tugs. Tugs join vessel just before harbour entrance. Tug's lines used, no extra charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by VHF or radio.

CONTAINER FACILITIES: Berths C1, C2, C3, C4, C5, C7, C8, R2, R3 and R4 each equipped with container handling gantry cranes. Berth C1 equipped to handle Ro/Ro.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2130 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

BRIDGES: 2 bridges under construction. Clearance 46.0 m. – 47.0 m. Completion 1993-94.

MEDICAL: No advance notice required unless urgent. General and Seaman's hospitals available.

TANKERS: No slop discharge facilities. Wharf No. 49, Sakurajima Oil Wharf, max. LOA 250 m., max. safe draft 11.60 m. Product handled, fuel oil, diesel oil, Minas Waxy. Shoreline 12 in. Discharge rate 1,000 t.p.h.

Shipmaster's Report: December 1985.

Tankers are only taken alongside between 0930 hrs. and 1500 hrs. In Summer sometimes between 0900 hrs. and 1600 hrs., but it is not usual.

Sakurajima Wharf 49 has a max. safe draft of 11.60 m., however with such a draft entering only possible during HW. If high water does not fall between 0930 hrs. and 1500 hrs. vessel has to wait a few days.

We discharged 5,000 tons of Ethylene Dichloride at Sakurajima Wharf. Only one connection of 8 in. Discharging rate 700 cu.m.p.h.

DENSITY: Outside anchorage: 1023 – 1025. Near breakwater: 1020 – 1022. Average density inside breakwater 1020. Wharves near estuaries (Aji River, Shirinashi River, Kizu River and etc.): 1016 – 1020.

FRESH WATER: Methods of delivery: by barges or pipe-line.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

CONSULS: The following consulates available in Osaka:

Austria	France	Singapore
Australia	Korea	Switzerland
China, People's Rep. of	New Zealand	U.S.A.

REPAIRS: All grades repairs possible.

DRY DOCKS: Hitachi Zosen Co. Ltd., Chikko Ship Yard. No. 1 Dock: 247.5 m.×55.7 m., depth 11 m. No. 2 Dock: 355.0 m.×62.7 m., depth 11 m.

Namura Dock Co. Ltd., No. 1 Dock: 180 m.×27.5 mm., depth 9.3 m. No. 2 Dock: 149 m.×22 m., depth 9.3 m.

Sanoyas Co. Ltd., No. 1 Dock: 155 m.×21.7 m., depth 7.4 m. No. 2 Dock: 112 m.×17 m., depth 7m.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CARGO GEAR: See "Certificates", but no special requirements.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

AIRPORT: One hour required from Osaka Port to Osaka International Airport by car (about 25 km. distance). Regular airlines:

Overseas Lines: Japan Airlines, Cathay Pacific Airlines, China Airlines, Thai International Airlines, North West Airlines, United Airlines, British Airways, Korean Airlines, Lufthansa Airlines, Singapore Airlines, Air France.

Domestic Lines: Japan Airlines, All Nippon Airways, Nippon Air System.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: Every Sunday, May 1st, July 20th, December 31st to January 4th.

POLICE/AMBULANCE/FIRE: Police tel. 110; Ambulance tel. 119; Fire tel. 119.

TELEPHONE: Wharf connections available.

SERVICES: All services available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but 3 days' extension possible if ship stays longer.

DEVELOPMENTS: Container Berth No. C-6 under construction with completion in 1992 (300 m. length and 12.0 m. depth). Berth No. C-9 will be completed in 1993 (length 350 m. and depth 13.0 m.).

OWASE: 34.04 N. 136.15 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
5 Crew Lists, including Passport Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan). Each person's signature is necessary in it.
Ship's Agent will prepare 2 Inward/Outward Declarations. 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
Certificates: Ship's Register to show Customs Inspector ship's gross and net registered tonnages.
PILOTAGE: Pilot station is 2 miles East from Togashira Island. Pilotage is not compulsory at this port but recommended to take pilotage by Toho Oil Co. Ltd.
ANCHORAGES: Quarantine Anchorage position is Lat. 34° 03′ 55″ N., Long. 136° 13′ 20″ E. Depth of water 60 m. – 80 m. Radius 500 m. However, it is not advisable for vessels to stay there for a long time as there are many fishing boats nearby.
RESTRICTIONS: According to Agreement between Fishery Association and Oil Refinery, ship's movement is prohibited at night. See "Berthing".
MAX. SIZE: See "Tankers".
HEALTH: Radio Pratique available. Formalities carried out after entering the port.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: Tugs usually join vessel at Outer Harbour (near Quarantine Anchorage) and tug's line is used. Tugs come from Nagoya. VHF Channel 16, 6, and 12.
BERTHING: Time limit of Pilot boarding for berthing to Toho Oil Terminal is 3 hours before sunset due to the agreement between Fisheries and Toho Oil Co. Ltd.
MEDICAL: No advance notice required unless urgent. Hospital facilities available.
TANKERS: Toho Oil - Owase Pier: Depth of water, 17.0 m., Max. d.w.t. 100,000, Max. LOA, 155 m. Max. safe draft 16.00 m. Product handled crude oil. Shoreline 2×12″. Discharge rate, 4,500 k/l.p.h.
Toho Oil - Sea Berth: Depth of water, 21.0 m. Max. d.w.t. 210,000. Max. LOA 350 m. Max. safe draft 19.00 m. Product handled, crude oil. Shoreline 2×20″. Discharge rate 7,000 k/l.p.h.
FRESH WATER: Fresh water can be supplied to the vessel from pipe at quay. Supply capacity 30 t.p.h.
FUEL: Domestic oils available. Bonded oil will be brought from Nagoya, Yokohama, Chiba or Kobe.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.
CONSULS/REPAIRS/AIRPORT: None.
TIME: GMT plus 9 hours. Permanent.
TELEPHONES: Emergency numbers, Owase Police Office 22-0004; Owase Fire Station 22-2020; Owase Hospital 22-2118. No facilities for placing telephones on board.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but extension possible if ship stays longer.
AUTHORITY: Owase Doboku (Public Works) Office, 2-11, Hayashi-machi, Owase City, Mie Pref. *Tel:* (05972) 2-2017.
AGENT: Sub-agents of Aall Barwil Agencies K.K.
Nippon Express Co. Ltd., Agency Section, 2-32, Hayashi-Machi, Owase City, Mie 519-36, Japan. Tel: (05972) 2-2217. Fax: (05972) 2-2218. Cables: Nexco Owase.

RUMOI: 43.57 N. 141.38 E. (See Plan)

SHIPMASTER'S REPORT: November 1985 (Updated 1992).

DOCUMENTS:
5 Crew Lists on Japanese forms.
1 Stores List.
3 Passenger Lists (if carried).
Last Port Clearance.
Register.
PILOTAGE: 24 hours notice required. Boarding position at Quarantine Anchorage if fine weather or inside lee of new breakwater. Pilot boat is a small tug with a white hull.
ANCHORAGE: Lat. 43° 57′ 11″ N., Long. 143° 37′ 30″ E. – Very poor holding ground, rock bottom. Exposed from N.W. to S.W. Numerous fishing floats, nets, etc., in approach to anchorage to about 3 miles offshore.
RESTRICTIONS: Daylight entry only, sailing reportedly to be allowed up to 2 hours after sunset.
MAX. SIZE: Maximum ship size 150 m. LOA, 25 m. beam and 10.0 m. draft.
RADIO: *ETA:* Via Choisi Radio. This port has no VHF therefore ETA's can be given via Otaru Radio on VHF Channels 16 and 12 when coming from South.
TUGS: 1×1,900 h.p. Very expensive and poorly equipped and handled.
BERTHING: Depth alongside and in approaches 5.5 m. – 10.0 m.
STEVEDORES: Very good. Discharged boxes of frozen fish at average rate of 30 tons per working hour. Normal stevedoring hours 0800 – 1700 hrs. with overtime to 2100 hrs. if required.
MEDICAL: Hospital available.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Minor repairs possible.
GANGWAY/DECK WATCHMEN: Not compulsory.
OPENING/CLOSING HATCHES: Crew open and close hatches. Stevedores adjust derricks as required under ship's supervision.
REPATRIATION: Possible.
AIRPORT: Nearest airport 90 km. from town (subject to delays in winter) ice, snow, fog, etc.
TIME: GMT plus 9 hours all year round.
TELEPHONE: In Agent's office, adjacent to wharf.
GENERAL: *Provisions/Laundry:* Available.
AGENT: Sub-agents of Aall Barwil Agencies K.K.
Nippon Express Co. Ltd., Marine Department, No. 45, 1-chome, Sakae-cho, Rumoi-City, Hokkaido 097, Japan. Tel: (01644) 2-0535. Fax: (01644) 9-2122. Cables: Nexco Rumoi.

SAGANOSEKI: 33.15 N. 131.52 E. (See Plan)

DOCUMENTS: When a vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:
Customs: (Tel: 0975-75-0350).
1 copy Crew Manifest (full name/rank/Passport No./date of birth).
1 copy List of Ship's Stores (Arms/Ammunition and Narcotics List to be attached).
1 copy Declaration of Crew's Baggage.
1 copy Ports of Call List (last 3 months).
1 copy Inward/Outward Declaration (ship's Agent will prepare).
1 copy Cargo Manifest for Discharging Cargo (ship's Agent will prepare).
1 copy Cargo Manifest for Through Cargo (ship's Agent will prepare).
1 copy Declaration for Payment of Tonnage Dues (ship's Agent will prepare).
The following ship's documents will be checked by Customs:
Ship's Register.
International Tonnage Certificate.
Last Port of Clearance.
Immigration: (Tel: 0975-27-3754) Oita Office.
2 copies Crew Manifest.
1 copy Ports of Call List.
1 copy Inward/Outward Declaration.
At first Japanese port, ship's Agent is to bring Passports and/or Seamen's Books to Immigration Office and obtain the Crew Landing Passes.
Quarantine (Tel: 0975-21-2394) Oita Office:
See "Health".
PILOTAGE: Inland Sea Pilots Association, Moji Office (Tel: 093-332-7191):
(a) Harbour and sea pilotage are not compulsory, but foreign vessels are recommended to employ a pilot, in view many fishing nets/boats in Sekisaki/Saganoseki area.
(b) Request must be made at least 24 hours in advance, and pilot should be kept closely advised of vessel's accurate ETA at certain pilot station.
(c) Sekisaki, 3 miles South of Sekisaki Lighthouse (vessel transiting Bungo Channel). Position Lat. 33° 13.5′ N., Long. 131° 58′ E.
(d) Hesaki at East side of Kanmon (Shimonoseki) Strait, position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.
(e) Communication with pilot: VHF Channel 16 through Oita Port Radio (Tel: 093-332-7191. Telex: 715313 Anjin J. Cables: Anjin Moji).
RADIO: Recommended that Master communicates with Agents through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

ANCHORAGE: Waiting anchorage available at following 3 positions only:

Saganoseki "A" Anchorage, Lat. 33° 15′ 39″ N., Long. 131° 51′ 25″ E.
Saganoseki "B" Anchorage, Lat. 33° 15′ 30″ N., Long. 131° 51′ 33″ E.
Saganoseki "C" Anchorage, Lat. 33° 15′ 48″ N., Long. 131° 51′ 16″ E.

(Above Saganoseki Anchorage is assigned as Customs "Closed Port", so cash/mail/stores delivery, etc., whilst anchored not permitted, as per Customs Regulations).

RESTRICTIONS: Berthing/unberthing during daytime only.

MAX. SIZE: See "Berthing".

HEALTH:

(a) Ordinary quarantine inspection should be undertaken at Saganoseki Anchorage (See "Anchorage") by inspectors attending on board.

(b) Quarantine service is rendered between 0830 hrs. and 1700 hrs. in Summer season, and between 0830 hrs. and 1600 hrs. in Winter season.

(c) Radio Pratique is available, provided vessel has valid Derat Exemption and Japanese Sanitary Inspection Certificate.

VHF: Oita Port Radio (Tel: 0975-75-1819). Channels 16, 12 and 14. Power 50 W. Operating hours: 24 hours.

TUGS: Tugs available to assist with berthing/unberthing through Oita Port (30 minutes by sea from Saganoseki).

BERTHING:

Berth	*Wharf Length* (m.)	*Max. LOA* (m.)	*Depth alongside* (m.)	*Depth in Approach* (m.)	*Max. Draft* (m.)
A Wharf	100	185	10.0	9.20	9.55
B Wharf	200	185	10.0	9.20	9.55
C Wharf	130	185	10.0	9.20	9.55

Note: Wharf length (A/B/C): 430 m. in total (same extension).

Max. deadweight: 31,406 tonnes (wharf strength), 39,200 tonnes (bitt strength).

Max. draft: 9.55 m., subject to tide allowance 10% of ship's draft as under-keel clearance.

CRANES: Company: Nippon Mining Co.Ltd.

Facilities:

Unloaders: 4.
Cargo handled: Copper concentrate in bulk.
Discharge Rate: About 160 – 170 tonnes/hr. and about 1,900 tonnes per day per unloader.
About 650 tonnes/hr. and about 7,800 tonnes/day by 4 unloaders.
Max. airdraft: 11.00 m.
Max. outreach: 25 m. × 2 unloaders.
27 m. × 2 unloaders.
Berth: To be used at Wharf "A" and "B".

BULK CARGO FACILITIES: See "Cranes".

SPECIALISED CARGO HANDLING FACILITIES: Company: Nippon Mining Co.Ltd.

Facilities:

Loading arms: 2.
Cargo handled: Sulphuric acid in bulk.
Loading rate: 1,000 tonnes/hr. by 2 arms.
Shore connection: 6 in./JIS Chicksan.
Max. pressure: 10 kg. at manifold.
Berth: To be used at Wharf "C".

STEVEDORES: Discharging of all raw materials is on "Free in/out" basis. Therefore, stevedorage is to receiver's account., Discharging is carried out by shore cranes. Ship's gear is not used.

MEDICAL: No advance notice required, except on Sundays, holidays and in an emergency.

TANKERS: See "Berthing" and "Specialised Cargo Handling Facilities".

DENSITY: Average: 1023 in Summer, 1024 in Winter.

FRESH WATER: Available from shore. Rate about 15 tonnes/hr.

FUEL: Bonded oil will be brought from Oita, Kanmon or Tokuyama.

CONSULS: There are not consuls in Saganoseki. Notary Public office is available for Marine Note of Protest (Nakano Notary Public office at Oita. Tel: 0975-35-0888).

REPAIRS: Minor deck and engine repairs can be undertaken by Oita workshop and/or Moji.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: For discharging raw materials, opening/closing hatches must be carried out by ship's crew before berthing.

CERTIFICATES: Ship's Register and International Tonnage Certificate, to show Customs Inspector ship's registered gross and nett tonnages.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible.

AIRPORT: Oita Airport, 2 hours by taxi, 1.5 hours by hovercraft (Distance from centre of Oita town to Saganoseki is 25 km.).

A regular domestic airline service to most airports in Japan is available. A regular international airline service only to Seoul, South Korea (every Monday, Wednesday and Saturday).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance/Fire 119.

TELEPHONES: Possible to place wireless telephone on board ex-Saiki. 3-4 days prior notice required.

SHORE LEAVE: Local Immigration Office (Oita Office) issues shore passes valid for 7 days only, if vessel only calling at one port in Japan, and 15 days, if vessel calling at more than one port in Japan. Extension possible if ship stays longer.

SERVICE: All services available.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Oita Branch, 934 Kaibara, Chihama, Oita City, Oita Pref., Japan. Tel: 0975-21-3015. Telex: 7722-84 Greeno J. Fax: 0975-22-2136. Cables: Greenship Oita.

SAIKI: 32.59 N. 131.55 E. (See Pla

DOCUMENTS: When vessel arrives direct from a foreign port, Custo Officials will board to search, and the following documents are to submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, came wrist-watch, radio, firearms/swords, etc. (only at first port in Japa

Ship's Agents will prepare Inward/Outward Declaration, Ca Manifest and Cargo Manifest in Transit, using specific forms. Therefo ship's Agents should be provided with necessary information ab details of cargoes in advance.

PILOTAGE: Pilotage in and out of harbour not compulsory, recommended to be taken at Quarantine Anchorage (Lat. 32° 59 Long. 131° 56′ 50″ E.). Inland Sea Pilot carries out harbour pilota Inland sea pilotage should preferably be arranged through Agent cable via Nagasaki Radio, giving 72 hours notice. Urgent correctio ETA outside business hours should be cabled direct to pilot stati Inland Sea Pilot Association covers all inland sea ports. Pilota compulsory for vessels over 10,000 g.r.t. Pilots obtained from one three pilot stations, depending upon vessel's last port of departure, at Master's discretion. Pilotage available throughout 24 hours, 72 hours advance notice preferred, thereafter advising any alteratio Most Inland Sea Pilots also act as harbour pilots up to berth or anchora at destination.

Note: VHF communication available with inland sea pilot station.

1. Wadamisaki, at entrance to Kobe (vessel transiting Kii Strai Position Lat. 34° 34′ 09″ N., Long. 135° 11′ E. Cable address "A Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessel transi Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Ca address "Anjin Moji". In event of bad weather, recommended vess proceed for shelter, as near as possible having due regard to safety Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Posi Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGES: Same as Quarantine Anchorage (see "Pilotage").

RESTRICTIONS: Vessel can enter port and depart after sunset.

Depth of water in the passage is 11.0 m.

Tidal Range: Max. +1.7 m. Min. −1.3 m.

MAX. SIZE: See "Berthing".

HEALTH: At first port of call in Japan, vessel must obtain Free Pratiq Quarantine Officers will attend vessel from 0830 hrs. to 1630 hrs. anchorage. Master to show all Vaccination Cards and Derat Exempt Certificate. In case vessel arrives from cholera infected area wi 10 days, Master must advise crew and passengers' health condition respective Quarantine Office through ship's Agent, prior to arrival, a close all soil pipes before entering port. Radio Pratique available.

RADIO: Recommended that Master communicates with Agent throu Choshi Radio or Nagasaki Radio, which cover all ports in Japa Westbound vessels to contact Choshi Radio, and Northbound vess to contact Nagasaki Radio respectively.

VHF: No VHF service.

TUGS: 1×1,000 h.p. and 1×800 h.p.

BERTHING:

Name of Berth	*Length* (m.)	*Depth* (m.)	*Max. Draft* (m.)	*Capacity* (g.r.t.)
Mejima Pier	370	10.0	10.0	2×10,000
Nihon Cement Pier	150	9.5	9.5	18,000 d.w.t. (1 unloa
Kojin Dolphin	150	9.0	9.0	12,500 (Wood chip on
Buoy		12.0	12.0	20,000 (Discharge logs
Anchorage		12.0	12.0	4×10,000 (Discharge logs)

BRIDGE: None.

STEVEDORES: At least 24 hours prior notice, excluding Sundays holidays, required in order for Agent to arrange stevedores. Vessel m constantly keep her Agent advised of ETA. If stevedores can commence loading/unloading at time notified by the Agent, the order must pay for waiting time. If cargo gear not rigged on berth stevedores will do same for ship's crew at additional cost. Overt surcharges 1700 hrs. – 1900 hrs. 50% additional of basic stevedora 2100 hrs. – 0500 hrs. next morning 130% additional; Sundays/holid 60% additional.

TANKERS: No tanker berth.

MEDICAL: No advance notice required, unless urgent.

DENSITY: Average 1025.

FRESH WATER: Good fresh water supplied either from water barg from hydrants. Capacity of water barge is 180 tons.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise B Osaka Bay and Kanmon Port. At all other ports, bunkers will be ligh from the nearest bunker stock ports at maximum 7 days prior notic

CONSULS: No consuls. Marine Note of Protest possible at local No Public.

REPAIRS: Only minor repairs possible. Major repairs can be underta at Moji or Oita.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not specially required, un passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening closing hatches. If any time lost by ship's crew doing this w stevedores charge ship for waiting. Recommend request stevedore this work, unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores, when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

CARGO GEAR: See "Certificates", but no special requirements.

REPATRIATION: Possible.

AIRPORT: Oita Airport about 2 hours by train and taxi. JAL, ANA and JAS airlines for domestic service.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance/Fire 119.

TELEPHONES: Not possible to place telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days, when Saiki is first port of call in Japan. Extension possible if ship stays longer.

SERVICES: All services available from Moji and Oita.

AUTHORITY: Oitaken Saiki Doboku Office, 4-1 Nakamura Minami Machi, Saiki City, Fukuoka Pref., 876 Japan. *Tel:* 0972-22-3129. *FAX:* 0972-22-9543.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Green Shipping Ltd., Moji, c/o Yoshida Koun Kaisha Ltd., Mubanchi Tsuruya Ku, Saiki City, Oita Pref., Japan. Tel: 0972-23-5555. Telex: 775-702 Yoshiko J. Fax: 0972-22-5695. Cables: Yoshiko Saiki.

SAKAI (Including Senboku and Hannan Port):

34.34 N. 135.27 E. **(See Plan)**

DOCUMENTS:

Ship's Register.
Last Port Clearance.
7 Crew Lists, including Passport Numbers.
2 Passenger Lists.
1 Stores List
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (if first port of call in Japan).

Ship's Agent will prepare inwards/outward Declaration, 1 Cargo Manifest in transit using specific form. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Cable address "Hanshinpilot Osaka". 24 hours' notice required. VHF (Osaka Port Radio), Channel 16, JBD Osaka Radio, Channels 25, 26 and 27. Three boats capacity 15 tons, 147 h.p. Pilot boards anywhere within harbour area, but preferably at Quarantine Anchorage – Sector No. 7. Bad weather: Unable to take Pilot. Boarding measures: Safe pilot ladder. Anchorage for vessel waiting Pilot: As Pilot Boarding Area.

Inland Sea Pilot cable address: "Anjin Kobe" can also be used for following wharves: Kansai Oil Co. Ltd., Sakai Wharf; Koa Oil Co. Ltd., Sakai Wharf.

ANCHORAGES: Quarantine inspection carried out at Quarantine Anchorage – Sector No. 7 where max. draft 10.0 m. Vessels with draft over 10.0 m. have to obtain Free Pratique at Safety Anchorage (max. draft 12.0 m.).

Anchorage location for larger vessels is designated on a grid system by the Captain of the Port. The instructions will be passed to the Master via the Agent.

RESTRICTIONS: Entry not possible after sunset. Sailing possible anytime but Pilots not available after sunset.

(*a*) Arrival notice for ships over 500 tons gross must be given to Harbour Master 48 hours prior to arrival.

(*b*) Entrance passage draft limitation: 11.20 m.

MAX. SIZE:

Name of Wharf (Jetty)	*Max. draft* (m.)	*Max. LOA* (m.)
Nippon Steel Wharf 3-A/3-B	14.0	255
Nippon Steel Wharf 2-H	10.2	181
Ube Kosan Wharf (Export)	9.0	130
Ube Kosan Wharf (Import)	10.2	174
Public Wharf 3 & 6	9.0	160
Public Wharf 1, 2, 4, 5 only for vessel less than 500 tons		
Osaka Seiyosho Wharf	9.0	144

Tankers:

Name of Berth	*Max. d.w.t.*	*Max. LOA* (m.)	*Max. Safe draft* (m.)
Cosmo Oil (South Berth)	259,999	333	14.50
(North Berth)	195,000	313	14.50
General Sekiyu	259,999	333	14.50
Koa Oil	150,000	276	14.50
Marubeni Oil	85,000	260	13.50
Iwatani Terminal (LPG)	66,000	270	14.50
Mitsuitoatsu (LPG)*	66,000	260	14.00
Osaka Gas (LNG) No.1	54,000	270	14.40
Osaka Gas (LNG) No.2	79,999	270	12.50
Ube Kosan (D)	20,000	170	9.20

*See "Shipmaster's Report".

HEALTH: Radio Pratique available. Vessels usually anchor at the Quarantine Anchorage in Osaka, where the authorities board and grant Free Pratique.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF:

	Call Sign	*Call On*	*Work On*
Osaka Bay Pilot	Osaka Bay Pilot	Channel 16	Channel allocated
Harbour Pilot	Hamshin Pilot	Channel 13	Channel 13
Port Radio	Osaka Radio	Channel 16	Channel allocated
Sakai MSA (Captain of the Port)	Sakai Hoan	Channel 16	

TUGS: Join vessel at anchorage under instruction or attending Pilot. Tug lines used, cost in tug hire.

BERTHING: (Berths with less depth or capacity not shown).

Berth	*No.*	*Water Depth* (m.)	*Total length* (m.)	*No. of Berths*	*Ship tonnage* (d.w.t.)
Sakai:					
Shiohama Wharf	1	7.0	120	1	5,000
Ohama Wharf	1	4.5	60	1	1,000
Ohama Wharf	2	5.5	270	3	3,000

Kaizuka Wharf	1	6.5	202	2	2,000
Kaizuka Wharf	2	6.5	400	3	3,000

There are many additional berths with depth of 2 m. – 4 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agents advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: *Berthing Procedure at General Wharf:* Vessels may enter the Hamadera Passage during daylight hours only, from 0700 hrs. until about 2 hours before sunset. In addition, for mooring larger vessels a tellurometer is provided on bridge. No entry is made if wind speed is 15 m./sec. or over (for VLCC's 10 m./sec.), or if a typhoon is forecast.

Normally 4 tugs attend to a vessel of 160,000 d.w.t. and 6 tugs to larger vessels. The local rule is that total tug power is from 8% to 10% of the vessel's deadweight, depending on weather conditions.

The berthing manoeuvre is carried out by the attending tugs with very little assistance from the ship's engines. The vessel approaches the berth at a 5° angle until about 2 ship lengths away. Then, the vessel is brought parallel to the berth, about 200 ft. to 300 ft. off, and eased alongside by the tugs and mooring lines. The approach speed is approximately 0.5 knots until 1 ship length away. Currents in the basin are very weak.

Mooring: The 2 mooring launches have insufficient power to handle wires and consequently are slow. However, an additional large launch is made available to handle wires. The normal mooring sequence is forward back spring, aft back spring, bow line, stern line, and breast lines. In view of the underpowered mooring launches, it is advisable to use synthetic lines for the bow and stern lines. The normal mooring configuration is 4 bow lines, 2 forward breast lines, 2 forward back springs, 2 aft back springs, 2 aft breast lines and 4 stern lines. In view of the limited space available in front of the bow, care should be exercised not to overshoot the berth.

Berth	*Product*	*Shoreline*	*Discharge Rate* (t.p.h.)
Cosmo Oil (North)	Crude Oil	12 in.×3	6,000
	Fuel Oil	12 in.×1	600

Osaka Gas (LNG) No.2	LNG	12 in.×3	12,500 cu.m.

FRESH WATER: Minami Hakuchi anchorage by barges. All other wharves by shore line.

DENSITY: Osaka Gas Wharf and Nippon Steel Corporation Wharves 1020 to 1025.

All other wharves, 1010 to 1025.

FUEL: Most domestic and bonded fuels available.

CONSULS: None.

REPAIRS: See "Osaka".

DRY DOCK: Hitachi Shipbuilding & Engineering Co. Ltd., Sakai Shipyard, Dock No. 2, length 455 m., width 63 m., depth 11 m., capacity 400,000 d.w.t.

GANGWAY/DECK WATCHMEN: Recommended and compulsory for tankers working cargo.

OPENING/CLOSING HATCHES: Stevedores open and close hatches with terms subject to charter party.

CUSTOMS ALLOWANCES: Each man allowed 200 cigarettes to take ashore but no spirits.

CARGO GEAR: See "Certificates" but no special requirements.

REPATRIATION: Possible.

AIRPORT: International Airport Osaka, 45 km. distant.

TIME: GMT plus 9 hours No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: See "Osaka".

TELEPHONES: Available except Nippon Steel Wharf and Public Wharf.

SHORE LEAVE: Local Immigration Officers issue shore leave pass valid for 3 days, but a 9 day pass is obtainable in case where a vessel stays in port for longer period.

DEVELOPMENTS: 29 berths under construction at Sakai-Senboku. Max. depth 12 m. 53 berths under construction at Hannan, depths from 4 m. – 12 m.

SHIPMASTER'S REPORT: February 1980. (L.P.G. Carrier).

Osaka Bay: Also see "Kobe" – "Shipmaster's Report".

Entry: No transit of Tomogashima Strait at night from Sunset to Sunrise. This is not a regulation but a Japanese Government request which for all intents and purposes is a requirement.

Pilotage: Bay Pilot is a recommendation for LPG carriers which again means a requirement. About 97% of overseas shipping and 60% of Japanese foreign going shipping use this service.

Lights: Flashing red over green to be permanently on day and night in Japanese waters if vessel over 200 m. length. Red is for dangerous cargo and flashes at 120 to 140 flashes per minute and green for vessels over 200 m. flashes at 180 to 200 flashes per minute.

Two black cylinders by day for over 200 m. length plus 1st substitute over 'B' for dangerous cargo.

Fire Wires/Mooring Line: To be rigged starboard side fore and aft, plus 1 mooring line at each end. In actual fact we kept the fire wires in during transit of Osaka Bay in case of slippage and getting caught in propeller. The Pilot approved.

Navigation: Sumoto – Oki Light Buoy: Lat. 34° 21.1′ N., Long. 135° 00′ E. must be left to port (North or South bound). This is not indicated on BA.3614 as a traffic separation buoy. The Pilot advised me that some foreign ships without Pilot leave this buoy on the wrong side, if JMSA catch any vessel doing this they are liable to prosecution. No navigation in visibility less than 1 mile and no berthing when wind speed exceeds 12 m./sec.

Pilot: Boards about 7 miles South of Tomogashima. Cable: 'Bay Pilot Kobe' 12 hours ETA, if any alteration cable 'Urgent Bay Pilot Kobe'.

Then by VHF through Kobe Port Radio – range 80 miles. Pilot nearly always starboard side. Boards from 3 fairly fast purpose built red hulled cutters based at Sumoto on Awaji Shima Island.

Pilot disembarks about 1 mile South of Tomogashima Strait.

Entry: For LPG carriers and certain other dangerous classification ships there is no night passage of Tomogashima Straits or Osaka Bay which means from about 1600 hrs. to 0600 hrs. there is no transit. Further complications are:

(1) At the berths themselves at Sakai and Kobe, LPG movements and berthing during darkness prohibited.

(2) If vessel has no Sanitary Certificate Free Pratique cannot be given which means anchoring at Osaka Quarantine anchorage for Pratique.

(3) The cost of an escort tug whilst vessel is at anchor is fairly costly about £100 per hour.

Therefore if Pratique is required (No Sanitary Certificate) and berthing that day is undertaken, arrival at Tomogashima pilot station can only be between 0600 to 0930 hrs. as the Quarantine service finishes for lunch time and if Pratique is not granted before lunch, entry is unlikely to take place that day.

If Sanitary Certificate is held, Pilot boarding at Tomogashima can be between 0600 to 1200 hrs.

Pratique: Free Pratique can only be given on proper notification by Radio 24 hours before arrival to Quarantine Service, prefixed by RPM through Agent. Current Sanitary Certificate must be held.

Pratique is granted whether or not Sanitary Certificate held but as above delay will be entailed. Granted at Osaka Anchorage between 0830 to 1200 hrs. and 1300 to 1700 hrs. Sanitary Certificate costs about £100 and is valid for 1 year. Application is made through Agent who arranges prior inspection by 'Rentokil' agency (£100) for any debugging and water testing and then followed by Government inspection which takes about 1.5 hours. Storerooms, fridges, galley, toilets, garbage bins, drinking water, etc., checked. This certificate entitles vessel to Free Pratique.

If the ship is not calling at Japan again within the 12 month period it is of little value, otherwise if likely to call, for an LPG ship with restricted entry the £200 could be well spent.

For Pratique, vessel anchors in Osaka Quarantine anchorage position Lat: 34° 37′ N., Long: 135° 21.5′ E. (approx.).

Escort Boat: A fire-fighting escort tug is required for Loaded LPG ships in port limits. An escort boat of smaller capabilities is required for LPG ships in Vapour taking on bunkers or Lub oil in port limits.

Approximate cost of firefighting tug is £100 per hour.

Therefore to anchor overnight to await berthing in loaded condition will require escort tug costing in region of £1,500. During cargo operations instant communication must be maintained with escort tug by VHF or Walkie Talkie.

Sakai:

Notice of Readiness: On anchoring at Quarantine anchorage or w Harbour Pilot boarding, whichever first.

Agent suggests tendering Tomogashima PIlot and seeing if rece accepts.

Pilot: Harbour Pilot boards at Quarantine anchorage or at No. 1 a Buoys Hamadera Passage channel as indicated on BA.3614.

Depth: Minimum depth in channel found to be 18 m.

V.H.F.: Kobe Port Radio, very powerful station – 80 miles range. Os Radio used for public correspondence.

Tugs: Two tugs join about half way down buoyed channel. U powerful Japanese type, tug's lines.

Berth: Mitsui Toatsu – Fertiliser berth: Position Lat: 34° 32.45′ Long: 135° 25.6′ E.

Port Side to.

Depth: 14.5 m.

Stern overhangs end of quay.

Gangway can be easily landed.

No stores on quay.

If wind speed exceeds 15 m./sec. no berthing and ins disconnection.

Vessel must be connected and have commenced pumping by sun

Solid concrete pile quay wall with ample fenders.

Lines: 3, 2, 2, each end. Line boat available, about 1.5 hours to tie

Connections: Rubber hoses for liquid and Vapour Return.

Propane line 12 in., Butane line 12 in. connection ASA 150.

Vapour 8 in. for both.

Shore labour with shore reducers.

Takes about 1.5 hours to connect.

Rate: Maximum able to accept: Propane: 800 m.t.p.h.
Butane: 1,300 m.t.p.h.

We were pumping at very close to this figure all the time with 3 pum on each grade – shore restriction.

Cargo General: Little back pressure.

We had no surveyor, all tonnages on shore figures.

Plant capacity: Propane: 1 tank of 20,000 metric tons.
Butane: 3 tanks 12,000 metric tons.
1 tank 24,000 metric tons.

Approximately 15 m. of hose is used from shore manifold.

Fire axe required for moorings each end.

Watchman: English speaking watchman with telephone on boa throughout 24 hours.

Departure/Arrival: Latest 1700 hrs.

Arrival: Hoses must be connected and discharge commenced bef sunset.

Facilities: No stores alongside.

Water available, about Yen 700 per tonne.

Doctor will board vessel at minimum charge of Yen 20,000.

STD telephone to U.K. very expensive.

Crew changes: Via Osaka International Airport – no difficulties.

Repairs – Diawa (Company accredited Japan repair company). Kobe H. Kajita (Konishi now in general office). 078–681–6001 Te 5622–849 Daiwindus.

Documents: 1st Port:

1 Health Declaration
1 Vaccination List.
1 Application for Shore Pass.
3 Crew Manifests (Crew Declaration) – Japanese Form.
7 Crew List – Ship.
1 Declaration (Ship Information) – Japanese Form.
3 Ship's Stores.

If any crew changes new personnel must be added onto original cr list (Manifest).

Seal Bond only, leave Beer Room open.

Usual procedure with shore passes – all handed in on departu bottom torn off if calling at 2nd port and re-application made.

For 2nd Port:

7 Crew Lists.
1 List Ship's Stores.
1 Application Shore Passes.

SAKAIDE: 34.19 N. 133.51 E. (See Pla

DOCUMENTS:

1 Voyage Memorandum (List of Ports of Call).
Ship's Register.
International Tonnage Certificate.
Last Port Clearance.
5 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, came wrist-watch, radio, firearms/swords, etc (only at first port of cal Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Car Manifest and Cargo Manifest in transit using specific forms. There ship's Agent should be provided with necessary information about de of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage is compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34′ 35″ N., Long. 135° 08′ 24″ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 55′ 38″ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 57′ N., Long. 131° 03′ E.

4. Tomogashima Pilot Station. Position Lat. 34° 10′ N., Long. 135° 00′ E.

ANCHORAGES: Port located on North coast at East part of Shikoku Island in Inland Sea.

Boundaries and Areas. Area bounded by line joined with three points, East corner of Sosha river mouth, Mamako-Hana of Semi Jima and Tako-Saki of Shotsuji-Yama.

Depth of water inside harbour limit: 9 m. Outside harbour limit: 13 m.

RESTRICTIONS: Vessels entering and/or leaving during daytime only at wharves; but no restrictions day and night at sea anchorage provided favourable weather conditions prevail.

MAX. SIZE:

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Normal working hours: 0830 hrs. – 1630 hrs. Overtime surcharges 1630 hrs. – 2130 hrs. 60% additional of basic stevedorage; 2130 hrs. – 0700 hrs. next morning 120% additional; 0700 hrs. – 0830 hrs. 60% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Cosmo Oil Co.Ltd. No. 2 Pier: Max. size 50,000 d.w.t. Max. LOA 230 m. Max. draft 11.0 m. 2×24 in. for crude (4,000 kl.p.h.); 1× 16 in. for fuel (1,000 kl.p.h.); 2×14 in. for chemical products (10,000 kl.p.h.).

Cosmo Oil Co.Ltd. Pier No. 1 (Sea Berth): Max. size 130,000 d.w.t., depth alongside 19.6 m.; 2×16 in. connections for crude. Max. unloading rate 10,000 kl.p.h.

DENSITY: Inside harbour limit 1025. Outside harbour limit 1025.

FRESH WATER: Sea anchorage. No water barge available but usually brought from Onomichi (about 4 hours run to Sakaide). Rate of delivery 80 to 200 t.p.h. dependent on barge.

Centre Pier: Can be supplied by shore line with capacity 25 t.p.h.

Mitsubishi Kasei Wharf: Can be supplied by shore line with capacity 60 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo, Ise Bay, Osaka and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

FIRE PRECAUTIONS: No specific precautions.

CONSULS: None. See "Kobe".

REPAIRS: Only minor repairs.

DRY DOCKS: Kawasaki Heavy Industries Ltd., Sakaide, which is suitable to dry dock. Dock No. 2 for 500,000 d.w.t. vessel. 450 m.×72 m.×12.3 m. Not yet in action for ship repairs. Only used at present for ship building and after services.

Floating dock with capacity 80,000 d.w.t. under construction.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register and International Tonnage Certificate to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

CARGO GEAR: See "Certificates", but no special requirements.

SURVEYORS:

1. Nippon Kaiji Kentei Kyokai is stationed at Sakaide.
2. Nippon Kaiji Kyokai (NK Class) and Lloyd's Register are stationed at Sakaide.

REPATRIATION: Possible.

AIRPORT: No airport. Nearest Takamatsu, All Nippon Airways 4 flights to Osaka and 3 to Tokyo and TOA domestic airlines to Tokyo/Fukuoka.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: National Holidays – see "Niihama". Local Holidays: New Year's Day (Lunar Calendar).

No ship's movement can be effected on January 1st, 2nd and 3rd, August 8th and October 15th.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119. Sakaide Maritime Safety Base, 6-2858.

TELEPHONES: No facilities for placing telephones on board.

BANKS: No American/European banks. But it is possible to collect foreign currency, especially U.S. Dollars, at The 114th Bank, Ltd., Takamatsu.

STORING: See "Prelims".

1. Available by both, however, for Asia Kyoseki by barge.
2. Available during cargo operations.
3. Available, however at Mitsubishi "A" or "B" berth – by barge for heavyweight goods.
4. No, however, at Centre Pier East/West they are available.
5. No special regulations.
6. Yes.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but extension for next 7 days possible if ship stays longer.

GENERAL: Mitsubishi Chemical Industries Co. Ltd., Sakaide Works. As wharf of above works located outer harbour limit of Sakaide port, the undermentioned procedures required: In conformity with regulations, vessel required to get special permission for entering into closed port, which will be given from Shikoku Maritime Bureau.

Customs request vessel calls Mitsubishi Chemicals Wharf to obtain special permission for entering. If tonnage dues paid prior arrival, this procedure will be attended to by Agent.

Waiting anchorage: Avoid Bisan Seto Boundary according to special water zone navigation order. Imperative to exclude water surfaces with established Fishery Privilege.

Vessels waiting to berth at centre pier are lightened at anchor.

7 flights daily between Nagasaki/Osaka (All Nippon Airways).

TIME: GMT plus 9 hours. No alterations to clocks throughout year.

POLICE/AMBULANCE/FIRE: Police Station: Sasebo 23-7161 (if emergency: 110). Ambulance Sasebo 23-5121 (Sasebo Fire Station). Fire Sasebo 119 (Sasebo Fire Station).

TELEPHONES: No facilities exist for placing telephones on board.

SERVICES: Hold cleaning. Compass adjusting. Fumigation.

IDENTIFICATION CARDS: See "General – Immigration".

WEATHER: Southwesterly winds prevail in Summer, while Northerly blows frequently in other seasons. Max. wind velocity recorded 26.1 m./sec. In early Spring dense fog prevails, but renders navigation impossible only for 7 days or so.

Tidal range 2.6 m. Current rate max. 1.5 knots in vicinity of harbour entrance at rising tide. At ebb tide, it flows in opposite direction and is faster than during flood, but not so strong as to hinder navigation.

GENERAL: *Customs:* When vessel arrives direct from foreign port, Customs Officials board for search. Following documents to be submitted. Crew List, Passenger List, Store List, Manifest of Crew Personal Effects (must be signed by individual crew member). Arms and Ammunition List, Narcotics List, List of Port of Call on current voyage, Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward (Form No. C2000). Following will be checked on board. Ship's Registry, Last Port Clearance.

When vessel comes from Japanese port, Customs Officals will not attend on board, except special case. Master or Agents to attend at Customs House for entry formalities with following documents. Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward, Ship's Registry, Last Port Clearance, documents entrusted with the Master by Customs at previous port.

On vessel's departure, clearance issued by Customs after confirming payment of tonnage dues.

Immigration: Immigration Officials board vessel on arrival to examine passports, discharge books and/or other equivalent travel documents and provide a 7 days landing pass for crew members and passengers. Two copies each of Crew List and Passenger List are required by them. Providing vessel's Agent with these documents beforehand will help in expediting Immigration business on arrival. When vessel in port more than 7 days, landing passes will be extended every 7 days on application.

In event that crew members, without entry visas, to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Services are rendered from 0900 hrs. to 1700 hrs.

AUTHORITY: Port & Harbour Bureau, Sasebo City, 3-5, Yorozu-cho, Sasebo City, Nagasaki Pref. *Tel:* (0956) 22-6128.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Nishi Kyushu Warehouse Co. Ltd., P.O.Box 48, Tategami-cho, Sasebo City, Nagasaki Pref. 857, Japan. Tel: (0956) 24-6161. Telex: 7482-27 Soko J. Fax: (0956) 24-6168. Cables: Soko Sasebo.

SENDAI: 38.13 N. 141.06 E. (See Plan)

DOCUMENTS:
- Ship's Register.
- International Tonnage Certificate (1969).
- Last Port Clearance.
- 3 Crew Lists, including Passport numbers and date of birth.
- 3 Passenger Lists.
- 1 Declaration of Crew's Personal Effects (Baggage List).
- 1 Stores List.
- 2 Lists of Port Calls (last 3 months).
- 1 Maritime Declaration of Health (if calling at first port in Japan).

Agents should be provided with necessary information to prepare Inward/Outward Declarations and Cargo Manifests.

PILOTAGE: Not compulsory, but Oil Terminal request vessels to take pilot. Pilot will be arranged through Agent, and approximately 1 hour before pilot arranged he can be contacted direct by VHF Channel 16 via tug. Pilot not available after dark. Pilot boards at Sendai Entrance Fairway Buoy (Position Lat. 38° 13′ 15″ N., Long. 141° 08′ 15″ E.).

ANCHORAGE: Depth 28 m. Bottom: Rock and sand. Anchorage not suitable in rough weather, and as no sheltered anchorage nearby, it is advisable for vessels to proceed offshore.

Anchorage positions:
(1) Quarantine Anchorage: 38° 13′ 03″ N., 141° 06′ 42″ E.
(2) Tanker Anchorage (Pilot Station) can also be used as Quarantine Anchorage. Quarter Circle Area covering 3 miles East and 3 miles South from position 38° 13′ 15″ N., 141° 08′ 15″ E.

RESTRICTIONS: Entry into and sailing from Sendai: Priority of entry and sailing from the port is given to ferries. Entry and sailing of other vessels is restricted to times outside ferry schedules. Entry of tankers controlled by Tohoku Oil Co.Ltd., under supervision of Harbour Master.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Radio Pratique available. Vessel to have valid Japanese Sanitary Inspection Certificate and valid Derat Exemption Certificate, in order to apply for Radio Pratique. Master should send Radio Pratique message (R.P.M.) by cable or telex to Quarantine Office through Agents, within 36 hours prior to vessel's arrival time (excluding Saturdays, Sundays and holidays). At first port in Japan, Master should obtain Free Pratique by radio or from attending Quarantine Officer at anchorage.

If vessel not applicable for Radio Pratique, Master should send crew's health condition to Quarantine Office at least one day (office day) prior to vessel's arrival, through Agents, by cable or by telex. Formalities will be carried out at the Quarantine Anchorage (38° 13′ 03″ N., 141° 06′ 42″ E.), or Tanker Anchorage (38° 13′ 15″ N., 141° 08′ 15″ E.).

RADIO: Recommended that Master communicates with Agents through Choshi Radio or Nagasaki Radio by cable. Sellcall through Singapore Radio or Hong Kong Radio. Telex through satellites, if vessel equipped with Inmarsat.

Tankers are to advise receivers of arrival draft, cargo to be loaded/discharged and quantity/tank and vessel's mooring equipment.

VHF: Tugs on Channel 16.

RADAR: Not available.

TUGS: 4 tugs available (3,200 h.p., 3,000 h.p., 2,600 h.p. and 2,400 h.p. each). Also 3 tugs available (3,200 h.p., 3,000 h.p. and 2,600 h.p. each) from Ishinomaki and Shiogama.

SHIBUSHI: 31.28 N. 131.07 E. (See Pl

PORT LIMITS: An arc of one mile radius from position Lat. 31° 28.2 Long. 131° 06.7′ E.

DOCUMENTS: When vessel arrives direct from a foreign port, Cus Officials will board to search, and the following documents are submitted:
- Ship's Register.
- International Tonnage Certificate.
- Voyage Memo (Ports of Call).
- 3 Crew Lists, including Passport numbers.
- 3 Passenger Lists.
- 1 Stores List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, ca wrist-watch, radio, firearms/swords, etc. (only at first port of Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory for berthing or unberthing. At present, pilotage is arranged by ship's Agent. Boarding only during daytime. Boarding position Lat. 31° 25′ N., Long. 131° 05.5′ E.

ANCHORAGE: No fixed locations, anchorage is safe in the bay.

RESTRICTIONS: Berthing and unberthing during daylight hours only.

MAX. SIZE: Max. permissible LOA 240 m., draft 11.5 m.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset, and Master to show all vaccination cards and Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent, prior to arrival, and close all soil pipes before entering port.

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

VHF: No VHF watch maintained.

TUGS: 3 tugs available at port for berthing and unberthing. 1×3,000 h.p., 1×3,200 h.p. and 1×2,600 h.p.

BERTHING:

Name of Berth	*Length* (m.)	*Depth* (m.)	*Capacity* (d.w.t.)	*Cranes*
Zen-Noh Silo Wharf	205	13.0	65,000	1×800 t.p.h., 2×400 t.p.h.
Shibushi Silo Dolphin	200	13.0	65,000	2×600 t.p.h.
Wadahama Chuo Wharf				
No. 1	240	12.0		
No. 2 and 3	165	9.0		
No. 4	315	7.5		
No. 6	180	5.5		

STEVEDORES:

(1) Working hours are 0830 hrs. to 1630 hrs.
(2) Overtime normally only for finishing cargo.
(3) No work on Sundays/holidays.
(4) Discharge Rate: Bagged Cargo – 300 tons per gang/day.
Bulk Cargo – 700 tons per gang/day.

MEDICAL: No advance notice required, unless urgent.

DENSITY: Average 1025 – 1027.

FRESH WATER: Available from hydrants on the jetty.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports, bunkers will be lightered from the nearest bunker stock ports, at maximum 7 days prior notice.

CONSULS: No local representatives. Marine Note of Protest can be attended by local notary public.

REPAIRS: No facilities available.

DRY DOCKS: None.

SURVEYORS: N.K.K.K. general surveyor's office stationed at port.

GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work, unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores, when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible but inconvenient.

AIRPORT: Nearest Kagoshima Airport, about 2 hours drive from Shibushi (JAL, JAS and ANA lines).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.
Public telephone booth available near by the berth.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days, when Shibushi is first port of call in Japan. Extension possible if ship stays longer.

BANKS: Kagoshima Bank Ltd. Daily working hours 0900 – 1500. Closed on Saturdays and Sundays.

STORING: Passenger jetty and general cargo berth have plenty of open space available alongside for storing by trucks. Forklifts available and can work on jetty.

SHIPMASTER'S REPORT: April 1990.

Port Limits: An arc of one mile radius from position Lat. 31° 28.2′ N., Long. 131° 06.7′ E.

Documents: As per other Japanese ports.

Pilotage: At present it is arranged by Kagoshima Port Authority and only during daytime. Boarding position Lat. 31° 24′ N., Long 131° 5.5′ E.

Anchorage: No fixed locations, anchorage is safe in the bay.

Restrictions: None. Berthing and unberthing during daylight hours only.

Max. Size: LOA 240 m., draft 11.5 m.

Health: Normal pratique procedure.

Radio: As for Kagoshima.

VHF: No VHF watch maintained.

Tugs: Two tugs available at port for berthing and unberthing.

Berthing: Four berths available for medium sized ships, of which 2 berths are for ships carrying bulk grain, which is discharged with shore cranes assisted by conveyor belts into silos built for the purpose. One berth – Wakahama Central No.1, without installed shore cranes is available for general cargo. The fourth berth is for local passenger vessels which call at the port daily.

Mobile cranes are available locally to assist discharge if required.

Stevedores:
(a) Working hours are 0830 hrs. to 1630 hrs.
(b) Overtime normally only for finishing cargo.
(c) No work on Sundays.
(d) Discharge rate: Bagged cargo – 300 tonnes per gang/day.
Bulk cargo – 700 tonnes per gang/day.

Density: 1025.

Fresh Water: Available through hydrants on the jetty.

Consuls: None.

Repairs: No facilities available.

Dry Docks: None.

Surveyors: None available.

Gangway/Deck Watchman: Not required.

Hatches: Opening/closing normally by crew.

Customs Allowances: As per other Japanese ports.

Cargo Gear: Optional.

Repatriation: Possible but inconvenient.

Airport: See "Kagoshima".

Time: GMT plus 9 hours.

Holidays: As in other Japanese ports.

Telephones: Not available on board.

Banks: Bank of Kagoshima, daily working hours 0900 to 1500, Saturday 0900 to 1200.

Storing: Passenger jetty and general cargo berth have plenty of open space available alongside for storing by trucks. Fork lifts available and can work on jetty.

Shore Leave: No restrictions.

Identification Cards: Shore passes issued by immigration.

General: Charts: Japanese charts: Kyusyu East Coast – Sibusi Wan No.185 and Sibusi – Ko No.5850.

SPECIALISED CARGO HANDLING FACILITIES:
Container Berth: Okitsu No. 2 Wharf No. 11 – No. 12, depth 12 m., length 440 m. (2 berths), 1 gantry crane (capacity 37.5 tons), 1 transtainer (capacity 30.5 tons).
Sodeshi No. 1 Wharf: Berth No. 6 – 8: Length 720 m., depth 12.0 m. 3 gantry cranes, capacity 37.5 tons ×1, 40.5 tons ×2. 8 transtainers, capacity 30.5 tons ×7, 40.5 tons ×1.

STEVEDORES: Normally latest time to order gangs 1000 hrs. previous day.

MEDICAL: No advance notice required unless urgent.

TANKERS: Tonen (8 berths): Max. permitted draft 20.0 m., max. size 250,000 d.w.t.

DENSITY: 1023 – 1024.

FRESH WATER: Most berths supply by shore installations, otherwise barge.

FUEL: All grades of oil delivered by barge only.

FIRE PRECAUTIONS: Harbour fire-fighting corps with a fire-figh boat.

CONSULS: None.

REPAIRS: Most repairs and overhauls possible.

DRY DOCKS: Kanazashi Shipyard, largest dry dock – 122 m. × 18.5 5,700 tons. Floating dock – 65 m. × 18 m. 1,000 tons.

Nippon Kokan Shipyard, floating dock – 135 m. × 27.8 m. 7,900 t

SURVEYORS: Japan Marine Surveyors & Sworn Measu Association, Shimizu Branch, 7-5, Irifune-cho, Shimizu, Jap Tel: 52-0177.

SHIMONOSEKI (including Mutsure): 33.57 N. 130.58 E. (See Plan)

(See "Kanmon-Ko")

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:
Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: *Nissin Tanker Pier – Mutsure:* Pilotage is not compulsory but all vessels should take a Pilot. The Pilots reportedly are experienced, qualified and well organised.

If the vessel is coming from Westwards, the Pilot will board at the anchorage position N.N.E. of Mutsure-Sima.

If the vessel is coming from Eastwards, the same Pilot who navigated the vessel through the Kanmon Passage will bring the vessel to the berth if the tidal conditions are favourable and the berth is not occupied. Otherwise, the vessel should anchor off the terminal in an authorised anchorage.

Pilots meet vessels arriving from Eastward near the entrance approaches of Kanmon Passage off the Hesaki Lighthouse. However, this is not applicable when the vessel is coming from Seto Naikai.

Pilots have available heavy launches or tugs which generally have black and white superstructure.

The Port of Kanmon Ko is divided into several Districts, the most important of which are Shimomoseki, Moji and Wakamatsu. The anchorage is quite congested and the traffic is heavy. Also, a lot of fishing boats, barges on tow, and other craft may be encountered, so extreme caution should be exercised.

Also see "Moji".
ANCHORAGES: Mutsure Anchorage: Undermentioned area is open port. The sea area surrounded by:
(a) Line connecting Daibahana on Takenoko Island and top of Wagora Island.
(b) Line connecting top of Wagora Island and Udonohama on Mutsure Island.
(c) Coastline between Udonohama and Unoishibana on Mutsure Island.
(d) Line connecting Unoishibana and Anse-no-Shiri in Shimonoseki.
(e) Line connecting Anse-no-Shiri and point at 370 m. from Daibahana on the line connecting Daibahana and top of Wagora Island.
(f) Line Long. 130° 54′ E.

Anchorage includes a part of Quarantine Anchorage and Mutsure Oil Berth; depth 10 m. – 25 m.
RESTRICTIONS: See "Moji".
MAX. SIZE:

Wharf	*Numbers*	*Length* (m.)	*Depth* (m.)	*Capacity* (g/t)
No. 1 Pier	9 – 10	330	9.0	10,000×2

Note: If both Nos. 12 and 13 piers are used, LOA up to 160 m.
If both Nos. 15 and 16 piers are used, LOA up to 160 m.
If both Nos. 20 and 21 wharves are used, LOA up to 230 m.
If both Nos. 24 and 25 piers are used, LOA up to 230 m.

Also see "Tankers".

HEALTH: See "Moji".
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.
VHF: Shimonoseki Port Radio Station on Channels 16, 12, 14, 20 and 22. Pilots on Channel 13.
TUGS: See "Moji".
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
Mitsui Kinzoku Dolphin Pier: Max. d.w.t. 60,000. Max. LOA 230 m. Max. draft 11.90 m. 1 shore crane. Bauxite, zinc concentrate and phosphate handled.
BRIDGES: Kanmon Suspension Bridge was built in 1973 across Hayatomo Channel (narrowest place in Kanmon Strait, width of fairway 530 m.) between Shimonoseki and Moji. The height of the bridge from sea level is 61 m. Vessels over 59 m. height must seek clearance from Pilot Office.
STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required, unless urgent.
TANKERS: Nissin Tanker Pier No. 1 located about 610 m. South of Mutsure Lighthouse. At this berth, West-going current stronger than East-going and ship taken to berth only on Westerly current, with stern towards South. Most suitable berthing time is 2 – 3 hours after commencement of West-going current. Max. dimension of vessel which can be accommodated at this berth is 95,000 d.w.t., LOA 245 m., draft 14 m. Product handled, fuel oil. Shoreline 3×12 in. Discharge rate 2,000 t.p.h. Berth Nos. 2 and 3 handle coastal tankers only.
DENSITY: 1025.
FRESH WATER: Good fresh water supplied either from water barge or from hydrants alongside wharves. Rate of delivery from water barge 50 t.p.h. and from hydrants 40-50 tons.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
CONSULS: Korean Consul, Tel. 0832-66-5341.
REPAIRS: All types of repairs possible.
DRY DOCKS: Mitsubishi Heavy Industries Ltd. 4 dockyards (Nos. 3 & 4 for smaller vessels).
Mitsubishi Heavy Industries Ltd.
Dimensions of Docks:

	Length (m.)	*Breadth* (m.)	*Draft* (m.)
No. 1 Dock	164.13	25.0	7.04
No. 2 Dock	150.10	20.0	6.88

Max. Size of Vessel for Docking:

	Length (m.)	*Breadth* (m.)	*Draft* (m.)
No. 1 Dock	160.00	22.50	5.50
No. 2 Dock	143.00	19.30	5.00

Towa Shipbuilding K.K. - 1 dockyard (Max. 1,000 g.t.).
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.
CARGO GEAR: See "Certificates", but no special requirements.
REPATRIATION: Possible.
AIRPORT: Nearest is Fukuoka Airport, about 2 hours by train and taxi. Kitakyushu Airport, about 40 minutes by taxi.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.
Public telephone booth available near by the berth.
TELEPHONE: Possible to place telephone on board.
SERVICES: All services available.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 15 days, when Shimonoseki is first port of call in Japan. Extension possible if ship stays longer.
AUTHORITY: Shimonoseki Port Authority, 1-1 Nabe-cho, Shimonoseki City, Japan 750. *Tel:* (0832) 31-1111. *FAX:* (0832) 23-1300. *Contact:* Takao Ito, General Manager.

Green Shipping Ltd., Moji, 9-7, Minato-machi, Moji Ward, Kitakyushu City, Fukuoka Pref. 801, Japan. Tel: 093-321-4261. Telex: 7153-11 Greenm J. Fax: 093-321-4288. Cables: Greenship Moji.

SHIMOTSU (including Kainan): 34.06 N. 135.08 E. (See Plan)

DOCUMENTS:
Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot request to be given to pilot station through Agent. Advance notice of ETA: 72 hours and 24 hours before arrival. No VHF available. Pilot usually attends by tug boat. No special pilot boat. Pilot boards at Quarantine Anchorage in vicinity of Lat. 34° 07′ 10.5″ N., Long. 135° 06′ 42″ E., or at another anchorage which will be designated by Harbour Master. No alternative area in event of bad weather. Location of anchorage for awaiting pilot – Lat. 34° 07′ 10.5″ N. Long. 135° 06′ 42″ E., as pilot station.

ANCHORAGES: Quarantine Anchorage, 20 m. depth.

RESTRICTIONS: Anytime for entry to anchorage, but daytime only for berthing and unberthing.

Yura Bay: Vessels no longer than 110 m. berth. Daytime entrance only regardless of tide and current.

MAX. SIZE:

	Max. d.w.t. tonnes	*Length* (m.)	*Draft* (m.)
Tonen O-1	260,000	349 m.	18.80 m.
Tonen E-1	70,000	234 m.	12.20 m.
Wakayama Sekiyu-Jetty 9 (Kainan)	78,000	250 m.	11.50 m.
Wakayama Sekiyu-Ohsaki Sea Berth	245,000	340	21.00 m.

Also see "Tankers".

HEALTH: Radio Pratique available.

Formalities will be carried out at the undermentioned positions which will be specified by Harbour Master.

1. Lat. 34° 09′ 00″ N., Long. 135° 06′ 29″ E.
2. Lat. 34° 08′ 33″ N., Long. 135° 06′ 49″ E.
3. Lat. 34° 08′ 05″ N., Long. 135° 07′ 09″ E.
4. Lat. 34° 08′ 25″ N., Long. 135° 05′ 47″ E.
5. Lat. 34° 08′ 09″ N., Long. 135° 05′ 47″ E.
6. Lat. 34° 07′ 54″ N., Long. 135° 06′ 54″ E.

RADIO: Recommended Masters communicate with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound, to contact Choshi, and Northbound, to contact Nagasaki Radio respectively.

TUGS: Tugs normally join at anchorage designated by Harbour Master, tug lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio or telex.

MEDICAL: No advance notice required unless urgent.

TANKERS: There are no slop facilities.

Berth	*Product*	*Shorelines*	*Discharge Rate* (t.p.h.)
Tonen O-1 Jetty	Crude Oil	2×12 in. 3×16 in.	4,500 12,000
Tonen E-1 Jetty	Crude Oil Fuel Oil	2×12 in. 1×10 in.	2,500 2,000
Wakayama Sekiyu Jetty 9 (Kainan)	Crude Oil	2×12 in.	5,000
Wakayama Sekiyu Ohsaki Sea Berth	Crude Oil	3×16 in.	12,000

Tonen O-1 Jetty: This berth consists of an unfendered central platform with access way and pipe trestle to the shore, having on each side 1 flexible and 2 rigid spring and main dolphins with catwalk connected to the central platform. There are 2 more rigid mooring dolphins for breasting lines located in a backward position relative to the breasting frontage and accessible by catwalk.

The spring lines are secured to either one of the rigid spring dolphins at each side of the central platform.

The original mooring buoys have been replaced with mooring dolphins standing off the central platform 251 m. and 241 m. thus extending the total mooring frontage to 492 m. All mooring and breasting dolphins are fitted with capstans and remotely operated quick release hooks.

Currents run parallel to the berthing face, maximum 2 knots each way.

The berth has been approved for accommodating tankers of about 260,000 d.w.t. Depth alongside the berth is about 20 m. below C.D.

Berthing Procedures and Mooring: The vessel is turned about 1 mile North of the berth and then backed down to the berth. The reason for this procedure is twofold. First, there is insufficient room at the berth for turning. Second, in the port of Shimotsu vessels are normally berthed heading out so that in case of an emergency they can depart with the least possible delay. Furthermore the passage South of Zi-no-Shima inland is very often obstructed with fishing nets.

The vessel is brought parallel to the berth, about 150 ft. – 300 ft. off, and then pushed alongside by the attending tugs. Mooring lines are only led when the vessel is very close in or resting against breasting dolphins. The normal sequence for handling ship's ropes is: spring lines, breasting lines, then bow and stern lines, and then the forward and aft breasting lines.

The mooring configuration for vessels less than 100,000 d.w.t. is: 3 bow lines, 3 stern lines, 2 forward breasting lines, 2 aft breasting lines, 2 forward back springs, 2 aft back springs. For vessels up to 200,000 d.w.t., an additional bow line and stern line is required. For vessels 200,000 d.w.t., an additional breast line fore and aft is necess 2 mooring launches are used. The berth is equipped with a so docking system.

When very strong Southerly winds are experienced, the vessel go port side to. This rarely happens.

DENSITY: Average density 1019.

FRESH WATER: Available at every berth except Fuji Kosan Sea Be by shore lines, rate about 25 tonnes per hour. Also available by ba

FUEL: Most grades of domestic and bonded oil are availab bunkering is carried out at anchorage, guard boat and oil fence wi required by harbour regulations.

CONSULS: None.

REPAIRS: Only minor deck and engine repairs.

DRY DOCKS:

Yura Dockyard: Mitsui Shipping & Engineering Co. Ltd. have constru a 350,000 d.w.t. new dockyard in Yura, 50 nautical miles South of K Lat. 33° 57′ 30″ N., Long. 135° 07′ 00″ E. Vessels calling at Yura are requested to note the following information:

Tonnage dues should be paid at Wakayama since Yura is closed

Dock Master boards at position 280° – 2,000 m. from Anj Lighthouse for entering Yura and Pilot is not required.

Vessel is requested to wait at Wakayama Anchorage if dry dock wet basin is not available.

Vessel is requested to call at Shimotsu for Free Pratique if necess

Immigration: Authorities come from Onahama.
Lightering: Possible.
Stores: Provisions and stores available.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Onahama Kairiku Unso Kaisha Ltd., 312-1 Takayama, Aza, Onahama, Iwaki City, Fukushima Pref., 971 Japan. Tel: (0246) 53-3221. Telex: 8922-80 Onakai J. Fax: (0246) 54-8224. Cables: Onakai Iwakionahama.

SUSAKI: 33.24 N. 133.18 E. (See Plan)

PORT LIMITS: *Arrival Position:* Within 800 m. radius of position Lat. 33° 19′ N., Long. 133° 18′ E.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
Quarantine Certificate.
Crew List.
Voyage Memo (last 3 months).
Stores List.
Narcotics List.
Declaration of Crew's Baggage.
The ship's Agents will prepare Inward/Outward Declaration and Cargo Manifest. Therefore ship's Agents should be provided with necessary information from the vessel, such as ship's nationality, port of registry, gross and nett tonnages, deadweight, owner's name, number of crew, nature and quantity of cargo.
PILOTAGE: The port does not have VHF, telegraphic or telephone communications, so ETA advice should be sent to the ship's Agent, who will contact the pilot station. The vessel will be advised of berthing and entry information by Agent by cable or telex.
Whilst awaiting pilot, vessel anchors in anchorage (see "Anchorage"). In the event of bad weather, there is no alternative anchorage, and pilot will not board. The Master should decide whether to proceed to sea or not.
ANCHORAGE: Lat. 33° 19′ N., Long. 133° 18′ E. Depth 40 m. – 50 m.
RESTRICTIONS: Vessels cannot enter Port Limits until Free Pratique has been granted (see "Health").
Berthing/unberthing throughout 24 hours.
MAX. SIZE: See "Berthing".
HEALTH: Free Pratique not available at Susaki. Nearest convenient quarantine port is Kochi (Lat. 33° 29′ N., Long. 133° 35.5′ E.), which is about 18 miles from Susaki.
RADIO: It is recommended that vessels use Choshi Radio or Nagasaki Radio, which cover all ports in Japan.
VHF: No port VHF station. In an emergency, vessel can contact J.M.S.A. on Channel 16.
TUGS: 1×2,200 h.p. and 1×2,500 h.p.
BERTHING:
Diabo 10,000 ton Wharf: Public wharf for cement in bulk and clinker. Max. LOA 165 m. Max. beam 28.0 m. Max. draft 8.9 m. Clear height less than 13.0 m. Loading by shore conveyor belt. Rate: 650 tonnes/hr. for cement in bulk and 1,000 tonnes/hr. for clinker.
Diabo "A" Pier: Private pier for discharging coal in bulk. Max. LOA 125 m. Max. beam 15.0 m. Max. draft 7.5 m. Discharging rate by shore equipment 350 tonnes/hr.
Diabo "K" Pier: Private pier for cement in bulk and clinker. Max. LOA 125 m. Max. beam 15.0 m. Max. draft 6.20 m. Loading by shore conveyor belt at 650 tonnes/hr.
15,000 ton Wharf: Public wharf for logs and lumber. Max. LOA 185 m. Max. beam 32.0 m. Max. draft 8.70 m. Ship's gear used for discharging, rate 850 cu.m./day with 3 gangs working 0800 hrs. – 1700 hrs.
5,000 ton Wharf: Public wharf for domestic vessels.
3,000 ton Wharf: Public wharf for domestic vessels.
Ninato Machi Wharf: Public wharf for domestic vessels.
Nittetsu Dolphin Pier: Private pier for limestone in bulk. Max. LOA 240 m. Max. beam 32.5 m. Max. draft 12.5 m. (even keel). Clear height less than 13.5 m. Limestone loading by shore conveyor belt and 2 loaders, rate 1,300 tonnes/hr.

BULK HANDLING FACILITIES: See "Berthing".
STEVEDORES: To be arranged by shipper/consignee against the shipping plan. Workable 24 hours for cement/limestone loading, including Sundays and holidays.

Discharging of logs, 0800 hrs. – 1700 hrs., except Sundays and holidays. No overtime possible.
MEDICAL: No advance notice required, except for Sundays and holidays and in an emergency.
DENSITY: 1018 – 1023, average throughout the year.
FRESH WATER: Available at berth. Rate 10 t.p.h. Cost Yen 550 – 600/ton.
FUEL: Supply prohibited under local port regulations, except in drums.
CONSULS: None.
REPAIRS: Only minor repairs.
DRY DOCKS: None.
REPATRIATION: Possible.
AIRPORT: Kochi Airport, about 70 km. 19 flights to Osaka, 2 flights to Nagoya and 5 flights to Tokyo daily.
TELEPHONES: Not available.
POLICE/AMBULANCE/FIRE: Contact Agent.
CUSTOMS ALLOWANCES: Only allowed to take 60 cigarettes ashore, but no spirits.
SERVICES: None.
SHORE LEAVE: Crew issued with shore passes valid for 15 days.
DELAYS: Sometimes there are delays in berthing and unberthing, due to fishing boats towing nets in the vicinity of harbour entrance, anchorage and channel.
GENERAL: Susaki is a complex port as the Fishing Union has strong powers, and demands that the following conditions are met:

1. Ships must use recognised anchorage.
2. Ships must berth within one day of anchoring.
3. Ships must not show too many lights at night.
4. Ships must not dispose of any waste into the sea (dust, scraps of food, any waste material or oily water) at anchorage or in inner harbour.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Irimajiri Kaiun Co.Ltd., 2-9 Minato Machi, Susaki City, Kochi Pref., Japan. Telex: 5886-712. Fax: 0889-43-2055. Cables: Irimajirikaiun Susaki.

TAGONOURA: 35.08 N. 138.42 E. (See Plan)

PORT LIMITS: Commences 5 cables from the harbour entrance. A vessel is considered an "arrived ship" at this point.
DOCUMENTS: Same as "Shimizu".
PILOTAGE: Ordered 24 hours in advance through Agents. If possible vessels should obtain Japanese Chart 1075 for the approaches and Japanese Harbour Plan No. (P) 98. Two fixed green leading lights visible 16 miles lead the ship through the entrance on a bearing of 323.5° True. Vessels should approach on this transit until 1 mile off the breakwater entrance which is marked by an Occ. G. 6 sec. 14.4 mile light on the West Breakwater and a Occ. R. 6 sec. 15 mile light on the East Breakwater. The Pilot will board from a tug (190° × 2 miles from West Breakwater Lighthouse). 2 tugs will attend for the entrance transit.
ANCHORAGES: Due to the steep nature of the coast no roadstead anchorages are available. In the event of having to wait for Pilot or weather to moderate it is necessary to steam outside the entrance or anchor and wait near Shimizu Quarantine Station.
RESTRICTIONS: The allowable draft should be verified with the Agents before arrival as this does vary, the average being 6.5 m. alongside the berth. The entrance channel has a minimum depth of 9 m. at high tide.
MAX. SIZE: LOA 600 ft., beam 100 ft. These extremes are likely to be increased as the port develops.
HEALTH: Radio Pratique is available if vessel holds a valid Japanese Sanitary Inspection Certificate; if not, then quarantine will be cleared at Shimizu.
RADIO: Chosi Radio. When nearing Shimizu a call can be made via Shimizu Radio VHF requesting them to telephone ETA to Tagonoura Pilot.
TUGS: 2 tugs normally required. These are ordered from Shimizu in advance by Tagonoura Agents. The same applies on departure.
BERTHING:

			Permissible

DOCUMENTS:

Harbour Master: Report of arrival and departure.

Shimotsu Customs Office (Tanabe Branch): 1 copy each of the following.

Ship's Register
Last Port Clearance
3 copies Crew List
3 copies Passenger List
1 copy Stores List
1 copy Declaration of Crew's Baggage (First port only)
1 copy Cargo Manifest (Discharge & through cargo)
1 copy Declaration Inward of vessel
1 copy Parcel List

Osaka Immigration Office (Shimotsu Branch):

1. Before ship's arrival: "Notice of Ship's Arrival" is to be submitted 24 hours before ship's arrival with Crew List (Name, Nationality, Date of Birth, Number of Passport or Seaman's Book, Rank).

2. On ship's arrival: "Report of Ship's Arrival" is to be submitted with Crew and Passenger Lists (if already submitted before ship's arrival, not required).

3. On Ship's Departure: "Report of Ship's Departure" to be submitted with Crew List if any changes.

Note: It is required that ship's Agent is able to guarantee the identification of crew.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Not compulsory, but if required Agent to be advised 72 hours prior arrival. No pilotage sunset to sunrise. Anchorage waiting for Pilot Lat. 33° 42′ N., Long. 135° 19′ E. Pilot station 2,200 m. 315° from Banshono-hana Lighthouse. Depth 38 m.

ANCHORAGES: (a) Lat. 33° 42′ 05″ N., Long. 135° 20′ 34″ E. (b) Lat. 33° 42′ 08″ N., Long. 135° 21′ 01″ E.

Depth 19 m. Bottom, sand and mud.

In Tanabe Port, there are many rocks, and therefore it is required to investigate the port passage sufficiently, according to the Chart of Tanabe Port which is issued by Maritime Agencies (Chart No. 74).

RESTRICTIONS: Max. draft 10.5 m.

When a vessel loaded with explosives or dangerous cargo is entering the port, she must obey the instructions issued by Port Master when outside the port.

There is no restriction for night arrival.

HEALTH: Vessels usually anchor in the port of Owase or Shimotsu, where the authorities board and grant Free Pratique.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

Tanabe Maritime Safety Office, call sign: JNH.

The contents of communications must be concerned with ship's arrival and departure, and maritime safety.

VHF: Call: "Tanabe Hoan".

Communication to be concerned with ship's arrival and departure arrangements and port safety affairs.

Telephone number of Maritime Agencies: 0739-22-2000.

TUGS: Tugs can be arranged from Wakayama Port.

BERTHING: Buoy A: Depth 10.7 m., max. draft 10.5 m. Capacity 30,000 g.r.t. (logs only).

STEVEDORES: Available through Kinan Port Transport Union.

MEDICAL: No advance notice required unless urgent. In an emergency contact Maritime Agencies.

TANKERS: Proceed to Shimotsu.

DENSITY: About 1030.

TIDE: Tidal range: Maximum plus 2.13 m. Minimum minus 0.21 m.

FRESH WATER: Available by water barge, capacity 30 tons. Daytime delivery only to buoy berths. 48 hours' notice required.

FUEL: Bonded oil will be brought from Shimotsu or Kobe, when required.

CONSULS: None.

REPAIRS: No facilities available.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

AIRPORT: Nanki Shirahama Airport about 25 km. distant. 2 Domestic flights daily to Tokyo.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

Voyage Memo (Ports of call).
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Compulsory. Harbour Pilots and Inland Sea Pilots are available at the pilot station or quarantine anchorage. Mutsure pilot station. Lat. 33° 59′ 30″ N., Long. 130° 53′ 00″ E.

Inland Sea Pilot Association covers all Inland Sea Ports. Pilotage compulsory for vessels over 10,000 g.r.t.

Pilots obtained from one of three pilot stations, dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours, and 72 hours' advance notice preferred, thereafter any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations.

1. Wadamisaki, at entrance to Kobe (Vessel transiting Kii Straits) Position Lat. 34° 34′ 09″ N., Long. 135° 11′ E. Cable address: "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (Vessel transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Cable address: "Anjin Moji".

In the event of bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGES: No. 5 Section, Wakamatsu. Depth: 9 m. – 11 m. Capacity 15,000 g.r.t. × 2. Quarantine Anchorages also used when necessary.

RESTRICTIONS:

(a) Vessels exceeding 20,000 tons gross may berth only within 1 hour before and/or after slack tide. Vessels under 20,000 tons gross may berth regardless of current, if it does not exceed 5 knots.

(b) Night entry: Vessels under 10,000 gross tons may berth at Nos. 1, 2, 3 and 8 wharves until 2200 hrs. in Summer season and 2100 hrs. in Winter season, subject to Harbour Master's permission and Pilot's agreement.

(c) Night departure: Vessels under 20,000 gross tons allowed to sail from Nos. 1, 2, 3, 8 wharves until 2200 hrs., regardless of current, provided they are moored with bow outward.

(d) Least depth in channel, 17.0 m.

MAX. SIZE: No. 4 Ore Pier: 160,000 d.w.t. or 250,000 d.w.t. with part load.

HEALTH: Formalities will be carried out at the anchorage. Quarantine station 105° – 2,800 m., (800 m. square) from Mutsure Lighthouse. Radio Pratique available.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF: Shimonoseki Port Radio Station on Channels 16, 12, 14, 20 and 22. Pilots on Channel 13.

TUGS: Two tugs join vessel at entrance of harbour (in front of harbour signal station). Vessels exceeding 20,000 tons gross require 3 tugs. One of them will join vessel at Mutsure leading into main harbour and 2 join vessel at entrance of port (in front of harbour signal station).

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

BRIDGES: Kanmon Suspension Bridge was built in 1973 across Hayatomo Channel (narrowest place in Kanmon Strait, width of fairway 530 m.) between Shimonoseki and Moji. The height of the bridge from sea level is 61 m. Vessels of 59 m. height must advise Pilot Office.

STEVEDORES: At least 24 hours prior notice excluding Sundays holidays required in order for Agent to arrange stevedores. Vessel m constantly keep her Agent advised of ETA. If stevedores ca commence loading/unloading at time notified by the Agent, the orde must pay for waiting time. If cargo gear not rigged on berth stevedores will do same for ship's crew. Overtime surcharges 170 1900 hrs. (50% additional of basic stevedorage), 2100 – 0500 hrs. morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required, unless urgent.

TANKERS: *Kita-Kyushu LNG. Co.:* Max. size 125,000 d.w.t. Max. L 286 m. Max. draft 12.0 m. 3×16 in. (LNG). Discharge rate 12,000 k 1×16 in. (boil off oil) discharge rate 12,000 kl./Hr.

DENSITY: Average density in the port is about 1019 – 1021 in Sum season, 1025 – 1026 in Winter season.

FRESH WATER: Available in connecting lines from shore side at W Nos. 1, 2, 3, 4, 8 and 9. At buoys: from barges, arranged b Wakamatsu. Rate of delivery: 55 – 70 t.p.h., ex-hydrant, 60 t.p.h., ba

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise B Osaka Bay and Kanmon Port. At all other ports, bunkers will be lighte from the nearest bunker stock ports, at maximum 7 days prior notic

FIRE PRECAUTIONS: No tanker berth. Each tugboat equipped with extinguishing system for attending emergencies on request.

CONSULS: See "Yawata".

REPAIRS: All types of repairs possible.

DRY DOCK: See "Shimonoseki".

GANGWAY/DECK WATCHMEN: Not specially required un passengers or valuable cargo aboard.

OPENING/CLOSING HATCHES: Stevedores carry out opening a closing hatches. If any time lost by ship's crew doing this w stevedores charge ship for waiting. Recommend request stevedores this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector sh registered gross and nett tonnages. Valid Cargo Gear Certifica sometimes required by stevedores when cargo gear maintenan appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ash but no spirits.

REPATRIATION: Possible.

AIRPORT: Nearest is Fukuoka Airport, about 2 hours by train and ta Kitakyushu Airport about 40 minutes by taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during yea

POLICE/AMBULANCE/FIRE: Police 110 (just dial). Ambulance and F 119 (just dial).

TELEPHONES: Possible to place telephone on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid only 15 days when Tobata is first port of call in Japan, extension possi if ship stays longer.

WIND/TIDE: South-easterly winds prevail in the warm seasons a North-westerly winds in the Winter season. The maximum velo recorded in the past being 18 m./sec. The tidal range is 2.145 m. T current at the channel leading to new port runs Southward at the flo and Northward at the ebb. The maximum speed of the current is ab 3 knots. There is no current in the dock.

AUTHORITY: Kitakyushu Port and Harbor Bureau, 2-7 Nishi-Kaig 1-chome, Moji-Ward, Kitakyushu City, Fukuoka Pref., 801 Jap *Tel:* (093) 321-5941, (093) 321-5941. *FAX:* (093) 321-5915.

DELAYS: None.

DEVELOPMENTS: None.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Mitsuwa Transport Co.Ltd., 101-4, Nishikou 2-chome, Kushiro City, Hokkaido 084, Japan. Tel: (0154) 31-3030. Telex: 9629-71 F Mtw J. Fax: (0154) 53-0030. Cables: Funemitsuwa Kus.

TOKUYAMA: 34.02 N. 131.48 E. (See Plan)

LOCATION: Port situated in Yamaguchi Prefecture on Western part of mainland, facing Seto Inland Sea. Surrounded by Oshima Peninsula on the East, by Otsu-Shima and Uma-Shima (islands) on the S.W. and by the land on the North forms a large bay with deep water suitable for shelter. Sen-Shima and Kurokami-Shima (islands) lying in harbour, divide it into Tokuyama Section and Tonda Section.

DOCUMENTS: When vessel arrives direct from a foreign port, Customs officials will board to search and the following documents are to be submitted.

Ship's Register and International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port in Japan).

Ship's agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's agents should be provided with necessary information about details of cargoes in advance.

Immigration. Immigration Officials attend from Tokuyama. They board vessel on arrival to examine passports, Discharge Books and/or other equivalent travel documents, and provide 7 day landing passes for crew members and passengers. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting Immigration business on vessel's arrival. When vessel stays in port more than 7 days, the landing passes will be extended every 7 days on application. In event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days. Also see "Shipmaster's Report".

PILOTAGE:

Inland Sea Pilot (Sekisaki/Tokuyama): Not compulsory. Agent gives 24 hours' notice to Pilot Association Moji, and advise if ETA changed. (Master to cable "Anjin Moji" in case ETA changed and believes that his advice, if relayed by Agent, will not reach in good time; for example, at night before date of arrival at Sekisaki). Location: 3 miles South of Sekisaki Lighthouse (Lat. 34° 00′ N., Long. 131° 54′ E.). Pilot boards on vessel's arrival at pilot station day and night. No alternative area in event of bad weather. No VHF.

Harbour Pilot (Tokuyama Harbour or Tokuyama-wan): Not compulsory. Pilot boards in Tokuyama-wan at Quarantine Anchorage, or other anchorage to pilot to berth. Master who has not taken Pilot at Sekisaki should enter harbour without Pilot (no pilot station at entrance). Master to inquire position for anchoring from Agent prior arrival. Agent will advise Master in consideration of vessel's size, draft or number of other vessels, especially supertankers in port.

ANCHORAGES: Quarantine Anchorage, 34° 01′ N., 131° 46′ E., depth water 36 ft. Deeper water of more than 60 ft. about 2 miles S.W. of Quarantine Anchorage where Quarantine board supertankers. If harbour congested by vessels, especially supertankers, anchor Outer Harbour. In this case Quarantine go to Outer Harbour if advised by Master or Agent. In emergency or unable contact Agent, vessel can talk with Harbour Master by VHF, Channel 16, calling "Tokuyama Hoan". No restriction for entry into and/or departure from the anchorages after nightfall.

RESTRICTIONS: Strictly no entry or departure after sunset.

MAX. SIZE: Largest recorded vessel to enter 275,000 d.w.t., 19.5 m. draft.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA* (m.)	*Max. Safe Draft* (m.)
Idemitsu Sea Berth	275,000	340	19.50
Idemitsu Ohura No. 3	50,000	250	12.00
Idemitsu Ohura No. 5	150,000	300	12.00
Idemitsu Ohura No. 7 (L.P.G. Terminal)	56,188	250	13.00
Idemitsu Center	50,000	220	11.10
Nippon Seiro Jetty	40,000	200	10.00

HEALTH: Radio Agent for Free Pratique not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.
Derat Certificate (copy).
Declaration Inward.
Voyage Memo (Ports of Call).

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Join inside harbour. For supertankers outer harbour if requested. Tugs' lines used. 8 tugs available, up to 4,000 h.p.

BERTHING: Also see "Tankers". No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Wharf	*Length* (m.)	*Depth* (m.)	*Capacity* (g/t)	*Cargo*
Tokuyama Soda Salt Pier	117	12.0	45,000×1	Salt/Cement Clinker

Nippon Seiro Jetty	Raw Oil	12″×1	700	8″×1 Flexible
	Fuel Oil	10″×1	500	8″×1 Flexible

Idemitsu Sea Berth: Located in Tokuyama Bay at the position of Lat. 33° 59.5′ N., Long. 131° 46.1′ E., consisting of 7 mooring 'buoys. 275,000 d.w.t. tanker can be accommodated at this berth, being moored to buoys fore and aft. 4 powerful tug boats and 2 line boats are engaged in berthing/unberthing. Depth of water 20 m. Also see "Report" below.

Nippon Seiro Refinery: The mooring berth consists of 1 oil pier and 2 mooring buoys, to which vessel is moored fore and aft, port side alongside pier, there are also dolphins fore and aft.

Nippon Zeon Wharf (25 ft.) for LPG only.

Operator's Report: 1983.

Idemitsu Kosan Tokuyama Sea Berth (Discharging terminal):

Multiple buoy mooring system berth with 1 or 2 anchors.

Berth operates 24 hours per day, 7 days a week. Ships moored and unmoored at daytime, weather or other circumstances permitting. Berth will not be closed due to any holidays.

Location: Lat. 33° 59′ 12″ N., Long. 131° 46′ 00″ E.

Pilotage: Not compulsory.

Approaches: In order to make use of slack water berthing operations should be commenced 2 hours before slack water.

Berth is to be approached on a course of 075° after passing N.W. of Iwa Island, anchorage position visible from ship's bridge just after passing Sukumo Island abeam to starboard.

After letting go anchor (port), turn anti-clockwise with tug's assistance and let out 3 shackles and approach berthing position and take in slack anchor chain.

In Winter (from November-March) monsoons prevail, let go starboard anchor when heading about 320° and port anchor is out to 5 shackles then let out both chains, and move astern into berth.

1st line out should be taken to either No. 1 or No. 2 mooring buoy, whichever is the nearest.

Berthing:

(a) Vessel must not proceed to starboard of yellow buoy, because North of transit line No. 2 and 3 buoys area becomes shallow with depths 17 m. – 19 m.

(b) If port anchor let out too fast or too much, ship cannot return to manifold position, as anchor position designed for 8 – 9 shackles on port anchor when ship made fast.

(c) When Berthing Master comes on board, please advise him of number of shackles on each anchor and length from bow to manifold.

(d) Wire mooring lines are better than hawsers especially in case of No. 1, 2, 3, 4, 5, 7 buoys where wire should be used (each using 2 wires) as these wires are used to adjust the manifold position.

(e) Mooring arrangement:
Port anchor 8 – 9 shackles
Starboard anchor 2 – 3 shackles
No. 1 – 7 buoys 2 lines to each

DENSITY: 1025.

FRESH WATER: Water barges available, 1 each of 450 tons, 350 tons and 160 tons. Hydrants at Harumi Public Pier and Idemitsu Central Pier. The rate of delivery: 50 t.p.h. from barge, 20 t.p.h. from hydrant. (Public hydrant 30 t.p.h.).

FUEL: Major oil companies are represented and all grades of marine oil can be delivered, usually by barge. Notice of 7 days required.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: Kasado Dockyard in Kudamatsu-wan, entrance 3 miles East of Tokuyama-wan entrance. Largest dry dock for 90,000 tonners and two other dry docks/building docks.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

AIRPORT: Hiroshima (about 40 minutes by Shinkansen), Ube (about 40 minutes by Shinkansen and taxi).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police, tel. 110; Ambulance and Fire, tel. 119.

TELEPHONES: No facilities for placing on board.

SERVICES: From Moji, Kobe or Osaka.

SHORE LEAVE: See "Documents - Immigration".

AUTHORITY: Shunan Port Administration Office, 111, Chikko-cho, Tokuyama City, Yamaguchi Pref. *Tel:* (0834) 21-1787.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Moji, c/o Tokuyama Kairiku Unso K.K., No. 2-18, Chikko-cho, Tokuyama City, Yamaguchi Pref. Japan. Tel: (0834) 31-3610. Telex: 6765-10 Kairiku J. Fax: (0834) 21-7433. Cables: "Kairiku Tokuyama".

TOKYO: 35.43 N. 139.46 E. (See Plan)

DOCUMENTS:

4 copies Inward/Outward Declaration – (Form C.2000 prepared by Agent).

1 copy Berth Application (normally prepared by Agent).

3 Cargo Manifest (Form C.2030 prepared by Agent).

1 List Ship's Stores (Form C.2040).

2 Parcel List.

5 Passenger Manifest (Form C.2070).

5 Crew Manifest (Form C.2060).

1 Statement by Master (Form C.2020).

1 Declaration for Payment Tonnage Dues (prepared by Agent).

1 Maritime Declaration of Health.

1 Application for Shore Passes (prepared by Agent).

2 Baggage Lists (Form 5370).

PILOTAGE: 12 hours advance notice of ETA required. Pilot boats named Musashi, Tsukuba and Atago. No light or sound signals, use ship's radio in case necessity arises. Address: Tokyo Pilot Association, 26-82 Kaigan, Minato-ku, Tokyo 108 (at the Southern tip of the Shibaura Terminal). Tel: 03-3453-1691.

Pilot boards vessel outside harbour. Vessel awaits Pilot around "Quarantine Anchorage".

Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka advising ship's details and arriving time at No. 1 Uraga Channel Light Buoy. It is compulsory for vessels of 10,000 g.r.t. or more passing through the Uraga Channel, the entrance to Tokyo Bay, to have a pilot on board. Uraga Channel Pilot embarks 5 miles S.S.E. of Kannonsaki Lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hours before vessels arrival at No. 1 Uraga Channel Light Buoy.

Vessels of 10,000 gross tons or more should give "Notification of Traffic" to ensure safety of their navigation in or near Uraga Suido and Nakanose traffic routes (normally by Agent).

ADVANCE APPLICATIONS: Passenger ships and large vessels using mooring facilities must submit applications for use of facilities to port managers (the Port and Harbour Bureau of Tokyo Metropolitan Government) through shipping firms or Agents 3 days before entry into port so that they may have berths designated.

When they want to use anchorage facilities, they must submit applications for use of anchorage areas to Tokyo-Yokohama Port Director (the Port and Harbour Section of the Tokyo Maritime Safety Agency) to have anchorage sites designated. Small vessels of less than 300 gross tons do not need to submit anchorage application.

When ships of over 500 gross tons want to enter port at night (from sunset to sunrise), must submit applications in advance to Port Director and receive permission. Copy of written permission given to captain of ship when ship has entered port.

A ship carrying explosives or any other dangerous cargo must submit copies of application in advance for permission to use port to Port irector. Such ships required to stay outside port in No. 3 Area. However, ey will be allowed to enter port when Port Director considers it llowable.

ANCHORAGES: See "Advance Applications".

Quarantine Anchorage on starboard hand of No. 1 Fairway.

Sector "A" is a triangular sea area formed by line passing through oint 180° and 400 m. from Light Buoy No. 16 and point 105° and 240 m. om same light buoy. Accommodates one 1,000 ton class ship or 2 ships f 500 ton class or smaller.

Sector "C" (263,330 sq.m.) is a space between Harumi Wharf and oyosu Wharf. Accommodates five 2,000 ton class vessels.

Sector "D" (141,350 sq.m.) sea area enclosed by line drawn from oint 217° and 400 m. from Northwestern tip of Tsukishima Fishery Base hrough No. 8 Mooring Buoy. No. 15 Buoy and Southern tip of sukishima Fishery Base. Accommodates 5 vessels smaller than ,000 tons, but 2 if vessels larger than 700 tons.

ESTRICTIONS: Tokyo West Passage (No. 1 Passage) is long and arrow (4,200 m. × 300 m.) and carries considerable traffic. Vessels nder 500 tons not permitted use Fairway when vessel over 5,000 tons in transit. Depth 12 m.

Container vessels to/from Ohi, Aomi and Shinagawa Container Vharves may enter and depart at any time. Entry at night-time is subject o and must conform to the standard for night entry permission as set rth by the Tokyo Maritime Safety Office.

For other vessels, in principle, entry/departure time is restricted from unset to sunrise. Entering vessels shall start from outside the port not ater than 30 minutes before sunset (the time the vessel takes to moor r berth before sunset).

The 3rd Regional Maritime Safety Headquarters requests vessels to ake the following safety measures:

(1) Taking pilots on board: Foreign flag vessels and non-experienced Japanese vessels should take pilots.
(2) Restriction on overtaking: Vessels of 10,000 gross tons or more and other particular vessels in the traffic route should not overtake a vessel of 500 gross tons or more.
(3) Restriction on speed: Vessels should not navigate at a high speed within the Bay.
(4) Restriction on entry into traffic route in poor visibility.
(5) Restriction on use of auto-pilot.
(6) Maintenance of communication with the Tokyo Wan Traffic Advisory Service Center: VHF Call: Tokyo Martis, VHF Channel 16 or 156.8 MHz. Working frequency: VHF Channel 14 or 156.7 MHz. and Channel 22 or 161.7 MHz.

MAX. SIZE: Draft: Passenger ships: 9.54 m. for Harumi. General cargo hip: 8.63 m. for Harumi and 9.09 m. for Shinagawa and Aomi, and 1.81 m. for Ohi.

Tankers for Tokyo Gas Wharf (Toyosu), max. deadweight 5,000 tons, bulkers for Toyosu 36,000 tons.

Timber carriers for Timber Wharf (Land-lot No.15), max. size is limited y length overall 170 m. and draft 11.0 m. with high water.

Tide: These drafts are applied for low water. The difference between igh and low water level is about 2.0 m.

The tidal height will be considered to decide maximum draft to be ccepted, subject to Agreement with Marine Safety Office.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not ore than 36 hours before arrival, advising full details of vessel and ealth condition on board. When Free Pratique is granted by radio vessel ill be required to submit the following documents to Quarantine Officer n arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected nfected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious isease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption ertificate.

Medical inspection of plants: When a report is received in advance rom a ship by telegraph or other means of communication, Tokyo Office f the Yokohama Plant Disease Prevention Station must be notified by elephone or verbally in request for an on-the-spot inspection of plant in uestion.

Medical inspection of animals: When a report is received from a ship n advance by telegraph or other means of communication, the Tokyo ranch or the Haneda Branch of Animal Disease Prevention Station ust be notified by telephone or verbally in request for an on-the-spot nspection of the animals.

RADIO: Vessels entering into Tokyo Bay are watched at all times at origasaki, the entrance gate to Tokyo Bay, and record of passing the oint is taken. As each ship passes point, this is immediately ommunicated by VHF radio telephone to head office of Tokyo Signal ommunications Company. From here news communicated on normal elephone or on exclusive direct call telephone to interested parties (also ee "VHF").

Vessels over 200 m. in length or 25,000 gross tons or more carrying iquified gas and 10,000 gross tons or more are requested to send ollowing notifications directly to the Chief of Tokyo Wan Traffic Advisory ervice Center.

(1) Notification of traffic routes.
(2) Report of position.
(3) Notification of change.
(4) Maintenance of communications with the Center. Notification should be given to the Chief of the Center by noon of the day before the estimated date of entering a traffic route of Tokyo Bay.

Notification should be made by one of the following methods:

(a) Radio communication: Call sign and call name "JGC Yokohama Hoan", calling frequency 500 kHz., 2,182 kHz, Channel 16 and working frequency 444 kHz., 2,150 kHz., and Channel 12.
(b) Telegram: Notification can be sent by a telegram directly to the Center. The address is "TWTASC".
(c) Telephone: The Center accepts calls directly Tel: 0468-43-8622/4.
(d) Telex: Telex should be sent to the Center in the form of radio communcations. Telex: 3852-463 TWTASC.
(e) Method of Notification of change: Notification of change should be made by VHF radio telephone, calling frequency Channel 16, working frequency Channel 12, and in the case of telephone, Tel: 0468-43-8622/4.

Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

VHF:

A. Transmitting antenna:	Located 39° 26′ N. 139° 39′ E.
B. Type:	Single communication – Yagi type.
	Plural communication – Corner reflector type.
C. Direction:	Southern part of entrance to Tokyo Bay and Port of Tokyo.
D. Frequency class:	F3E.
E. Frequency:	Simplex communication –
	156.55 MHz, Channel 11
	156.6 MHz, Channel 12
	156.65 MHz, Channel 13
	156.7 MHz, Channel 14
	156.8 MHz, Channel 16
	(for calling, answering and safety)
	Duplex communications –
	161.5 MHz, Channel 18
	161.6 MHz, Channel 20
	161.7 MHz, Channel 22
F. Antenna power:	50 W.
G. Call sign:	Tokyo Port Radio.
H. Range:	Approx. 100 km. (straight range)
	S.E. side – About 20 nautical miles South of Nojimazaki.
	S.W. side – About 5 nautical miles North of Oshima Island.
	North side – Tokyo Port and Chiba Port.
I. Operating time:	All hours.

Ship Telephone: Uses VHF and is a service between navigating or anchored ships and subscriber telephones on land, and between ships connected via base station on land. Communicating sphere approximately 50 km. to 100 km. from base station. Base stations located so as to allow communication with any ship sailing along Japanese coasts.

TUGS: Tokyo Tug Center, Shibaura Uwaya, 26-101, Kaigan 3-chome, Minato-ku, Tokyo. Tel: (3) 3451-1761. Upon notification, tugs will be waiting in neighbourhood of the scheduled berth.

Tugs available: 4×2,600 h.p., 4×3,000 h.p., 4×3,200 h.p., 1×3,500 h.p. 8 tugs are equipped with fire fighting facilities. Tug's lines used.

BERTHING: Any vessel entering port required to:

(1) Submit 1 each of "Declarations Inward/Outward of Vessels" to TMG and TMSA. See "Documents".
(2) Submit "Application for Berth" to TMG. See "Documents".
(3) Submit "Application for Designation of Anchoring Site" to TMSA (Form No. 13) regarding anchoring area.

Berthing will be in order of arrival, passenger and special cargo vessels excepted.

Name of Berth	*Length* (m.)	*Depth* (m.)	*Max. d.w.t.*	*No. of Berths*
Shinagawa (Foreign)	586	10.0	15,000	3
Shinagawa (Domestic)	520	3.0-8.0	6,000	3
Shinagawa Container Terminal	574	10.0	15,000	3
Shibaura	740	7.4	5,000	5
Shibaura	90	5.5		1
Hinode	564	6.7	3,000	6
Takeshiba	465	7.5	5,000	3
Tsukishima	266	7.5	5,000	2
Harumi	1,444	9 – 10.0	20,000	11
Toyosu	800	7 – 10.0	15,000	4
Ariake Terminal	1,500	7.5	5,000	11
Oh-i Marine Products Wharf	450	12.0	30,000	2
Oh-i Foodstuff Terminal	229	12.0	30,000	1
No. 15 Lumber Wharf	720	10.0–12.0	25,000	3
Oh-i Container Terminal	2,300	12.0–13.0	40,000	8
Odaiba Terminal	1,800	10.0	15,000	9
Aomi Container Terminal (Berth C-1)	300	12.0	35,000	1

There are many private and domestic wharves and other smaller public wharves in use and under construction.

CARGO HANDLING FACILITIES:

Wharf/Terminal	*Equipment*	*Capacity tons*	*Cargo Handled*	*Remarks*
Oh-i Terminal	18 container gantries	30.5-40.6	Containers	Straddle carriers and transtainers available.
Shinagawa Container Terminal	1 container gantry 2 container gantries	37.5 49.0	Containers	Ro-Ro facilities, Straddle carriers available.
Shinagawa (Foreign Trade)	2 unloaders 1 belt conveyor	250 t.p.h. 600 t.p.h.	Machinery, sugar, fruit.	3 transit sheds (18,118 sq.m.) Open storage 14,451 sq.m.
Shibaura (Foreign Trade)			Paper, cement, fertiliser, feed grain	2 transit sheds (4,665 sq.m.) Open storage 2,104 sq.m.
Hinode Terminal			Salt, paper, soda ash.	9 transit sheds (19,583 sq.m.) Open storage 6,806 sq.m.
Tsukishima Terminal			Marine products	
Harumi Terminal	4 portal jib cranes	5	Sugar, wheat, fruit, marine products.	Passenger ship terminal at Berth "HL"
Toyosu Energy Terminal			Gas, steel, coal, general cargo.	
Ariake Terminal			Gravel, sand, lumber, construction materials.	Open storage 92,163 sq.m.
Odaiba Terminal	2 gantry cranes at Berth 2	10	General cargo, steel, timber, fruit.	9 warehouses (64,766 sq.m.)
Terminal 15			Timber.	Storage capacity 400,000 tons. Open storage yard 257,004 sq.m.
Aomi Container Terminal	2 gantry cranes	30.5	Containers	2 straddle carriers

---

BRIDGES: Tokyo Harbour Bridge, connecting Shibaura Wharf and Ariake Terminal, is under construction, and will be completed 31st March 1993. Maximum clearance to waterline is 52.4 m.

STEVEDORES: Advance advices should be made 24 hours at latest before vessel's arrival order arrange necessary gangs.

Discharge rates (approx.):

(a) Iron, steel and scrap, using crane or magnet, about 1,000 tons/day.

(b) Coal, crane and bucket, 1,500/2,000 tons/day.

(c) Ores, grabs and bulldozers, 1,000 tons/day.

(d) Timber, 1,000 tons/day.

(e) Grain, crane with bucket or suction, 1,000 tons/day.

MEDICAL: Hospitals, clinics and all specified facilities. Advance notice not necessary.

TANKERS: No slop discharge facilities (see "Services"). One tanker berth only. Products handled, Naphtha and crude oil. Shorelines, one 12 in. for each product. Discharge rates 1,000 t.p.h. (Naphtha) 900 – 1,000 t.p.h. (Crude).

FRESH WATER: Water supply from hydrant by Tokyo Metropolis, and waterboat by private management.

(a) Water supply on wharves

Application	Bureau of Port and Harbour Offices in charge of each wharf.
Work of water supply	Tokyo Port Service Association.

(b) Water supply by water boat

Extra charge	Overtime from 0600 to 0800	50%
	from 1700 to 2200	50%
	from 2200 to 0600	100%
	Special district	50%
	Festival day	50%

In the case of less than 20 tons per time, it will be considered 20 tons supply.

(c) Price (basic rate)	Yen 650 per ton ex-wharf. Yen 900 per ton ex-water barge.

FUEL: All grades available. 24 hours' notice required.

FIRE PRECAUTIONS: (Tankers).

1. Must enter port at dead slow speed preceded by patrol boat of TMSA, 1 tug boat each side of vessel and followed by fire patrol boat.
2. Engine to be kept ready for immediate use in case of emergency.
3. Tow lines to be placed over bow and stern with eyes close to water surface.

Note: No vessels allowed alongside a tanker during loading or discharging of inflammable liquids.

DEPARTURE PROCEDURE: Ship over 300 tons departing must hoist signal in daytime and 2 white lamps at night and make 2 prolonged blasts of whistles or siren 30 minutes before starts to move and then act according to signals given by signal station on Shibaura Quay. Departure notice must be submitted to Maritime Safety Agency and port managers (operations Section of Port and Harbour Bureau). Foreign ships must submit required documents in addition to above notice to Tokyo Custom House, Immigration Control Office.

CONSULS: Most countries have embassies and consuls in Tokyo.

REPAIRS: *Ship Repairer:* Ishikawajima-Harima-Juko Co. Ltd. Tel: 03-3244-5111. Telex: J22232 (Ichico), has 2 dry docks for vessels of 16,750 g.r.t. and 7,000 g.r.t.

DRY DOCKS: Largest dry dock: length 180 m.; width 24 m.; depth 7.27 m. Capable of accommodating vessel of 16,750 gross tons.

Also 1 other dry dock for ocean-going vessels of 7,000 tons.

SURVEYORS:

American Bureau of Shipping, Kiyoken Building, 12-6 Takashima-cho, 2-chome, Nishi-ku, Yokohama 220. Tel: 045-441-1000.

Lloyd's Register of Shipping, No. 32 Mori Bldg., 4-30 Shibakoen 3, Minato-ku, Tokyo 105. Tel: 03-3438-0481.

Nippon Kaiji Kyokai, 28-2, Hamamatsu-cho, 1-chome, Minato-ku, Tokyo 105. Tel: 03-3434-2341.

GANGWAY/DECK WATCHMEN: Necessary only in the case of valuable cargo.

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCES: (Tobacco) 200 cigarettes a week. (Wine and/or spirits) 760 cc's per crew member per week.

AIRPORT: Distance to new Tokyo International Airport (Narita Airport), approx. 60 km.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: National Holidays: New Year's Day (Jan. 1st); Adult Day (Jan. 15th); Foundation Day (Feb. 11th); Vernal Equinox Day (around March 21st); Green Day (April 29th); Constitution Commemoration Day (May 3rd); Children's Day (May 5th); Respect-for-Age Day (Sept. 15th); Autumnal Equinox Day (around Sept. 23rd); Physical Education Day (Oct. 10th); Culture Day (Nov. 3rd); Labour Thanksgiving Day (Nov. 23rd) and Emperor's Birthday (December 23rd).

No cargo work on 1st or 3rd Sundays of each month, and no work from 31st December to 3rd January inclusive. Cargo work can be arranged on all other days including National Holidays.

POLICE/AMBULANCE/FIRE: Tokyo Water Police, 5-8-36, Konan, Minato-ku, Tokyo. Tel. (433) 2411. Call Fire Stations for ambulances. Tokyo Water Fire Station, 5-1-23, Kachidoki, Chuo-ku, Tokyo. Tel. (534) 0119.

TELEPHONES: (also see "VHF").

Installed on ships moored at piers or jetties to allow telephone communications between ships and subscriber telephones on land and between ships.

Report:

Idemitsu Hokkaido Sea Berth (Discharging Terminal):

Location: Lat. 42° 36′ 10″ N., Long. 141° 38′ 50″ E.

Operator: Idemitsu Kosan Co. Ltd.

Terminal operates 24 hours per day, 7 days a week. Ships moored and unmoored daytime weather or other circumstances permitting. Terminal will not be closed on any holidays.

Approaches: Clear and unimpeded from South. White and red striped high chimney (approx. position: Lat. 42° 38.1′ N., Long. 141° 35.6′ E.) makes a most conspicuous landfall. In poor visibility, in heavy fog or rain, radar reflector fitted at centre of Sea Berth can be located first by ship's radar and after that Sea Berth will be seen in direction from N.W. to S.E.

Westward of Sea Berth, there are many cargo vessels anchored.

Ships berthing starboard side alongside at the Sea Berth, proceed on course 314°, observing transit of chimney and East Breakwater Lighthouse.

Anchorage: No strict boundary areas for anchorage but Master recommended to anchor 1 mile to 2 miles S.E. from Sea Berth.

Holding ground is good and depth about 27 m. – 30 m.

Pilotage: Sea Berth requires Pilot for berthing, no strict location of anchorage for ships awaiting Pilot in Tomakomai area, but should be as close as possible to port in accordance with harbour draft and communications.

2 Pilots will board ships over 30,000 g.r.t. Pilot uses tug boat for boarding.

Important Features: Ships arriving in Winter season (November-March) should pay special attention to the cold, as average temperature in that season ranges from −3°C to 5°C.

MEDICAL: Hospitals, doctors, oculist, ear, nose and throat clinic and dentists available.

DENSITY: 1025.

FUEL: Domestic oil is available. Bonded oil will be brought from Idemitsu Refinery at Tomakomai, otherwise to be brought from Muroran or Hakodate port with sufficient advance notice, when required.

FRESH WATER: Clean drinking water available at public berths.

REPAIRS: Minor repairs possible.

AIRPORT: Sapporo International Airport is situated 25 km. from the port. International direct flights are available to Hong Kong, Seoul, Honolulu and Guam. Domestic flights, every 30 minutes to Tokyo and other places are available every day.

SHIP SUPPLY SERVICE: Ship chandler, stores supplier, laundry services, diver's inspector, cargo and hull surveyor are arrangeable.

GENERAL: *Signal Control:* Harbour Master controls ship's traffic by flashing white and red lights.

DEVELOPMENTS: The following wharves are projected for 1995 to 2000.

Wharf Name	*Depth* (m.)	*Length* (m.)	*No.*	*Cargo*	*Completion*
Foreign Container Berth	14.0	330	1	Containers	1995
Domestic Container Berth	9.0	320	2	Containers	1995
Common Container Berth	12.0	250	1	Containers	2000
Harumi Wharf No. 2	12.0	240	1	Logs/Lumber/Coal	1995
Harumi Wharf No. 3	10.0	170	1	Ro/Ro, G.C.	1995
Central South Wharf No. 2	12.0	240	1	Grain, G.C.	1995
Oji Paper Wharf	12.0	240	1	Woodchips, Coal	2000
Sanyo Kokusaku Wharf	12.0	280	1	Woodchips	2000
Toyota Automobile Wharf	10.0	200	1	Ro/Ro, Cars, Car Parts	1995
Idemitsu Kosan Oil Jetty	7.5		5	Petroleum Products	2000

TONDA: 34.02 N. 131.44 E. (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register and International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore, ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Harbour pilotage inward and outward not compulsory, but recommend vessel takes pilot at pilot station (Lat. 33° 54′ N., Long. 131° 56′ E.). Inland Sea Pilot carries out harbour pilotage.

Inland sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio, giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations, depending upon vessel's last port of departure, and at Master's discretion. Pilotage available throughout 24 hours, and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as harbour pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations.

1. Wadamisaki, at entrance to Kobe (vessel transiting Kii Straits). Position Lat. 34° 34′ 09″ N., Long. 135° 11′ E. Cable address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessel transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Cable address "Anjin Moji".

In event of bad weather, recommended vessel proceed for shelter, as near as possible, having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Berthing Pilot Station at Tokuyama Quarantine Anchorage (Lat. 33° 13′ N., Long. 131° 40′ E.).

RESTRICTIONS: Vessels enter port and depart during daytime only. Depth of water in the passage 9.00 m.

MAX. SIZE: See "Berthing".

HEALTH: At first port call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel from 0830 hrs. to 1630 hrs. at anchorage of Tokuyama. Due to no quarantine office at Tonda, Master to show all Vaccination Cards and Derat Exemption Certificates. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival, and close all soil pipes before entering port. Radio Pratique available.

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

VHF: No VHF service.

TUGS: 4 tugs are stationed at Tokuyama. 2×3,200 h.p., 1×2,600 h.p. and 1×2,300 h.p.

BERTHING:

Name of Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)	*LOA* (m.)	*Capacity* (d.w.t.)
Toyo Soda Cement Wharf No. 1	120	9.0	8.50	160	10,000
Toyo Soda G.C.Wharf No. 1	170	9.0		170	15,000
Toyo Soda G.C.Wharf No. 2	65	7.5		100	5,000
* Toyo Soda Salt Wharf	190	10.5	9.0	180	

* Max. draft at Salt Wharf: Subject to tide allowance but require under-keel clearance of about 1.0 m. and/or 10% of ship's draft, whichever greater.

Also See "Shipmaster's Report".

Loading Facility: One shore gantry crane (lifting capacity 15 tons) Outreach: 22 m. from front leg of the crane. Height: 17 m. from the quay Span: 28 m. forward and aft. Airdraft: 20.10 m. at MLW.

Loading Rate: Approximately 1,500 – 2,000 tons through night by 2 gangs (gantry and ship's gear).

BRIDGES: None.

STEVEDORES: At least 24 hours prior notice, excluding Sundays and holidays, required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing stevedores will do same for ship's crew at additional cost.

TANKERS: No tanker berths.

MEDICAL: No advance notice required, unless urgent.

DENSITY: Average 1025.

FRESH WATER: Good fresh water supplied from hydrants. Delivery rate 50 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports, bunkers will be lightered from the nearest bunker stock ports, at maximum 7 days prior notice.
CONSULS: No consuls. Marine Note of Protest possible at local Notary Public.
REPAIRS: Only minor repairs possible. Others from Moji, Tokuyama or Kobe.
DRY DOCKS: Shin Kasado Dockyard in Kudamatsu-Wan, entrance 3 miles East of Tokuyama-Wan entrance. Largest dry dock for 90,000 d.w.t. and two other dry docks/building docks.
GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work, unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores, when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.
CARGO GEAR: See "Certificates", but no special requirements.
REPATRIATION: Possible.
AIRPORT: Hiroshima Airport, about 40 minutes by Shinkansen. Ube about 40 minutes by Shinkansen and taxi.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.
EMERGENCY CO-ORDINATION CENTRE: M.S.A. Tokuyama Office in Tokuyama City. Tel: 0834-31-0110.
TELEPHONE: Not possible to place telephones on board.
SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days, when Hikari is first port of call in Japan. Extension possible if ship stays longer.
SERVICES: All services available from Moji and Tokuyama.

SHIPMASTER'S REPORT: June 1983.
Toyo Soda Salt Pier:
Documents/Immigration: Landing passes are now valid for 1 week, but restricted to the immediate port area (Tokuyama) only. This restriction is enforced, and the Agent must make individually written application for any crew member required or desiring to leave the Tokuyama area. There are severe penalties (Yen 100,000 for being found ashore by the Authorities without a landing pass).
Pilotage: The Inland Sea Pilot who boarded at Sekisaki also acted as harbour pilot, boarding from a fast launch with the vessel making about 4 knots. Oita Port Radio, in the first Western bay of the inland sea, after passing through the Hayasui Seto Entrance, called on VHF Channel 16 to confirm the vessel's nationality and ETA.

For a vessel of our size (see "Berthing"), pilotage is at daylight H.W. only, using 3 tugs, and the Eastern dredged channel into Tonda port. Departure is during daylight hours only (pilot available apparently 0630 hrs. – 1830 hrs. during June, although ours was not ordered by the Charterer's Agents until 0800 hrs.). Vessel was swung off the berth by 2 tugs and proceeded to sea, again by the Eastern Channel, there being a substantial 'corner' to negotiate in the dredged channel on the Tokuyama Section of the port.
Health: We could not get Radio Pratique as the Authorities required the number of the vessel's Sanitary Certificate. However, after berthing, we were unable to ascertain just what this certificate was. The number of our Derat Exemption and type and make of the sewage system did not satisfy this question either.
Berthing: We were probably one of the larger vessels to berth at the Toyo Soda Salt Pier, discharging 31,536 metric tons of coal on dimensions – length 177 m., beam 27.8 m., draft 10.5 m. and of 20,096 gross tons.

With large engines-aft bulk carriers, there are problems with landing the gangway on the end of the jetty. A shore gangway cannot be used because of the travel of the portainer-type discharging crane. Stevedores use a vertical steel ladder clipped over the sheer strake for access.

Access ashore through the Toyo Soda Cement Factory is prohibited to ship's crew, and a launch service (Sampan) must be engaged, with the requisite timetable, for transport to Tokuyama, 15 minutes distant, the launch berthing at Customs Pier.

This launch is also used for the Agent, watchmen, etc., and it may well be preferable to lower the off-side gangway to near the water as a means of access. The only permitted access, to and from the launch via the vessel's gangway onto the wharf, is by a badly bent vertical steel ladder at the end of the jetty.
Fresh Water: Not available from Toyo Soda Salt Pier. Delivery can only be made by lighter.
Storing: Mobile cranes are not allowed onto the wharf to work ship's stores. E/R spares, etc., and if these cannot be coped with by the vessel's own gear or stores crane, floating plant would have to be hired.

AUTORITY: Shunan Port Administration Office, 111, Chikko-cho, Tokuyama City, Yamaguchi Pref., Japan. *Tel:* 0834-21-1787.
AGENT: Sub-agents of Aall Barwil Agencies K.K.
Green Shipping Ltd., Moji, c/o Toyo Koun Co.Ltd., 19-25, 1-chome, Shin Nanyo City, Yamaguchi Pref., 743 Japan. Tel: 0834-63-0080. Telex: 6766-14 Tykoun J. Fax: 0834-63-0079. Cables: Toko Shinnanyo.

TOYAMA: 36.46 N. 137.13 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
6 Crew Lists, including Passport Numbers.
6 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
PILOTAGE: Not compulsory. No telegraphic address for pilot station, but Pilot arranged through Agent whom keep advised ETA which may be sent through Choshi Radio. Pilot boards about 1 mile off East Breakwater from small tug. In event bad weather recommend remain outside port until weather clears. Pilot available daytime only from sunrise to sunset.
ANCHORAGES: The harbour at the Jintsu river mouth is always calm. Covers about 125 acres, with depths of from 16.5 ft. to 33 ft. over mud and sand. Room at anchorage for at least 4 vessels over 5,000 gross tons. Anchoring position for ocean tankers is Lat. 36° 46.6′ N., Long. 137° 14.4′ E.
MAX. SIZE: Max. LOA 175 m., but may be extended by 2.0 m. – 3.0 m. if Pilot agrees.
Also see "Tankers".
HEALTH: Radio Pratique available. Formalities carried out at Quarantine Anchorage.
RADIO: (Also see "Pilotage"): Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: Usually join vessel at port entrance but can join outside harbour for large vessels. Used only when Pilot aboard.
"Narita Maru" – 3,000 h.p. uses own lines free of charge.
"Nihonkai Maru" – 1,800 h.p. uses own lines free of charge.
"Raicho" – 2,600 h.p. uses own lines free of charge.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

TOYAMA SHINKO: 36.47 N. 137.10 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 2 Cargo Manifests and 1 Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
ANCHORAGES: No anchorage at Toyama-Shinko, therefore, if vessel required to await for berth or some other reason, use Fushiki Outer Anchorage ground where safe at all seasons with depth from 8 m. to 11 m. Sand and clay bottom. Room at anchorage for at least 6 vessels over 5,000 gross tons.
PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 209° 2 miles off leading light of Fushiki Port, thence takes vessel to Fushiki Quarantine Anchorage ground, due to many fishing-nets on both sides of fairway. No Quarantine Anchorage ground established presently at Toyama-Shinko, therefore, every vessel obtains free pratique at Fushiki. If requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fishing-nets. When approaching position for Pilot, give exact ETA to Agent by using Niigata Radio and/or VHF to Fushiki Harbour Master. Small wooden pilot-boat painted yellow. No particular light or sound signals required. Even if the vessel already obtained Free Pratique in other port, need to approach the aforesaid position for Pilot, because of no Pilot position located in Toyama-Shinko.
RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour in Fushiki.
MAX. SIZE: Length 200 m., draft 34 ft. Tidal range is max. 0.45 m.
HEALTH: Formalities will be carried out at Fushiki quarantine anchorage.
RADIO: (also see "Pilotage"). Recommend Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Hokuden	285	13.0	12.0	60,000

TUGS: Tugs normally join vessel at port entrance, but sometimes in Fushiki Outer Harbour for larger vessels. Maritia-Maru (2,060 h.p.) and Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and Raicho-Maru (760 h.p.) uses ship's line. In case public tug, i.e. Nihonkai-Maru and Raicho-Maru used, always require Pilot on board.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Average density between 1015 and 1019 in all seasons.
FRESH WATER: Available, from wharves No. 1, 2, 3, 4, 5 and 6 average 10 t.p.h.
FUEL: Domestic oil is available. Bonded oil will be brought from Kanmon area, with 1 week advance notice, when required.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.
REPATRIATION: Possible.
AIRPORT: Toyama Airport about 25 km. distance. Two regular services a day. ANA only.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: 1st May and New Year's Day, most probably from 31st December to 3rd January.
POLICE/AMBULANCE/FIRE: Police, Shinminato Police Station, Shinminato (07668) 2-3141; Ambulance, Shinminato Fire Station, Shinminato (07668) 2-3175; Fire, Shinminato Fire Station, Shinminato (07668) 2-3175.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Hold cleaning available.
SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days' extension possible if ship stays longer. Attending from Fushiki Immigration Office, Fushiki, due to no office in Toyama-Shinko.
AUTHORITY: Toyama Prefecture, 1-7 Shinsogawa, Toyama City, Toyama Pref., Japan. *Tel:* (0764) 31-4111.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Fushiki Kairiku Unso Co. Ltd., 4-2, Nagonoe, Shinminato City, Toyama Pref. 934, Japan. Tel: (0766) 82-1118. Telex: 5155-571 Kairiku J. Fax: (0766) 84-3335. Cables: Kairiku Fushiki.

TOYOHASHI: 34.43 N. 137.20 E. (See Plan)

LOCATION: The Port of Toyohashi is located in Mikawa Wan near Nagoya. It was opened in May 1972 as the 102nd international trading port in Japan.

Since then, the port has been rapidly growing in exporting, as it has been steadily improved in its facilities and access roads.

The Port of Toyohashi can be largely classified into three areas: One is Jinno Public Area, another Osaki Industrial Area, the other Tahara Industrial Area.
PILOTAGE: Compulsory for vessels exceeding 10,000 g.r.t. in Ise Wan, including Mikawa Wan. Pilot boards near Ise Buoy No. 1 (Lat. 34° 40.8′ N., Long. 137° 03.8′ E.).

Harbour pilots are also available at the anchorage.

(1) Application for Irago-Mikawa Wan Pilot: Please inform undermentioned items through your Agents.
  (A) Time for application:
    Inward vessels – 24 hours and 6 hours prior to ETA.
    Outward vessels – 12 hours and 6 hours prior to ETD.
  (B) Item:
    (a) Name of vessel.
    (b) Gross tonnage.
    (c) Deepest draft.
    (d) Length overall.
    (e) ETA or ETD.
    (f) Last port of call and destination.
    (g) Berthing schedule.
    (h) Kind of cargo (dangerous cargo).
    (i) Others (quarantine, any malfunction of engine, radar, compass, VHF, etc.).
(2) Office hours of Irago-Mikawa Wan Pilots: Service provided 24 hours a day (including Sundays, holidays and night-time).
(3) Channel, Bay and Harbour through Pilotage: Irago Suido-Mikawa Wan-Toyohashi.

(4) Communications:

(a) Telex: 4563668 Iragop (directly or via Choshi Radio, or via Nagasaki Radio).
(i) The message is sent by Master directly to the Pilot Office.
(ii) The message is passed from the Radio Station to the Pilot Office in a few minutes.

(b) Cable address: Iragopilot Handa.
The message is passed from the Radio Station to the Pilot Office in about 30 minutes.

(c) VHF: Irago Pilot (Channels 16 and 13).
Masters of vessels who are required to take pilot are requested to contact "Iragopilot" by VHF, 4 hours and also 1.5 hours prior to arrival at Pilot Station.

(d) On Sundays, holidays and during the night-time:
Masters are requested to advise the Pilot Office directly of ETA or any amendment thereof by Telex or Cable, to avoid any delay in case of absence of the person-in-charge at the Agent's Office.

(5) Irago-Mikawa Wan Pilots are generally stationed at Handa (Kinuura) Office. It takes about 3 hours to board vessels, and therefore, if ETA or ETD is amended, please advise the Pilot Office of it as soon as possible by all means.

ANCHORAGE: See "Health".

RESTRICTIONS: Vessels may enter in daylight only. Unberthing is possible after sunset for pure car carriers, subject to pilot's approval.
Draft limitation in channel is 9.8 m. at H.W.

MAX. SIZE:

* Grain unloader available.

Remark: Entry or sailing may be restricted during strong seasonal winds in Winter.

FRESH WATER: Available.

FUEL: Bonded fuel available from Yokkaichi or Nagoya.

REPAIRS: Minor repair services available from Yokkaichi or Nagoya.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.
Masters are able to call "Nagoya Hoan" by VHF Channel 16 if an emergency matter has occurred.
Note: "Nagoya Hoan" means Nagoya Maritime Safety Agency.

GENERAL: Provisions can be obtained.

AGENT: Sub-agents of Aall Barwil Agencies K.K., Tokyo.
Sogo Port Service K.K., 5-1, Akemi-cho, Toyohashi City, Aichi Pref. 441, Japan. Tel: (0532) 23-0281. Telex: 4322-107 Sogopt J. Fax: (0532) 23-3124. Cables: Sogoport Toyohashi.

TSU: 34.40 N. 136.33 E. **(See Plan)**

DOCUMENTS: (1) When a vessel calls directly from abroad, it must firstly call at Yokkaichi Quarantine Anchorage for Pratique (Quarantine Anchorage: 34° 56.15′ N., 136° 40.40′ E.).
Quarantine Officers board to issue Pratique, and/or Agent boards to undertake Quarantine Pratique and Customs arrival/sailing formalities. Thereafter, the vessel is able to proceed to Tsu with Yokkaichi Customs Clearance.
(2) When a vessel calls from a Japanese port, it can proceed to Tsu direct.

Documents for Yokkaichi Quarantine: (See (1) above).
Health Declaration – 1 copy (Japanese form).
Vaccination List – 1 copy.
Crew List – 1 copy.
Ports of Call List – 1 copy.
Ship's Register – 1 original.

Documents for Yokkaichi Customs: (See (1) above).
Inward/Outward Declaration – 1 copy/2 copies (Agent prepares).
Last Port Clearance – 1 original.
Ports of Call List – 1 copy.
Cargo Manifest – 1 each for discharge and through cargo.
Crew List – 1 copy.
Crew's Baggage List – 1 copy.
Pratique Certificate – 1 original.
Application for Exemption Tonnage Dues Payment – 3 copies (Agent prepares).
Ship's Register – 1 original.
Yokkaichi Customs issue Yokkaichi Sailing Clearance.
For above formalities, Agent must attend vessel on arrival/sailing by a taxi boat.

Documents for Tsu Customs formalities: (Stationed at Tsu).
Formalities for documents are same as Yokkaichi Customs, and payment of tonnage dues is required.

Documents for Immigration formalities: (Stationed in Yokkaichi, not at Tsu).

(1) Yokkaichi Immigration Officers attend onboard at Tsu to issue shore passes, and following documents are required:
Inward/Outward Declaration – (Agent prepares).
Crew List – 2 copies.
Ports of Call List – 1 copy.
Application for Crew Landing Permit – (Agent prepares).
Passports or Seamen's Books for all crew members.

(2) Agent must attend Yokkaichi Immigration for arrival formalities, and documents required are as follows:
Inward/Outward Declaration – (Agent prepares).
Crew List – 2 copies.
Ports of Call List – 1 copy.
Shore Pass Envelope – 1 envelope.
Extension of Movement Area – 2 copies (Agent prepares).

PILOTAGE: Compulsory. Berthing Pilot available from Yokkaichi or Nagoya (see "Nagoya").

ANCHORAGE: No designated anchorage. Vessels usually anchor 1.5 miles S.W. of Igurazu Lighthouse, in depth of 20.0 m. with sand/mud bottom.

HEALTH: No quarantine station at Tsu. If Tsu first port in Japan, vessel has to call at Yokkaichi, then proceed to Tsu after Free Pratique granted (see "Documents").
Yokkaichi Quarantine Anchorage: Lat. 34° 56.16′ N., Long. 136° 40.40′ E.

RADIO: No local radio station.

VHF: Nagoya Port Radio (24 hours), Channels 16, 12 and 20. Range 110 km. of Kamishima Island.

TUGS: Available from Yokkaichi and Nagoya, at special charge. Line handling available from Yokkaichi.

BERTHING: Two public berths for handling cargo, mainly gravel.
1. Length 90 m. Depth 5.5 m. 2. Length 60 m. Depth 4.5 m.

STEVEDORES: Available from Yokkaichi, distance 45 km. (1.5 hours by car).

FRESH WATER: Available at shipyards. Also available by barge from Yokkaichi, at special charge.

FUEL: Only available to new building at shipyards.

CONSULS: None locally, see "Nagoya".

REPAIRS/DRY DOCKS: *Tsu Dockyard – NKK Tsu Works:*
Docks:

Name	*Length* (m.)	*Width* (m.)	*Depth* (m.)	*Max. Docking Draft* (m.)	*Use*	*Facilities*
Building Dock	500	75	11.8	6.2	New building	2×200 ton Goliath cranes.

No. 3A Wharf	375	Outfitting	15 ton crane	8.5
No. 3B Wharf	243	Outfitting and Repairs	120 ton crane	5.5

Dock Master: Joins vessel in front of NKK Drydock Gate.
Time of Docking/Undocking: All times arranged with Dock Master.
Tug Assistance and Line Handling: Arranged by NKK, Tsu Works.
Accommodation: NKK, Tsu Works, has available:

A. Chitose Club	for Superintendents, Surveyors, Masters and Chief Engineers, at their expense. 25 minutes by car to NKK.
B. Kumozu Club	for other officers and engineers, at their expense. 10 minutes by car to NKK.
C. Family House	Total of 6 houses are available for Superintendents, Surveyors, Masters and Chief Engineers, who wish to stay with familites. These are located near Chitose Club.

SURVEYORS: Available from Nagoya.
REPATRIATION: Possible. Formalities completed at Yokkaichi during office hours.
AIRPORT: Nearest airport at Nagoya, 2.5 hours by train and car.
TIME: GMT plus 9 hours.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.
EMERGENCY CO-ORDINATION CENTRE: In case of emergency (fire, pirates, robbery, etc.), contact the 4th Regional Maritime Safety Headquarters by the following means:

1. VHF Channel 16: "Nagoya Hoan".
2. Cable: Code J.N.T.
3. Telex No.: 4934961 JMSANA.
4. Distress Call: 2182 kHz.
5. Telephone: 052-661-1611 (0900 hrs. – 1700 hrs. Monday/Friday, 0900 hrs. – 1200 hrs. Saturday).
   052-661-1616 (outside office hours).

GENERAL: *Immigration:* Located at Yokkaichi. Tel: 0593-52-5695.
Customs: Tsu: Tel. 0592-34-4161. Yokkaichi: Tel. 0593-52-3829.
Railway Station: Hisai Station of Kintetsu Railway is 20 minutes by taxi from port.
Floating Cranes: 120 ton crane available from Nagoya and 150 ton crane available from Yokkaichi.
Services: Most services available from Nagoya and Yokkaichi.
AUTHORITY: Tsu Port Administration. *Tel:* 0598-51-3482.

AGENT: Aall Barwil Agencies K.K., Nagoya Branch, Kaiun Building 4th Floor, 2-46, Irifune 2-chome, Minato-ku, Nagoya City, Aichi Pref., Japan 455. Tel: (052) 652-2266. Telex: 446-3751 Aallng J. Fax: (052) 652-2269. Cables: Aallbarwil Nagoya.

TSUKUMI: 33.05 N. 131.54 E. (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs officials will board to search and the following documents are to be submitted.

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory, but recommended unless Master well acquainted with locality. Pilot embarks vessel at anchorage, position Lat. 33° 05′ 30″ N., Long. 131° 54′ 00″ E. Request for Pilot made through Agent; Master to report ETA 24 hours prior arrival.
ANCHORAGES: Good holding anchorage available; depth of water about 25 m. Loading and/or unloading of cargo usually effected alongside wharves and in event of loading/unloading at anchorage, when rough weather prevails, difficulty sometimes experienced on account of swell from open sea. Therefore suggested that vessel anchor as close to shore as possible consistent with safety.
RESTRICTIONS: Berthing and unberthing at Onoda Cement Berths A, B and D:

Over 40,000 d.w.t. daytime only.
Over 15,000 d.w.t. until 2200 hrs.
Under 15,000 d.w.t. all day.

Other berths: Berthing and unberthing at any time, weather permitting and subject to Pilot's agreement.
MAX. SIZE: See "Berthing".
HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. No Quarantine office located here so vessels usually anchor in the Bay of Saganoseki, Saiki, Oita or Mutsure Quarantine Anchorage at Kitakyushu for authorities to board and grant Free Pratique.
RADIO: Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: 1 × 1,800 h.p. and 2 × 3,000 h.p. Tugs usually used for berthing and unberthing.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Berth		*Length* (m.)	*Depth* (m.)	*Max. Draft* (m.)	*Capacity* (d.w.t.)
Takada Pier No. 1	South	175	10.0	10.0	20,000

	No. 1	82	7.0	6.5	6,000
	No. 2	121	8.0	8.0	8,000

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700 – 1900 hrs. (50% additional of basic stevedorage), 2100 – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).
MEDICAL: No advance notice required unless urgent.
DENSITY: Average density about 1024.
FRESH WATER: Available from shore.
FUEL: All grades of bonded bunkers are stocked in and brought from Moji, Oita or Matsuyama, when required at anchorage. Maximum 7 days prior notice.
FIRE PRECAUTIONS: By Marine Security Guards.
CONSULS: No local representatives. Marine Note of Protest can be attended by local notary public.
REPAIRS: Local workshop available only for minor repairs.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.
REPATRIATION: Possible.
AIRPORT: Oita Airport; 1 hour from Tsukumi by train. Regular airlines are ANA and JAS, for domestic service.
TIME: GMT plus 9 hours. No alterations to clocks during year.
HOLIDAYS: 14th – 16th August.
POLICE/AMBULANCE/FIRE: Police, 110; Ambulance/Fire, 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: No special services available, but if required will be arranged by Agent who calls from another port.
SHORE LEAVE: Local Immigration Offices issue shore passes, valid for only 15 days, when Tsukumi is first port of call in Japan. Extension possible if ship stays longer.
AUTHORITY: Usuki Doboku (Public Works) Office, 72-1, Aza Susaki, Oaza Usuki, Usuki City, Ohita Pref. *Tel:* 0972-63-4136.

AGENT: Sub-agents of Aall Barwil Agencies K.K.
Green Shipping Ltd., c/o Azuma Shipping Co. Ltd., Nakatsuru Building, 2nd Floor, 15-5, Semento-machi, Tsukumi City, Oita Pref., Japan. Tel: 0972 (82) 2144. Telex: 7755-77 Fune Azuma Tsukumi. Fax: 0972 (82) 8076. Cables: "Fune Azuma Tsukumi".

TSURUGA: 35.40 N. 136.03 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Daylight hours only. Pilot arranged through Agent. Await Pilot at quarantine anchorage (see "Anchorages").
ANCHORAGES: Quarantine Anchorage is best area for anchoring to avoid heavy weather (being protected from the North by mountains). Position Lat. 35° 40′ 08″ N., Long. 136° 02′ 55″ E.
HEALTH: Radio Pratique available. Formalities carried out at Quarantine anchorage.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.
TUGS: Join ship inside breakwater and use tug's line.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Hariyama (C)	240	12.0	10.8	30,000	

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630 hrs. – 2130 hrs. (60% additional of basic stevedorage), Sundays/holidays (100% additional). Rain/snow (10% additional of basic stevedorage).
MEDICAL: No advance notice required unless urgent.
TANKERS: No facilities for large tankers.
DENSITY: Average density through year 1023.
FRESH WATER: Available from wharf, and by barge.
FUEL: Bonded oil will be brought from Moji with sufficient advance notice, when required.
CONSULS: None.
REPAIRS: Minor repairs only.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspectors ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
AIRPORT: Distance 1 hour by train. 2 flights daily to Tokyo.
TIME: GMT plus 9 hours. Permanent.
POLICE/AMBULANCE/FIRE: Police, 2–4000; Ambulance and Fire, 119.
TELEPHONES: Not available for placing on board.
SERVICES: Hold cleaning.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 7 days, but extension possible if ship stays longer.
AUTHORITY: Tsuruga Port Administration Office, 2-1, Sakura-Machi, Tsuruga City, Fukui Pref. *Tel:* 0770-22-0369.
AGENT: Sub-agents of Aall Barwil Agencies K.K.,
Tsuruga Kairiku Unyu Kaisha Ltd., 2-10, Sakura-machi, Tsuruga City, Fukui Pref. Tel: (0770) 22-3111. Telex: 5176-693 Kairik J. Fax: (0770) 24-3065. Cables: Kairiku Tsuruga.

UBE: 33.56 N. 131.15 E. (See Plan)

(A) UBE PORT
(B) SEIBU SEKIYU SEA BERTH

(A) *UBE PORT*

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Harbour pilotage not compulsory but recommended unless Master well acquainted with area. No Harbour Pilot stationed at Ube but Inland Sea Pilot will attend.

Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Cable address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Cable address "Anjin Moji". In the event of bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.
3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Off Ube (Lat. 33° 51.2′ N., Long. 131° 23.5′ E.). Sea bottom is mud.

Depth	4 m. – 7.5 m.	7.5 m. – 10 m.
Sheltered	73,000 sq.m.	233,100 sq.m.
Unsheltered	12,175,500 sq.m.	680,000 sq.m.

RESTRICTIONS: Fairway: Dredged to 11.0 m. depth. Length 2.25 miles.
(a) Outer harbour: No restriction.
(b) Inner harbour: Berthing/unberthing is practicable only during daytime.
(c) Deep draft vessels may berth at high water only.
MAX. SIZE: See "Berthing" and "Tankers".
HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agents prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.
VHF: No facilities.
TUGS: 4 tugs (2,400 h.p. – 3,200 h.p.) stationed at Ube. Other tugs available from Moji or Tokuyama. Tug's lines used at no extra charge.
RADAR: No port radar service.
BERTHING:

Name of Berth	*Length* (m.)	*Depth* (m.)	*Max. Draft* (m.)	*Remarks*
Public Okinoyama Wharf	370	10.0	10.0	
Public Shinkawa Wharf	185	10.0	10.0

CRANES: Mobile cranes up to 45 tons capacity available.
STEVEDORES: At least 24 hours' prior notice, excluding Sundays and holidays, required in order for Agent to arrange stevedores. Vessel must constantly keep her Agents advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 hrs. – 1900 hrs. (50% additional of basic stevedorage), 2100 hrs. – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).
MEDICAL: No advance notice required, unless urgent.
DENSITY: 1025.
TANKERS: See Part "B".
FRESH WATER: Good fresh water supplied either from water barge or from hydrants. From hydrants at wharves delivery rate about 30 t.p.h. Cost Yen 670/ton.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
CONSULS: None. Marine Note of Protest possible at local Notary Public.
REPAIRS: All types of repairs possible.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work, unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.
CARGO GEAR: See "Certificates", but no special requirements.
REPATRIATION: Possible.
AIRPORT: Ube Domestic Airport about 20 minutes by taxi. Only 5 flights daily to Tokyo.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: Public Wharves: Sundays and national holidays, no work. Ube Kosan No. 5 and 6: No holidays.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119. Public telephone booth available near the berth.
TELEPHONES: Not possible to place telephone on board.
SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days, when Ube is first port of call in Japan. Extension possible if ship stays longer.
SERVICES: All services available.
AUTHORITY: Ube Port Administration Office, 5-7, Minato-machi 1-chome, Ube City, Yamaguchi Pref., Japan. *Tel:* (0836) 31-3311.
AGENT: Sub-agents of Aall Barwil Agencies K.K.
Green Shipping Ltd., Moji, 9-7, Minato-machi, Moji Ward, Kitakyushu City, Fukuoka Pref., 801 Japan. Tel: (093) 321-4261. Telex: 7153-11 Greenm J. Fax: (093) 321-4288. Cables: Greenship Moji.

(B) SEIBU SEKIYU SEA BERTH

LOCATION: Lat. 33° 49′ 48″ N., Long. 131° 12′ 58.8″ E.
OPERATOR: Seibu Sekiyu Co. Ltd., Yamaguchi Refinery, 5 Nishioki, Onoda City, Yamaguchi Prefecture. Tel: 0836-88-1111.
PORT LIMITS: Seibu Sekiyu's SBM is located to the South of the recommended route, at the central part of the Suo-Nada, and is connected with Seibu Oil Refinery by 11,400 m. of submarine pipes.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
5 copies Crew List.
3 copies Passenger List.
1 copy Stores List.
3 copies List of Ports of Call (last 3 months).
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest for both discharge cargo and through cargo, using specific forms. Therefore, ship's Agent should be provided with necessary information about details of cargo in advance.
PILOTAGE: Not compulsory, but M.S.A. recommend that Master takes a pilot, unless Master well acquainted with area. Inland Sea Pilot and Harbour Pilot can be arranged through Agent by telex. Inland Sea Pilot boards at Lat. 33° 13′ N., Long. 131° 58′ E., about 4 miles S.E. of Sekisaki Lighthouse. In final stage (ETA Sekisaki Pilot Station), vessel must radio Pilot Office at Moji, Telex: 715303 (Tel: 093-332-7191). VHF communication available with pilot station. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Harbour Pilot boards at anchorage.
ANCHORAGE: All vessels are requested to anchor about 1.0 miles – 1.5 miles off and 110° from SBM, and wait there until commencement of shifting for mooring. The anchorage of Seibu Sekiyu's SBM is in "The Open Port" area. Under Customs Law, the centre of isolated "Open Port", the circular range of which is radius of only 500 m. around SBM. Out of this "Open Port" is "The Closed Port", where vessel must comply with special Customs Law. While vessel is anchored, Ube Customs allows no traffic between shore and vessel before Customs formalities have been processed by Agent. Also the anchored vessel is not permitted to take on spare parts, food, bunkers, etc., until the vessel has entered "The Open Port".
RESTRICTIONS: Traffic control and pre-notice are not required.

Berthing is practicable only during daytime and with Easterly stream, and unberthing is practicable during daytime.

Simultaneous ballasting and discharging of cargoes is permitted. However, a ballast pump with double segregation from cargo is required. Dirty ballasting into cargo tanks is in principle daytime only. Discharging of dirty ballast to shore tanks is not available.
MAX. SIZE: 259,999 tonnes s.d.w.t.
HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officer will board vessel only during daytime, and the vessel's Master is required to show Derat Exemption Certificate, Ship's Register, Maritime Declaration of Health and Crew List.

Radio Pratique is available. In order to obtain Radio Pratique qualification, vessel's Master must have a Japanese Sanitary Inspection Certificate as well as Derat Exemption Certificate. In cases where a vessel arrives from cholera infected area within 10 days, Master must advise respective Quarantine Office of the crew and passengers health conditions through ship's Agent prior to arrival, and close all soil pipes before entering port.
RADIO: Telex communication is available. In the case of telegram, Master communicates with Agent through Nagasaki Radio or Choshi Radio, which cover all ports in Japan. It is advisable for Northbound vessels to contact Choshi Radio, and for Westbound vessels to contact Nagasaki Radio.
TUGS: Two tugs of 3,000 h.p. for berthing and one tug for unberthing are used, in case of vessels less than 249,999 d.w.t. Three tugs of 3,000 h.p. for berthing and one tug unberthing are used, in case of vessels over 250,000 d.w.t.

In case of SBT tanker of 230,000 d.w.t. class, one tug will attend at her stern until sailing.
BERTHING: Berth is an SBM and vessel requires a Panama Lead, 450 mm. × 600 mm. (standard), 350 mm. × 450 mm. (minimum). Size of mooring rope is 130 mm. diameter × 55 m. × 2 lines, and size of chain is 76 mm. diameter × 7.4 m. × 2 chains.
Derricks: All vessels are requested to have port main derrick ready on arrival (Derrick capacity: More than 20 tonnes).
Floating Hoses: Connected by shore hands and arranged by refinery.
Discharging: Crude oil be discharged by 2×16 in. floating hoses at the ship's port side manifold. It's capacity is 5,000 kl./hr. and max. rate is 10,000 kl./hr. (9.0 kg./sq.cm.). Flange is ANSI 16 in. 150 PSI, and connecting method is a Camlock.

Distance from bow to centre manifold is 130 m. to 170 m. (acceptable), 145 m. to 165 m. (standard). Distance from ship's side to manifold flange is 4.0 m. to 4.6 m. (acceptable), 4.5 m. (standard). Height of manifold centre from working platform is 0.9 m. Flange spacing is 2.5 m.

Vessel requires gas ejection of cargo lines by cargo oil circulation with pumps. The vessel is required to hold 15,000 kl. of fresh crude oil until final stage of cargo discharge, with which submerged line shall be flushed up to shore tank. Depth at berth is 20.2 m. Max. draft at SBM is 19.6 m., and further safety requirements shall be maintained. Also forward draft must be maintained deeper than 6.0 m. for 130,000 d.w.t. vessels, 7.0 m. for 200,000 d.w.t. vessels, 8.0 m. for 250,000 d.w.t. vessels, 8.5 m. for 230,000 d.w.t. to 259,999 d.w.t. with SBT, also mean draft of 10.5 m., and proper trim must be maintained.
MEDICAL: No advance notice required, except on Sundays, holidays and in an emergency.
DENSITY: 1025.
FRESH WATER: Arrangeable by barge at SBM.
FUEL: Bunkering prohibited by refinery.
REPAIRS: Some steel works and engineering companies can arrange minor repairs, but usually only parts are delivered at this port.
DRY DOCKS: None.
SURVEYORS: *Cargo Inspectors:* Nippon Kaiji Kentei Kyokai (Japan Marine Surveyors and Sworn Measurers Association), No. 5-5, Minatomachi 1-chome, Ube City, Yamaguchi Pref. Tel: 0836-32-6282.

Shin Nihon Kentei Kyokai (New Japan Surveyors and Sworn Measurers Association), No. 5-5, Minatomachi 1-chome, Ube City, Yamaguchi Pref. Tel: 0836-33-1036.
Class Surveyors: None at Ube.
GANGWAY WATCHMEN: Not necessary.
CUSTOMS ALLOWANCES: Each person may take 60 cigarettes ashore, but spirits may not be brought ashore.
REPATRIATION: Possible.
AIRPORT: 20 minutes to Ube Airport by taxi. 5 flights per day to Tokyo. Domestic flights only from Ube to Tokyo. International flights leave from Fukuoka International Airport.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: Public offices (Customs, Immigration, etc.) have holiday on every Saturday, Sunday and usual Japanese national holidays.
POLICE/AMBULANCE/FIRE: Police 110, Ambulance and Fire 119.
EMERGENCY CO-ORDINATION CENTRE: Maritime Safety Association, Ube Branch. Tel: 0836-22-4999.
TELEPHONES: Temporary marine telephone can be installed at SBM.
SERVICES: Charts, designated governmental forms and documents, notary public, etc.
BANKS: Yamaguchi Bank, Onoda Branch, Nishi-Koendori, Onoda City, Yamaguchi Pref., Japan 756. Tel: 0836-83-2007.
SHIP SUPPLY SERVICE: Not available.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes can be arranged by the Ube Immigration Office through the vessel's Agent. Shore passes are valid for 15 days.
REGULATIONS: Special port regulations for tankers may be applied at SBM.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

NO: 34.29 N. 133.57 E.

OCUMENTS:

Ship's Register.
1 copy Voyage Memo (last 3 months).
Last Port Clearance.
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo anifest and Cargo Manifest in transit using specific forms. Therefore hip's Agent should be provided with necessary information about details cargoes in advance.

ILOTAGE: Harbour pilotage is not compulsory, but recommended in ew of rapid current. Pilotage compulsory in Osaka Bay, Inland Sea nd Kanmon Straits for vessels over 10,000 g.r.t.

Pilots obtained from one of three pilot stations, dependent upon essel's last port of departure, and at Master's discretion.

Most Inland Sea Pilots act as harbour pilots up to berth or anchorage destination. Harbour pilots available from sunrise to sunset.

1. Tomogashima, entrance to Osaka Bay. Position Lat. 34° 10′ N., ong. 135° 00′ E. Osaka Bay Pilot boarding up to Wadamisaki. elegraphic address: "Baypilot Kobe". Tel: (078) 321-2200. Telex: 5622-17. Advance ETA notice: 12 hours. VHF: Channel 16.

Wadamisaki, entrance to Kobe. Position Lat. 34° 35′ 0″ N., ong. 135° 08′ 24″ E. Inland Sea Pilot boarding up to destination. elegraphic address: "Anjin Kobe". Tel: (078) 391-7191. Telex: 5623-11. Advance ETA notice: 24 hours. VHF: Channel 16.

2. Sekisaki, entrance from Bungo Channel. Position at. 33° 13′ 0″ N., Long. 131° 55′ 38″ E. Inland Sea Pilot boarding up to estination. Telegraphic address: "Anjin Moji". Tel: (093) 332-7191. elex: 7153-03. Advance ETA notice: 24 hours. VHF: Channel 16.

3. Mutsure, entrance to Kanmon Straits. Position Lat. 33° 58′ 30″ N., ong. 130° 52′ 12″ E. Kanmon Pilot boarding up to Hesaki. Telegraphic ddress: "Kanmonpilot Moji". Tel: (093) 332-2384. Telex: 7153-13. dvance ETA notice: 24 hours. VHF: Channel 16.

Hesaki, East side of Kanmon Straits. Position Lat. 33° 57′ N., ong. 131° 03′ E. Inland Sea Pilot boarding up to destination. elegraphic address: "Anjin Moji". Tel: (093) 332-7191. Telex: 7153-03. dvance ETA notice: 24 hours. VHF: Channel 16.

NCHORAGE: Bottom: Sand or shell.

arbour Anchorage	*Depth*	*Position from Tobisu Beacon*	*Max.LOA*
o. 1 Anchorage (off shipyard)	20.0 m.	323° – 700 m.	150 m.
o. 4 (Closed Port)	22.0 m.	165° – 1,000 m.	180 m.
o. 5 Anchorage	29.0 m	023° – 850 m.	180 m.

ESTRICTIONS: No restrictions on entry and berthing by Port uthorities, but with pilot, entry is restricted to daytime only, and berthing nly at slack tide.

raft restrictions are as follows:

essel's draft:		
	Over 12.0 m.	Bottom clearance at berth: 10%.
	9.0 m. – 12.0 m.	Bottom clearance at berth: 8%.
	Under 9.0 m.	Bottom clearance at berth: 5%.

AX. SIZE: See "Berthing".

EALTH: Vessels usually anchor at Wadamisaki (off Kobe), where the uthorities board and grant Free Pratique.

Quarantine Officials not stationed in the port, therefore, vessel has to ass a quarantine inspection at Kobe (Quarantine) Anchorage at. 34° 38′ 20″ N., Long. 135° 10′ 45″ E.) when vessel coming through he Kii Channel, Matsuyama, Mizushima, Sakaide or any other "Q" port hen coming through the Bungo Channel, or Mutsure "Q" Anchorage at. 33° 59′ 31″ N., Long. 130° 53′ E.) when vessel coming through the apan Sea.

Vaccination is available at local hospital. If vessel requires sanitary nspection, Officials come from Mizushima.

ADIO: Recommended Master communicates with Agent through hoshi Radio (Call Sign JCS. Telex: 3782-600) or Nagasaki Radio (Call ign JOS), which cover all ports in Japan. Westbound vessels to contact hoshi Radio, and Northbound vessels to contact Nagasaki Radio espectively.

HF: Nearby facilities are "Mizushima Port Radio" on Channel 16, and akaide Port Radio" on Channel 16.

ADAR: Bisan Seto Traffic Advisory Service Centre, located at at. 34° 17′ 59.8″ N., Long. 133° 49′ 26.1″ E., provides mariners with avigational information on movement of vessels, weather conditions, arine notices, etc., and controls traffic flow in restricted waterways.

UGS: Tugs join vessel at Outer Harbour area. Tug's lines used.

ERTHING:

Berth	*Length (m.)*	*Depth (m.)*	*Draft (Salt) (m.)*	*Cargoes handled*
Tai-A	240	12.0	10.9	Logs

Uno No.3 Pier	185	10.0	09.2	Not specified

RANES: No shore cranes installed, ship's gear used.

PECIALISED CARGO HANDLING FACILITIES: None.

RIDGES: None.

TEVEDORES: Orders for gangs must be given to stevedores by 00 hrs. on day prior to working, excluding Sundays and holidays.

Normal working hours: 0830 – 1630. Overtime work depends on vailability of gangs.

EDICAL: Advance notice preferable. Hospital and dentist are available om 0900 hrs. – 1200 hrs., and 1500 hrs. – 1800 hrs. on weekdays, and n an emergency.

TANKERS: No facilities.

DENSITY: Summer – 1023, Winter – 1025.

FRESH WATER: Available from shore hose. Cost Yen 270/ton.

FUEL: Bonded fuel is available from main ports or oil station by barge.

FIRE PRECAUTIONS: No particular precautions.

CONSULS: No consuls. Marine Note of Protest can be attested by local notary public in Okayama.

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Mitsui Tamano No. 3 Dock: Length 209 m. Beam 31.5 m. Depth 9.75 m. Max. size 46,000 d.w.t. (27,000 g.r.t.).

SURVEYORS: (1) General cargo inspectors in Japan: INTECO, S.G.S., NKKK and SK.
(2) Hull surveyors available from Kobe.

GANGWAY/DECK WATCHMEN: Not specially required.

HATCHES: Opening/closing is normally carried out by stevedores.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

CARGO GEAR: Load/discharge effected by ship's gear.

REPATRIATION: Possible.

AIRPORT: 42 km. to Okayama Airport. Regular airline service to Korea only, 4 flights per week.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: National holidays: January 1st and 15th; February 11th; March 20th; April 29th; May 3rd and 5th; September 23rd; October 10th; November 3rd and 23rd.

Local holidays: Year End, New Year (about 5 days), around August 15th (about 3 days). Cargo work cannot be arranged on those days.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.

TELEPHONES: Telephones can be placed on board at 3 days notice. Cost of installation plus daily rental plus charges for calls.

SERVICES: Most services available from Kobe area.

BANKS: Chugoku Bank, Uno Branch, 1-10-10, Chikko, Tamano City, Okayama Pref.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes issued.

DELAYS: See "Restrictions".

DEVELOPMENTS: Passenger ship berths will be constructed in about 10 years: 30,000 gross ton class (10 m. depth, 280 m. length) and 3,000 gross ton class (5 m. depth, 120 m. length).

AUTHORITY: Uno Port Administration Office, 1-8-9, Uno, Tamano City, Okayama Pref., Japan. *Tel:* (0863) 31-3211.

AGENT: Sub-agents of Aall Barwil Agencies K.K., Tokyo.

Naigai Unyu Co. Ltd., Tamano Shoko Kaikan,1-2-2, Chikko, Tamano City, Okayama Pref., Japan. Tel: (0863) 31-2211. Telex: 594-6869 Naigai J (Domestic). Fax: (0863) 31-2214. Cables: Naigai Tamano.

WAKAMATSU: 33.54 N. 130.48 E. (See "Kanmon-Ko"). (See Plan)

DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

Ship's Register.
International Tonnage Certificate.
Voyage Memo (Port of Call).
Last Port Clearance.
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Compulsory. Harbour Pilots and Inland Sea Pilots are available at the pilot station or quarantine anchorage. Mutsure Pilots Station: Lat. 33° 59′ 30″ N., Long. 130° 53′ 00″ E. Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transiting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGES: No. 5 Section, Wakamatsu. Depth 9 m. – 11 m. Capacity (g/t), 15,000×2. Also quarantine anchorage.

RESTRICTIONS: Pilots not available after sunset. Entry and Sailing are controlled by the one-way signals as follows:

Entry: 0800 to 1100 hrs.; 1300 to 1500 hrs. 1 hour before sunset to sunset.

Sailing: Sunrise to 0800 hrs.; 1100 to 1300 hrs.; 1500 hrs. to 1 hour before sunset. Sunset to 0800 hrs. Easterly winds prevail in warm season, dense fog prevails sometimes in Spring and Winter, but generally clears in a few hours in the morning. Tidal range about 1.5 m. and current in leading channel about 1.5 – 2.5 knots, but no current in port. Due to narrow channel leading to main harbour and shallow water at entrance of channel, length and draft of vessels are generally limited (See "Berthing").

Fairway leading into main harbour about 200 m. wide and 2 miles long, running parallel to a breakwater and reclaimed land. In this channel, as in main harbour and fairway, vessels observe only one-way traffic and on an outgoing signal from the shore, wait outside for outgoing vessel until channel is cleared. Vessels with draft of more than 8.5 m. can enter/depart only at high tide. Entry permitted only from sunrise and vessel to be berthed before sunset. Night departure prohibited, but at HD1-5 Wharf, vessel can depart at night up to 2200 hrs. This vessel must be less than 5,000 g.r.t., and moored port side alongside.

MAX. SIZE: See "Berthing".

HEALTH: At first port call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel from 0830 hrs. to 1630 hrs., only at anchorage. Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival, and close all soil pipes before entering port.

Others see "Moji".

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

VHF: Shimonoseki Port Radio Station on Channels 16, 12, 14, 20 and 22. Pilots on Channel 13.

TUGS: See "Moji".

BERTHING:

Name of Berth	*Length* (m.)	*Depth* (m.)	*Max. Draft* (m.)	*Size LOA* (m.)	*Cargo Handled*	*Cranes*
Makiyama Asahi Glass	140	7.0	6.8	140	Dangerous cargo	1×3 tons, 2×2.3 tons

No capacity limits at berths, but subject to draft.

BRIDGES: Wakato Bridge. Height of mast limited to 38 m. for passing under bridge.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional charge. Overtime surcharges 1700 hrs. – 1900 hrs. (50% additional of basic stevedorage), 2100 hrs. – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent. All types of hospitals available.

TANKERS: No tanker berths.

DENSITY: Average density in port about 1019 – 1021 in Summer season; 1025/1026 in Winter season.

FRESH WATER: Fresh water supplied either from water barge or from hydrants. Rate of delivery: 50 t.p.h. – 60 t.p.h. ex-barge. Minimum quantity at all berths, 30 tons.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports, bunkers will be lightered from the nearest bunker stock port at 7 days prior notice.

CONSULS: See "Yawata".

REPAIRS: All types of repairs possible.

DRY DOCKS: Mitsubishi Heavy Industries Ltd., 4 dockyards (No. 3 and 4 for small vessels).

	Dimensions of Docks			*Max. Size of Vessel for Docking*		
	Length (m.)	*Breadth* (m.)	*Draft* (m.)	*Length* (m.)	*Breadth* (m.)	*Draft* (m.)
No.1 Dock	164.13	25.0	7.04	160.00	22.50	5.50
No.2 Dock	150.10	20.0	6.88	143.00	19.30	5.00

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but no spirits.

REPATRIATION: Possible.

AIRPORT: Nearest is Fukuoka Airport, which is about 2 hours by train and taxi. Kitakyushu Airport about 40 minutes by taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.

Defence/Rescue Department: Tel. 093-761-4353.

Public telephone booth available near some berths.

TELEPHONES: Possible to place telephones on board.

SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days, when Wakamatsu is first port of call in Japan. Extension possible if ship stays longer.

SERVICES: All services available.

DEVELOPMENTS: Land reclamation N.E. Wakamatsu for discharge wharves (coal/iron ore). Depth to be 12 m.

AUTHORITY: Kitakyushu Port & Harbour Bureau, 2-7 Nishi-kaigan, 1-chome, Moji-ku, Kitakyushu-City, Fukuoka Pref., 801 Japan. *Tel:* (093) 321-5941. *FAX:* (093) 321-5915.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Moji, 9-7, Minato Machi, Moji Ward, Kitakyushu City, Fukuoka Pref., 801 Japan. Tel: (093) 321-4261. Telex: 7153-11 Greenm J. Fax: (093) 321-4288. Cables: Greenship Moji.

WAKAYAMA: 34.13 N. 135.08 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Numbers
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Certificates: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

PILOTAGE: Wakayama-Shimotsu licensed Pilots. ETA advices to Agent. Pilot boards 1,500 m. – 2,500 m. off Wakayama Breakwater. Chart Nos. 1150 and 1143 (Japanese Maritime Safety Board). No pilot boat. Pilot boards from tug.

ANCHORAGES: For waiting Pilot and/or berth (nature of bottom, sand mixed with mud.) Four anchorage points for large vessels (ore carriers for Sumitomo Metal) over 30,000 tons gross are provided by the Port Authority. Agents must apply for one when required. The position of each from the lighthouse (flashing white) in the Southern sector of the port is as follows:

"A" – 3,000 m. – 255°
"B" – 3,500 m. – 272°
"C" – 4,100 m. – 283°
"D" – 4,800 m. – 292°

Other vessels are required to anchor in position (approx.) Lat. 34° 13′ 30° N., Long. 135° 06′ 30″ E. or nearer the shore if possible (Wakayama Log Carrier): 2,000 m. 245° and 230° from Red lighthouse depth about 22 m.

RESTRICTIONS: Pilot available daytime only. Channel depth, (Southern Section) 9.0 m; (Northern Section) 14.0 m.

MAX. SIZE: (Wakayama Log Carrier): South Section, LOA 160 m. 20,000 d.w.t. draft 9.0 m.; LOA 200 m., 35,000 d.w.t., draft 9.0 m. (Sumitomo Metal Pier, South Section): LOA 300 m., 100,000 d.w.t. or 150,000 d.w.t. with part load, draft 14.0 m.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio or Kobe Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio or Kobe Radio respectively.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.
Vaccination List.

The following vessels will not be able to get Radio Pratique:

A vessel that does not have a Japanese Sanitary Certificate on board.

A vessel that has been in contact with an infected area, or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected cases, of infectious disease within 15 days of arrival.

TUGS: Tug assistance normally commences from outer harbour. Tug lines used and charge included in towage. 8 tugs available, up to 3,000 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

YATSUSHIRO: 32.30 N. 130.05 E. (See Plan)

PORT LIMITS: The sea surrounded by the circle with a radius of 5,000 m. centred upon the triangulation point on Kagashima Island (28.7 m. high), the lines West to the respective bridges on the lowest Mae-kawa and Kuma-gawa, and the coast.
DOCUMENTS: When vessel arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:
Ship's Register.
International Tonnage Certificate.
Voyage Memo (Ports of Call).
3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in Transit, using specific forms. Therefore, ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory for entering or leaving. Pilot station (acting also as an Agent for foreign vessels):
Yatsushiro Branch Office of the Nippon Tsuun K.K. located at 262-15 Minato-machi, Yatsushiro City, Kumamoto Pref. Tel: 0965-37-0011.
Kokoku Unyu K.K. located at 262 Minato-machi, Yatsushiro City. Tel: 0965-37-1101. Telex: 767503 Kounki J.
Yatsushiro Branch office of Kitakyushu Unyu K.K. located at 3-2 Tatema, Yatsushiro City. Tel: 0965-37-1221. Telex: 767592 Yatsushiro Kitakyuunma.
Yatsushiro Koun K.K. located at 9-4 Asahichuo-dori, Yatsushiro City. Tel: 0965-35-2233. Telex: 767506.
Bay Pilot boarding at Lat. 32° 11′ N., Long. 130° 05′ E.
Harbour Pilot boarding at Lat. 32° 28′ N., Long. 130° 29′ E.
ANCHORAGES: Within port limits.
RESTRICTIONS: A Pilot is not available after dark, also his availability depends on the tidal conditions.
MAX. SIZE: Max. d.w.t. 40,000 tons. The tidal difference between high and low water is 4.3 m.
HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset, and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival, and close all soil pipes before entering port.

All the necessary procedures must be undertaken at the Yatsushiro-Minamata Branch Office of the Nagasaki Quarantine Station. Radio Pratique available.
RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio and Northbound vessels to contact Nagasaki Radio respectively.
TUGS: 3 tugs available. 1×500 h.p. owned by the Jonan Unyu K.K., 1×2,000 h.p. from Misumi, and 1×3,200 h.p. from Nagasaki.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Name of Berth	*Length* (m.)	*Depth* (m.)	*Max.Draft* (m.)
Quary A	130	7.50	7.30
B	130	7.50	7.30
C	165	9.00	8.80
D	185×4	10.00	9.50
E	240	12.00	11.80

CRANES: 10 mobile cranes and 20 shovel loaders.

As a rule, when a vessel is secured alongside Quays A, B, C, D and E there is no need to use the ship's own gear. However, it may sometimes be necessary to use the ship's gear during loading and unloading.
STEVEDORES: At least 24 hours' prior notice, excluding Sundays and holidays, required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew, at additional cost. Overtime surcharges 1700 hrs. – 190 hrs. 50% additional of basic stevedorage; 2100 hrs. – 0500 hrs. next morning, 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required, unless urgent.

FRESH WATER: Available from the water supply facilities operated by the Kumamoto Prefecture.

CONSULS: No local representation. Marine Note of Protest can be attended by local notary public.

REPAIRS: Not possible.

DRY DOCKS: Not available.

SURVEYORS: Not available.

GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches (according to charter party). If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work, unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores, when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore, but not spirits.

REPATRIATION: Yatsushiro Branch Office of the Fukuoka Immigration office arranges necessary repatriation.

AIRPORT: Kumamoto Airport (about 70 km. distance). Domestic flights only (ANA and JAS).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 1st January, 15th August.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119. Public telephone booth available near by the berth.

EMERGENCY CO-ORDINATION CENTRE: Yatsushiro Branch Office of the Misumi Maritime Safety Department. Tel: 0965-37-1477.

TELEPHONES: There is no arrangement for placing telephone on board.

STORING: See "Prelims".

1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. Yes.
6. Yes.

SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days, when Yatsushiro is first port of call in Japan. Extension possible if ship stays longer.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMEN'S CLUBS: None.

DELAYS: Delays will be expected when quays are occupied by vessels or a Pilot cannot go on board because of the tidal conditions.

AUTHORITY: Yatsushiro Port Office of the Kumamoto Prefecture, 249 Minato-Machi, Yatsushiro City, Kumamoto Pref., Japan. *Tel:* 0965-37-0632. *Contact:* Port Office Superintendent.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Moji, c/o Yatsushiro Koun Co. Ltd., 82 Minato Machi, Yatsushiro City, Kumamoto Pref. 866, Japan. Tel: 0965-37-1221. Telex: 7675-06 Koun J. Fax: 0965-37-1219. Cables: Koun Yatsushiro.

YAWATA: 33.52 N. 130.49 E. (See Plan)
(See "Kanmon-Ko")

DOCUMENTS: When ship arrives direct from a foreign port, Customs Officials will board to search, and the following documents are to be submitted:

3 Crew Lists, including Passport numbers.
3 Passenger Lists.
1 Stores List.
Manifest of Crew Personal Effects (must be signed by individual crew members).
Arms and Ammunition List.
Narcotics List.
Voyage Memo (Ports of Call).
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. C-2000).

The following will be checked on board:

Ship's Register.
Last Port Clearance.
International Tonnage Certificate.

When ship comes from Japanese port, Customs Officials will not attend on board, except in special cases. Master or Agent to attend Customs House for entry formalities with following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Register.
Last Port Clearance.

Documents entrusted with the Master by Customs at previous port.

On ship's departure, clearance issued by Customs, after confirming payment of Tonnage Dues.

PILOTAGE: (1) *Harbour Pilotage:* Compulsory for entry, departure and when passing through Straits if vessel exceeds 10,000 g.r.t.

Pilots embark Eastbound vessels at Mutsure Quarantine Anchorage, position 0.5 miles East Mutsure Lighthouse, Lat. 33° 58′ 15″ N., Long. 131° 53′ 18″ E., and Westbound vessels at Hesaki Quarantine Anchorage (position 125° × 1,500 m. from Hesaki Lighthouse, Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.). Two pilots embark vessels exceeding 30,000 g.r.t. for entry and departure, charging double pilotage × 85%.

(2) *Sea Pilotage:* Vessel approaching from East obtain Pilot by radio request made at least 24 hours in advance. Pilot embarks 3 miles South from Sekisaki Lighthouse; Lat. 33° 13′ N., Long. 131° 56′ E.

(3) Pilots should be kept closely advised of vessel's accurate ETA at pilot station. If any change in vessel's movements, Master requested to immediately communicate by VHF to pilot office direct or through Agent, reporting revised ETA. Cable address of pilot offices are: Harbour Pilot – "Kanmonpilot Moji". Inland Sea Pilot – "Anjin Moji".

(4) *VHF:* Vessels keep in direct contact with Port Authorities with regard to arrival, berthing instructions and pilot's requirements through VHF as follows:

(a) Call Sign: Kitakyushu Port Radio (or Shimonoseki Port Radio).
(b) Location of Radio facilities: Transmitting and receiving station located at the top of Mt. Hinoyama, Shimonoseki.
(c) Type of Wave: Channel: Simplex 16 (calling, responding), Simplex 12 (communicating), Simplex 14 (communicating), Simplex 20 and 22 (communicating). Output 50 W.
(d) Operating hours: 0000 hrs. – 2400 hrs.
(e) Communicating Range: Within a radius of 50 miles from the Hinoyama Station.
(f) Communicating Language: Japanese/English.

ANCHORAGES: No anchorage at Yawata, but quarantine anchorage used in essential cases. See "Health".

RESTRICTIONS:

(a) Because of narrow channel leading to Yawata and shallow water at entrance of channel, length and draft of vessel limited, except for berthing at Nishi-Yawata Wharf, where 20,000 gross tonnage with 200 m. length overall and 8.3 m. draft may be accommodated.

Limits:	*Wharf*
Length (overall)	166 m.
Draft	8.5 m.
Gross tonnage	10,000 tons

Vessel slightly exceeding above may be berthed at the Pilot's discretion, subject weather conditions and efficiency of engine, steering, etc.

(b) Fairway leading into main harbour about 200 m. wide and 2 miles long, running parallel to breakwater and reclaimed land. In this channel, as in main harbour and fairway to Yawata, vessels observe one-way traffic and, on a "not-clear" signal from shore, wait outside for outgoing vessels to clear channel. Vessels with draft of more than 7.0 m. can enter/depart only at high tide.

(c) Entry permitted only from sunrise and vessels to be berthed before sunset. Night departure prohibited.

(d) Wakato Suspension Bridge crosses channel between Tobata and Wakamatsu. Height of bridge from water line at fairway 42.675 m. at spring high tide; height of mast of vessels passing under bridge limited to 38 m.

(e) Easterly winds prevail in warm season. N.W. winds in Winter. Dense fog sometimes in Spring and Winter, but generally clear in morning. Tidal range about 1.2 m. Tidal current in channel about 1.5 to 2.5 knots, but no current in port.

(f) Port privately owned and controlled by Nippon Steel Corp.

MAX. SIZE: See "Berthing".

HEALTH: Radio Agent for Free Pratique not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio, vessel will be required to submit following documents to Quarantine Officer on arrival:

Declaration Inward.
Voyage Memo (Ports of Call).
Maritime Declaration of Health.
Crew List.
Passenger List.
Derat Certificate (copy).

The following vessels will not be able to obtain Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case, of infectious disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

If a vessel does not possess a valid Japanese Sanitary Inspection Certificate.

Quarantine Regulations:

(a) Quarantine station at Western entrance: 0.5 mile East of Mutsure Lighthouse Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E.

(b) Quarantine station at Eastern entrance: 125°, 1,500 m. from Hesaki Lighthouse Lat. 33° 56′ 24″ N., Long. 131° 30′ 12″ E.

(c) Quarantine inspection not allowed inside port except when weather or other special reasons prevent quarantine boat from approaching ship at anchorage.

(d) "Q" flag should be hoisted until ship in Free Pratique.

(e) Vessels exceeding 20,000 gross tonnage may undergo quarantine on application when they berth inside port.

(f) Quarantine service is rendered from 0830 hrs. to 1630 hrs.

(g) When ship arrives from plague infected or suspected area within 10 days after she left such place, 24 hours special quarantine required. All sanitary scuppers must be closed and garbage must not be thrown overboard within 60 miles of Japanese coast.

(h) Radio Pratique is obtainable according to the Radio Pratique Regulations.

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

VHF: See "Pilotage".

TUGS: 2 tugs join vessel at corner of fairway leading into main harbour. Ship's lines used when vessel berths.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent, mainly by radio.

Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)	*Permissible Length* (m.)	*Shore Cranes* (tons)
Steel Export Wharf No. 14	150	9.0	8.0	180	—
15	150	9.0	8.5	180	—
16	150	9.0	8.5	180	2×12
17	150	9.0	8.5	180	—
18	179	9.0	8.5	180	2×12
Nishiyawata Wharf No. 2	120	9.0	8.5	100	2×40
No. O.B.2	220	9.0	8.5	200	—

Note: Capacity for the above, no limit subject to draft and length.

BRIDGE: See "Restrictions".

STEVEDORES: At least 24 hours prior notice, excluding Sundays and holidays, required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew, at additional cost. Overtime surcharges 1700 hrs. – 1900 hrs. (50% additional of basic stevedorage), 2100 hrs. – 0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: No tanker berth.

DENSITY: Average density in port about 1020 – 1022 in Summer season, 1024 – 1025 in Winter season.

FRESH WATER: Water barges available from Wakamatsu, rate of delivery about 50 t.p.h. At wharves: (No. 16, 17, 18, 19, 20 and Nishi-Yawata Wharf.) From hydrants: 25 t.p.h. – 40 t.p.h. For supply at Nishi-Yawata Wharf, 1 day prior notice required.

FUEL: Domestic oil is available. Bonded oil will be brought from Moji, Ube or Oita with sufficient advance notice, when required.

FIRE PRECAUTIONS: No tanker berth. Each tugboat is equipped with fire extinguisher system for attending emergency cases.

CONSULS: British Consul, who is also acting Swedish Consul, is stationed with Holme Ringer, Moji (tel. 093-331-1311). American Consul stationed at Fukuoka (tel. 092-751-9331). Korean Consul stationed at Fukuoka (tel. 092-771-0461).

REPAIRS: All types of repairs possible.

DRY DOCKS: No dry dock available.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Fukuoka Airport, about 2 hours by train and taxi. Kitakyushu Airport, about 40 minutes by taxi.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110, Ambulance and Fire 119.

SERVICES: All types of services available.

TELEPHONES: Possible to place telephone on board.

Nippon Senpaku Tsushin K.K. available at Moji (tel. 093-331-1089). In case of Mutsure anchorage, extra boat charge and personnel expenses will be incurred. Due to insufficient number of telephones require adequate advance notice for installation. Suitable ship's electrical voltage; DC – 22/28 v. AC – 100 v. 110 v. 120 v. (to keep at least within 10 v.).

SHORE LEAVE: Local Immigration Offices issue shore passes valid for only 15 days, when Yawata is first port of call in Japan. Extension possible if ship stays longer.

GENERAL: Whenever vessel takes bunkers in port, advisable to close deck scuppers' holes before pumping in order to avoid overflow oil into sea.

AUTHORITY: Kitakyushu Port and Harbor Bureau, 2-7 Nishi-kaigan, 1-chome, Moji-ku, Kitakyushu City, Fukuoka Pref., 801 Japan. *Tel:* (093) 321-5941, (093) 321-5941. *Fax:* (093) 321-5915.

AGENT: Sub-agents of Aall Barwil Agencies K.K.

Green Shipping Ltd., Moji, 9-7, Minato Machi, Moji Ward, Kitakyushu City, Fukuoka Pref., 801 Japan. Tel: (093) 321-4261. Telex: 7153-11 Greenm J. Fax: (093) 321-4288. Cables: Greenship Moji.

YOKKAICHI: 34.57 N. 136.38 E. **(See Late Plans)**

DOCUMENTS:

Ship's Register.
Last Port Clearance.
International Tonnage Certificate.
1 Maritime Declaration of Health (only at first port of call in Japan).
1 Declaration of Crew's Baggage (only at first port of call in Japan).
5 Crew Lists.
1 Stores List.
2 Lists of Ports of Call.

PILOTAGE: Compulsory for vessels exceeding 10,000 g.r.t. in Isewan (including Mikawawan). Pilots are available at Isewan No. 1 Buoy, position 34° 31′ N., 137° 04′ E., for vessels less than 14.0 m. draft, and position 34° 25′ N., 137° 00′ E., for vessels over 14.0 m. draft.

Vessels requiring Pilot, cable Agent at least a day ahead, advising exact ETA pilot station.

Wireless station for communicating with entering ships and for other port business, call signal JCZ. Radio wave in use is A1.A2 500 kHz and A1.A2 486 kHz, output A1 50 W. and A2 110 W. Zone of communication about 100 km.

Yokkaichi Signal Station also equipped for assigning berths to entering ships and for other port business. VHF communication available, call signal Yokkaichi Port Radio, Channel 16. Working Channel 14, 0600 hrs. to 2000 hrs. any day.

Also see "Nagoya" – "Pilotage: Shipmaster's Report".

ANCHORAGES: Vessels anchor in position Lat. 34° 56′ 15″ N., Long. 136° 40′ 40″ E. where Authorities board and grant Free Pratique; Max. depth 13 m.

RESTRICTIONS: Entry restricted by vessel's draft and Pratique. Max. draft inside port 12 m. Quarantine Authority attend vessel usually from dawn to sundown on any day. Berthing daytime only. Unberthing any time except tankers daytime only.

MAX. SIZE: Max. permissible draft inside port 12 m.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA* (m.)	*Max. Safe Draft* (m.)
Showa Outer SBM	275,000	335	18.00
Showa Inner SBM	170,000	300	15.00

19-21	5.0	210.0
22	14.0	280.0
24	12.0	240.0
25	12.0	240.0

SPECIALISED CARGO HANDLING FACILITIES:

Bulk Cargoes: No. 2 Wharf has a cereal silo which can store 56,840 tons of imported grain. 2 pneumatic unloaders with unloading capacity of 300 t.p.h. per machine at the Northern berth of the pier to connect the silo with conveyors.

Containers: One deep-sea container berth of 280 m., quay length and minimum water depth of 12 m., incorporating a Ro-Ro ramp. Two 37.5 ton and 44.5 ton Hitachi container cranes. Container yard and marshalling yard area of 58,750 sq.m. Five TCM straddle carriers, 4 forklift trucks (20 tons – 40 tons), 15 tractors, 35 trailers. Container freight stations at Asake 5,940 sq.m. Wool centre 46,768 sq.m.

Facilities of Container Terminal:

1. Total area 58,750 m.
2. Container berth: Length 280 m., depth 12 m., mooring capacity 25,000 d.w.t.×1 berth.
3. Cargo handling equipment: Ramp-way 1 unit, container cranes 2 sets, 1×44.5 tons, 1×37.5 tons.
4. Transport machine: Straddle carrier, 5×40 ft. units,; fork lift 4, 2×40 tons, 1×20 tons, 1×20/40 tons.
5. Container yard: Container yard 6 yards, 29,730 m. refrigerated container yard, one yard 1,275 m.
6. Other relevant facilities: Chassis yard 5,740 m.; wool centre 46,768 m.; cold store 4,664 m.; meat centre 3,335 m.

Liquid Chemicals/LPG Carriers:

Operator: Yokkaichi LPG Terminal Co. Ltd.
Location: Lat. 34° 58′ 10″ N., Long. 136° 39′ 55″ E.
Max. Mooring Capacity: 67,000 d.w.t.
Depth of Water: Passage: 13 m.
Berth: 13 m.
Max. Acceptable Length: 360 m.
Max. Acceptable Draft: 11.00 m.
Tidal Range: Zero to plus 2.36 m.
Side Berthing: Starboard
Type of Unloader: Chicksan Arms.
No. of Receiving Lines: 2 liquid and 2 vapour.
Size of Manifold Flange: Liquid 12 in., vapour 8 in. ASA-150.
Manifold Configuration: From forward to aft – PV-PL-BL-BV and changeable to BV-BL-PL-PV if sufficient notice given to terminal.
Max. Airdraft Manifold: 19.00 m.
Remarks: Safety Pledge letter has to be filed with Port Authority.

TIDE: Tidal current of Ise Bay runs Northward along East side of Mie Prefecture and turns round at mouth of Kiso River and runs Southward for Chita Peninsula.

Tidal level:		Tidal level (average)
	High tide	+7.74 ft.
	Mean tide	+4.30 ft.
	Low tide	+0.00 ft.

TANKERS:

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Showa Outer SBM	Crude Oil	16 in.×2	8,350
Showa Inner SBM	Crude Oil	12 in.×2	5,000
Showa Wharf "E"	Naphtha	12 in.×1	1,400
	Fuel Oil	12 in.×1	1,000
	Kerosene (Load)	10 in.×1	300/500
	Lub Oil (Load)	3 in.×1	200/300
Cosmo SBM	Crude Oil	16 in.×2	5,000
Cosmo Umaokoshi Pier 1	Crude Oil	12 in.×2 (Chicksan)	3,000
	Fuel Oil	12 in.×1	3,000
	Naphtha	6 in.×2	350/400
	Kerosene (Load)	6 in.×2	380/400
Cosmo Umaokoshi Pier 9	Crude Oil	12 in.×1 (Chicksan arms)	3,000
	Fuel Oil	12 in.×1 (Chicksan arms)	3,000
	Naphtha	6 in.×2	350/450

Attention is drawn to the manual "Safety Standards on Discharge Operations for Crude Oil Tankers", which will be handed to the Master on arrival by the Berthing Master and which are to be strictly adhered to. Apart from request for the normal international safety precautions for tankers, it contains several regulations which could cause considerable delays to vessels if not taken into account when planning discharge/ballasting operations.

Such regulations are:

1. Ballasting operations shall commence between sunrise and 90 minutes before sunset.
2. Berthing operations shall be performed so that discharge operations can be commenced between sunrise and 90 minutes before sunset.
3. Unberthing shall be conducted only between sunrise and sunset.
4. Discharge operations shall be suspended when malfunctions occur to the vessel or discharge facilities or at other times when in the judgement of the Master and the Berthing Master, it is necessary to suspend operations.

It is therefore of utmost importance that the planning/timing of port operations are carefully drawn up and fully discussed with the Berthing Master prior to commencement in order to reduce delays to a minimum. The good operational conditions of ship's equipment (pumps, etc.) and awareness of personnel are of equal importance.

DENSITY: Average 1022.

FRESH WATER: Available, rate of delivery 50 t.p.h. from shore pipes at Government wharves; 100 tons from barge; before 2200 hrs. additional cost 50%; after 2200 hrs. additional cost 100%.

FUEL: Most domestic and bonded oil available, ex-barge.

Minimum 5 days' notice required.

CONSULS: None.

REPAIRS: Minor repairs only.

AIRPORT: No airport.

POLICE/AMBULANCE/FIRE: Police, Tel: 110; Ambulance/Fire, Tel: 119.

TELEPHONES: Telephone can be arranged from shore connection at Government wharves. No connections at tanker berths.

SERVICES: Technicians for vessel's instruments can be arranged from other ports at 2/3 days notice.

REGULATIONS: Under adverse weather conditions:

1. If a typhoon is reported approaching, and upon advice from refinery representative, loading or unloading operation will be suspended and vessel will leave berth to a designated area for refuge.
2. During a violent thunderstorm, cargo work will be stopped upon receiving order from refinery, and vent-line valves securely closed.
3. During stormy weather, with gusty winds condition, Master shall follow weather reports closely and shall endeavour to prevent any accidents by taking all possible precautions, such as reinforcing mooring ropes and arranging adequate emergency personnel to stand-by for any emergency.

Liability for Accidents: If accident is judged by Maritime Safety Office and Port Captain to be ship's fault, either through negligence of these Safety Regulations or otherwise, Master shall immediately cease operations, if necessary, and simultaneously follow in good faith the instructions of refinery and Port Captain, and take all necessary actions. Master shall inspect and verify cause of accident in the presence of refinery representative and ship's Agent, and shall be held responsible for reporting the accident, in writing, to the parties concerned. Until this is completed and full agreement reached with refinery representatives, the vessel shall not leave the jetty, unless otherwise requested. For actual confirmation of the accident, and damage liability, Public Surveyor (Messrs. Japan Marine Inspections Co. Ltd.) is fully entitled to inspect the accident.

GENERAL: Lightening: Not allowed, except a cargo of oil or chemicals.

DEVELOPMENTS: New LNG berth will be ready in 1997.

AUTHORITY: Yokkaichi Port Authority, 9-1, Chitose-cho, Yokkaichi City, Mie Pref., Japan 510. *Tel:* (0593) 54-6670. *FAX:* (0593) 54-6675.

YOKOHAMA (incl. Negishi and Tsurumi): 35.27 N. 139.38 E. (See Plan)

DOCUMENTS:

1 Maritime Declaration of Health.
Ship's Certificate of Registry.
1 Ship's International Tonnage Certificate.
1 List of Crew Personal Effects (to be signed by each crew member).
1 Ship's Stores List.
3 Lists of Ports of Call (last 4-6 months).
7 Crew Lists, including Passport numbers.
7 Passenger Lists.

PILOTAGE:

Bay Pilotage: Bay Pilot is compulsory for vessels over 10,000 g.r.t.

Bay Pilot boards vessel at entrance to Tokyo Bay (35° 10.24′ N., 139° 45.54′ E.), located 5 miles 161° from Kannon Saki Lighthouse. Bay Pilot boards vessel from a tug.

Request for Bay Pilot can be made by ship's Agents to Bay Pilot 2 days in advance.

24 hours and 6 hours notice of ETA to be made to Bay Pilot by Master of the vessel.

Communication with Bay Pilot can be made by the following:

Cables: Anjin Yokosuka.
Telex: 3852451.
VHF: Call Sign "Uraga Channel Pilot".

Amendment of ETA should be made to Bay Pilot whenever ETA changes.

Final confirmation or amendment of ETA should be made to Bay Pilot by VHF Channel 16, 3 hours before arrival, failing which Bay Pilot cannot board on time.

Restriction on Overtaking: Large vessels and other particular vessels, as prescribed by the Maritime Traffic Safety Law, and vessels over 10,000 g.r.t. should, if the circumstances of the case admit, avoid overtaking a vessel of over 500 g.r.t. in the traffic routes.

Restriction on poor Visibility: Vessels over 10,000 g.r.t. should not enter the traffic route when the visibility in the traffic routes and its vicinity is less than 1,000 m.

Preparation of Emergency Fire Wires: A vessel, carrying dangerous cargo, prescribed by the Maritime Traffic Law, should prepare emergency fire wires at the bow and the stern for immediate use, in case of emergency.

Communications with Tokyo Wan Traffic Advisory Service Centre: Vessels over 10,000 g.r.t. should keep watch on VHF Channel 16 while navigating within the radar service area, since information might be sent by Tokyo Wan Traffic Advisory Service Centre.

Contact with Tokyo Wan Traffic Advisory Service Centre can be made by the following:

Call Sign: "Tokyo Martis".
Calling Frequency: VHF Channel 16.
Working Frequencies: Channels 14 and 22.

Restriction on Navigation Period: LPG/LNG vessels of over 25,000 g.r.t. and tankers over 50,000 g.r.t. are prohibited from navigating in Uraga Channel between sunset and 1 hour before sunrise.

Harbour Pilotage: Yokohama Harbour Pilot is compulsory for vessels over 300 g.r.t. for berthing and unberthing.

Request for Harbour Pilot can be made by ship's Agents to Yokohama Harbour Bureau in advance.

Harbour Pilot boards vessel by launch at Yokohama Anchorage for berthing operations. If weather is rough, Harbour Pilot boards vessel by tug. Pilot's boat is painted grey with the word "PILOT" in white letters on each side, with "H" flag by day and lights by night, in accordance with international rules.

ANCHORAGES: 12 m. – 26 m. in Quarantine Anchorage, and 26 m. – 34 m. in other areas. For details refer to chart published by Hydrographic Division of Japan MSA.

RESTRICTIONS: (A) Conventional vessels can be berthed up to 2200 hrs. at public berths.

(B) Container vessels can be berthed up to 0030 hrs. at container berths.

(C) At most of the private berths, berthing and unberthing is from sunrise (or after 0630 hrs.) till sunset.

MAX. SIZE:

Main Dry Cargo Berths:

Berth	*Max. d.w.t.*	*Max. LOA (m.)*	*Max. Draft (m.)*	*Max.Airdraft (m.)*
Kokusai Futo	150,000	300	16.80	16.0
Nissin Seiyu	55,000	220	12.00	N/A

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA (m.)*	*Max. Draft (m.)*
Keihin Yokohama (Sea berth)	200,000	No limit	19.50
Showa Shell Sea Berth	80,000	280	12.00
NPRC (Negishi) A	175,000	310	16.50
NPRC (Negishi) B	79,000	250	13.60
Tokyo Gas	50,000	300	12.00

HEALTH: 1. Radio Pratique is available to vessels who possess valid Sanitary Inspection Certificate issued by Japanese Quarantine Authority.

Radio Pratique message can be sent by Master to ship's Agents between 6 hours – 36 hours prior arrival as per specific format.

2. Following vessels are not applicable for Radio Pratique:
   - (A) Vessels who are less than 7 days from Japan after departing a port which is designated an infected area.
   - (B) Where ship's crew have suffered from an infectious disease within 15 days before arriving in Japan.

Quarantine Inspector boards vessel at Yokohama Quarantine Anchorage for Pratique. Location of Yokohama Quarantine Anchorage 35° 26.9′ N., 139° 42.7′ E.

Pratique is only required at first port of call in Japan.

RADIO: Recommended that Master communicates with Agent through Choshi Radio or Nagasaki Radio, which cover all ports in Japan. Westbound vessels to contact Choshi Radio, and Northbound vessels to contact Nagasaki Radio respectively.

VHF: Call sign Yokohama Port Radio. (See details under "Kawasaki/VHF").

Berthing information for next day can be obtained from Yokohama Port Radio at 1500 hrs. by VHF Channel 16 (Range of Station approximately 50 miles).

RADAR: Traffic Control Centre (Tokyo Wan Traffic Advisory Service Centre) keeps watch round-the-clock for the vessels within the radar service area. Vessels can make contact with the Traffic Control Centre by VHF Channel 16.

TUGS: Tugs join vessel at Yokohama Anchorage. Number of tugs required is at discretion of the Harbour Pilot. Normally 2 tugs are used for berthing and unberthing. However, 4/5 tugs are used for large vessels or LPG/LNG/VLCC.

The following tugs are registered in the Yokohama/Kawasaki area for berthing/unberthing operations: 7×3,600 h.p., 2×3,400 h.p., 6×3,100 h.p., 15×3,000 h.p., 1×1,800 h.p. and 1×1,700 h.p. (total 32 tugs).

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Mooring Buoys:

BRIDGES: Yokohama Bay Bridge spanning Honmoku and Daikoku was completed in 1989 with highest clearance above water of 55 m.

STEVEDORES: There are 21 stevedoring companies in Yokohama. Orders for stevedore gangs are to be confirmed by 1200 hrs. day before, excluding Saturdays, Sundays and holidays.

Working Hours:

0830 hrs. – 1630 hrs.	Basic rate.
1630 hrs. – 2130 hrs.	60% additional charge.
2130 hrs. – 0400 hrs.	130% additional charge.
Holidays	100% additional charge.
Saturdays	60% additional charge.

MEDICAL: Hospital and clinic available. No advance notice required, unless urgent.

TANKERS: Masters of tankers seldom requested to fit reducing pieces before arrival for connection of shore lines since oil installation have own appliances. Two slop disposal facilities, one in District No. 5 in Yokohama which is private enterprise and can dispose of dense residues, and one in District No. 1 in Kawasaki which is run by Kawasaki city and can dispose of diluted slop or oily ballast. (Also see "Max. Size").

	Naphtha	6 in.×1	700 (Kl.p.h.)

DENSITY: Average approx. 1023.

FRESH WATER: Available by pipeline at public berths and some private berths, and by barge at anchorage. 3 water barges with 280 tons capacity also available. 24 hours prior notice is required to supply on Sundays and national holidays.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay.

FIRE PRECAUTIONS: Oil installations in Yokohama/Kawasaki generally do not allow bunker barge to come alongside ships moored to their berths.

CONSULS: Argentina, Korea, Netherlands, Norway and Sweden.

REPAIRS: Any kind of repairs can be effected at this port.

SURVEYORS: Lloyd's, A.B.S., B.V., DNV, Salvage Association and U.S. Salvage are available. GL available from Kobe.

GANGWAY/DECK WATCHMEN: Normally not required.

HATCHES: Opening and closing normally carried out by ship's crew.

CUSTOMS ALLOWANCES: Daily consumption allowed aboard by Customs: 2 packets cigarettes, 1.3 litres beer and 144 ml. of whisky.

REPATRIATION: Possible.

AIRPORT: (A) Yokohama to Haneda Airport (25 km.). Limousine bus from Yokohama to Haneda takes 1 hour.

(B) Yokohama to Narita Airport (100 km.). Train (Narita Express) from Yokohama to Narita takes 1 hour. Limousine bus from Yokohama to Narita takes 2.5 hours.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: *National Holidays:*

January 1st, New Year Holiday.
January 15th, Adults' Day.
February 11th, Foundation Day.
March 21st, Vernal Equinox Day.
April 29th, Green Day.
May 3rd, Constitution Memorial Day.
May 4th, National Holiday.
May 5th, Children's Day.
September 15th, Respect for the Aged Day.
September 23rd, Autumnal Equinox Day.
October 10th, Physical Culture Day.
November 3rd, Culture Day.
November 23rd, Labour Thanksgiving Day.
December 23rd, Emperor's Birthday.

Local Holidays:

July 20th, Maritime Day.

If a holiday falls on a Sunday, the following Monday is observed as a holiday.

December 31st – January 3rd is considered as End of Year and New Year's Holidays, and the period is not workable for dry cargo vessels.

Sundays and holidays are not workable for dry cargo vessels.

Tankers can load and unload throughout the year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.

EMERGENCY CO-ORDINATION CENTRE:

Maritime Safety Agency Yokohama (Coast Guard). Tel: 045-201-4522.

Yokohama Harbour Pilot Station. Tel: 045-681-4081.

Yokohama Harbour Police Station. Tel: 045-212-0110.

Police Tel: 110. Ambulance and Fire Tel: 119.

Master of the vessel can also contact Yokohama Port Radio by VHF Channel 16 for urgent matters.

TELEPHONES: Telephones can be placed on board at most public berths.

SERVICES: Most services can be provided, if advance notice is given.

BANKS: Bank of Tokyo Ltd., 3-17-1 Honcho, Naka-ku, Yokohama. Tel: 045-201-2515. Hours: 0900 – 1500, Monday to Friday.

STORING: *Dry Cargo Vessel:*

Public Berths: Vessel can be accessed by trucks.

Private Berth (dolphin berths): Vessel can be accessed by barge from sea.

Private Berth (non-dolphin): Vessel can be accessed by trucks.

Tankers: Stores, bunkers and lube oil can be supplied onboard at anchorage. Stores can be delivered onboard by hand at the terminals.

SHIP SUPPLY SERVICE: Japanese Coast Guard, 3rd Regional Maritime Safety Headquarters of Yokohama (Tel: 045-211-0771) can arrange craft or helicopters for picking up crew and sick personnel upon request.

The range, capacity and rendezvous points of supply craft and helicopters can be fixed case by case.

SHORE LEAVE: Crew members are allowed ashore, provided shore landing passes for each crew member are issued by local Immigration Authority.

Crew members are to be back onboard the vessel prior to ship's departure from port.

IDENTIFICATION CARDS: Shore landing passes are issued for crew members by local Immigration Authority.

GARBAGE DISPOSAL: Collection compulsory at public berths, and provided on request at private berths.

Service available from Yokohama Seiko-kai Corporation, 25 Yamashita-cho, Naka-ku, Yokohama. Tel: 45-661-0392.

	Basic Rates	Additional Charges/bag
Shore collection: 1 unit (3 bags)	Y 3,360	Y 1,120
Shipboard collection: 1 unit (3 bags)	Y 9,900	Y 3,300
Collection with drum cans: 1 drum	Y 12,560	—

Other charges shall be 50% over and above the basic rate in the following cases:

(a) Collection in rough water.
(b) Collection on Sundays, national and local holidays.
(c) Vessels moored outside breakwaters.

WASTE OIL DISPOSAL: Service available from Ships Waste Oil Treatment and Disposal Plant, City of Yokohama, 12-70 Daikoku-cho, Tsurumi-ku, Yokohama. Tel: 45-501-0434. Fax: 45-501-0435.

Charges:

1. Water ballast	Y	110/cu.m.
2. Bilge water	Y	1,100/cu.m.
3. Waste oil	Y	5,000/ton.

SEAMAN'S CLUBS:

United Seamen's Service Inc., 3 Honmoku Futo, Naka-ku, Yokohama, Japan. Tel: 045-623-2237. Facilities: Western style restaurant, bar, gift shop, games room, money exchange (US$/DM/A$/£), overseas telephone, pool tables, darts, TV, library, book exchange, barber shop, money orders, postal services (stamps etc.), transportation to and from ships in port free of charge, information on sightseeing and shopping and doctors.

The Missions to Seamen, 194 Yamashita-cho, Naka-ku, Yokohama, Japan. Tel: 045-662-1871. Facilities: Souvenir shops, international telephone, chapel, postal services, bar, darts, games (chess and draughts), books/magazines, sightseeing information, TV & lounge, welfare, medical information.

Seamen's Service Centre, 1-1 Kaigan-dori, Naka-ku, Yokohama, Japan. Tel: 045-201-2177. Facilities: Waiting room, information on ship movements, hotel, hospital, etc.

CURRENCY: Japanese Yen (Y). U.S.$ 1.00 = Y 140.20.

DEVELOPMENTS: *Minato Mirai 21 Project:* This project is designed to create an attractive city centre for Yokohama, one which will have the international and cultural qualities appropriate for a self-reliant, major city within the capital region of Japan, and also have the qualities appropriate for an international port city. This new urban centre is to be built in the inner port area (a total area of 186 hectares, about 110 hectares, inclusive of the already closed Takashima Pier and the Shinko Pier, and some partially reclaimed area of about 76 hectares).

The project began in 1983 and will be completed in 2000. In anticipation of its role in the 21st century, the plan calls for the building of facilities for international exchange: conference halls, green belts and facilities for the purpose of creating spaces with ample amenities for new port activities, daily life and places for people to interact and exchange goods and information.

Honmoku Pier Project: To keep up with this age of containerisation, D-4 Container Terminal started service in November 1984. This was followed by D-5 Container Terminal operating in December 1986 with a berth 300 m. long and a water depth of 13 m.

At C Jetty, the number of gantry cranes was increased to boost the capacity for handling containers with conventional, Ro-Ro and semi-container ships. At present 5 such cranes are in operation. There is also a plan to expand the container yard by reclaiming the space between B and C Jetties.

The newly reclaimed area at D Jetty completed in 1985 (about 70 hectares) has secured space for piers and port facilities to alleviate their shortage. It will also be developed as a green belt of about 20 hectares with various amenities and the Port of Yokohama Symbol Tower to serve as the centre of the area. The citizens began using this tower in July 1986.

Minami Honmoku Pier Project: The waters off the industrial zone of Honmoku Pier have a high development potential as an area for the distribution of goods because of the great water depth, its proximity to the Tokyo Bay Shore Expressway and other factors. The plan is to build deep-water, larger container terminals in order to respond to the expanding demand for container freight and the trend towards larger vessels.

We also intend to build a new comprehensive base at the Port of Yokohama for distribution of goods in the next century. We hope to establish facilities to meet both the diversified demands of and increasing complexities for goods distribution.

Daikoku Pier Project: This project envisages the construction of a modern pier by a 321 hectare reclamation project, which will be completed in two phases: Phase I includes 221 hectares, and Phase II is intended for 110 hectares near Daikoku Pier, Tsurumi Ward. The Phase I area was reclaimed in 1984. Some of the berths for ocean-going trampers were converted into multi-purpose berths to accommodate Ro-Ro ships and semi-container ships.

The reclamation work was finished in 1990 in the Phase II area where the construction of two large container berths is now in progress to cope with the expanding demand for container cargoes. We plan to improve a complex distribution terminal to be able to handle diverse cargoes in a unified, efficient manner, responding to the trend toward diversified distribution of goods. We also plan to secure areas for citizen recreation activities, as part of our program to improve the environment, by establishing large scale green and water areas (about 20 hectares), at the gateway to the Port of Yokohama.

Tokyo Bay Shore Expressway Project: This project calls for improving the

160 km. long expressway along Tokyo Bay, stretching from Yokosuka to Futtsu through Yokohama, Tokyo, Chiba and Kisarazu. There is a plan to build a road within the Port of Yokohama linking Ogishima, Daikoku Pier and Honmoku Pier, stretching to Kanazawa and Yokosuka. When completed, this road will serve as a central network of highways to markedly improve the port functions and alleviate traffic congestion within the city.

AUTHORITY: Port and Harbour Bureau, City of Yokohama, 2 Yamashita-cho, Naka-ku, Yokohama, 231 Japan. *Tel:* 045-671-2874 2888. *Telex:* 3822844 Green J. *Contact:* Y. Shimura, Manager of Port Promotion Division.

AGENT: Aall Barwil Agencies K.K., 23, Yamashita-cho, Naka-ku, Yokohama, Japan. Tel: 045-641-0141. Telex: J47711, 3822282. Fax: 045-662-1228.

YOKOSUKA: 35.17 N. 139.39 E. (See Plan)

DOCUMENTS:

Customs:
Ports of Call List (Voyage Memo).
Cargo Manifest for Discharging and Through Cargo.
Declaration of Crew's Baggage.
Passenger List.
Crew List.
List of Ship's Stores.
Ship's Register.
Last Port Clearance.
Declaraton of Payment of Tonnage Dues and Special Tonnage Dues.
Application for permission of:
  Traffic through place other than designated.
  Traffic through place designated.
  Traffic between vessel or aircraft coming and/or going between Japan and any foreign country and coasting vessel, etc.
Application for Approval on Loading and/or Unloading of goods before Cargo Manifest is submitted.
Declaration Inward/Outward of Vessel.

Immigration:
Crew List.
Passenger List.
Application for Crew member's Landing Permit for Issuance of Crew Landing Pass, Crew Replacement and Repatriation.
Application for Emergency Landing Permit in case of hospitalisation of crew members.
Passport or Seaman's Identity Book.
Declaration Inward/Outward of Vessel.

Quarantine:
Notification for prior Quarantine Procedures.
Radio Pratique Message from the Vessel.
Delivery papers for Radio Pratique Message.
Maritime Declaration of Health.
Crew List.
Passenger List.
Ports of Call List (Voyage Memo).
Notification for after Quarantine Acceptance.

Plant Protection Station:
Application for Plant Importation Inspection.

Animal Quarantine:
Importation Inspection not available.

Maritime Safety Agency:
Declaration Inward/Outward of Vessel.
Application for Permission of Movement in the Port.
Application for Loading, Transfering and Unloading of Explosives and Combustibles.
Application for Transportation of Explosives and Combustibles.

Port Authority:
Application for use of Facility.
Declaration Inward/Outward of Vessel.

PILOTAGE: In applying for pilot at time of entry and departure, pilot station should be contacted 24 hours in advance of beginning of pilotage through Agent. 96 pilots available.
Uraga Channel Pilots: Tel: 0468-35-6211. Telex: 3852-451.
VHF Call sign: "Uraga Channel Pilot", on Channel 16.

ANCHORAGES: At 4th District of Yokosuka Port. Depths 10 m. – 30 m.

RESTRICTIONS: The 1st, 2nd and 3rd District of Yokosuka Port under compulsory pilotage districts.

Possibilities of Entry or Sailing after Sunset:

Nagaura Pier:
Entry: If berthing alongside "Head In", the vessel may pass Yokosuka Ko North-East Breakwater (E) Lighthouse from sunrise to sunset.
If berthing alongside "Head Out", from sunrise until 30 minutes before sunset.
Sailing: If berthed alongside "Head Out", the vessel may leave quay from sunrise to 2200 hrs.
If berthing alongside "Head In", from sunrise until 30 minutes before sunset.

Shinko Wharf:
Entry: The vessel may pass Yokosuka Ko (S) Light Buoy No. 1 from sunrise to sunset.
Sailing: The vessel may leave quay from sunrise to sunset.

Shinko Pier:
Entry: The vessel may pass Yokosuka Ko (S) Light Buoy No. 1 from sunrise until 30 minutes before sunset.
Sailing: The vessel may leave quay from sunrise until 30 minutes before sunset.

During the evening rush hours in Uraga Suido Traffic Route (1600 hrs. - 2000 hrs. JST), a vessel of some 10,000 gross tons or more should normally avoid crossing the West Traffic Lane of the traffic route from or to the West, but if obliged to do so, should pursue safety in crossing by:

(a) Understanding the prevailing circumstances and conditions in and around the traffic route by keeping in close contact with the Tokyo Wan Traffic Advisory Service Centre.
(b) Faithfully obeying maritime traffic rules (particularly the rules on conduct of vessels and indications of their own routes under the Maritime Traffic Safety Law).
(c) At all times maintaining a proper lock-out (by sight and hearing) as well as all available means.
(d) At all times proceeding at a safe speed.
(e) Effectively using escort boats, tugs, etc.
(f) As far as practicable, maintaining a listening watch by VHF radio telephone on Channel 16.

MAX. SIZE: See "Berthing".

HEALTH: Radio Pratique available. Authorities board at anchorage. Quarantine Station to be informed in advance of name of last port, ship's name, tonnage, number of crew, number of passengers, ship's nationality, etc. In event any suspected disease, Agent should be advised. When isolation of ship needed, it will be transferred to Quarantine Station Yokohama.

RADIO: Local radio station.

TUGS: Can be arranged through Agent. Tugs normally join vessel in 3rd District, when vessel enters Nagaura and Shinko, and in 7th District, when it enters Kurihama. Tug's lines to be used. Charge for tug's lines included in charge for tug.

BERTHING: Agent submits application for berth to Port Authority (Nagaura and Kurihama Port Offices and Yokosuka Shinko Wharf Company).

Jordan

AQABA: 29.31 N. 35.01 E. (See Plan)

LOCATION: The commercial sea port of Aqaba is the only outlet to the Hashemite Kingdom of Jordan, and is situated at the top of the Gulf of Aqaba at Lat. 29° 31′ N., Long. 35° 01′ E.

The Passenger and Container Terminals lie approximately 3 miles to the South of the main port.

The New Oil Exporting Jetty lies approximately 8 miles to the South of the main port.

The Fertiliser Industry Terminal lies approximately 12 miles to the South of the main port.

PORT LIMITS: The Southern limit of the port is an imaginary line 270° from Al Derrah Point (Saudi Border); about 12.5 miles from the main port.

DOCUMENTS: *Documents required by the authorities for cargoes:*
1 copy of all dangerous goods on board showing IMO & UN numbers.
6 copies unfreighted Manifest, showing IMO & UN numbers for dangerous goods.
2 copies of unfreighted Manifest for Free Zone if vessel has Free Zone cargo.
1 set of non-negotiable Bills of Lading.

All Manifests should bear the following clause: "This is to certify that the above vessel has not called and is also not scheduled to call at any Israeli ports nor is owned by any Israeli Company, also it is not included in the Black List".

All the above documents are to be airmailed to the Agent's Head Office in Amman and not Aqaba.

Documents Required by the Authorities for Free Pratique:
7 copies Crew List.
7 copies Passenger List.
1 copy Stores List.
1 copy Crew Declaration List.
1 copy Vaccination List.

The Following Forms to be Filled:
2 copies of Maritime Declaration of Health.
1 Customs Declaration Form.
2 copies Vessel's Specification Form.
1 copy Pilotage Form.

The Following Documents to be Produced for Checking:
(a) Log Book.
(b) Ship's Registry Certificate. (Kept by the Port Authorities until departure).
(c) Derat Certificate.

Shipmaster's Report: November 1988.
Customs: 3 copies Crew List.
1 copy Bonded Stores List.
1 copy Crew Declaration.
Agent: 3 copies Crew List.
Quarantine: 3 copies Crew List.
1 copy Maritime Declaration of Health.
2 copies Vaccination List.
Immigration: Photograph for shore passes (compulsory).

PILOTAGE: Pilotage is compulsory for all vessels above 150 n.r.t. for berthing, unberthing and entering the near (East) anchorage area. Pilotage is obtained from the Harbour Master through Port Control. Ships in harbour requiring a Pilot should call the Pilot via Aqaba Port Control Radio (VHF Channel 16, working Channel 12) 1 hour before ship is ready to move. Advance notice of the ship's requirement of pilot service should be given to the Agent who should advise the Harbour Master or his representative.

It should be noted that vessels may proceed to sea from the anchorage without taking a Pilot, but for ships leaving the berths alongside, pilotage is compulsory. Sound signals are prohibited.

Ships intending to go to anchorage, cargo berths or bulk export berths should wait for Pilot 1 mile to the West of the Phosphate Berth.

Ships intending to berth alongside the Floating Berth (Yarmouk) or Container Terminal should wait for Pilot 1 mile to the S.W. of these berths.

Ships intending to berth alongside the Fertiliser Berth or the new Oil Jetty should wait for Pilot 1 mile to the S.W. of these berths.

The vessel has to supply the following information to the pilot station when requesting a Pilot:
(a) Name of vessel;
(b) Nationality;
(c) Agent's name;
(d) Overall length;
(e) Maximum draft;
(f) Gross and net tonnages;
(g) Cargo for Aqaba;
(h) Any special characteristics of vessel.

ANCHORAGES: About 0.6 miles from shore in depths of 15 — 30 fathoms. Ships awaiting discharge can easily anchor in deep water anchorage which can accommodate 9 large vessels.

Anchorages 1-5 are called inner anchorage and are used for ships discharging cargo into barges. The remainder (6-9) are used for ships waiting. The anchorage may take a larger number of ships during congestion periods. All anchorages lie in the compulsory pilotage areas.

When anchored, all ships must keep 6 cables distance from the Royal Jetty.

RESTRICTIONS: The entry of ships to anchorage after sunset is not allowed. Berthing is prohibited during darkness at the oil terminal.

Ships' Masters are warned that contravention of above rules renders them liable to penalties of up to JD. 10,000 per ship.

MAX. SIZE: Up to 20,000 d.w.t. Max. draft 32 ft. for the cargo berths and 100,000 d.w.t. and 50 ft. draft for the phosphate loading berth. Also see "Berthing" and "Notice".

HEALTH: Health Officials board after vessel drops anchor or after vessel is secure alongside.

The Port Medical Officer is in charge of granting Free Pratique to all vessels on arrival, and of all medical matters concerning ships and seamen.

RADIO: Aqaba Radio Station, call sign JYO.

Watchkeeping hours are currently from 0500 hrs. to 1700 hrs. GMT. The station received all MF frequencies on: 500 kHz and 477 kHz and receives HF frequencies from 0700 hrs. to 0900 hrs. GMT only on 8728 kHz. The radio station listens on VHF Channel 16.

Weather forecasts: Twice daily, at 0730 hrs. and 1530 hrs. GMT.

The new radio station will work for 24 hours and will be able to receive all types of communications (Telegraphic, Telephonic, Telex, etc.)

Note: To all ships bound for Aqaba Port = In order to facilitate berthing and cargo handling at Aqaba Port, Masters of ships are kindly requested to cable Harbour Master in Aqaba via Aqaba Radio 72 hours and confirm 24 hours before arrival providing the following information:– Ship's name, Flag, Last Port, Next Port, Cargo for Aqaba, Tonnage and Type, Length, Breadth, GRT/NRT, Draft Forward/Aft, ETA, Aqaba Agent's Name, Liner or Charterer, Year built, and if Ro-Ro ship, the Ramp Location. Station Telex No. 62325 Aq Radio Jo. Station Tel. No. 315544 and 314321.

VHF: Aqaba Port Control at Harbour Master's Office listen from 0700 to 2400 hrs. local time on VHF Channel 16, working Channels 10 and 12 for service messages. Pilots listen VHF Channel 16.

RADAR: There is no Port Control Radar, but tugs are equipped with radar and sounding apparatus.

TUGS: Compulsory. 3 tugs, 840 h.p. – 1,500 h.p., 9 mooring and 5 towing boats 80 h.p. – 380 h.p.

BERTHING: The Main – Port Berths: Includes 12 berths with a total length of 2,050 m. for handling general cargo, grain, phosphate and discharging lighters.

Berth No.		*Length of Berths* (m.)
1	receives ships up to 40,000 d.w.t.	160
2,5,6		180
3,4		180
7		150
8,9		150
Lighter Discharging Berth		150
Phosphate Berth A (With conveyor belts and shiploader of 1000 t.p.h.)		210
Phosphate Berth B (With conveyor belts and two shiploaders of 2200 t.p.h. each).		180 (Receives ships up to 100,000 d.w.t.)

Also see "Notices".

Container Berth: Total length of 540 m. and a depth of 15 m. which can receive 3 vessels at a time up to 100,000 d.w.t. each. It is equipped with 2×40 ton gantry cranes. Attached to this berth and with a depth of 10 m. is the Ro-Ro Berth with 40 m. length.

The Container Terminal has a container freight service, Container Freight Station (CFS) and a container and Ro/Ro storage area of 309,000 sq. m.

The capacity of the container storage area is 7,000 full containers and 5,000 empty containers (in TEUs).

The Terminal also has 24 power points for the supply of power to refrigerated containers.

Passenger Terminal and Yarmouk Floating Berth: Length 150 m. and depth 15 m. It specialises in passenger traffic and their vehicles, it also receives Ro-Ro and container ships.

Mo'ta Floating Berth: Recently fixed to the North of container berths with a length of 150 m. and a depth of 15 m. It is used for bagged cement, export purposes and Ro-Ro vessels. Max. size 20,000 d.w.t.

Moshterak Berth: Length 120 m. and depth of 11 m. Dolphin berth used for oil product exports. Max. size 120,000 d.w.t.

New Oil Export Jetty: Length of jetty 150 m. Depth alongside 25.0 m. There are 4 breasting dolphins and 4 mooring dolphins. Max. size 300,000 d.w.t. Max. monthly oil exporting capacity 300,000 tons.

Industrial Port: Jordan Fertiliser Industry Co. Ltd.

(A)	Timber berth (J.F.I) 1	*Sea Side*
	Max. draft permissible	6.8 m.
	Length of berth	80 m.
	Max. vessel width	—
	Max. vessel d.w.t.	5,000 tons

(B)	(J.F.I.) 2	*Shore Side*
	Max. draft permissible	1.75 m.
	Length	45 m.

There is possibility to use Berth No.1 and No.2 for Ro/Ro vessels of different sizes, with stern (straight) ramp of not less than 35 m. in length. The vessel will be moored 25 m. from the jetty.

(C)	Fertiliser berth	*Sea Side*	*Shore Side*
	Max. draft permissible	15 m.	11 m.
	Length	230 m.	190 m.
	Max. vessel width	27 m.	27 m.
	Max. vessel d.w.t.	50,000	40,000

2×2,000 t.p.h. shiploaders and 1×500 t.p.h. ship evacuator.
2 Potash stores, each 75,000 tons capacity.

CARGO EQUIPMENT: *Grain Silos:* Erected by Ministry of Supply on Berth No.1 with evacuators & conveyor belts with a capacity of 500 t.p.h. and storage capacity of 150,000 tons.

Cargo Handling Equipment:
62 cranes with a capacity of 2 tons - 90 tons.
108 Forklifts with a capacity of 1.5 tons - 22 tons.
49 Tractors.
9 Straddle carriers for handling containers.
19 Tug Masters.
12 Top lifts of 5.0 - 30.5 tons.
2 Gantry cranes with a capacity of 40 tons each.
120 Trailers.
33 Barges with a capacity of 250 tons - 500 tons each, including 1 Water Barge, 1 Waste Collection Barge and 1 Oil Pollution combatting Barge.

Storage Facilities:

Total Shedded Area	41,500 sq.m.
Closed Hangers Area	34,500 sq.m.
Paved Open Storage Area	450,000 sq.m.
Closed Cold Store	500 Tons
Container Terminal Area	309,000 sq.m.

STEVEDORES: Stevedoring is carried out by The Ports Corporation and their working hours are from 0700 – 1400, work must start at 0700 and end at 1400, therefore there is 1 hour overtime in the morning from 0700 – 0800. The second shift's working hours are 1700 – 0100 next morning and are counted as overtime hours.

Ships with homogenous cargoes of bags or steel may work four shifts per day – first shift 0700 to 1100, second 1100 to 1600, third 1600 to 2200 and fourth 2200 to 0500 next morning.

During the month of Ramadan the timing is 0700 – 1300 for the first shift and 2100 – 0300 next morning for the second shift, the four shift system is suspended during this month.

Cargo work is continuous throughout the year with the exception of 1 day at Eid-El-Fitr (the first day of the holiday) and 1 day at Eid-El-Adha (the first day of the holiday).

Friday is the official weekly holiday therefore the working hours during this day are treated as overtime hours at an extra cost of JD 37.5 per gang per day.

Ships' Working Hours: Ships can work around the clock depending on the Master's option and the number of ships in port. Opening of ships' hatches is allowed up to 2100 hrs. if Agent arranges for gangs beforehand.

The port meeting is held daily at 1000 hrs.

MEDICAL: The Health Department of Aqaba Port provides all medical services required and responds to any urgent calls by radio before arrival. A government hospital is available and is well-staffed.

TANKERS: Tankers loading fuel oil can be handled at the following berths:

Mushterak Berth: Consisting of 2 dolphins 120 m. apart from each other with a depth of 11.0 m.

New Oil Berth: Export tankers berth alongside storage vessel "Red Seagull" LOA 362 m. "Red Seagull" is under management of "Sosema Matex" and is used to export Iraqi Crude Oil. No draft restrictions for ocean-going tankers, however LOA should not exceed 340 m. Loading is through 3 × 12 in. hoses at an average rate of 8,000 tonnes per hour.

Port Restrictions:

1. No night berthing/unberthing.
2. Dirty ballast facilities are not available.
3. Pilot boarding area adjacent to the terminal.
4. Slops not accepted.
5. No limitation on freeboard.

Port Circulars:

Ref. No. 2/10/2/499
Date: 10/1/86

To Ocean Going Oil Tankers Arriving at Aqaba Oil Terminal:

Standard information from ocean going oil tankers arriving at Aqaba Oil Terminal must be sent by cable or letter to Ports Corporation at least 15 days before arrival.

1. Date/time of arrival to be confirmed 5, 4, 3, 2, 1 days before arrival.
2. Ships particulars name/kind, date of building, d.w.t., draft, LOA, breadth.
3. Ballast condition, quantity of ballast, condition of ballast segregated or clean ballast.
4. Slop quantity on board on arrival.
5. Condition of cargo tanks, crude oil washed, gas free etc.
6. All overboard ballasting, deballasting, lines condition flushed, cleaned.
7. Equipped with inert gas system, then percentage of oxygen in the cargo tanks on arrival and throughout cargo operations.

All information sent to Ports Corporation must be correct.

Ref. 2/10/2/521
Date: 29/1/86

Port Instructions and Regulations to receive and serve Oil Tankers:

All oil tankers arriving at Aqaba Oil Terminal should comply and perform with the international convention 1973 and 1978 (MARPOL) marine pollution protocol and with OCIMF/ICS for ship to ship transfer guide (petroleum) for the safety and preventing pollution at Aqaba Gulf, hereby:

1. Oil tankers are requested to have segregated ballast, only such capacity which will allow them to operate safely on ballast conditions and on manoeuvring purposes are accepted. No other ballast except the segregated will be, for any reason, discharged at sea - while there are no reception facilities available at Aqaba Oil Terminal.
2. Oil tankers will be allowed to come alongside the storage vessel only if fully inerted. They will be rejected if oxygen percentage is more than 8% and the inerted condition will be maintained throughout mooring and loading/discharging operations.
3. Oil tankers must have the cargo tanks dry, clean and suitable to receive cargo on arrival avoiding any kind of contamination.
4. The crude oil must be loaded by tankers of approximately 200,000 d.w.t. as per contract with Ports Corporation.
5. Tankers age should not be more than 10 years.
6. Oil tankers will be inspected by Ports Authority on arrival coming alongside the storage vessel and they will be rejected if not complying with the requirements mentioned here above.

Also see "Berthing".

DENSITY: Average density in the port is 1031.

FRESH WATER: Fresh water may be supplied to ships and water may be supplied alongside any of the berths with the exception of the floating berth which has no water available.

FUEL: Bunker fuel is available in Aqaba.

CONSULS: All Consulates are in Amman, the capital, except for Hon. Danish Consulate, (Vice-Consul), at Kawar Building and Egyptian Consulate (Western Housing Area).

REPAIRS: Only minor repairs may be carried out above the waterline. Divers may be obtained and a private firm carries out repairs to Navigational Aids including radar, gyro compass, echo sounder, wireless equipment, etc.

DRY DOCKS: Slipway for maintaining port equipment.

SURVEYORS: Germanischer Lloyd, NKK, Bureau Veritas and Lloyd's Register are available.

GANGWAY/DECK WATCHMEN: Customs provide a guard who has to be given full board and lodging. Ships are also supplied with local watchmen through Agents.

OPENING/CLOSING HATCHES: Normally handled by stevedores while alongside or by ships' crew before arrival.

CUSTOMS ALLOWANCES: 20 packets of cigarettes and 1 bottle of liquor for each crew member. Ships' store is locked and sealed by Customs while in port.

AIRPORT: Aqaba Airport links Aqaba with Amman International Airport 355 km. away. One flight daily except for Thursday and Saturday when 2 flights are scheduled for each.

TIME: GMT plus 2 hours.

HOLIDAYS: May Day (May 1st); Independence and Army Day (May 25th); Arab Reconaissance Day (July 4th); Crowning of King Hussein (August 11th); King Hussein's Birthday (November 14th).

The following dates change from year to year as they are reckoned in accordance with the lunar calendar consisting of 354 days.

1986: Eid El Maraj (April 7th); Eid El Fitr (June 8th); Eid El Adha (August 16th); New Year Hijriya (September 5th); Prophet's Birthday (November 15th).

NOTICE:

The Hashemite Kingdom of Jordan Port Corporation - Aqaba
No. 7/3/9492
Date: 4/10/1986

Circular No. 26 for 1986 (with amendment 8/3/1987)
to all Ship Agents

Further to my Circular No. 3 for the year 1985, and effective immediately it is forbidden to accept any vessel calling at Aqaba Port for discharge at berth if she is exceeding the length and draft hereunder.

All Lines represented by you should comply with these instructions.

Berth	*Draft allowed* (m.)	*Length of Vessel* (m.)
No. 1	10.8	200
No. 2	10	180
No. 3, 4	12.5	180
No. 5	10.5	180
No. 6	10	180
No. 7	8	150
No. 8, 9	5.8	110
Old Phosphate – A	11	—
New Phosphate – B	15	220
Mou'ta	15	150
Joint Berth	12	250
Ro/Ro	10	180
Containers	14	230
Yarmouk	10	150
Wood	7	120
Orient Fertiliser Berth	11	190
Western Fertiliser Berth	15	230

Fertiliser Berth No. 2 and Ro/Ro Berth (9 m.): Ro/Ro vessels should have a ramp with at least 35 m. length, and with a minimum distance of 25 m. from the berth.

Signed:
General Manager,
Ports Corporation.

GENERAL: *Weather:* Masters are warned that during the Winter months strong Southerly gales can develop within 2 hours followed by swell. In such a case it may be necessary for small vessels to unberth and proceed to sea, and also for vessels in the anchorage to weigh anchor and proceed to sea and remain at sea until the weather moderates.

Range of Tide: The range of tide is 1.2 m. at Spring tides.

Firefighting: The port has its own fire brigade, which includes 5 water and foam engines; 1 dry powder engine; 1 ladder engine; 3 water and rescue engine and 2 manual high capacity pumps, plus a variety of equipment such as breathing apparatus, etc.

The town of Aqaba has a highly efficient and well equipped fire brigade and it is 4 km. away from the port.

Aqaba Airport 11 km. away also has a fire brigade and assistance may be called for from any of these whenever needed.

Waste Matter and Pollution: No rubbish may be thrown overboard either at the anchorage or alongside the quays. A barge calls regularly at all anchorages to collect garbage. No vessel which has carried livestock may clean its holds while in port. No vessel may pump overboard any silage, fuel or water ballast liable to contaminate the port. This regulation refers particularly to substances mixed with oil.

Ships' Masters are warned that contravention of the above rule renders them liable to penalties of up to JD. 10,000 per ship.

DEVELOPMENTS: *Development Projects:*

1. Erection of a new Ro/Ro passenger terminal.
2. Erection of a berth to serve the Ro/Ro passenger terminal.
3. Developing Port's communication system and the coastal station.
4. Project of prevention of pollution and firefighting.
5. Purchase of 2 tug boats and cargo handling equipment.
6. Computerisation is under consideration.

SHIPMASTER'S REPORT: July 1992.

Pilot is available throughout 24 hours to take vessel to anchorage or berth.

There are 8 designated anchorage spots. Any other vessels have to drift, if not berthing.

Health officials and Agent board whilst vessel is drifting.

Vessel's cargo was 13,000 tons of bagged sugar.

AUTHORITY: The Ports Corporation – Aqaba, P.O.Box 115, Aqaba, Jordan. *Tel:* 314024/8. *Telex:* 62262, 62352 Port Jo, 62235 Radio Jo. *FAX:* 316204. *Cables:* Port, Aqaba. *Contact:* Eid Al-Fayez, Director General.

Plan "B" for tankers over 100,000 DWT & LOA to 300 m.

HASTINGS

MOORING DIAGRAM FOR VESSELS AT LONG ISLAND POINT

Oil tankers over 100,000 DWT and departure drafts exceeding 13 metres normally berth starboard-side-to (head out). Usual mooring plan for ships lines each end is:- 2 springs: 4 head-stern lines: 2 breast lines. In addition, all ships must take onboard each end 2 preventer wires (36 mm.). These shore wires have a rope and wire messenger attached and are run by launch. Ship must heave onboard and made tight to bitts. When letting go the shore wires are lowered down to launch, aft shore wires first, which are run back by launch to mooring dolphin. Launch then goes to for'd shore wires and runs them.

PREFERRED MOORING PLAN SEQUENCE (2 Launches and 7 Linesmen)

FIRST: Set both springs for'd and aft and position ship on berth.
SECOND: Run head and stern lines to shore.
THIRD: Run breast lines to shore.
FOURTH: Run shore wires to ship. Heave tight onboard and make fast.

WHILST ALONGSIDE VESSELS MUST HAVE READY
Offshore anchor lowered to water.
Offshore ladder rigged and lowered.
Offshore lifeboat at embarkation deck.
Emergency wires rigged and adjusted.

ALL MOORING LINES KEPT TIGHT WITH EVEN STRAIN AND WINCH BRAKES FULLY APPLIED.

PREFERRED LET GO SEQUENCE (1 Launch and 6 Linesmen) WHEN ENGINE TEST COMPLETED

FIRST: Slack off AFT shore wires and lower to launch, which will tow to dolphin where winched in.
SECOND: Slack off FOR'D shore wires and lower to launch, which will tow to dolphin where winched in.
THIRD: Single up to Pilot's orders Fore and Aft.
FOURTH: Let go to Pilot's orders.

Wharf Edge
Depth of water 11.6m.(38ft.)

NOTES:

1. Ship must not present itself for loading with hatch coamings more than 17.4m.(57ft.) above I.S.L.W. and this height must not be exceeded during loading.
2. Working range of boom is horizontal to 11 degrees below horizontal.
3. Maximum throw of trimming machine is 18.3m.(60ft.)
4. Travel range between two loading heads along wharf is 149.4m. (490ft.) and the wharf length is 215m.(704ft.)
5. Depth of water at berth and approaches is 11.4m.
6. Minimum size hatch opening (without prior arrangement) with trimmer is 4.9m. × 4.9m.(16ft. × 16ft.).
7. Maximum length of vessel—dependent on shipping conditions—to be arranged with Harbour Master.
8. All dimensions in metres.
9. This drawing is not to scale.

MOORING ARRANGEMENT

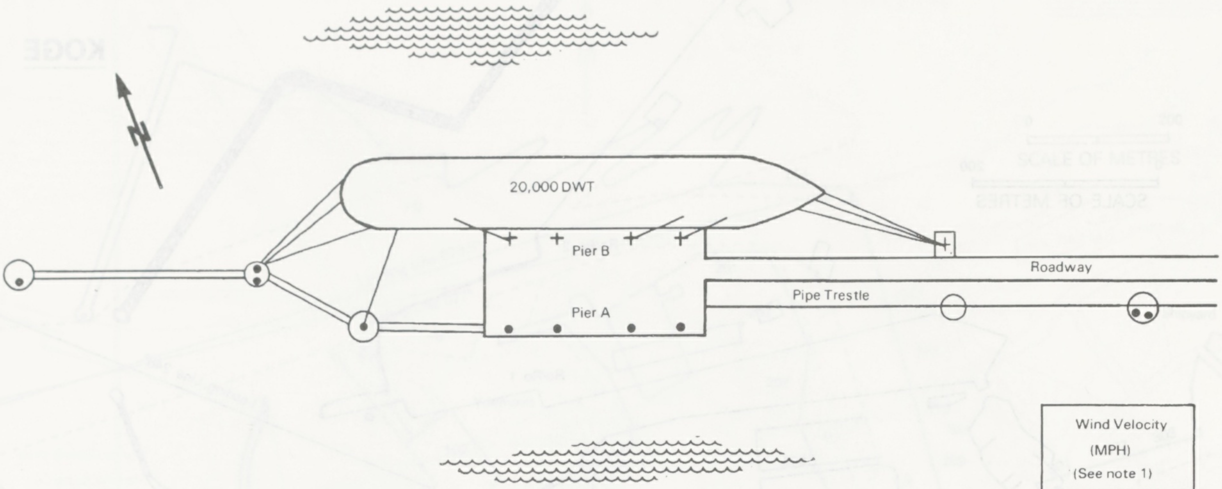
STATOIL A/S — PIER B



NOTES:
1. All wind velocities given are fastest mile velocities.
2. Wind is assumed to come from any direction.
3. Recommended mooring arrangements are for all size ships.

	Wind Velocity (MPH) (See note 1)	
	Light Vessel	Loaded Vessel
Maximum Capacity	50–55	70–75
Recommended Operation Limit	40–45	55–60

LPG VESSEL BERTHING – PIER 'C'

Berthing arrangement for LPG vessels under normal weather and wind conditions:

Due to the LPG arm's limited work area, it is important that the vessel is very careful during berthing, and during the whole time it is at the berth, that lines be checked and adjusted as required. Should the vessel move along the quay, and the manifold area comes outside the work area of the LPG arm, an alarm of the rapid acting type is activated. Loading/discharge operations are stopped immediately, and the vessel is moved back to the original position.

Article 94:

(A). Signals displayed on station signal masts to vessels

Signal No.

1. Stand by to proceed (general)
2. Proceed (general)
3. Stand by to make fast (signal mast 18)
4. Make Fast (signal mast 18)
5. Attention
6. Immediate Stopping
7. Make fast (vessels from North)
8. Make fast (vessels from South)
9. Proceed (vessels from North)
10. Proceed (vessels from South)
11. Current signal
12. Port closed
13. W/T Watch (vessels from North)
14. W/T Watch (vessels from South)
15. Passage authorization (Ferry Boats)
16. Isolated signal station

(B). Special signals used by vessels in Ports and in the Canal

Signal No.

1. Vessels carrying bulk petroleum, flash point between 73° and 150°
2. Vessels carrying explosives - vessels N.G.F.
3. Vessels carrying bulk petroleum flash point under 73°
4. Vessels carrying radioactive substances
5. I require a pilot
6. I require Free Pratique
7. Coming from an infected port
8. Under Quarantine
9. Tug required (in ports)
10. Mooring boats
11. Searchlight
12. Last in convoy
13. Making fast

13-bis. Doubling in G.B.L.

14. Vessel manoeuvering to Sea
15. Vessel manoeuvering to Canal
16. Voluntary stopping (G. V.)
17. Aground
18. I have a pilot
    (a). On Board
    (b). To Disembark
19. My vessel is isolated, I have no means of communication

(C). Signals used by Dredgers

(1) Dredgers Working Underway

Signal No

1. Dredgers underway
2. Passage clear on side shown
3. Passage clear on both sides
4. Passing not allowed on either side
5. I am going about
6. I am not under command

(2) Stationary dredgers and floating equipment

Signal No

1. Passage clear on side shown
2. Passage clear on both sides
3. Passage clear on side shown, with speed reductions
4. Passing not allowed on either side
5. Passing not allowed : manoeuvring to clear passage
6. I am not under command - passing not allowed

Appendix

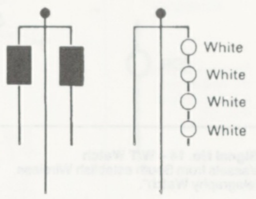
(A) Signals displayed on Station Signal Masts to Vessels

Signal No. 1 – Stand by to Proceed
(a) Hoisted on Port Tewfik, Kabrit, Deversoir and Ras El Ech "Stand by to Proceed on signal No. 2".

(b) Hoisted on Ballah and repeated on El Ferdan. "Southbound vessels made fast in Ballah West Branch, Stand by to Proceed".

(c) Hoisted on Ballah and repeated on El Kantara. "Northbound vessels made fast in Ballah West Branch, Stand by to Proceed".

(d) Hoisted on Km. 3 East Branch of Port Said. "Southbound Vessels using Port Said East Branch, Stand by to Proceed".



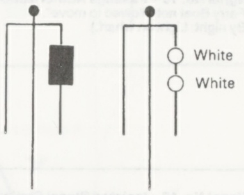
Signal No. 2 – Proceed
(a) Hoisted on Port Tewfik, Kabrit, Deversoir and Ras El Ech "Proceed".

(b) Hoisted on Ballah and repeated on El Ferdan. "Southbound vessels made fast in Ballah West Branch, Proceed".

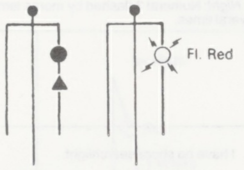
(c) Hoisted on Ballah and repeated on El Kantara. "Northbound vessels made fast in Ballah West Branch, Proceed".

(d) Hoisted on Km. 3 East Branch. "Southbound vessels using Port Said East Branch, Proceed".

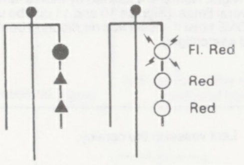
(e) Absence of Signal No. 2: "Stay at anchor or made fast and keep continuous W/T watch".



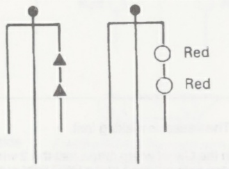
Signal No. 3 – Stand by to Make Fast
Hoisted at Km. 18 mast. "Southbound vessels made fast in West Branch Km. 4 to 14 and Northbound vessels already passed Tineh station, Stand by to make fast".



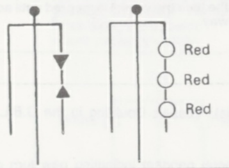
Signal No. 4 – Make Fast
Hoisted at Km. 18 mast. "Southbound vessels in Port Said East or West By-pass and Northbound vessels already passed Tineh station, Make Fast".



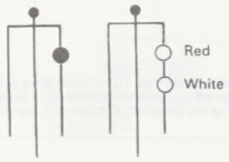
Signal No. 5 – "Attention"
"Southbound and Northbound vessels stand by to make fast or manoeuvre. Keep W/T watch immediately".



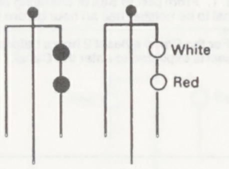
Signal No. 6 – Immediate Stopping
"Southbound and Northbound vessels make fast immediately".
Vessels may proceed when signal is lowered or switched off.



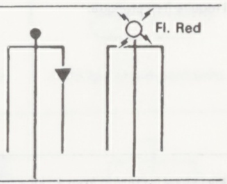
Signal No. 7 – Make Fast
"Vessels from North : Make Fast".
(to be lowered or switched off when all concerned vessels are made fast.)



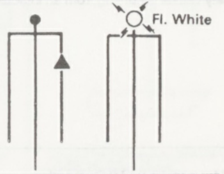
Signal No. 8 – Make Fast
"Vessels from South : Make Fast".
(to be lowered or switched off when all concerned vessels are made fast.)



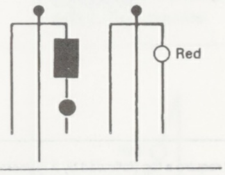
Signal No. 9 – Proceed
"Vessels from North made fast on Signal No. 7 : Proceed".
(Southbound vessels made fast in Port Said West Branch and in Ballah West Branch to Proceed on Signal No. 2.)



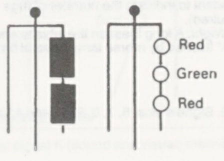
Signal No. 10 – Proceed
"Vessels from South made fast on Signal No. 8: Proceed".
(Northbound vessels made fast in Ballah West Branch to Proceed on Signal No.2.)



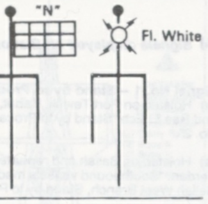
Signal No. 11 – Current Signal
Current indication signal.
Hoisted on Challoufa and Genefa signal masts: "Current Running North"
Absence of signal: "Current is Running South or Slack Water."



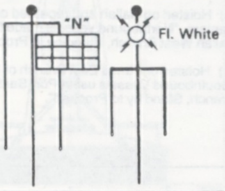
Signal No. 12 – "Port Closed"
"Suez Roads closed for bad weather".



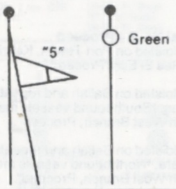
***Signal No. 13 – W/T Watch**
"Vessels from North establish Wireless Telegraphy Watch".



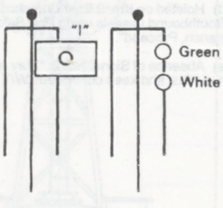
***Signal No. 14 – W/T Watch**
"Vessels from South establish Wireless Telegraphy Watch".



Signal No. 15 – Passage Authorisation
"Ferry Boat not allowed to move".
(By night: Light on wharf.)



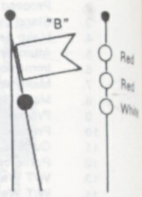
Signal No. 16 – Isolated Signal Station
"This signal station is isolated. All communications are made by Wireless Telegraphy".



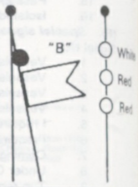
*Signals No. 13 and 14 can be used at the same time addressing both convoys from North and South.

(B) *Special Signals Used by Vessels in Ports and in the Canal*

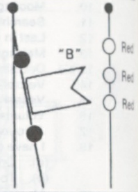
1. Oil tanker carrying bulk petroleum (flash point between 73° and 150°F).



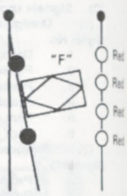
2. Vessels carrying 1st group dangerous goods.
Not Gas Free tankers.
LPG – LNG.
Dangerous chemicals in bulk.



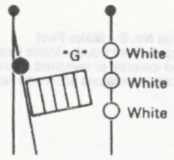
3. Petroleum in bulk. (Flash point below 73°F).



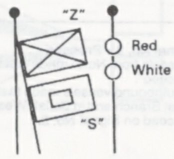
4. Vessels carrying Radio Active substances.



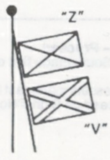
5. I require a Pilot.
N.B. 1. From port to Sea or changing berth, signal to be hoisted half an hour before sailing time.
2. For the Canal at least 2 hours before the 1st Vessel is expected to enter the Canal.



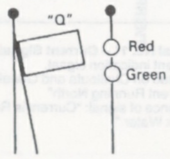
6. I require free pratique.



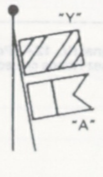
7. My vessel is coming from an infected port.



8. My vessel is under Quarantine.



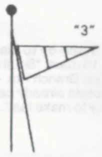
9. I require a tug (followed by a numeral pendant to indicate the number of tugs required).
By Night: A long blast on the whistle and letters "YA" flashed by morse lamp several times.



N.B. Signals Nos. 6, 7, 8, 9, 10 and 11 are to be used in Ports only.

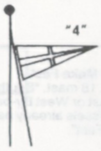
10. I have no mooring boats

By Night: Numeral 3 flashed by morse lamp several times.

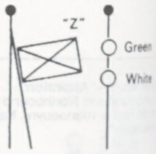


11. I have no shore searchlight.

By Night: Numeral 4 flashed by morse lamp several times. (Signals 10 and 11 can be used in ONE hoist if vessel has no mooring boats and searchlight).

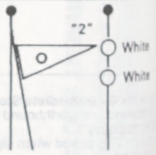


12. Last vessel in the convoy.



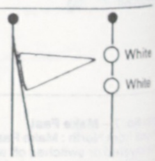
*13. The vessel is making fast.

N.B. In the Canal when made fast the 2 white lights are extinguished and a RED light put on aft all the time the vessel is moored until actually underway.



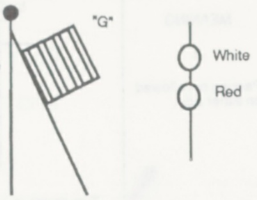
13(bis). Vessels Doubling in the G.B.L.

(Numeral pendant indicating new turn of Vessel)

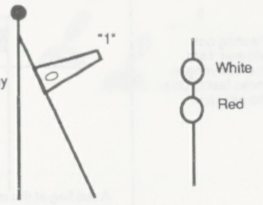


* When signals Nos. 13, 14 and 15 are hoisted, vessels are not authorised to overtake or cross until vessel is securely made fast and Signal No. 16 (G.V.) hoisted.
N.B. Signals Nos. 6, 7, 9, 10 and 11 are to be used in Ports only.

14. The vessel is manoeuvring to get underway to Sea(*).



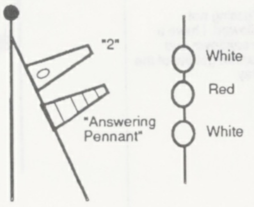
15. The vessel is manoeuvring to get underway to the canal



16. Voluntary Stopping (G.V.) "Garage Volontaire".

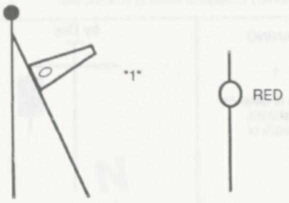
Vessel is not ready and will not maintain her turn in the convoy.

If hoisted by a vessel in the canal :
" I am securely made fast and can be crossed or doubled by other vessels in the convoy".

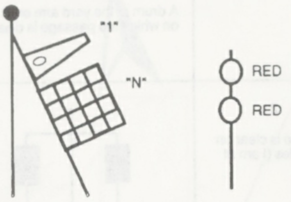


17. Aground

"Passage clear for tugs".

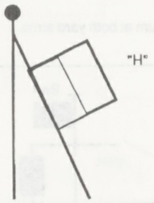


"Passage not clear for tugs".

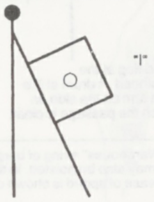


18. a) I have a pilot on board

b) Leaving Port Said & Port Suez
I Have a pilot to disembark.



19. My vessel is isolated .
I have no means of communication.



---

* When signals Nos 13, 14 and 15 are hoisted, vessels are not authorised to overtake or cross until vessel is securely made fast and signal no 16(G.V.) hoisted

(C) ***Signals used by dredgers in Canal Waters***

(1) Dredgers working underway

MEANING	by Day	by Night
1 I am dredging underway and cannot get out of the way.	 International Signal	 *N.B.:* In lieu of the white masthead light.
2 Passage is clear on the side shown	 A drum at the yard arm on the side on which the passage is clear.	 A white light at the yard arm on which the passage is clear. A red light at the yard arm on which the passage is not clear. Two white lights along the bulwark where passage is clear.
3 Passage is clear on both sides.	 A drum at both yard arms.	 A white light at both yard arms and two white lights along the bulwark on both sides.

(1) Dredgers working underway – *continued*

MEANING	by Day	by Night
4 Passing not allowed on either side.	 Two drums one over the other at the yard arm.	 A red light at both yard arms.
5 I am going about.	 Flag D hoisted at the yard arm on the side to which she is turning.	 A red light shown at the yard arm on the side to which she is turning. Signal IP by morse lamp.
*6 I am not under command.		 International Signal

*This signal may be hoisted together with the International signal K (sound and visual) meaning: "STOP IMMEDIATELY"

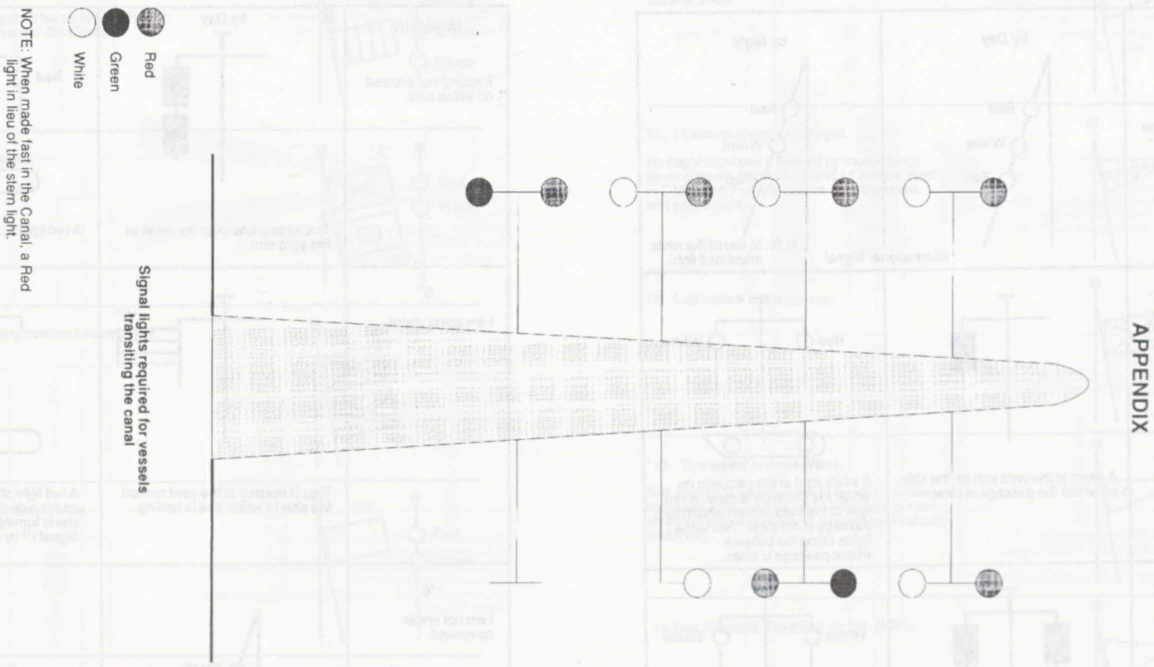
(2) Stationary dredgers, floating cranes, etc.

MEANING	by Day	by Night
1 Passage is clear on the side shown. (I am at work or moored).	 A drum at the yard arm on the side on which the passage is clear.	 A white light at the yard arm on the side on which the passage is clear. Two white lights along the bulwark on the side on which the passage is clear.
2 Passage is clear on both sides (I am at work).	 A drum at both yard arms.	 A white light at both yard arms. Two white lights along the bulwark on both sides.
3 Passage is clear on the side shown but only proceed at the lowest possible speed.	 A red flag at the masthead. A drum at the yard arm on the side on which the passage is clear.	 A white light over a green light on the side on which the passage is clear. Two white lights along the bulwark on the side on which the passage is clear.

*This signal is also used by "Warehouse" string of barges.
†The International Signal TE may also be hoisted. In this case the decrease of speed is imperative. By night the imperative decrease of speed is shown on the Pilot's embarkation order.

(2) Stationary dredgers, floating cranes, etc. – *continued*

MEANING	by Day	by Night
4 Passing not allowed on either side.	 Two drums one over the other at the yard arm.	 A red light at both yard arms.
5 Passing not allowed: I am manoeuvring to make fast to clear the passage.	 A red flag at the masthead and two drums one over the other at the yard arm.	 A red light at the masthead. A re light at both yard arms.
*6 Passing not allowed. I have a breakdown and cannot get out of the way.	 International Signal	
*This signal may be hoisted together with the International Signal "K" (sound and visual): "STOP IMMEDIATELY".



Signal lights required for vessels transiting the canal

NOTE: When made fast in the Canal, a Red light in lieu of the stern light.

ESSENTIAL FACTS FOR INCOMING TANKERS

1. Only clean ballast to be discharged overboard. There are no reception facilities for dirty ballast
2. The storage vessel is The'Bon Bateau' (Call Sign ELCT). Marisat number is 1241411. ETA's required 72/48/24 hours before arrival.
3. Anchorage area is recommended location for vessels awaiting berth.
4. Tankers to have ready:
   a. Windlasses, anchors, winches on forecastle, 3 inch messenger.
   b. on starboard side lifting gear capable of lifting a weight of 10 metric tons.
   c. on port side pilot ladder/accommodation ladder.
   d. reducer to 16 inches for tanker rail hose.
5. Tanker crew will perform all operations aboard the tanker under the mooring master's guidance.
6. Emergency Signal: Rapid & continuous blasts of the ship's whistle.

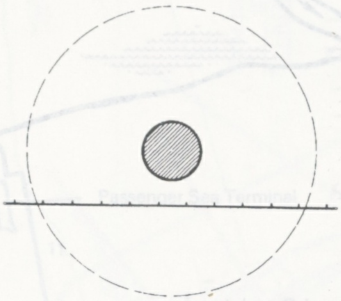
GERMANY (GENERAL)
ELBE HELICOPTER PILOTAGE (1)

WINCHING AREA



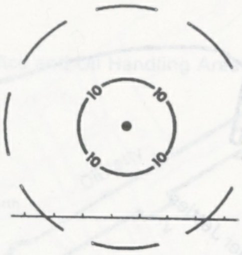
1. CLEAR ZONE	DIAMETER 4,60 M
Full painted circle spot (white or yellow, non-skid)	
2. MANOEUVRING ZONE	DIAMETER 30,50 M
NO OBSTRUCTION HIGHER THAN	3,00 M

Man. zone circle line need not to be marked

Man. zone may extend over the ship's side.

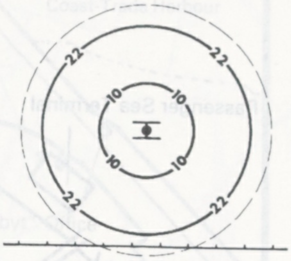
If obstruction higher than 03,00 m, helicopter will hover approx. 03,05 m (10 ft) above the highest obstacle within man. zone.

RESTRICTED LANDING AREA



1. CENTER CIRCLE SPOT	DIAMETER 0,50 M
Full painted white or yellow	
2. AIMING CIRCLE	DIAMETER 10,00 M
NO OBSTRUCTION HIGHER THAN	0,10 M
Circle line painted white or yellow, width Circle diameter to be marked (10) Non-skid surface	0,20 M
3. MANOEUVRING ZONE	DIAMETER 25,50 M
NO OBSTRUCTION HIGHER THAN	1,25 M
Man. zone to be marked with broken circle line, width Man. zone may extend over the ship's side	0,20 M

FULL LANDING AREA



1. CENTER CIRCLE SPOT	DIAMETER 0,50 M
Full painted white or yellow. "H" symbol may be painted, dimensions see ICS Guide. "H" symbol may only be marked in FULL LANDING AREA	
2. AIMING CIRCLE	DIAMETER 10,00 M
NO OBSTRUCTION HIGHER THAN	0,10 M
Circle line painted white or yellow, width Circle diameter to be marked (10) Non-skid surface	0,20 M
3. CLEAR ZONE	DIAMETER 22,00 M
NO OBSTRUCTION HIGHER THAN	0,25 M
Circle line painted white or yellow, width Circle diameter to be marked (22)	0,20 M
4. MANOEUVRING ZONE	DIAMETER 27,50 M
NO OBSTRUCTION HIGHER THAN	1,25 M
Man. zone circle line need not to be marked Man. zone may extend over the ship's side	

GERMANY (GENERAL)
ELBE HELICOPTER PILOTAGE (2)

SAFETY CHECK LIST

For use with ICS Guide to Helicopter/Ship Operations

To be checked by the officer in charge. ☐

1. **GENERAL**

(a) Have all loose objects within and adjacent to the operating area been secured or removed? ☐
(b) Have all aerials, standing or running gear above, and in the vicinity of, the operating area been lowered or secured? ☐
(c) Has the officer of the watch been consulted about the ship's readiness? ☐
(d) Are the fire pumps running and is there adequate pressure on deck? ☐
(e) Are fire hoses ready, (hoses should be near to, but clear of the operating area)? ☐
(f) Are foam hoses, monitors and portable foam equipment ready? ☐
(g) Are foam equipment operators, of whom at least two are wearing the prescribed firemen's outfits, standing by? ☐
(h) Are the foam nozzles pointing away from the helicopter? ☐
(i) Has a rescue party, of whom at least two are wearing firemen's outfits, been detailed? ☐
(j) Is a man overboard rescue boat ready for immediate lowering? ☐
(k) Are the following items of equipment to hand?
  (i) Portable fire extinguishers? ☐
  (ii) Large axe? ☐
  (iii) Crow bar? ☐
  (iv) Wire cutters? ☐
  (v) Red emergency signal/torch? ☐
  (vi) Marshalling batons (at night)? ☐
(l) Has the correct lighting, (including special navigation lights), been switched on prior to night operations? ☐
(m) Is the deck party ready, and are all passengers clear of the operating area? ☐
(n) Have hook handlers been equipped with helmets, strong rubber or suitable gloves and rubber soled shoes to avoid the danger of static discharge? ☐

2. **LANDING ON**

(a) Is the deck party aware that a landing is to be made? ☐
(b) Is the operating area free of heavy spray or seas on deck? ☐
(c) Have side rails and, where necessary, awnings, stanchions and derricks been lowered or removed? ☐
(d) Where applicable, have portable pipes been removed and have the remaining apex ends been blanked off? ☐
(e) Are rope messengers to hand for securing the helicopter, if necessary? (Note: only the helicopter pilot may decide whether or not to secure the helicopter). ☐

3. **TANKERS: Additional Items for Check List**

(a) Gas control, ships not fitted with an Inert Gas System: has pressure been released from tanks within thirty (30) minutes of commencement of helicopter operations? ☐
(b) Gas control, ships fitted with an Inert Gas System: has pressure in cargo tanks reduced to slight positive pressure? ☐
(c) All tankers: have all tank openings been secured following venting operations? ☐

4. **BULK AND COMBINATION CARRIERS: Additional Items for Check List**

(a) Has surface ventilation to dry bulk cargoes ceased, and have all hatch openings been fully battened down prior to helicopter operations? ☐

5. **GAS CARRIERS: Additional Items for Check List**

(a) Have all precautions been taken to prevent gas emission on deck? ☐

Radio Communication

The helicopter will contact the vessel on VHF-FM channel 16 and will request the ship to change to channel 9 or 70.
The vessel shall advise the helicopter pilot of its position, heading, speed and the actual wind direction and speed over the deck.

Bearing Transmissions

After radio contact is established, until the helicopter is over the ship, it is essential that the vessel transmit direction finding signals on 410 kcs. On request of the helicopter pilot an uninterrupted (locked key) transmission should be given.

Wind Conditions Limiting Helicopter Operations

For most purposes the best relative wind is between 35° abaft the beam and ahead with speeds normally from 10 - 50 knots. However, certain sea conditions may make it necessary to obtain a relative wind which is between 35° abaft the beam and dead astern.

Sea and Swell

If possible the master should ensure that spray, roll and pitch are kept to a minimum by selecting a suitable course and speed. This is particularly important in preventing sea and spray from entering the helicopter's engine. The helicopter pilot should be informed of any likelihood of seas or heavy spray on deck.

When personnel are being winched to or from smaller ships the helicopter pilot may request the ship to head into the sea to reduce rolling.

GOVERNMENT MOORINGS

No vessel shall take up any buoy without previous application to the Marine Department. Details of the buoy dues, booking procedures, and the use of Government mooring buoys during typhoon are available from the Port Formalities and Dangerous Goods Office, room 318, Harbour Building, 38 Pier Road, Hong Kong, Tel. : 852 3086. All ships are to secure to Government Buoys by their chain cable. Slip wire should remain slack at all times. Any damage done to Government Moorings will render the ship using the same liable for such damage.

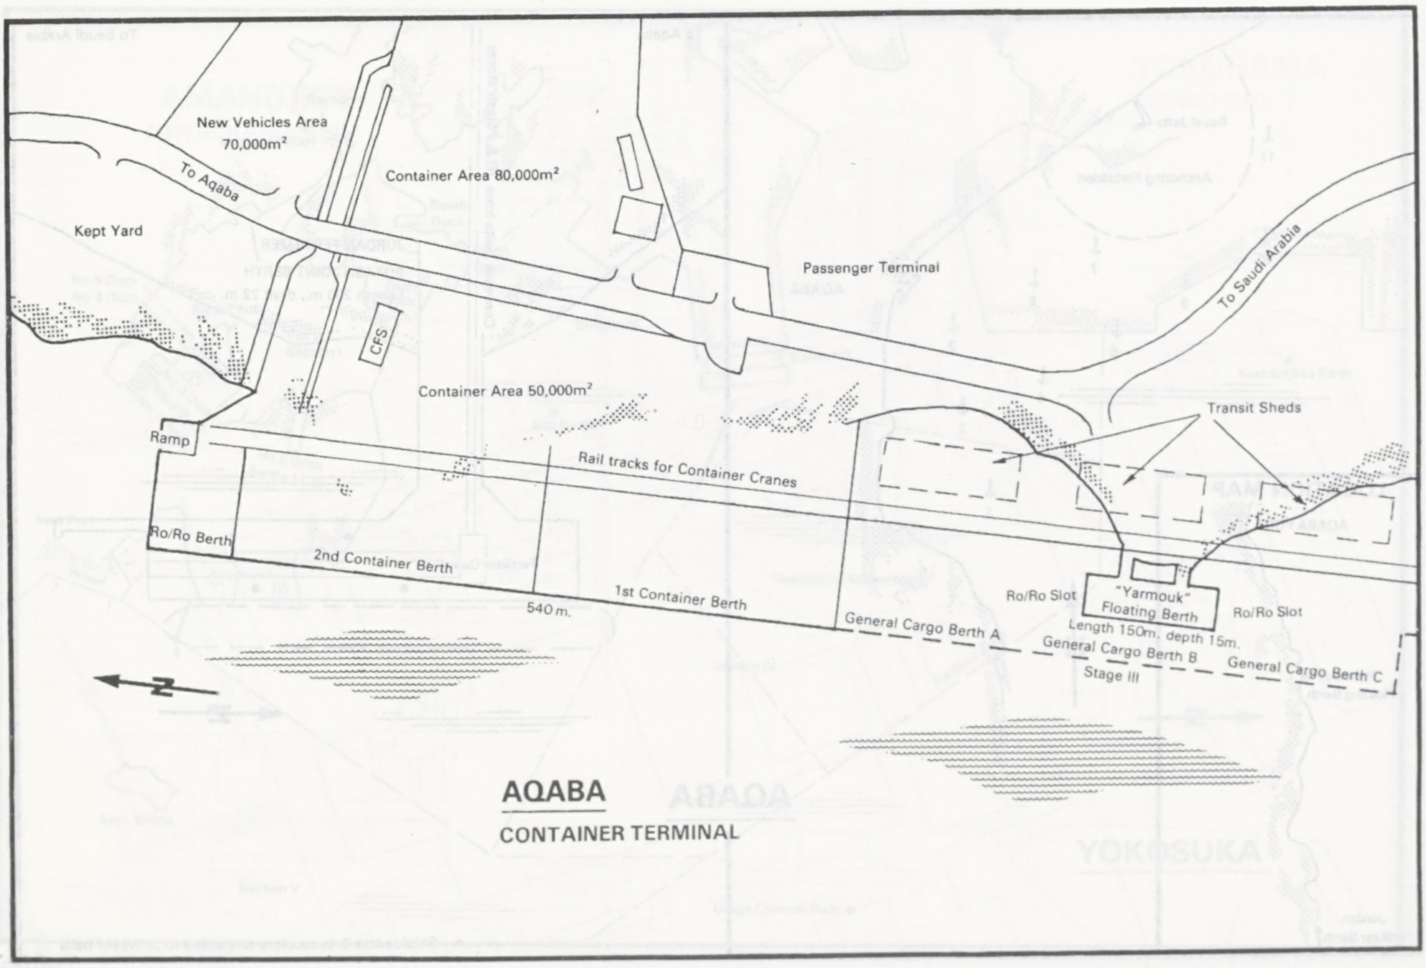
Bulk Export Berth C (Future expansion)

AQABA

CARGO AND PHOSPHATE TERMINALS



New Vehicles Area 70,000m²
To Aqaba
Container Area 80,000m²
Kept Yard
Passenger Terminal
To Saudi Arabia
CFS
Container Area 50,000m²
Transit Sheds
Ramp
Rail tracks for Container Cranes
Ro/Ro Berth
2nd Container Berth
540 m.
1st Container Berth
General Cargo Berth A
Ro/Ro Slot
"Yarmouk" Floating Berth
Length 150m. depth 15m.
Ro/Ro Slot
General Cargo Berth B
Stage III
General Cargo Berth C
